# Introduction

**Standards**

*Excellence through measurement*

# Global quality management solutions for the laboratory

## **LGC Standards provides products and services to improve measurement and quality control within your laboratory:**

- Reference materials for a wide range of sectors including food, environmental, pharmaceutical, clinical and industrial
- Biological standards and reagents
- Production of pharmaceutical impurities
- High purity solvents
- Proficiency testing schemes
- Analytical quality training courses.

## **Why choose LGC Standards?**

- **Widest range of reference materials from a single source**  
giving laboratories access to over 100,000 products, from over 90 suppliers worldwide
- **Access to 30 proficiency testing schemes**  
offering rapid turnaround of results and expert advice
- **Expert technical support**  
on product usage and selecting the appropriate material for your needs
- **Network of international offices**  
offering customer service in your local language and time zone
- **Access to knowledge**  
on import requirements, licensing, shipping regulations and controlled substances management.

Unlabelled PCB standards	599
U.S. EPA Method 1668A/B standard mixtures	608
EN-1948-4 PCB standards	610
Japanese Industrial Standard (JIS) Methods K0311 and K0312 standard mixtures	612
WHO PCB mixtures	616
Dioxin-like PCB RH12 standard mixtures	622
WHO "Non-Dioxin-like" marker PCB standard mixtures	623
Rapid PCB screening standard mixtures	623
Mono-deca plus predominant PCB standard mixtures	624
CDC PCB Standard Mixtures	627
Isotope labelled PCB standard mixtures	628
Unlabelled PCB standard mixtures	630
PCB window defining mixture	635
Isotope labelled mixed bromo/chlorobiphenyl standards	635
Unlabelled mixed bromo/chloro PCB standards	635
Mixed bromo/chlorobiphenyl standard mixtures	635
Hydroxy-PCBs	636
Methoxy-PCBs	636
Unlabelled methyl sulfone PCB standards	636

<b>Brominated flame retardant standards</b>	<b>637</b>
Isotope labelled brominated diphenyl ether (BDE) standards	637
Unlabelled brominated diphenyl ether (BDE) standards	638
Isotope labelled polybrominated biphenyl (PBB) standards	639
Unlabelled polybrominated biphenyl (PBB) standards	639
BDE technical mixtures	639
Tetrabromobisphenol A (TBBPA) and hexabromocyclododecane (HBCD) standards	639
Other flame retardant standards	639
Hydroxy-BDEs	640
Methoxy-BDEs	640
U.S. EPA Method 1614 standard mixtures	640
<b>RoHS standards</b>	<b>642</b>
<b>Polycyclic aromatic hydrocarbons (PAH)</b>	<b>649</b>
Carbon-13 labelled polycyclic aromatic hydrocarbons (PAH) standards	649
Deuterated polycyclic aromatic hydrocarbon (PAH) standards	650
Unlabelled polycyclic aromatic hydrocarbon (PAH) standards	651
Isotope labelled PAH standard mixtures	652
<b>Polychlorinated naphthalene (PCN) standards</b>	<b>653</b>
Isotope labelled polychlorinated naphthalene (PCN) standards	653
Unlabelled polychlorinated naphthalene (PCN) standards	653
Polychlorinated naphthalene (PCN) standard mixtures	654
Halowax technical mixtures	654
<b>Substituted benzothiophenes</b>	<b>654</b>
<b>Priority pollutant standard mixtures</b>	<b>655</b>
Isotope labelled chlorobenzene & chlorophenol mixtures	655
U.S. EPA Method 1653A standard mixtures	656
U.S. EPA Method 1653 standard mixtures	656
U.S. EPA CLP DMC standard mixtures	657
U.S. EPA Methods 1624/1625 standard mixtures	658
<b>Priority pollutants, endocrine disruptor and chemical contaminant standards</b>	<b>660</b>
Personal care product (PPCP) standards	661
Sex and steroidal hormone standards	661
Prescription and non-prescription drug standards	662
Veterinary and human antibiotic standards	663
Food and drinking water analysis standards	663
Phthalate & phthalate metabolite standards	664
Nonylphenol and nonylphenol metabolites	665
Perfluorinated compounds	666
Nitrosamine standards	666
Tobacco metabolite and flavoring standards	666
Halogenated and substituted benzene and phenol standards	667
Endocrine disrupting compounds and xenoestrogen standards	668
Isotope labelled chlorinated diphenyl ether standards	671
Unlabelled chlorinated diphenyl ether standards	671
Other industrial chemicals	671
Explosive standards	672
Individual n-alkane standards	672
Priority pollutant standards	673
<b>Pesticide and chemical weapon standards</b>	<b>682</b>
Individual chlorinated cyclodiene pesticide standards	682
Organochlorine (OC) pesticide and metabolite standards	683
Organophosphorous pesticide metabolites	685
Carbamate pesticide and metabolite standards	686
Pyrethroid pesticide and metabolite standards	686
Triazine herbicide and metabolite standards	686
Camphechlor (Toxphene) congeners	687
Individual pesticide standards and pesticide metabolite standards	687
Pesticide standard mixtures	692
Chemical weapon metabolite standards	700

## ULTRAcHECK and standards for EPA methods

<b>ULTRAcHECK® blind, quality control check standards</b>	<b>705</b>
Inorganic blind QC samples for drinking water analysis	705
Organic blind QC samples for drinking water analysis	707
Inorganic blind QC samples for non-potable water analysis	710
Organic blind QC samples for non-potable water analysis	712
Blind QC samples for underground storage tanks, hydrocarbon fuels and TPH	713

## Introduction

### About LGC Standards and LGC

LGC Standards provides the widest range of reference materials from a single supplier. We work closely with the leading manufacturers to provide laboratories worldwide with improved access to reference materials, covering an increasingly large range of parameters. Our network of offices in Europe, US, UAE, China and India combined with our extensive experience in selling reference materials and our technical expertise allows LGC Standards to work in partnership with our customers to provide fast delivery together with sound technical advice as well as dealing with complex import and export regulations.

LGC Standards is part of LGC, an established leader in laboratory services, measurement standards, reference materials and proficiency testing. LGC's business is focused upon customers in: forensic science; pharmaceutical and biotechnology research, development and quality control; food chain and environmental surveillance and safety; life science, genomics, proteomics and basic research. LGC also plays a pivotal role in a number of programmes with both government and industry to improve analytical standards and laboratory performance.

LGC's Science and Technology Division acts as the designated UK National Measurement Institute (NMI) for chemical and bioanalytical measurement, and has a long history in the development and validation of analytical methods and the production of reference materials.

Many of the analytical methods, which cover the food, environment, industrial, clinical and pharmaceutical sectors, are accredited to ISO/IEC 17025 (Requirements for the competency of testing and calibration laboratories). Full details of the accreditation schedule can be found on the UKAS website [www.ukas.com](http://www.ukas.com).

LGC's Science and Technology Division is accredited to ISO Guide 34 (General requirements for the competence of reference materials producers) for the production of reference materials. The measurement capabilities used to produce certified reference materials in its capacity as the UK NMI are verified through participation in key comparison studies organised by the Consultative Committee for the Amount of Substance (CCQM) of the International Weights and Measures Organisation (BIPM). The certificates are recognised by other National Measurement Institutes, under the Mutual Recognition Arrangement.

In its role as the NMI, LGC serves on the International Organisation for Standardisation (ISO) Committee for Reference Materials (REMCO), which aims to carry out and encourage a broad international effort for the harmonization, production and application of certified reference materials (CRMs).

### This catalogue

This catalogue "Analytical reference materials and standards 2011/2012" combines products for the environmental, food and industrial sectors, and includes matrix materials, standard solutions and pure materials, and replaces the 2008 edition and subsequent newsletter updates.

#### New in this catalogue

This catalogue provides a fully updated listing of all relevant reference materials, standards and solvents. Products added since the last catalogue was issued include:

- ULTRAgold<sup>®</sup> inorganic standards produced under ISO Guide 34
- High purity inorganic compounds
- ULTRA QuECh<sup>™</sup> standards for the QuEChERS method
- Mycotoxins and ergot alkaloids
- Labelled toxaphene standards
- Isotope labelled compounds from Cambridge Isotope Laboratories (pesticides, PCBs, sex and steroidal hormone standards, veterinary and human antibiotics, priority pollutant standards, POPs)
- Standards for USP 467
- Veterinary medicine and pharmaceutical standards
- ERM<sup>®</sup> (European Reference Materials)
- Reference materials from the National Research Centre for Certified Reference Materials, China (NIM)
- Reference nanomaterials
- GMO reference materials
- Certified materials for microbiological properties
- DR CALUX<sup>®</sup> matrix reference materials
- Combustion element analyser standards
- CONOSTAN<sup>®</sup> biodiesel standards
- Glass standards
- eVol<sup>®</sup> hand-held automated analytical syringe

These products are labelled with "**New**" to help you find them easily.

#### How to find your product

Products are grouped in this catalogue by type of material, as listed in the Contents. An index of all products is included at the back of the catalogue, listed by name and catalogue number.

### Producers of reference materials

This catalogue brings together products from a wide variety of sources. There are certified reference materials from National Measurement Institutes and also reference materials and standards from many different producers. Most products are supplied with a certificate of analysis although the lay-out and format of the certificates will vary according to the producer. A list of the producers is given below.

#### LGC

LGC's Science and Technology Division, based in Teddington in the UK, is accredited to ISO Guide 34 (General requirements for the competence of reference materials producers) for the production of reference materials. LGC has a long history in the development and validation of analytical methods and the reference materials production facility at LGC complements this expertise.

The measurement capabilities used to produce certified reference materials in its capacity as the UK National Measurement Institute are verified through participation in key comparison studies organised by the Consultative Committee for the Amount of Substance (CCQM) of the International Weights and Measures Organisation (BIPM). The certificates are recognised by other National Measurement Institutes, under the Mutual Recognition Arrangement.

In its role as the NMI, LGC serves on the International Organisation for Standardisation (ISO) Committee for Reference Materials (REMCO), which aims to carry out and encourage a broad international effort for the harmonization, production and application of certified reference materials (CRMs).

#### IRMM

The Institute for Reference Materials and Measurements (IRMM) is one of the seven institutes of the Joint Research Centre (JRC), a Directorate-General of the European Commission (EC). Today IRMM is one of the world's leading reference material producers, and is accredited according to ISO Guide 34 for the production of reference materials.

BCR<sup>®</sup> and IRMM reference materials (BCR<sup>®</sup> is a registered trademark of JRC-EC-IRMM) are the products of both research funding and direct action programmes of the European Commission, in which new or improved measurement or testing methods are developed. These programmes are aimed at improving, harmonising or standardising measurements and testing in the European Union.

As an authorised distributor of BCR<sup>®</sup> reference materials LGC Standards currently holds stock of more than 6000 units of certified BCR<sup>®</sup> and IRMM reference materials under carefully controlled and monitored conditions.

#### Federal Institute for Materials Research and Testing (BAM)

The Federal Institute for Materials Research and Testing (BAM) has a long tradition in the production of Certified Reference Materials. Starting in 1912 with a "Normal Steel" for the determination of carbon, the development of new CRMs has increased continuously. One year later eight steel samples with different carbon contents were available. The development continued with the participation of regional German material research and testing institutes as well as industry (1957). In 1968 within the framework of EURONORM, the first European CRMs in the field of iron and steel were issued.

Today a large range of ferrous and non ferrous CRMs together with environmental CRMs and CRMs for engineering materials are offered.

#### European Reference Materials (ERM<sup>®</sup>)

The ERM<sup>®</sup> range of reference materials was launched in May 2004. It is the result of collaboration between three major reference material producers, LGC in the UK, the Institute for Reference Materials and Measurement (IRMM) in Belgium and Bundesanstalt für Materialforschung und Prüfung (BAM) in Germany. The partners are committed to using the most advanced principles for the production of certified reference materials. The certified values have clearly defined and stated traceability and are internationally recognized through participation of the partners in key comparisons organized by the Bureau International des Poids et Mesures (BIPM). All ERM<sup>®</sup> materials are subject to rigorous homogeneity and stability testing guaranteeing the certified values for every unit over its complete shelf life.

#### Cambridge Isotope Laboratories

Cambridge Isotope Laboratories, Inc. (CIL) is a world leader in the field of isotope separations and has the capacity to produce 120 kilograms of carbon-13 and 250 kilograms of oxygen-18 annually. For more than 20 years, CIL has specialised in the development, production, and marketing of stable (non-radioactive) isotopes and chemical compounds labelled with stable isotopes to become the world's premier producer of stable isotope labelled compounds. In the environmental field CIL offer a wide range of stable isotope labelled contaminant standards designed for use with the high accuracy Isotope Dilution Mass Spectrometry (IDMS) technique.

This catalogue includes a dedicated chapter with the full range of environmental contaminant standards from Cambridge Isotope Laboratories.

## ULTRA Scientific

ULTRA Scientific, based in the USA, is recognised as a leader in the chemical standards industry. LGC Standards works in close partnership with ULTRA to ensure that laboratory requirements for high quality environmental standards are satisfied. ULTRA's organic and inorganic calibration standards are widely used in the analysis of drinking water, waste water, soils, sediments, foods, cosmetics and other products. Through LGC Standards ULTRA is also able to provide customised standards within manageable time frames and at affordable prices.

The ULTRA Scientific manufacturing, quality control and distribution system is registered to the International ISO 9001 standard. The quality control laboratory at ULTRA Scientific is accredited to ISO Guide 17025 and ISO Guide 34. Since 2005 LGC Standards has been the exclusive distributor of ULTRA products across most of Europe.

## IPO (Institute of Industrial Organic Chemistry)

IPO is a significant research and development centre for the Polish chemical industry. They have been producing neat pesticide reference materials for more than 20 years. IPO products are individual high purity organic compounds or mixtures of definite composition, supplied with a certificate of analysis or statement of purity. The Analytical Department of IPO has implemented a Quality Management System for manufacturing of analytical standards of organic compounds. The system fulfills the requirements of PN-EN ISO 9001:2001 standard (identical with ISO 9001:2000) and was certified in 2002 by the IQNET and PCBC (Polish Centre for Testing and Certification).

LGC Standards is the official distributor of IPO standards.

## Cerilliant

Cerilliant Corporation is a leading supplier of chemical standards for environmental analysis and forensic drug testing and for providing custom chemical synthesis. They were the first to produce Carbon-13 labelled chlorinated dioxins and furans in co-operation with Cambridge Isotope Laboratories, to meet the increasing demand for isotope-labelled reference standards. From raw materials analysis to continuing shelf-life studies, Cerilliant's ISO 9001 system requires multiple checks to ensure product conformance, and is accredited to ISO Guide 34, ISO 17025 and ISO 9001.

## CONOSTAN<sup>®</sup> Oil Analysis Standards

CONOSTAN<sup>®</sup> (now a division of SCP Science) is a pioneer and global leader in the development, manufacturing, and marketing of oil analysis reference materials/standards. The pioneering innovation continues with introductions of standards for lubricant product analysis that are benchmarks for quality, accuracy, precision, and traceability. Their quality program is certified under ISO 9001:2000.

## The National Institute of Standards and Technology (NIST)

NIST produces standard reference materials (SRMs<sup>®</sup>). Based in the United States, NIST has provided reference materials to industry and commerce for nearly 100 years. NIST collaborates with companies to provide academia and industry with SRMs for expanding areas such as air and water pollution, which are international issues.

## The National Research Council of Canada (NRC)

NRC produces certified reference materials (CRMs) through a program jointly operated by the Institute for National Measurement Standards (INMS), in Ottawa, Ontario and the Institute for Marine Sciences (IMB), in Halifax, Nova Scotia. The NRC range includes a variety of inorganic and organic CRMs.

## The National Water Research Institute (NWRI)

NWRI is Canada's largest freshwater research establishment. It carries out a national program of research and development in the aquatic sciences in partnership with the Canadian and international freshwater science communities.

## National Analysis Centre for Iron and Steel (NACIS)

National Analysis Centre for Iron and Steel is a research and development centre of analysis and test technology for iron and steel. Based in the Central Iron and Steel Research Institute in Beijing, China, NACIS has over fifty years experience in research of a wide variety of reference materials and production of metal alloy, ore, and ferrous alloy certified reference materials (CRMs).

### ChromaDex™

ChromaDex™ was established in 1999 to develop and supply botanical reference standards along with related phytochemical products and services. Based in California, with a testing and research facility in Colorado, ChromaDex™ provides analytical services and products to the dietary supplement, food, beverage, nutraceutical and cosmetic industries.

### Others

Materials from the following organisations are also included in this catalogue:

- AEA Technology, UK
- Agricultural Research Centre, Finland
- BioDetection Systems (BDS), Netherlands
- CANMET, Canada
- Cargille Laboratories INC, USA
- Central Office of Measures (GUM), Poland
- Centre for Ecological Research, Poland
- Chemipan, Poland
- Cyano Biotech GmbH, Germany
- Czech Metrological Institute, Czech Republic
- Faculty of Physics and Nuclear Techniques, Poland
- Federal Institute for Materials Research and Testing (BAM), Germany
- G E Sensing, Ireland
- H & D Fitzgerald Ltd, UK
- Institute of Dyes and Organic Products, Poland
- Institute of Nuclear Chemistry and Technology, Poland
- LabAnalityka, Poland
- Institute of Nuclear Chemistry and Technology, Poland
- International Atomic Energy Agency, Austria
- MV Laboratories Inc., USA
- Nacalai Tesque, Japan
- National Institute for Environmental studies (NIES), Japan
- National Measurement Institute, Australia
- National Research Centre for Certified Reference Materials, China
- Poulten, Selfe & Lee Ltd, UK
- R. T. Corporation, USA
- SGE Analytical Science, UK
- Society of Glass Technology, UK
- Sigma-Aldrich
- Stanhope-Seta, UK
- Starna Scientific Ltd, UK
- WEPAL, Netherlands
- Whitehouse Scientific Ltd, UK

### The use of reference materials

Reference materials are instrumental in ensuring the reliability of analytical measurements and so ensuring the use of high quality data as the basis of decision making.

When choosing a matrix reference material for a particular application the analyst should consider the following factors before selecting a material:

- Matrix match and potential interferences
- Analytes
- Measurement range
- Measurement uncertainties
- Certification procedures used by the producer
- Documentation supplied with the material (e.g. certificate or report).

## About proficiency testing (PT)

Proficiency testing (PT) is a powerful quality assurance tool for laboratories undertaking analytical measurements. A PT scheme provider distributes test materials on a regular basis to participating laboratories for independent testing. The results are returned to the organiser of the scheme who makes an analysis of the results and provides a report to all the participants.

There are a number of benefits of taking part in a PT scheme:

- enable participants to measure their performance against others;
- give an early indication of potential problems or training requirements;
- encourage good performance and reinforce an interest in quality assurance;
- demonstrate an ability to comply with international regulations;
- provide a valuable source of information;
- provide the means to measure consistency across a group of laboratories.

LGC Standards is a UKAS accredited international provider of proficiency testing (PT) services, with over twenty years experience in all aspects of providing proficiency testing services to laboratories undertaking chemical, microbiological and physical analysis. LGC Standards operates 29 proficiency testing schemes serving over 6,000 laboratories, producing and distributing more than 100,000 samples and processing more than 2,000,000 data points per annum.

LGC Standards offers an unprecedented breadth of chemical, microbiological and physical testing schemes across a wide range of industries including meat, dairy and other food sectors, water, soil and other environmental sectors, brewing, distilling, malting, sugar, forensic, consumer safety, pharmaceutical and phytochemical sectors. Schemes are supplied on an international basis with customers in over 130 countries making LGC Standards a major international provider of proficiency testing services.

All the PT schemes within LGC Standards Proficiency Testing are operated in accordance with the international standard ISO/IEC 17043. The statistical analysis undertaken is in accordance with the international standard ISO 13528. LGC Standards Proficiency Testing is accredited by the United Kingdom Accreditation Service for the provision of proficiency testing schemes, currently against ISO/IEC Guide 43-1 (certificate 0001) and ILAC G13. A copy of our current scope of accreditation is available on the UKAS website ([www.ukas.com](http://www.ukas.com)).

Current schemes provided include:

### Water and environmental schemes:

- AQUACHECK - chemical analysis of clean water, waste waters, sludges, sediments and soils
- CONTEST - analysis of contaminated soils for a wide range of contaminants
- STACKS - chemical analysis of gaseous emissions in impinger solution and metals on quartz filters
- QWAS - microbiological assessment of waters, effluents and sludges

### Food schemes:

- AFPS - chemical and microbiological analysis of animal feed
- QCS - chemical and microbiological analysis of chocolate
- QDCS - composition and safety testing in the dairy sector
- QFCS - chemical testing of food products
- QGS - microbiological analysis of gelatine samples
- QMAS - chemical and microbiological analysis of meat
- QMS - microbiological examination of food and food ingredients

### Beverage schemes:

- BAPS - chemical, microbiological and sensory analysis of a range of beers
- DAPS - analysis of a wide range of alcoholic beverages (excluding beer)
- MAPS - analysis of malt and barley used by the malting, brewing and distilling industries
- SUPS - analysis of raw sugar used in the production of food and beverages
- QBS - chemical and microbiological analysis of soft drinks

### Other schemes:

- PACQS - laser diffraction particle size analysis
- PHARMASURE - measurement of a range of chemical and microbiological analytes in pharmaceutical products
- PHYTAS - phytochemical testing of plant extracts
- QMIS - identification of micro-organisms
- QUARTZ - toxicological analysis of drugs and alcohol in blood
- TOYTEST - toy safety testing to the European Standard EN71 and American Standard ASTM F963

### Heathcontrol schemes:

- Heathcontrol Therapeutic Drug Scheme
- Heathcontrol Psychoactive Drug Scheme
- Heathcontrol Antibiotic Drug Scheme
- Heathcontrol Toxicology Scheme
- Heathcontrol Drugs of Abuse in Urine Scheme
- Heathcontrol Drugs in Oral Fluid Scheme
- ASI Immunosuppressives Scheme

In addition to these regular schemes, we are able to offer customised and closed proficiency testing schemes tailored to a specific organisation's requirements. We operate such schemes on behalf of some of the largest companies in the world, all of whom are leading brand names recognised for the quality and added value of their products, and we are happy to discuss your requirements in this area.

Please contact your local LGC Standards office to find out more.

### Relevant training courses

A range of training courses is available from LGC to help laboratory managers and analysts demonstrate competence in, and keep abreast of, quality assurance issues and practices. LGC's analytical quality training programme includes:

- Achieving traceability in chemical testing
- Using proficiency testing in the analytical laboratory
- Method validation
- Principles and practice of measurement uncertainty in chemical testing laboratories
- Quality systems in testing laboratories
- Statistics for analytical chemists
- Further statistical tools for analytical chemists
- Evaluating measurement uncertainty for chemical testing laboratories

The majority of the courses are run in Teddington, South West London. In addition, LGC can provide training for groups of staff at your own site, where the courses can be customised to meet your exact needs.

For further information, please contact:

## General ordering information

Prices and delivery procedures are shown in the price list that accompanies this catalogue, or are available from your local LGC Standards sales office. For products requiring special delivery procedures (cooled shipping, dangerous goods, etc) additional charges will be applied.

Please check with your local LGC Standards sales office for detailed procedures and transport charges where applicable.

Unless otherwise agreed in advance and in writing, orders are accepted only against LGC Standards standard terms and conditions of sale.

Once delivered to the customer, reference substances are not returnable. For this reason it is very important for users to be certain that the product ordered meets their needs.

LGC Standards technical staff are available to advise on the use and suitability of a particular product. Customers requiring assistance with the use or application of a particular reference substance should contact their local LGC Standards office, contact details are provided at the beginning of this catalogue.

For further information please contact any of the offices listed on the inside cover or visit [www.lgcstandards.com](http://www.lgcstandards.com).

# ERM® Application Notes

## ERM® Application Note 1

### Comparison of a measurement result with the certified value

Author: Thomas Linsinger  
 European Commission - Joint Research Centre  
 Institute for Reference Materials and Measurements (IRMM)  
 Retieseweg 111, 2440 Geel, Belgium  
 Email: thomas.linsinger@ec.europa.eu; www.erm-crm.org

The comparison of a measurement result on a certified reference material with the certified value is explained. The method compares the difference between the certified and measured values with its uncertainty, i.e. the combined uncertainty of certified and measured value. Guidance on how to determine the standard uncertainties of certified values as well as standard uncertainties of measurement results is given.

### Introduction

One of the most frequent applications of certified reference materials is validation of measurement procedures. To achieve this, measurements on certified reference materials are performed and the results are compared with the certified values. This comparison is often described in a qualitative manner such as measurement results “agree”, “agree well” or even “agree perfectly” with the certified values. However, a structured and quantitative approach exists that allows a statement of the evidence of any bias to be made. This approach takes into account the certified value, the measurement result and their respective uncertainties. These uncertainties are subsequently combined and the expanded uncertainty is compared to the difference. This note will explain the procedure of the uncertainty estimation and the comparison of results with a certified value.

### Basic Principles

After the measurement of a CRM the absolute difference between the mean measured value and the certified value can be calculated as

$$\Delta_m = |c_m - c_{CRM}|$$

$\Delta_m$  absolute difference between mean measured value and certified value

$c_m$  mean measured value

$c_{CRM}$  certified value

Each measurement has an uncertainty  $u_m$  as described in the ISO Guide to the Expression of Uncertainty in Measurement (GUM) [1] and the Eurachem/CITAC Guide “Quantifying Uncertainty in Analytical Measurement” [2]. This means, any measurement result is only known within the limits of this uncertainty. Similarly, the certified value of a CRM is only known with a specified uncertainty  $u_{CRM}$  stated on the certificate. Uncertainties are usually expressed as standard deviations, but only the variances (the squared standard deviations) are additive. The uncertainty of  $\Delta_m$  is  $u_{\Delta}$ , that is calculated from the uncertainty of the certified value and the uncertainty of the measurement result according to

$$u_{\Delta} = \sqrt{u_m^2 + u_{CRM}^2}$$

$u_{\Delta}$  combined uncertainty of result and certified value (= uncertainty of  $\Delta_m$ )

$u_m$  uncertainty of the measurement result

$u_{CRM}$  uncertainty of the certified value

The expanded uncertainty  $U_{\Delta}$ , corresponding to a confidence interval of approximately 95 %, is obtained by multiplication of  $u_{\Delta}$  by a coverage factor (k), usually equal to 2.

$$U_{\Delta} = 2 \cdot u_{\Delta}$$

$U_{\Delta}$  expanded uncertainty of difference between result and certified value

**To evaluate method performance,  $\Delta_m$  is compared with  $U_{\Delta}$ :**

**If  $\Delta_m \leq U_{\Delta}$  then there is no significant difference between the measurement result and the certified value.**

## Determination of the individual uncertainties

### Uncertainty of the certified value

The expanded uncertainties  $U_{CRM}$  of each certified value are given on the certificate. Each ERM®-certificate also contains in a footnote an explanation of the derivation of the uncertainty (see Figs. 1 and 2). In most cases, the coverage factor is explicitly stated (an example can be seen in Fig. 1). The standard uncertainty,  $u_{CRM}$ , of the certified value is obtained by dividing the stated expanded uncertainty by the coverage factor. In some cases, the uncertainty is the 95 % confidence interval of the mean of laboratory means (for an example see Fig. 2). In this case, the t-factor for a 95 % confidence interval with n-1 degrees of freedom (n being the number of laboratories) needs to be determined from statistical tables. Alternatively, the factor can be derived in MS Excel® using the function  $tinv(0.05, n-1)$ . The standard uncertainty of the certified value  $u_{CRM}$  is then obtained by dividing the stated expanded uncertainty by the t-factor.

### Uncertainty of the measured value

According to ISO/IEC 17025 [3], measurement uncertainties must be known for each measurement. In the absence of full uncertainty budgets, several approximations exist (ranked in decreasing usefulness) to estimate measurement uncertainties:

- 1) The within-laboratory reproducibility standard deviation (intermediate precision) as determined from e.g. quality control charts can be used as (rough) estimation of  $u_m$ .
- 2) A reproducibility standard deviation from other sources (e.g. the certification reports available on [www.erm-crm.org](http://www.erm-crm.org) or an interlaboratory comparison) can be used after it has been proven that the laboratory's performance is equivalent to the performance of the participants in the study in question.
- 3) The standard deviation of the measurements over a longer time period can be used as very rough estimation. This estimation is typically underestimating the real uncertainty.

**ERM® - BB445**

PORK FAT		
Chlorobiphenyl <sup>1)</sup> Ballschmitter No. (Congener name)	Mass fraction	
	Certified value <sup>2)</sup> [µg/kg]	Uncertainty <sup>3)</sup> [µg/kg]
28 (2,4,4'-Trichlorobiphenyl)	14.8	1.3
52 (2,2',5,5'-Tetrachlorobiphenyl)	12.9	0.9

<sup>1)</sup> As obtained by quantification using GC methods.  
<sup>2)</sup> Unweighted mean value of the means of 8 accepted sets of data, each set being obtained in a different laboratory with a different method of determination. The certified value and its uncertainty are traceable to the International System units (SI).  
<sup>3)</sup> Estimated expanded uncertainty  $U$  with a coverage factor  $k = 2$  corresponding to a level of confidence of about 95% defined in the Guide to the Expression of Uncertainty in Measurement (GUM), ISO, 1995. Uncertainty contributors a

Figure 1: Certificate with expanded uncertainty. The standard uncertainty of the certified value ( $u_{CRM}$ ) is obtained by dividing the expanded uncertainty by the coverage factor (in this case: 2; marked in red)

**ERM® - CC580**

ESTUARINE SEDIMENT		
Parameter	Mass fraction (based on dry mass)	
	Certified value <sup>1)</sup>	Uncertainty <sup>2)</sup>
Total Hg	132 mg / kg	3 mg / kg
CH <sub>3</sub> Hg <sup>+</sup>	75 µg / kg	4 µg / kg

<sup>1)</sup> Unweighted mean value of the means of 11 to 13 accepted sets of data, each set being obtained in a different laboratory and / or with a different method of determination. Certified value is based on dry mass. The certified values are traceable to SI.  
<sup>2)</sup> The certified uncertainty is the half-width of the 95 % confidence interval of the mean defined in  $U$ .  $k$ -factors were chosen according to the t-distribution depending of the number of accepted sets of results and were 2.179 for total Hg and 2.228 for MeHg.

Figure 2: Certificate with a confidence interval. The standard uncertainty of the certified value ( $u_{CRM}$ ) is obtained by dividing the expanded uncertainty (in this case: 4 for CH<sub>3</sub>Hg) by the coverage factor (in this case: 2.228; circled)

**Example: PCBs in pork fat (ERM-BB445)**

PCB 52: certified value =  $(12.9 \pm 0.9)$  µg/kg. Footnote 2 of the certificate states that a coverage factor of  $k = 2$  was applied.  $u_{CRM}$  is therefore  $0.9/2$  µg/kg =  $0.45$  µg/kg.

The laboratory measurements gave an average of  $(14.3 \pm 1.8)$  µg/kg (single standard deviation of 6 measurements spread over three weeks). The standard deviation is divided by the square root of the number of measurements, as the average of the results is compared with the certified value.  $u_m$  is therefore estimated as  $1.8/\sqrt{6}$  µg/kg =  $0.74$  µg/kg.

$$\Delta_m = |c_m - c_{CRM}| = |12.9 - 14.3| \text{ µg/kg} = 1.4 \text{ µg/kg}$$

$$u_{\Delta} = \sqrt{u_m^2 + u_{CRM}^2} = \sqrt{0.74^2 + 0.45^2} \text{ µg/kg} = 0.87 \text{ µg/kg}$$

The expanded uncertainty  $U_{\Delta}$  is  $2 \cdot u_{\Delta} = 1.7$  µg/kg. This is larger than the difference  $\Delta_m$  between the certified and the measured value. The measured mean value is therefore not significantly different from the certified value.

**ERM® Application Note 3****Using Reference Materials to Establish Metrological Traceability**

Author: Steve Wood  
LGC Limited  
Queens Road  
Teddington  
Middlesex, TW11 0LY, UK  
Email: [steve.wood@lgc.co.uk](mailto:steve.wood@lgc.co.uk)

Traceability of measurements enables results to be compared across space and time and is a requirement of ISO/IEC 17025. This note describes the steps that need to be applied to chemical measurement methods to ensure traceability of the results. Reference materials are key to achieving traceability of measurement results. The ERM® range of certified reference materials are produced by three of Europe's top metrology institutions. ERM® reference materials have stated traceabilities and provide a means of ensuring reliability and comparability of the results of chemical analysis.

**Introduction**

All chemical measurement results depend upon and are ultimately traceable to the values of measurement standards of various types, such as those for mass, volume and the amount of a particular chemical species. If results obtained by different laboratories are to be comparable, it is essential that all results are based on reliable measurement standards whose values are linked to a stated reference. If there are differences in the quality of the measurement standards used in different laboratories, discrepancies will inevitably arise when different laboratories analyse the same sample. It is a requirement of standards such as ISO/IEC 17025 [1] that test results should be traceable, preferably to national or international standards.

**Definition**

"Traceability is a property of the result of a measurement or the value of a standard whereby it can be related to stated references, usually national or international standards, through an unbroken chain of comparisons all having stated uncertainties" [2].

**Traceable measurements**

The value of the result for an unknown quantity obtained from a comparison with the value of a calibration standard (where the uncertainty of the result is the uncertainty of this comparison plus the uncertainty of the standard) is traceable to the value of the calibration standard provided the method used for the comparison is valid and the uncertainty of the calibration standard is known.

## Application to chemical measurements

Method development establishes an optimised procedure which can be used to compare a sample and standard. Validation shows that, in terms of its performance, this procedure is fit for the purpose in hand and has the appropriate uncertainty.

Calibration establishes the relationships between the values provided by the measurement system with the values of the reference standards.

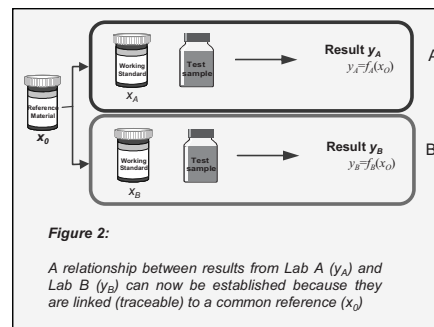

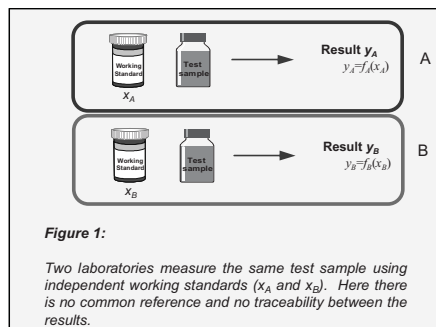

Traceability or control has to be established for each parameter specified in the procedure. Traceability is established through the use of measurement standards (e.g. certified reference materials) which are appropriate for each parameter. These certified reference materials are selected on the basis of fitness for purpose.

## Establishing traceable results

The following steps are necessary to establish traceable results [3]:

- 1) Specify the measurand and acceptable uncertainty.
- 2) Choose a suitable method of estimating the value, i.e. a measurement procedure with associated calculation (equation) and measurement conditions.
- 3) Demonstrate (validation) that the calculation and measurement conditions include all the 'influence quantities' that significantly affect the result.
- 4) Identify relative importance of each influence quantity. A methodology to help analysts categorise the degree of control to be applied to realising a particular experimental value has been developed [4].
- 5) Choose and apply appropriate certified reference materials and standards.

Estimate the uncertainty of the result.

Figures 1 and 2 show how calibration using a common reference material provides comparability between laboratories and allows a meaningful comparison of results.

## A STRATEGY FOR ESTABLISHING TRACEABILITY

### *To achieve traceability*

The method must be properly validated and applied within its stated scope. If not, erroneous results may still be produced, even if all measurements and standards are traceable.

The method must be carried out using the **appropriate stated references**.

### *Key steps to select the appropriate stated references*

Write down and understand the equation used to calculate the analytical result.

Identify any 'reagents' or equipment with specified values detailed in the method.

Identify the fixed conditions used in the method.

Obtain appropriate 'stated references' for use in the practical measurement or realisation of the experimental value.

### *What are 'appropriate stated references'?*

Any 'reference point' that an analyst uses to obtain or realise a particular quantity value in practice.

Physical calibrations are well established, e.g. calibrated weight; reference thermometer; volumetric glassware; stopwatch.

Chemical calibrations can be established in the same way using pure or matrix certified reference materials (calibrants) or other well-characterised pure materials.

### *What is appropriate?*

The analyst must decide, based on:

The degree of control that is required in obtaining or realising a particular value in practice.

The extent to which the quantity affects the result.

The uncertainty of each stated reference must be appropriate.

## ERM® Application Note 6

### Use of ERM® certificates and materials

Author: Thomas Linsinger  
 European Commission - Joint Research Centre  
 Institute for Reference Materials and Measurements (IRMM)  
 Retieseweg 111, 2440 Geel, Belgium  
 Email: thomas.linsinger@ec.europa.eu; www.erm-crm.org

This application note describes some practical aspects associated with handling and use of certified reference materials (CRMs) in laboratories. The various values provided on a certificate, re-use of materials, applying a moisture correction and interpretation of the traceability statement are also explained.

#### INTRODUCTION

Understanding the information contained in reference material certificates and correct use of these materials are necessary get the maximum benefit from them. This application note explains the basic terms used on ERM certificates, and gives guidance on the practical handling of materials.

#### TERMS ON THE CERTIFICATE

##### Types of assigned values

Three categories of values are assigned for ERM-branded reference materials:

**Certified values** fulfil the highest standards for reliability. They are traceable to stated references and are accompanied by a GUM (ISO Guide 98 "Guide to the expression of uncertainty in measurement") compatible expanded uncertainty statement valid for the entire shelf life of the ERM-CRM.

**Indicative values** are not certified due to either a larger uncertainty than required for the intended use or insufficient variety of methods used in the characterisation. The information is therefore unsuitable for certification at the accuracy required for certified values.

**Additional material information** are values created during the certification exercise, which are usually the result of one method only and indicate the order of magnitude rather than an accurate value. In summary, certified values are those values the certifying body is confident in assigning with the highest accuracy, while indicative values display higher uncertainties and/or lack a full traceability statement. This hierarchy in reliability is shown by the fact that only certified values are on the first page of the certificate. It follows that certified values are more assured than indicative values which in turn are more assured than additional material information.

##### Metrological traceability statement

Certified and indicative values come with a traceability statement. These statements unambiguously identify the measurand as well as the traceability of the values assigned to this measurand (see also the ERM policy on traceability on www.erm-crm.org). This information is given in one or two footnotes on the certified or indicative values and measurands (see Figures 1 and 2). The following alternatives exist: Measurands can be **structurally defined ("rational")** like for total Cadmium or Ochratoxin A, or **procedurally defined (empirical)**, such as for dietary fibre, extractable Cadmium or impact toughness, which are defined via specific measurement protocols.

For structurally defined measurands, ERM principles are stricter than those of ISO Guide 34 and 35 and require availability of results obtained from at least two completely independent methods or confirmation of results by primary methods of measurement by an independent method to demonstrate the absence of any method bias of assigned values.

Values assigned to the measurands can be traceable to the **International System of Units (SI)** or to an **artefact (empirical scales)**. In the former case, all input factors are calibrated with standards whose values are traceable to the SI, whereas in the latter cases arbitrary standards have been used for at least one step in the calibration (e.g. World Health Organisation primary reference preparation in clinical chemistry, Vienna Standard Mean Ocean Water (VSMOW) for chemical shift).

ERM® - AD452/IFCC		
GAMMA-GLUTAMYLTRANSFERASE		
	Certified value <sup>①</sup>	Uncertainty <sup>2</sup>
Catalytic concentration in reconstituted material	114.1 U/L	2.4 U/L
	1.90 µkat/L	0.04 µkat/L
1) This value is the unweighted mean of 12 sets of results, independently obtained from 12 laboratories. It is traceable to the IFCC primary reference method at 37 °C. The material must be reconstituted according to the specified procedure (see below). Values were converted from U/L into µkat/L by multiplication with 0.01667.		

Figure 1: Traceability statement of ERM-AD452/IFCC. The measurand is procedurally defined and proper calibration of all input factors is assumed.

In earlier ERM certificates, this information was combined into one footnote (Figure 1). Since the adoption of the common ERM policy on traceability, this information is given in two footnotes, one connected to identity of the measurand itself, the other specifying the traceability of the values assigned to it.

### Minimum sample intake

Every material is intrinsically heterogeneous. The minimum amount of material that is representative of the whole unit (bottle, vial etc.) is defined as minimum sample intake (Figure 2). The certified value and its uncertainty cannot be guaranteed for subsamples smaller than the minimum sample intake.

### Expiry date

Producers of reference materials guarantee the integrity of the material and the validity of the certificate for a specified time (known as the shelf life), provided the material is unopened and stored under the recommended storage conditions. This does not automatically mean that the user has to discard the unused sample once the shelf life has expired, but the producer cannot guarantee stability any longer. Users can continue to use a material under their own responsibility, if they have additional evidence of stability (e.g. no changes in quality control charts, comparison with other materials), however the material certificate will not be valid.

ERM® - BC367		
RAPESEED (COLZA)		
Parameter	Certified value <sup>1</sup>	Uncertainty <sup>2</sup>
Total glucosinolate (GSL)	99 mmol/kg	9 mmol/kg
Sulphur	10.3 g/kg	0.5 g/kg
1) The certified values for both GSL and S are the unweighted mean of the means of the accepted sets (GSL and 7 for S). The values are traceable to SI.		
2) Estimated expanded uncertainty $U$ with a coverage factor $k = 2$ , corresponding to a level of confidence of 95% as defined in the Guide to the Expression of Uncertainty in Measurement (GUM), ISO, 1995. Uncertainty arising from characterisation as well as from homogeneity and stability assessment were taken into consideration.		
This certificate is valid for one year after purchase.		
<b>Sales date:</b>		
<b>The minimum sample intake is:</b>		
- 500 mg for total glucosinolate (GSL) determination,		
- 20 g for sulphur calibration by XRF (preparation of discs),		
- 200 mg for sulphur determination after digestion.		

Figure 2: The shelf life and minimum sample intake are marked in blue and green, respectively.

The shelf life may be extended by the producer if additional information on the stability becomes available. This, however, refers only to newly purchased samples and not to samples distributed before the extension of the original shelf life.

### Instructions for use

The instructions for use give a detailed description for each material. These descriptions can refer to dry mass correction (Figure 3), reconstitution procedure, use of values, storage of the material etc. If these instructions are not followed, the assigned values are not valid.

INSTRUCTIONS FOR USE
The sample can be used as it is from the bottle. Before a bottle is opened, it should be shaken manually for 5 min so that the material is re-homogenised. The correction to dry mass should be made on a separate portion of 100 mg which should be dried in an oven at 102 °C for 3-4 h until constant mass is attained. The recommended minimum sample intake is 500 mg.

Figure 3: Definition of the dry mass correction for ERM-CE477. Please note the different recommended sample intakes for dry mass correction and certified measurands (in this case butyltins), reflecting different degrees of homogeneity for moisture and butyltins.

### HANDLING ISSUES

#### Measurement method to be used

The measurement method must determine the same measurand as described in the certificate. This means that for procedurally defined measurands, the method specified on the certificate must be used. For structurally defined measurands, any method determining this measurand can be used and should give unbiased results.

All instruments must be properly calibrated to ensure that measurement results are traceable to the same reference as the certified value. For results traceable to an artefact, a standard whose value is traceable to the same artefact must be used.

### Use of opened bottles

For opened units, alteration or even degradation of the material can happen which could not be accounted for during the certification process. Therefore, CRM producers cannot guarantee the assigned values of opened units. It is up to the user's judgement whether or not this material can be further used and which storage conditions or treatment are necessary. As a general guideline, materials should be stored cool, dry, in the dark and closed. Further information is often available in the certification report, which is freely available on [www.erm-crm.org](http://www.erm-crm.org). In any case, materials from opened containers should be used as soon as possible after opening to minimise change.

### Moisture correction

Many certified values are stated as content per dry mass of sample. As results from different methods (e.g. drying oven, Karl Fischer titration, vacuum drying oven) may differ significantly, the procedure for moisture correction must be clearly stated on the certificate (Figure 3) and this method must be used. Using different conditions can significantly alter the material (Figure 4) and the results obtained. Determination of the dry mass must be performed on a separate subsample.

Figure 4: Effect of different drying conditions on a cabbage reference material. Specified drying condition on the certificate: 16h at 70 °C

# Matrix reference materials

## The highest quality and reliability in certified reference materials

Three major European producers have combined forces to produce a standard in reference materials to ensure reliability and comparability of the results of chemical analysis.

European Reference Materials (ERM®) are certified materials, which undergo uncompromising peer evaluation and offer the highest quality and reliability.

### Why ERM®?

- Peer-review ensures the highest quality and reliability
- Full transparency of the certification principles
- Clearly defined and stated traceability
- Internationally recognised values.

[www.erm-crm.org](http://www.erm-crm.org)

Code	Product	Unit
<b>New</b> NIST-1640A	<b>Natural water - Trace elements</b> This Standard Reference Material (SRM) is intended for use in evaluating methods used in the determination of trace elements in freshwater. NIST-1640a consists of acidified spring water with mass fractions and mass concentrations assigned for 29 elements, 22 of which were gravimetrically added. The solution contains nitric acid at a volume fraction of approximately 2 %. A unit of NIST-1640a consists of 250 mL of solution in a high-density polyethylene (HDPE) bottle sealed inside an aluminized Mylar pouch. Certified values Ag ..... 8.017 ± 0.042 µg/kg      Co.....20.08 ± 0.24 µg/kg      Se ..... 19.97 ± 0.16 µg/kg Al..... 52.6 ± 1.8 µg/kg      Cu.....85.07 ± 0.48 µg/kg      Sr ..... 125.03 ± 0.86 µg/kg As..... 8.010 ± 0.067 µg/kg      Fe .....36.5 ± 1.7 µg/kg      Tl..... 1.606 ± 0.015 µg/kg B ..... 300.7 ± 3.1 µg/kg      Mn .....40.07 ± 0.35 µg/kg      U ..... 25.15 ± 0.26 µg/kg Ba ..... 150.60 ± 0.74 µg/kg      Mo .....45.24 ± 0.59 µg/kg      V ..... 14.93 ± 0.21 µg/kg Be ..... 3.002 ± 0.027 µg/kg      Ni.....25.12 ± 0.12 µg/kg      Zn..... 55.20 ± 0.32 µg/kg Cd ..... 3.961 ± 0.072 µg/kg      Pb.....12.005 ± 0.040 µg/kg Cr..... 40.22 ± 0.28 µg/kg      Sb..... 5.064 ± 0.045 µg/kg	250 mL
NIST-1643e	<b>Simulated freshwater - Trace elements</b> NIST-1643e simulates the elemental composition of freshwater. Nitric acid is present at a concentration of approximately 0.8 mol/L to stabilise the trace elements. Certified values Ag .....1.036 µg/kg .....1.062 µg/L Al.....138.33 µg/kg ..... 141.8 µg/L As.....58.98 µg/kg .....60.45 µg/L B ..... 154.0 µg/kg .....157.9 µg/L Ba ..... 531.0 µg/kg .....544.2 µg/L Be ..... 13.64 µg/kg ..... 13.98 µg/L Bi..... 13.75 µg/kg ..... 14.09 µg/L Ca .....31500 µg/kg .....32300 µg/L Cd .....6.408 µg/kg .....6.568 µg/L Cr.....19.90 µg/kg .....20.40 µg/L Co .....26.40 µg/kg .....27.06 µg/L Cu .....22.20 µg/kg .....22.76 µg/L Fe.....95.7 µg/kg .....98.1 µg/L K .....1984 µg/kg .....2034 µg/L Li.....17.0 µg/kg ..... 17.4 µg/L Mg.....7841 µg/kg .....8037 µg/L Mn.....38.02 µg/kg .....38.97 µg/L Mo.....118.5 µg/kg .....121.4 µg/L Na .....20230 µg/kg .....20740 µg/L Ni.....60.89 µg/kg .....62.41 µg/L Pb .....19.15 µg/kg .....19.63 µg/L Rb .....13.80 µg/kg .....14.14 µg/L Sb .....56.88 µg/kg .....58.30 µg/L Se .....11.68 µg/kg .....11.97 µg/L Sr.....315.2 µg/kg .....323.1 µg/L Te.....1.07 µg/kg ..... 1.09 µg/L Tl.....7.263 µg/kg .....7.445 µg/L V .....36.93 µg/kg .....37.86 µg/L Zn.....76.5 µg/kg .....78.5 µg/L	250 mL
NIST-1641d	<b>Natural water - Mercury</b> Mercury in 2% (v/v) HNO <sub>3</sub> initially stabilised with 1 mg/kg gold Certified value: .....1.557 mg/kg ± 0.020 mg/kg	10 x 10 mL
<b>New</b> ERM-CA615	<b>Ground water - Trace elements</b> Certified values As..... 9.9 ± 0.7 µg/L      Hg.....0.037 ± 0.004 µg/L      Pb ..... 7.1 ± 0.6 µg/L Cd ..... 0.106 ± 0.011 µg/L      Mn ..... 107 ± 5 µg/L Fe..... 5.11 ± 0.26 mg/L      Ni.....25.3 ± 1.1 µg/L	95 mL

## Sea water

LGC6016	Estuarine water - Trace metals	50 mL
	Collected from the Severn Estuary, UK, offshore from a heavily industrialised area near Avonmouth.	
	Certified Values	
Cd.....	101 µg/kg	Mn ..... 976 µg/kg
Cu.....	190 µg/kg	Ni ..... 186 µg/kg
	Indicative values for Ca, K, Mg, Na, Zn	Pb ..... 196 µg/kg
BCR-505	Estuarine water - Trace elements	1 L
	The material has been filtered at 0.45 µm and acidified with HNO <sub>3</sub> to around pH 1.5	
	Certified values	
Cd.....	0.80 nmol/kg	Ni ..... 24.1 nmol/kg
Cu.....	29.4 nmol/kg	Zn ..... 172 nmol/kg
BCR-579	Coastal sea water - Mercury	1 L
	The material has been filtered at 0.45 µm and acidified with HCl to around pH 1.7	
	Certified value	
Hg.....	1.9 ng/kg	
NRCSLEW-3	Estuarine water - Trace elements	470 mL
	Collected from the San Francisco Bay, California, USA at a depth of 5 metres	
	Certified values	
As.....	1.36 µg/L	Cu ..... 1.55 µg/L
Cd.....	0.048 µg/L	Fe ..... 0.568 µg/L
Co.....	0.042 µg/L	Mn ..... 1.61 µg/L
Cr.....	0.183 µg/L	Ni ..... 1.23 µg/L
	Indicative values for Ag, Mo, U	Pb ..... 0.0090 µg/L
		V ..... 2.57 µg/L
		Zn ..... 0.201 µg/L
<b>New</b> NRCNASS-6	Seawater - Trace metals	500 mL
	Certified values	
Arsenic (As).....	1.40 ± 0.12 µg/kg	1.43 ± 0.12 µg/L
Cadmium (Cd).....	0.0303 ± 0.0019 µg/kg	0.0311 ± 0.0019 µg/L

<b>New</b> NCS ZC80301D	Chemical oxygen demand (COD) - low level Certified value COD ..... 1164 mg/L	20 mL
<b>New</b> NCS ZC80302D	Chemical oxygen demand (COD) - medium level Certified value COD ..... 2528 mg/L	20 mL
<b>New</b> NCS ZC80303D	Chemical oxygen demand (COD) - high level Certified value COD ..... 5027 mg/L	20 mL

The Quality Control Materials RTC-QCI-039 - RTC-QCI-088 for water analysis are formulated at known sample target concentrations for routine use. The samples are packaged in flame sealed ampoules to ensure stability. The materials can be used as the basis for a range of control materials by altering the final volume to which the concentrate is diluted.

The analytes and concentrations will vary from lot to lot (except "constant value") but will always be certified within the concentration range shown on the next page.

Code	Product	Unit
RTC-QCI-039	<b>Residue - Constant value</b> A set of 2 ampoules of solids for dilution up to 2 litres of residue-free water. Vial 1: Lot 001378 Residue (Total solids) (TS).....491 mg/L Filterable residue (TDS) .....441 mg/L Non-filterable residue (TSS).....57.1 mg/L Vial 2: Lot 018524 Total residue (Total solids) (TS) .....496 mg/L Filterable residue (TDS) .....255 mg/L Non-filterable residue (TSS) .....244 mg/L Residue volatile .....50.1 mg/L	set
RTC-QCI-040	<b>Demand - Constant value</b> A single sample to be diluted up to 1 litre of reagent water. Biochemical Oxygen Demand (BOD).....147 mg/L Carbonous BOD (CBOD) .....126 mg/L Chemical Oxygen Demand (COD) .....226 mg/L Total Organic Carbon (TOC) .....93.1 mg/L	Amp.
<b>New</b> RTC-QCI-301	<b>Demand - WP (Whole Volume)</b> Certified values Biochemical oxygen demand (BOD) ..... 147 ± 5.61 mg/L Carbonaceous BOD (CBOD)..... 126 ± 5.59 mg/L Chemical oxygen demand (COD)..... 227 ± 3.63 mg/L Total organic carbon (TOC)..... 93.2 ± 1.44 mg/L	500 mL
RTC-QCI-041	<b>pH QC Sample - Constant value</b> A single sample for direct measurement of pH. pH .....7.2 units	Amp.
<b>New</b> RTC-QCI-028K	<b>Nutrients</b> Three samples for dilution up to 1 L QCI-028-1 (20 mL concentrate) Ammonia as N .....14.5 mg/L      Nitrate + Nitrite as N ..... 12.4 mg/L Nitrate as N .....12.4 mg/L      Orthophosphate as P ..... 1.53 mg/L QCI-028-2 (2 mL concentrate) Kjeldahl nitrogen, total (TKN) .....11.5 mg/L      Phosphorus, total ..... 3.65 mg/L Nitrogen, total ..... 11.5 mg/L QCI-028-3 (2 mL concentrate) Nitrite as N 0.672 mg/L	set
RTC-QCI-028-1	<b>Nutrients</b> Samples for dilution up to 1 L 20 mL concentrate Ammonia as N .....14.5 mg/L      Nitrate + Nitrite as N ..... 12.4 mg/L Nitrate as N .....12.4 mg/L      Orthophosphate as P ..... 1.53 mg/L	Amp.
RTC-QCI-028-2	<b>Nutrients</b> Sample for dilution up to 1 L 2 mL concentrate Kjeldahl nitrogen, total (TKN) .....11.5 mg/L      Phosphorus, total ..... 3.65 mg/L Nitrogen, total ..... 11.5 mg/L	Amp.
RTC-QCI-028-3	<b>Nutrients</b> Samples for dilution up to 1L 2 mL concentrate Nitrite as N ..... 0.672 mg/L	Amp.
RTC-QCI-042	<b>Nutrients - Constant value</b> A two-sample set for dilution up to 2 litres of reagent water. Ampoule 1: Ammonia-N.....2.05 mg/L Nitrate-N .....1.99 mg/L Nitrite-N.....1.50 mg/L Orthophosphate as P.....0.758 mg/L Ampoule 2: Kjeldahl-Nitrogen (TKN) .....7.41 mg/L Total Nitrogen .....7.49 mg/L Total Phosphorus .....1.77 mg/L	set

## Waters

Code	Product	Unit
<b>New</b> RTC-QCI-303-1	Nutrients - WP (Whole-volume) Certified values Ammonia as N ..... 12.9 ± 0.129 mg/L Nitrate as N ..... 27.8 ± 0.429 mg/L Nitrate+nitrite as N ..... 28.2 ± 0.535 mg/L Nitrite as N ..... 0.411 ± 0.00601 mg/L Orthophosphate as P ..... 3.07 ± 0.0199 mg/L	500 mL
<b>New</b> RTC-QCI-303-2	Complex Nutrients - WP (Whole-volume) Certified values Kjeldahl nitrogen (TKN) ..... 3.56 ± 0.140 mg/L Phosphorus, total ..... 7.73 ± 0.121 mg/L	500 mL
RTC-QCI-032	Total phenolics A single sample for dilution up to 1 L Sample Target Concentration Total phenolics ..... 1.52 mg/L	Amp.
RTC-QCI-043	Phenolics - Constant value A set of 2 ampoules for dilution up to 2 litres of reagent water. 4AAP (colorimetric) methods are recommended for analysis. RTC-QCI-043-1: Total phenolics (by 4AAP Method) ..... 6.62 mg/L Total phenolics are derived from phenol (40%), 2-Chlorophenol (20%), 2,4-Dinitrophenol (20%), and 2,4-Dichlorophenol (20%). RTC-QCI-043-2: Total phenolics (as phenol) ..... 5.0 mg/L	set
RTC-QCI-033	Total residual chlorine A single sample for dilution up to 1 L Sample Target Concentration Total residual chlorine ..... 1.47 mg/L	Amp.
RTC-QCI-044	Residual chlorine - Constant value A single sample for dilution up to 1 litre of reagent water. Total or free residual chlorine ..... 1.66 mg/L	Amp.
RTC-QCI-267	Water -Total residual chlorine (Low level) A single sample for dilution up to 2 litres Certified value Total residual chlorine ..... 0.104 ± 0.00600 mg/L	
RTC-QCI-046	Minerals (set of 2 ampoules) - Constant value A set of 2 ampoules for dilution into 2 litres of reagent water. RTC-QCI-046-1 and RTC-QCI-046-2 are packaged as 20 mL concentrate Conductivity ..... 458 µmhos/cm <sup>3</sup> Corrosivity (ph) ..... 7.25 Hardness ..... 106 mg/L Ca ..... 25.7 mg/L Mg ..... 10.1 mg/L K ..... 8.09 mg/L Na ..... 40.6 mg/L Alkalinity as CaCO <sub>3</sub> ..... 43.0 mg/L Chloride ..... 85.7 mg/L Fluoride ..... 6.03 mg/L Sulfate ..... 24.4 mg/L	set
RTC-QCI-031	Total cyanide A single sample for dilution up to 1 L Total cyanide ..... 0.490 mg/l	Amp.
RTC-QCI-047	Cyanide - Constant value A set of 2 ampoules for dilution up to 2 L of reagent water. Ampoule 1: Cyanide (from Potassium Ferricyanide) ..... 0.626 mg/L Ampoule 2: Cyanide (from Potassium Cyanide) ..... 0.482 mg/L	set
RTC-QCI-048	Turbidity - Constant value A single sample for dilution up to 2 L of turbidity-free reagent water. Turbidity ..... 9.06 NTU	Amp.

Code	Product	Unit

## Sediments

Code	Product	Unit
<b>Freshwater sediments</b>		
LGC6187	River sediment - Extractable metals The extractable/leachable metal content refers to metals soluble in a hot mixture of nitric and hydrochloric acids using methods based on ISO 11466 (1995). Certified values As..... 24.0 mg/kg      Hg..... 1.4 mg/kg      Sn ..... 6.8 mg/kg Cd ..... 2.7 mg/kg      Mn ..... 1240 mg/kg      V ..... 38.3 mg/kg Cr ..... 84.0 mg/kg      Ni ..... 34.7 mg/kg      Zn ..... 439 mg/kg Cu ..... 83.6 mg/kg      Pb ..... 77.2 mg/kg Fe ..... 23600 mg/kg      Se ..... 1.2 mg/kg	80 g
LGC6189	River sediment - Extractable metals The river sediment was collected from a monitoring station lagoon on the river Elbe close to the Czech-German Border, Czech Republic. Assessed values for extractable metals precisely following the ISO11466 (1995) method. Only those metals that reached a plateau of concentration after two hours reflux were characterised. Assessed values As..... 26 mg/kg      Cu..... 87 mg/kg      Ni ..... 34 mg/kg Cd ..... 3.3 mg/kg      Mn ..... 1120 mg/kg      Pb ..... 87 mg/kg Cr ..... 93 mg/kg      Mo ..... 1.2 mg/kg      Zn ..... 460 mg/kg Indicative values for Ba, Se and constituents.	30 g
BCR-280R	Lake sediment - Trace elements Certified values As..... 33.4 mg/kg      Cr..... 126 mg/kg      Ni ..... 69 mg/kg Cd ..... 0.85 mg/kg      Cu..... 53 mg/kg      Zn ..... 224 mg/kg Co ..... 16.8 mg/kg      Hg..... 1.46 mg/kg	30 g
BCR-701	Sediment - Extractable trace elements (3 step extraction) Certified values <u>Step 1</u> Cd ..... 7.34 mg/kg      Cu..... 49.3 mg/kg      Pb ..... 3.18 mg/kg Cr ..... 2.26 mg/kg      Ni ..... 15.4 mg/kg      Zn ..... 205 mg/kg <u>Step 2</u> Cd ..... 3.77 mg/kg      Cu..... 124 mg/kg      Pb ..... 126 mg/kg Cr ..... 45.7 mg/kg      Ni ..... 26.6 mg/kg      Zn ..... 114 mg/kg <u>Step 3</u> Cd ..... 0.27 mg/kg      Cu..... 55.2 mg/kg      Pb ..... 9.3 mg/kg Cr ..... 143 mg/kg      Ni ..... 15.3 mg/kg      Zn ..... 45.7 mg/kg	20 g
BCR-684	River sediment - Phosphorous Extractable phosphorous in sediment following a five-step extraction procedure NaOH-extractable P.....550 mg/kg      Organic P ..... 209 mg/kg HCl-extractable P.....536 mg/kg      Conc.HCl-extract. P ..... 1373 mg/kg Inorganic P.....1113 mg/kg	35 g
BCR-646	Freshwater sediment - Butyltin and phenyltin Certified values TBT ..... 480 µg/kg      MBT.....610 µg/kg      DPhT..... 36 µg/kg DBT..... 770 µg/kg      TPhT .....29 µg/kg      MPhT ..... 69 µg/kg	40 g

PCB 208	2,2',3,3',4,5,5',6,6'-Nonachlorobiphenyl	13.1 ± 0.78
PCB 209	2,2',3,3',4,4',5,5',6,6'-Decachlorobiphenyl	8.32 ± 0.60
	Indicative values for further PCB congeners, chlorinated pesticides and PAHs	

Code	Product	Unit
NIST-1944	New York/New Jersey waterway sediment - PCBs and PAHs	50 g

This Standard Reference Material<sup>®</sup> (SRM<sup>®</sup>) is a mixture of marine sediment collected near urban areas in New York and New Jersey. Reference values are also provided for selected dibenzodioxin and dibenzofuran congeners, total organic carbon, total extractable material, and particle-size characteristics. All of the constituents for which certified, reference, and information values are provided were naturally present in the sediment material before processing.

#### Certified Concentrations for Selected PAHs

PAHs	Mass Fractions in mg/kg (dry-mass basis)	PAHs	Mass Fractions in mg/kg (dry-mass basis)
Naphthalene	1.65 ± 0.31	Benzo(a)fluoranthene	0.78 ± 0.12
Phenanthrene	5.27 ± 0.22	Benzo(e)pyrene	3.28 ± 0.11
Anthracene	1.77 ± 0.33	Benzo(a)pyrene	4.30 ± 0.13
Fluoranthene	8.92 ± 0.32	Perylene	1.17 ± 0.24
Pyrene	9.70 ± 0.42	Benzo(ghi)perylene	2.84 ± 0.10
Benzo(c)phenanthrene	0.76 ± 0.10	Indeno(1,2,3-cd)pyrene	2.78 ± 0.10
Benzo(a)anthracene	4.72 ± 0.11	Dibenzo(a,j)anthracene	0.500 ± 0.044
Chrysene	4.86 ± 0.10	Dibenzo(a,c)anthracene	0.335 ± 0.013
Triphenylene	1.04 ± 0.27	Dibenzo(a,h)anthracene	0.424 ± 0.069
Benzo(b)fluoranthene	3.87 ± 0.42	Pentaphene	0.288 ± 0.026
Benzo(j)fluoranthene	2.09 ± 0.44	Benzo(b)chrysene	0.63 ± 0.10
Benzo(k)fluoranthene	2.30 ± 0.20	Picene	0.518 ± 0.093

#### Certified Concentrations for Selected PCB Congeners

PCB Congeners	Mass Fraction in µg/kg (dry-mass basis)
PCB 8.....2,4'-Dichlorobiphenyl	22.3 ± 2.3
PCB 18.....2,2',5-Trichlorobiphenyl	51.0 ± 2.6
PCB 28.....2,4,4'-Trichlorobiphenyl	80.8 ± 2.7
PCB 31.....2,4',5-Trichlorobiphenyl	78.7 ± 1.6
PCB 44.....2,2',3,5'-Tetrachlorobiphenyl	60.2 ± 2.0
PCB 49.....2,2',4,5'-Tetrachlorobiphenyl	53.0 ± 1.7
PCB 52.....2,2',5,5'-Tetrachlorobiphenyl	79.4 ± 2.0
PCB 66.....2,3',4,4'-Tetrachlorobiphenyl	71.9 ± 4.3
PCB 87.....2,2',3,4,5'-Pentachlorobiphenyl	29.9 ± 4.3
PCB 95.....2,2',3,5',6-Pentachlorobiphenyl	65.0 ± 8.9
PCB 99.....2,2',4,4',5-Pentachlorobiphenyl	37.5 ± 2.4
PCB 101.....2,2',4,5,5'-Pentachlorobiphenyl +	
90.....2,2',3,4',5-Pentachlorobiphenyl	73.4 ± 2.5
PCB 105.....2,3,3',4,4'-Pentachlorobiphenyl	24.5 ± 1.1
PCB 110.....2,3,3',4',6-Pentachlorobiphenyl	63.5 ± 4.7
PCB 118.....2,3',4,4',5-Pentachlorobiphenyl	58 ± 4.3
PCB 128.....2,2',3,3',4,4'-Hexachlorobiphenyl	8.47 ± 0.28
PCB 138.....2,2',3,4,4',5'-Hexachlorobiphenyl +	
163.....2,3,3',4',5,6-Hexachlorobiphenyl +	
164.....2,3,3',4',5',6-Hexachlorobiphenyl	62.1 ± 3.0
PCB 149.....2,2',3,4',5',6-Hexachlorobiphenyl	49.7 ± 1.2
PCB 151.....2,2',3,5,5',6-Hexachlorobiphenyl	16.93 ± 0.36
PCB 153.....2,2',4,4',5,5'-Hexachlorobiphenyl	74.0 ± 2.9
PCB 156.....2,3,3',4,4',5-Hexachlorobiphenyl	6.52 ± 0.66
PCB 170.....2,2',3,3',4,4',5-Heptachlorobiphenyl +	
190.....(2,3,3',4,4',5,5'-Heptachlorobiphenyl)	22.6 ± 1.4
PCB 180.....2,2',3,4,4',5,5'-Heptachlorobiphenyl	44.3 ± 1.2
PCB 183.....2,2',3,4,4',5',6-Heptachlorobiphenyl	12.19 ± 0.57
PCB 187.....2,2',3,4',5,5',6-Heptachlorobiphenyl +	
159.....2,3,3',4,5,5'-Hexachlorobiphenyl +	
182.....2,2',3',4,4',5,6'-Heptachlorobiphenyl	25.1 ± 1.0
PCB 194.....2,2',3,3',4,4',5,5'-Octachlorobiphenyl	11.2 ± 1.4
PCB 195.....2,2',3,3',4,4',5,6-Octachlorobiphenyl	3.75 ± 0.39
PCB 206.....2,2',3,3',4,4',5,5',6-Nonachlorobiphenyl	9.21 ± 0.51
PCB 209.....Decachlorobiphenyl	6.81 ± 0.33

#### Certified Concentrations for Selected Chlorinated Pesticides

Chlorinated Pesticides	Mass Fractions in µg/kg (dry-mass basis)
Hexachlorobenzene	6.03 ± 0.35
cis-Chlordane (alpha-Chlordane)	16.51 ± 0.83
trans-Nonachlor	8.20 ± 0.51
4,4'-DDT	119 ± 11

Reference Values for PAHs, Chlorinated Pesticides, Dibenz-p-dioxin and Dibenzofuran Congeners, Particle-Size Characteristics, Total Organic Carbon and Percent Extractable Mass.

Certified and reference concentrations for selected inorganic constituents.

Code	Product	Unit
RTC-CNS329-050	Freshwater sediment - PCBs and PBDEs The PDBEs Reference Values were determined by US EPA Method 1614, ISO 22032 and related GC-MS techniques. The PCB Reference Values were determined by Dutch standard methods (NEN 5771, 5718, and 5719) and EPA extraction methods 3540/3541 or 3550A, followed by Method 8270. The sample is suitable for use by these, or other similar digestion and analytical procedures. \* not-certified values

Information values for recoverable and leachable element concentrations

#### CAN-LKSD-2 - CAN-LKSD-4

The samples were taken from the bottom centre of each lake; materials from a number of similar lakes were then blended together to produce the four samples. As well as analytical values for elements from total destruction methods, values are also given for aqua regia and dilute aqua regia extraction methods, and for major and minor elements as oxides.

	The materials are mixed from various sediments as follows:	
CAN-LKSD-2	Lake sediment Sourced from lake 31F in Ontario (Canada) and lakes 86K and 86L in N.W. Territories	100 g
CAN-LKSD-3	Lake sediment A composite of 9 sediments, 31F, M & N 32 C&D, 41P and 42A all in Ontario (Canada) plus 64 L&M in Manitoba	100 g
CAN-LKSD-4	Lake sediment Sourced from two lakes, 31C in Ontario (Canada) and 74H in Saskatchewan (Canada)	100 g

Code Product Unit

## CAN-STSD-1, CAN-STSD-3, CAN-STSD-4 and CAN-STSD-134

A set of three different samples from CANMET, designed to provide a representative selection of the type of stream sediments likely to be found within a continental shield region. The samples were taken from the bottom of the stream bed; material from a number of similar streams was blended together to produce the four samples. As well as analytical values for elements from total destruction methods, values are also given for aqua regia extraction methods, and the major and minor elements as oxides.

Provisional values for total elements

ERM-CC580	Estuarine sediment - Mercury and methylmercury Certified values <sup>1</sup> uncertainty <sup>2</sup> Total Hg ..... 132 mg/kg ..... 3 mg/kg CH <sub>3</sub> Hg <sup>+</sup> ..... 0.0755 mg/kg ..... 4 µg/kg 1) Unweighted mean value of the means of 11 to 13 accepted sets of data, each set being obtained in a different laboratory and / or with a different method of determination. Certified value is based on dry mass. The certified values are traceable to SI. 2) The certified uncertainty is the half-width of the 95 % confidence interval of the mean defined in 1). k-factors were chosen according to the t-distribution depending of the number of accepted sets of results and were 2.179 for total Hg and 2.228 for MeHg.	40 g																																																																																																																																				
NIST-1941b	Organics in marine sediment Collected at the mouth of the Baltimore Harbour. All of the constituents for which certified, reference, and information values are provided in NIST-1941b were naturally present in the sediment material before processing. A unit of NIST-1941b consists of a bottle containing 50 g of radiation-sterilized, freeze-dried sediment material. NIST-2703	Marine sediment - Trace elements Sediment for solid sampling (small sample) analytical techniques NIST-2703 is a marine sediment collected at the mouth of the Baltimore Harbor. It is primarily intended for use in evaluating analytical methods for the direct determination of selected elements in solid samples of marine or freshwater sediment and similar matrices. Direct and slurry sampling, as well as dissolution techniques using typically milligram size samples (<10 mg), can employ this Standard Reference Material® in the user's procedures; all certified and reference values are based on measurements using a samples size of at least 0.7 mg. Techniques using large samples (100 mg) should use NIST-2702 Marine sediment - Trace elements.	5 g

Indicative values for chlorinated pesticides, PCBs and petroleum hydrocarbons.

### WEPAL sediment reference materials

The Wageningen Evaluating Programmes for Analytical Laboratories (WEPAL) runs international sample exchange programmes for continuous quality control of analytical data as produced by chemical laboratories. There are almost 700 laboratories who take part in one or more of WEPAL's regular ring-tests programmes.

The WEPAL sediment reference samples are supplied with certificates including consensus values, indicative values and values for information, based on the results of the proficiency programme.

The certificates are available on request.

<b>New</b>	WEPAL-SETOC-701	Riverclay - Organic compounds, inorganic composition (please ask for detailed information)	150 g

### EUROSOILS

The environmental fate of a chemical substance that is deliberately or accidentally distributed in the environment can only be understood if one studies its possible interaction with the various environmental compartments. In this context the processes related to soil are of particular importance and as a consequence producers of chemicals are nowadays obliged to access the interaction of a given chemical product with soils (EU Directive 67/548/EEC and amendments). To achieve a better comparability of data the European Commission's IRMM has released the world's first Certified Reference Materials (IRMM-443) for soil adsorption testing of chemical substances according to the OECD Testguideline 106. Six EU-representative soils have been selected and their adsorption coefficients for three reference substances (Atrazine, 2,4-D and Lindane) have been certified. Furthermore, the soil-pH according to the respective ISO-standards in aqueous solution and in 0.01 M calcium chloride have been certified, too. Additional information on other pedological parameters (CEC, organic carbon content, Total N and C), matrix constituents and background pollution makes IRMM-443 one the best characterised reference soil sets on a global level.

## Soils

Code	Product	Unit		
IRMM-443-1	<b>EUROSOIL 1</b>	200 g		
	Parameter	Value	Parameter	Value

	<b>RTC-CLNSOIL1-5</b> These five different soil types are not contaminated and contain only what an analyst can expect to find in a "clean soil". They are well characterised for nearly every parameter of interest. These soils are useful as a base material with known characteristics that can be spiked for in-house method development and validation, method comparison or other uses.

	<b>NIM-GBW07412A - NIM-GBW07417A and NCS DC85113</b>	
	These certified reference materials were prepared in accordance with the ISO guides 30-35. The intended use for these CRMs are the quality control in geochemical exploration, soil and eco-environment research analysis, the evaluation of analytical methods and the calibration of analytical instruments	
	<b>Composition</b>	<b>Methods</b>
	Organic Matter	H <sub>2</sub> SO <sub>4</sub> ,K <sub>2</sub> Cr <sub>2</sub> O <sub>7</sub> oxidation - Volumetric method
	Total nitrogen	Kjeldahl method for Nitrogen (not include NO <sub>2</sub> - and NO <sub>3</sub> -)
	pH	Water extraction - Potential method
	Cation exchange capacity	CH <sub>3</sub> COONH <sub>4</sub> extraction - Volumetric method
	Exchangeable Ca, Mg, Na, K, Mn	EDTA-CH <sub>3</sub> COONH <sub>4</sub> extraction - ICP-AES method (neutral, acid soil)
	Hydrolyzable nitrogen	Alkali Hydrolysis - Diffuse method
	Available phosphorus	NaHCO <sub>3</sub> extraction - Colorimetry (neutral, calcareous soil)
		NH <sub>4</sub> F,dilute HCl extraction - Molybdenum-antimony-ascorbic acid method (acid soil)
	Effective potassium	CH <sub>3</sub> COONH <sub>4</sub> . extraction - ICP-AES method or AAS
	Slowly available potassium	Dilute nitric acid extraction - ICP-AES method or AAS
	Available sulfur	(P) Phosphat- CH <sub>3</sub> COONH <sub>4</sub> .extraction - ICP-AES (neutral, acid soil)
		(Ca) CaCl <sub>2</sub> solution extraction - ICP-AES (calcareous soil)
	Available silicon	Citric acid extraction - ICP-AES or silicon molybdenum blue colorimetric method
	Available Cu, Zn, Fe, Mn, Cd, Pb, Ni, Cr, Co	DTPA* solution extraction - ICP-AES and ICP-MS
	Available Cu, Zn, Fe, Mn, Cd, Pb, Ni, Cr, Co	Dilute hydrochloric acid extraction- ICP-AES, ICP-MS or AFS (neutral, acid soil)
	Available Cu, Zn, Cd, Pb, Ni, Cr	NaNO <sub>3</sub> extraction - ICP-AES and ICP-MS
	Available molybdenum or I	Oxalic acid ammonium oxalate (Tamm solution)** - Extraction polarography ICP-AES
	Available boron	Boiling water extraction - Curcumin colorimetric method and ICP-AES
	Soluble selenium	Boiling water extraction - ICP-AES or AFS
	Soluble fluorine	Water extraction - Ion selective electrode method
	Soluble salts	
	Total	Water extraction - Gravimetric method or conductivity method
	Cl <sup>-</sup>	Water extraction - Titrimetric method
	SO <sub>4</sub> <sup>2-</sup>	Water extraction - ICP-AES
	Ca, Mg, K, Na	Water extraction- ICP-AES or AAS

\* DTPA solution 0.005mol/L C<sub>14</sub>H<sub>23</sub>N<sub>3</sub>O<sub>10</sub>-0.01mol/L CaCl<sub>2</sub>.0.1mol/L C<sub>6</sub>H<sub>15</sub>NO<sub>3</sub>, pH 7.3

\*\* Tamm solution 24.9g/L (NH<sub>4</sub>)<sub>2</sub>C<sub>2</sub>O<sub>4</sub>·H<sub>2</sub>O-12.6g/L H<sub>2</sub>C<sub>2</sub>O<sub>4</sub>·2H<sub>2</sub>O, pH 3.3

<b>New</b> RTC-CRM090-100	Clay soil - Nutrients Lot 014687 Certified values Ammonia as N .....743 ± 35.2 mg/kg Kjeldahl nitrogen, total (TKN) .....2530 ± 104 mg/kg Phosphorus, total.....809 ± 79.5 mg/kg Total organic carbon (TOC).....5280 ± 592 mg/kg	100 g
RTC-CRM401-225	Superfund soil (Sludge) - TCLP organics Organic contaminated soil from a superfund site in the Western United States. Certified using methods USEPA, SW846, 3 <sup>rd</sup> edition, Extraction Method 1311 and analytical methods 8031, 8150 and 8270. Lot D5401 Certified values o-Cresol .....888 mg/kg      Pentachlorophenol ..... 117 mg/kg Total cresol .....2660 mg/kg      2,4,6-Trichlorophenol ..... 58.7 mg/kg Lindane .....1.05 mg/kg Indicative values for m+p Cresol, 2,4-D TCLP: Total Characteristic Leaching Procedure. Superfund: US Government funding for the cleaning up of sites in the United States where dumping of hazardous waste has occurred.	225 g
RTC-CRM402-225	Superfund soil (Sandy loam) - TCLP organics The reference values were determined by USEPA SW846 (3rd edition) Extraction Method 1311 and Analytical Methods 8081, 8150, and 8270. The sample is suitable for these and other similar methods. Certified values CD402 Nitrobenzene .....12.2 mg/L      BHC (Lindane) ..... 1.28 mg/L 2,4-Dinitrotoluene (2,4-DNT) .....0.619 mg/L      2,4-D ..... 67.1 mg/L	225 g
RTC-CRM910-050	Soil (Loam) - PCBs Real-world waste produced from a contaminated site in the Eastern United States. The sample was certified by USEPA SW846, 3 <sup>rd</sup> edition Method 3540A/8081 and is suitable for use by these and other similar methods. Certified value D910 Aroclor 1242 ..... 39.4 mg/kg	50 g
RTC-CRM911-050	Soil (Loam) - PCBs Real-world waste collected from a percolation pond at an electric generating facility in the Southeastern United States. The sample was certified by USEPA SW846 (3rd edition) Methods 3540A/3545/3550 and 8082. The sample is suitable for use by these and other similar methods. Certified value BC911 Aroclor 1254 ..... 1.28 mg/kg	50 g
RTC-CRM913-050	Soil (Sandy loam) - PCBs Real-world waste collected from electric utility storage site Western United States. The PCB value was certified using extraction method 3540A and analysis method 8081 (PCBs by GC) and is suitable for use by these and other similar methods. Certified value Lot DG913 Aroclor 1254 ..... 5.93 mg/kg	50 g
RTC-CRM915-050	Soil (Sandy loam) - PCBs Real-world waste collected from a site in the Western United States. The sample was certified by USEPA SW846, 3 <sup>rd</sup> edition Method 3540A/8081 and is suitable for use by these and other similar methods. Certified values Lot JG915 Aroclor 1260 ..... 1.50 mg/kg	50 g
RTC-CRM916-050	Soil (Loamy sand) - PCBs Real-world waste collected from a site in the Western United States. The sample was certified by USEPA SW846, 3 <sup>rd</sup> edition Method 3540A/8081 and is suitable for use by these and other similar methods. Certified value Lot IH916 Aroclor 1248 ..... 10.7 mg/kg	50 g
RTC-CRM917-050	Soil (Loamy sand) - PCBs Real-world waste collected from a site in the Western United States. The sample was certified by USEPA SW846, 3 <sup>rd</sup> edition Method 3540A/8081 and is suitable for use by these and other similar methods. Certified value Lot II917 Aroclor 1242 ..... 5.05 mg/kg	50 g

## Soils

Code	Product	Unit
RTC-CRM918-050	Soil (Sandy loam) - PCBs Real-world waste collected from a site in the Western United States. The sample was certified by USEPA SW846, 3 <sup>rd</sup> edition Method 3540A/8081 and is suitable for use by these and other similar methods. Certified value Lot JI918 Aroclor 1252 ..... 274 mg/kg	50 g
RTC-CRM921-050	Soil (Sandy loam) - PCBs Real-world waste collected from a site in the Western United States. The sample was certified by USEPA SW846, 3 <sup>rd</sup> edition Method 3540A/8081 and is suitable for use by these and other similar methods. Certified value Lot AL921 Aroclor 1242 ..... 29.8 mg/kg	50 g
RTC-CRM922-050	Soil (Loam) - PCBs Real-world waste collected from a site in the Western United States. The sample was certified by USEPA SW846, 3 <sup>rd</sup> edition Method 3540A/8081 and is suitable for use by these and other similar methods. Certified value Aroclor 1016 ..... 8.30 mg/kg	50 g
RTC-CRM923-050	Soil (Sandy loam) - PCBs Real-world waste collected from a site in the Western United States. The sample was certified by USEPA SW846, 3 <sup>rd</sup> edition Method 3540A/8081 and is suitable for use by these and other similar methods. Certified value BL923 Aroclor 1254 ..... 5.47 mg/kg	50 g
RTC-CRM924-050	Soil (Silt loam) - PCBs Certified value Lot P76 Aroclor 1242 ..... 8.27 mg/kg	50 g
<b>New</b> RTC-CRM927-050	Soil (Clay loam) - PCBs The certified value was determined by USEPA SW846 (3rd edition) Methods 8081A and 8082. The sample is suitable for use by these and other similar methods. Certified value Lot 002392 Aroclor 1242 ..... 7.03 mg/kg	50 g
<b>New</b> RTC-CRM961-050	Clay soil - PCBs Certified values Lot 013366 PCBs, total ..... 3,100 ± 516 µg/kg 2,4,4'-Trichlorobiphenyl (PCB 28) ..... 135 ± 19.8 µg/kg 2,2',5,5'-Tetrachlorobiphenyl (PCB 52) ..... 85.9 ± 18.2 µg/kg 3,3',4,4'-Tetrachlorobiphenyl (PCB 77) ..... 223 ± 31.5 µg/kg 3,4,4',5-Tetrachlorobiphenyl (PCB 81) ..... 205 ± 35.8 µg/kg 2,2',4,5,5'-Pentachlorobiphenyl (PCB 101) ..... 106 ± 11.0 µg/kg 2,3,3',4,4'-Pentachlorobiphenyl (PCB 105) ..... 147 ± 18.5 µg/kg 2,3',4,4',5-Pentachlorobiphenyl (PCB 118) ..... 173 ± 19.9 µg/kg 2,3',4,4',5'-Pentachlorobiphenyl (PCB 123) ..... 170 ± 24.0 µg/kg 2,3,4,4',5-Pentachlorobiphenyl (PCB 114) ..... 183 ± 28.9 µg/kg 3,3',4,4',5-Pentachlorobiphenyl (PCB 126) ..... 213 ± 26.6 µg/kg 2,2',3,4,4',5'-Hexachlorobiphenyl (PCB 138) ..... 130 ± 22.8 µg/kg 2,2',4,4',5,5'-Hexachlorobiphenyl (PCB 153) ..... 137 ± 18.5 µg/kg 2,3',4,4',5,5'-Hexachlorobiphenyl (PCB 167) ..... 236 ± 43.7 µg/kg 3,3',4,4',5,5'-Hexachlorobiphenyl (PCB 169) ..... 124 ± 15.5 µg/kg 2,2',3,4,4',5,5'-Heptachlorobiphenyl (PCB 180) ..... 116 ± 11.6 µg/kg 2,3,3',4,4',5,5'-Heptachlorobiphenyl (PCB 189) ..... 247 ± 60.2 µg/kg PCB (156)+(157) ..... 370 ± 4.59 µg/kg	50 g

<b>New</b> RTC-CRM304-030	Soil - BETX This soil is typical of that found in the backfill surrounding a leaking underground diesel storage tank (LUST). The sample has been analyzed by a minimum of 20 laboratories to meet the requirements specified by the IPA/AALA RM-03, ISO Guides 34 and 35. The soil was certified by USEPA SW846, 3rd edition Method 5030A and 8020A or 8040B and is suitable for use by these and other similar methods. Certified values Lot 002520 Benzene.....3.57 mg/kg Ethylbenzene .....8.73 mg/kg Toluene.....3.84 mg/kg m+p-Xylene.....2.43 mg/kg o-Xylene ..... 2.40 mg/kg Xylene, total ..... 7.02 mg/kg Gasoline range organics (C6-C12) ..... 65.5 mg/kg	30 g
<b>New</b> RTC-CRM305-030	Silt loam - BETX The sample was certified by USEPA SW846, 3rd edition Method 5030A and 8020A or 8240B and is suitable for use by these and other similar methods. Certified values Lot 010406 Benzene.....57.5 mg/kg Ethylbenzene .....3.49 mg/kg Methyl tert-butyl ether (MTBE).....31.6 mg/kg Toluene.....15.5 mg/kg m+p-Xylene ..... 42.7 mg/kg o-Xylene ..... 23.2 mg/kg Xylene, total ..... 66.7 mg/kg Gasoline range organics (C6-C12) ..... 235 mg/kg	30 g
<b>New</b> RTC-CRM306-030	Soil - BETX This soil is typical of that found in the backfill surrounding a leaking underground diesel storage tank (LUST). The soil was certified by USEPA SW846, 3rd edition Method 5030A and 8021B or 8260B and is suitable for use by these and other similar methods. Certified values Lot 010590 Benzene.....20.2 mg/kg Ethylbenzene .....40.1 mg/kg Methyl tert-butyl ether (MTBE).....9.45 mg/kg Toluene.....51.4 mg/kg o-Xylene ..... 33.6 mg/kg m+p Xylene ..... 30.4 mg/kg Total Xylene ..... 69.5 mg/kg	30 g
RTC-CRM307-030	Soil - BTEX This soil is typical of that found in the backfill surrounding a leaking underground diesel storage tank (LUST). The soil was certified by USEPA SW846, 3rd edition Method 5030A and 8021B or 8260B and is suitable for use by these and other similar methods. The value for GRO was determined by GC method 8015M. Certified values Lot 015190 Benzene.....4240 µg/kg Ethylbenzene .....6540 µg/kg MTBE.....5430 µg/kg Napthalene .....3560 µg/kg Toluene.....2790 µg/kg 1,2,4-Trimethylbenzene .....2190 µg/kg 1,3,5-Trimethylbenzene ..... 1750 µg/kg m+p-Xylene ..... 6300 µg/kg o-Xylene ..... 3190 µg/kg Total Xylene ..... 9820 µg/kg Total purgeable hydrocarbons ..... 65500 µg/kg	30 g
RTC-CRM308-030	Soil - BTEX Certified values Lot 014714 Benzene.....4150 µg/kg 1,2-Dichlorobenzene.....6400 µg/kg 1,3-Dichlorobenzene.....1500 µg/kg 1,4-Dichlorobenzene.....5670 µg/kg Ethylbenzene .....1550 µg/kg Methyl tert-butyl ether (MTBE).....4720 µg/kg Napthalene .....3200 µg/kg Toluene ..... 4940 µg/kg 1,2,4-Trimethylbenzene ..... 5100 µg/kg 1,3,5-Trimethylbenzene ..... 2690 µg/kg m+p-Xylene ..... 5170 µg/kg o-Xylene ..... 2320 µg/kg Xylene, total ..... 7390 µg/kg Total purgeable Hydrocarbons ..... 67300 µg/kg	30 g

## Soils

Code	Product	Unit
<b>New</b> RTC-CRM309-030	Soil - BETX Certified values Lot 013253 Benzene .....2300 µg/kg Ethylbenzene .....6130 µg/kg Methyl tert-butyl ether (MTBE) .....5070 µg/kg Toluene .....5190 µg/kg m+p-Xylene ..... 7240 µg/kg o-Xylene ..... 6440 µg/kg Xylenes, total ..... 12100 µg/kg	30 g
<b>New</b> ERM-CC017	Mineral oil contaminated soil - Total petrol hydrocarbons (TPH) To be used for verification of analytical procedures for the determination of TPH in soils and sediments according to ISO 16703:2004 by GC/FID and for quality control in analytical laboratories. Certified values Total petrol hydrocarbons (TPH) .....6.6 ± 0.5 g/kg	81 g
<b>New</b> ERM-CC016	Waste - Total petrol hydrocarbons (TPH) The intended purpose of reference material ERM <sup>®</sup> -CC016 is the verification of analytical procedures for the determination of mineral oil hydrocarbons in waste and soils according to EN 14039 and ISO 16703 by GC-FID and for quality control in analytical laboratories. Certified value Total petrol hydrocarbons (TPH) .....3010 ± 220 mg/kg	83 g
<b>New</b> LGCQC3013	Loamy sand soil 2 - Total Petroleum Hydrocarbons Quality control reference material The method used for the determination of TPH was based on the ISO 16703:2004(E) Standard Soil Quality-Determination of content of hydrocarbons in the range of C10 to C40 by gas chromatography. Indicative values Textural classification Sand: 2.00-0.063 mm ..... 87 % Silt: 0.063 – 0.002 ..... 6 % Clay: < 0.002 mm ..... 7 % Constituent Total Petroleum Hydrocarbons (C10-C40) .....4100 mg/kg	100 g
RTC-CRM352-100	Soil (Loamy sand) - Total petroleum hydrocarbons (TPH) This soil is typical of that found in the backfill surrounding a leaking underground diesel storage tank (LUST). The soil was certified by USEPA 418.1. Certified value TPH ..... 1130 mg/kg	100 g
RTC-CRM350-100	Soil (Sandy loam) - Total petroleum hydrocarbons (TPH) This soil is typical of that found in the backfill surrounding a leaking underground diesel storage tank (LUST). The soil was certified by USEPA 418.1. Certified value Lot 013246 TPH ..... 8300 mg/kg	100 g
RTC-CRM353-100	Soil (Sandy loam) - Total petroleum hydrocarbons (TPH) This soil is typical of that found in the backfill surrounding a leaking underground diesel storage tank (LUST). The soil was certified by USEPA 418.1. Certified value Lot 012182 TPH ..... 2200 mg/kg	100 g
RTC-CRM355-100	Soil (Sandy loam) - Total petroleum hydrocarbons (TPH) This soil is typical of that found in the backfill surrounding a leaking underground diesel storage tank (LUST). The soil was certified by USEPA 418.1. Certified value Lot JC355 TPH ..... 7040 mg/kg	100 g
RTC-CRM356-100	Soil (Sandy loam) - Total petroleum hydrocarbons (TPH) This soil is typical of that found in the backfill surrounding a leaking underground diesel storage tank (LUST). The soil was certified by USEPA 418.1. Certified value Lot GK356 TPH .....3810 mg/kg Diesel Range Organics (C10-C20) ..... 611 mg/kg	100 g
RTC-CRM358-100	Soil (Sandy loam) - Total petroleum hydrocarbons (TPH) The value was determined by USEPA Method 8015M, 418.1, Total Recoverable Petroleum Hydrocarbons. Certified value TPH ..... 3650 mg/kg	100 g

Code	Product	Unit
RTC-CRM359-100	Soil (Sandy loam) - Total petroleum hydrocarbons (TPH) (as diesel) Certified value Lot 015649 Diesel range organics, C10-C28 .....982 mg/kg      Total EPH ..... 1110 mg/kg Diesel Range Organics (DRO) ..... 1030 mg/kg	100 g
RTC-CRM360-100	Soil (Sandy loam) - Total petroleum hydrocarbons (TPH) as (30/40WT motor) oil The reference value for TPH was determined by USEPA SW846 (3rd edition) Method 8015B and 8015M. TPH source is 30/40WT motor oil. Certified values Lot 013220 Residual Range Organics (RRO) C28-C35.....414 mg/kg	100 g
RTC-CRM357-100	Soil (Sandy loam) - Total petroleum hydrocarbons (TPH) This soil is typical of that found in the backfill surrounding a leaking underground diesel storage tank (LUST). The soil was certified by USEPA 418.1. Certified value Lot JF357 TPH ..... 3220 mg/kg	100 g
<b>New</b> RTC-CRM372-100	Sandy soil - Total petroleum hydrocarbons (TPH) Certified values Lot 014092 Total Petroleum Hydrocarbon.....2020 mg/kg      C10 to C12 Aromatics..... 17.1 mg/kg C10 to C12 Aliphatics .....70.9 mg/kg      C12 to C16 Aromatics..... 112 mg/kg C12 to C16 Aliphatics .....314 mg/kg      C16 to C21 Aromatics..... 96.2 mg/kg C16 to C21 Aliphatics .....209 mg/kg      C21 to C35 Aromatics..... 39.4 mg/kg C21 to C35 Aliphatics .....460 mg/kg	100 g
<b>New</b> RTC-CRM373-100	Loamy Soil - TPH Banded The soil is to be extracted and analyzed using an appropriate extraction and analytical method for TPH, assuming a high concentration sample. The values given are based on GC-FID/PID and column separation methods for aliphatics and aromatics. Certified values Lot 014476 C10 to C12 Aliphatics .....93.6 ± 10.5 mg/kg C12 to C16 Aliphatics .....302 ± 23.2 mg/kg C16 to C21 Aliphatics .....205 ± 10.3 mg/kg C21 to C35 Aliphatics .....539 ± 30.9 mg/kg C10 to C12 Aromatics .....36.8 ± 8.15 mg/kg C12 to C16 Aromatics .....151 ± 24.0 mg/kg C16 to C21 Aromatics .....86.8 ± 11.1 mg/kg C21 to C35 Aromatics .....26.7 ± 6.50 mg/kg Total Petroleum Hydrocarbons ..... 1050 ± 101 mg/kg      (TPH), (C6-C35)	100 g
<b>New</b> RTC-CRM371-100	Loamy Soil - TPH Banded The soil is to be extracted and analyzed using an appropriate extraction and analytical method for TPH, assuming a high concentration sample. Certified values Lot 013042 C10 to C12 Aliphatics ..... 280 ± 14.8 mg/kg C12 to C16 Aliphatics ..... 764 ± 42.1 mg/kg C16 to C21 Aliphatics ..... 574 ± 30.4 mg/kg C21 to C35 Aliphatics ..... 63.4 ± 6.89 mg/kg C10 to C12 Aromatics ..... 60.0 ± 6.70 mg/kg C12 to C16 Aromatics ..... 210 ± 35.9 mg/kg C16 to C21 Aromatics ..... 168 ± 12.4 mg/kg C21 to C35 Aromatics ..... 23.6 ± 4.78 mg/kg Total Petroleum Hydrocarbons(C6-C35) (TPH) ..... 1,570 ± 286 mg/kg	100 g
RTC-CRM500-030	Soil (Sandy loam) - Gasoline The sample was certified by USEPA Method 8015B, and is suitable for use by this and other similar methods. Certified value Benzene.....9.03 mg/kg      m+p-Xylene ..... 25.3 mg/kg Ethylbenzene .....6.16 mg/kg      o-Xylene ..... 9.23 mg/kg Naphthalene .....1.51 mg/kg      Xylene, total ..... 46.3 mg/kg Toluene.....30.1 mg/kg      Gasoline range organics (C5-C10) ..... 334 mg/kg	30 g
<b>New</b> RTC-CRM501-030	Soil (Loamy clay) - BTEX/GRO The sample was certified by USEPA Method 8015B, and is suitable for use by this and other similar methods. Certified values Lot 010589 Benzene.....10.5 mg/kg      o-Xylene ..... 12.6 mg/kg Ethylbenzene .....9.63 mg/kg      Xylene, total ..... 46.3 mg/kg Toluene.....42.6 mg/kg      Gasoline range organics (C6-C12) ..... 480 mg/kg m+p-Xylene.....34.2 mg/kg	30 g

Code	Product	Unit
RTC-CRM627-030	Soil (Sandy loam) - Volatile organic analytes (low level)	30 g
	The following sample was certified using USEPA SW846, 3rd edition, method 8260, and is ideal for methanol extraction	
	Certified values	
	Benzene.....56.5 µg/kg	Styrene..... 39 µg/kg
	Carbon tetrachloride .....44.8 µg/kg	1,1,1,2-Tetrachloroethane..... 99.8 µg/kg
	Chlorobenzene .....52.6 µg/kg	1,1,2,2-Tetrachloroethane..... 87.8 µg/kg
	1,2-Dichlorobenzene.....40.9 µg/kg	Toluene..... 75.7 µg/kg
	1,3-Dichlorobenzene.....70.4 µg/kg	1,2,4-Trichlorobenzene .....48.9 µg/kg
	1,4-Dichlorobenzene.....74.9 µg/kg	1,1,2-Trichloroethane ..... 71.3 µg/kg
	1,2-Dichloroethane .....60.7 µg/kg	1,2,3-Trichloropropane..... 53 µg/kg
	Ethylbenzene.....88.4 µg/kg	1,2,4-Trimethylbenzene ..... 90.5 µg/kg
	Hexachloroethane.....147 µg/kg	m+p-Xylene ..... 67.3 µg/kg
	Methyl chloride (Chloromethane).....23.3 µg/kg	o-Xylene ..... 49.9 µg/kg
	Methyl tert-butyl ether (MTBE).....121 µg/kg	Xylene, total ..... 117 µg/kg
RTC-CRM633-030	Soil (Loamy sandy) - Volatile organic analytes (low level)	30 g
	Analytical data for certification was obtained using USEPA SW846, 3rd edition method 8260 (VOCs by GC/MS). The sample is intended for use in analytical systems using this and related methods.	
	Certified values	
	Lot 015216	
	Acetone.....411 µg/kg	2-Hexanone ..... 422 µg/kg
	Benzene.....52.2 µg/kg	Isopropylbenzene ..... 106 µg/kg
	Bromobenzene .....153 µg/kg	Methyl bromide (Bromomethane) ..... 79.3 µg/kg
	Bromodichloromethane .....65.1 µg/kg	Methyl chloride (Chloromethane)..... 60.2 µg/kg
	2-Butanone (Methyl ethyl ketone, MEK).....330 µg/kg	Methyl tert-butyl ether (MTBE) ..... 82.3 µg/kg
	Carbon tetrachloride .....145 µg/kg	Naphthalene.....94.8 µg/kg
	Chlorobenzene .....158 µg/kg	Styrene ..... 81.9 µg/kg
	Chloroethane .....92.2 µg/kg	1,1,1,2-Tetrachloroethane..... 120 µg/kg
	Chloroform .....120 µg/kg	Tetrachloroethylene ..... 131 µg/kg
	1,2-Dibromo-3-chloropropane (DBCP).....98.4 µg/kg	Toluene ..... 86.2 µg/kg
	Dibromochloromethane .....183 µg/kg	1,2,4-Trichlorobenzene ..... 83.8 µg/kg
	1,2-Dibromoethane (EDB).....158 µg/kg	1,1,1-Trichloroethane ..... 38.8 µg/kg
	Dibromomethane .....27.0 µg/kg	1,1,2-Trichloroethane ..... 127 µg/kg
	1,2-Dichlorobenzene.....49.9 µg/kg	Trichloroethene (Trichloroethylene) ..... 188 µg/kg
	1,3-Dichlorobenzene.....68.3 µg/kg	Trichlorofluoromethane ..... 102 µg/kg
	1,4-Dichlorobenzene.....40.0 µg/kg	1,2,3-Trichloropropane..... 134 µg/kg
	1,2-Dichloroethane .....31.6 µg/kg	1,2,4-Trimethylbenzene ..... 132 µg/kg
	1,1-Dichloroethylene .....132 µg/kg	1,3,5-Trimethylbenzene ..... 190 µg/kg
	cis-1,2-Dichloroethylene .....81.3 µg/kg	Vinyl chloride.....63.2 µg/kg
	1,2-Dichloropropane .....37.2 µg/kg	m+p-Xylene ..... 110 µg/kg
	cis-1,3-Dichloropropene .....183 µg/kg	o-Xylene ..... 47.7 µg/kg
	trans-1,2-Dichloroethylene.....49.6 µg/kg	Xylene, total ..... 158 µg/kg
	Ethylbenzene .....56.6 µg/kg	
<b>New</b> RTC-CRM636-025	Loamy sand 4 - Volatile organic analytes	25 g
	Certified values	
	Lot 016530	
	Acrolein.....1080 µg/kg	Ethylbenzene ..... 6150 µg/kg
	Acetone.....27900 µg/kg	2-Hexanone ..... 11700 µg/kg

RTC-CRM112-100	Soil (Sandy loam) - Phenols	100 g
	Soil contaminated with phenols from a wood treatment site in the Rocky Mountain Region of the United States. The phenol values in the sample were certified by USEPA SW846, 3rd edition Analysis Method 8041 which describes open-tubular, capillary column gas chromatography procedures for the analysis of phenols, using both single-column and dual column/dual-detector approaches. The sample is suitable for these and other similar methods.

## WEPAL soil reference materials

The Wageningen Evaluating Programmes for Analytical Laboratories (WEPAL) runs international sample exchange programmes for continuous quality control of analytical data as produced by chemical laboratories. There are almost 700 laboratories who take part in one or more of WEPAL's regular ring-tests programmes. The WEPAL soil reference samples are supplied with certificates including consensus values, indicative values and values for information, based on the results of the proficiency programme. The certificates are available on request.

For each soil there are values for several sample preparation methods e.g.:

- Real totals
- Acid extractable (so-called totals)
- Aqua Regia (ISO 11466)
- Extraction with boiling 2 M HNO<sub>3</sub>
- Extraction with 0.1 M NaNO<sub>3</sub>
- Extraction with 0.01 M CaCl<sub>2</sub> 1:10
- Extraction with 1 M NH<sub>4</sub>NO<sub>3</sub> 1:2.5 (w/v) (DIN 19730)
- Extraction with 1 M NH<sub>4</sub>acetate
- Extraction with BaCl<sub>2</sub>
- Soil characteristics

## Sewage sludges

Code	Product	Unit
<b>New</b> ERM-CC136	<b>Sewage sludge - Extractable and total metals</b> An aged sewage sludge collected from a disused sewage works site at Heathrow in London, UK. Dried, sterilised and ground to a powder. The extractable metal content refers to metals soluble in Aqua Regia using methods based on ISO11466 (1995). Assessed values Al..... 15100 mg/kg      Fe ..... 22200 mg/kg      Ni ..... 130 mg/kg Ba ..... 633 mg/kg      K ..... 2030 mg/kg      Pb ..... 341 mg/kg Co ..... 23.2 mg/kg      Mg ..... 2820 mg/kg      Zn ..... 890 mg/kg Cr ..... 399 mg/kg      Mn ..... 544 mg/kg Cu ..... 464 mg/kg      Na ..... 397 mg/kg	25 g
LGC6181	<b>Sewage sludge - Extractable metals</b> The extractable metal content refers to metals soluble in Aqua Regia using methods based on ISO11466 (1995). Certified values Ag ..... 55 mg/kg      Cr ..... 78 mg/kg      Ni ..... 45 mg/kg As ..... 7.8 mg/kg      Fe ..... 40300 mg/kg      Pb ..... 105 mg/kg Cd ..... 5.8 mg/kg      Hg ..... 4.9 mg/kg      V ..... 20 mg/kg Cu ..... 354 mg/kg      Mn ..... 454 mg/kg      Zn ..... 1100 mg/kg	100 g
LGC6182	<b>Sewage sludge - PAHs</b> A digested sewage sludge of mixed origin was taken from a city water treatment plant immediately after discharge from a digestion tank. Assessed Values Acenaphthene..... 0.10 mg/kg      Chrysene ..... 0.84 mg/kg Anthracene ..... 0.17 mg/kg      Fluoranthene ..... 1.81 mg/kg Benzo(a)anthracene ..... 0.66 mg/kg      Fluorene ..... 0.19 mg/kg Benzo(b)fluoranthene ..... 0.95 mg/kg      Indeno(1,2,3cd)pyrene ..... 0.58 mg/kg Benzo(k)fluoranthene ..... 0.45 mg/kg      Naphthalene ..... 0.33 mg/kg Benzo(ghi)perylene ..... 0.62 mg/kg      Phenanthrene ..... 1.04 mg/kg Benzo(a)pyrene ..... 0.59 mg/kg      Pyrene ..... 1.53 mg/kg Indicative values for Acenaphthylene, Dibenzo(a,h)anthracene	30 g
LGC6184	<b>Sewage sludge - PCBs</b> A digested sewage sludge of mixed origin, taken from a city water treatment plant in the Czech Republic, immediately after discharge from a digestion tank. Certified values PCB 101 ..... 37 µg/kg      PCB 118 ..... 17 µg/kg      PCB 153 ..... 112 µg/kg Assessed values PCB 28 ..... 28 µg/kg      PCB 149 ..... 63 µg/kg      PCB 187 ..... 35 µg/kg PCB 52 ..... 14 µg/kg      PCB 170 ..... 37 µg/kg      PCB 194 ..... 13 µg/kg PCB 138 ..... 77 µg/kg      PCB 180 ..... 78 µg/kg Indicative values for PCB 31, PCB 77, PCB 110	30 g
BCR-145R	<b>Sewage sludge (mixed origin) - Trace elements</b> Certified values Cd ..... 3.50 mg/kg      Hg ..... 2.01 mg/kg      Pb ..... 286 mg/kg Co ..... 5.61 mg/kg      Mn ..... 156 mg/kg      Zn ..... 2122 mg/kg Cu ..... 696 mg/kg      Ni ..... 247 mg/kg Indicative value for Cr <u>Aqua Regia soluble content</u> Certified values Cr ..... 307 mg/kg      Ni ..... 251 mg/kg      Zn ..... 2137 mg/kg Cu ..... 707 mg/kg      Pb ..... 282 mg/kg Indicative values for Cd, Co, Hg, Mn	40 g
BCR-146R	<b>Sewage sludge (industrial origin) - Trace elements</b> Certified values Cd ..... 18.8 mg/kg      Cu ..... 838 mg/kg      Ni ..... 69.7 mg/kg Co ..... 7.39 mg/kg      Hg ..... 8.62 mg/kg      Pb ..... 609 mg/kg Cr ..... 196 mg/kg      Mn ..... 324 mg/kg      Zn ..... 3061 mg/kg <u>Aqua regia soluble content</u> Certified values Cd ..... 18.5 mg/kg      Cu ..... 831 mg/kg      Ni ..... 65.0 mg/kg Co ..... 6.5 mg/kg      Hg ..... 8.39 mg/kg      Pb ..... 583 mg/kg Cr ..... 174 mg/kg      Mn ..... 298 mg/kg      Zn ..... 3043 mg/kg	40 g
BCR-597	<b>Sewage sludge - Chromium</b> Certified value Cr ..... 203 mg/kg	40 g

RTC-CRM055-050	Sludge - Metals The values were determined by USEPA SW846 3050(Nitric Acid/Hot Plate), 3051(Nitric Acid/Microwave), 7000 series(AA), 6010(ICP) and Dutch standard methods (NEN 56.; 57.; 64.; and 66.; series) after total digestion using predominantly nitric/hydrochloric acid mixture (Aqua Regia) in pressurised microwave digester units. The sample is suitable for use by these, or other similar digestion and analytical procedures. Certified values Lot 015148 Ag .....64.7 mg/kg      Mo ..... 133 mg/kg Al.....14800 mg/kg      Na..... 758 mg/kg As.....229 mg/kg      Ni..... 163 mg/kg B .....110 mg/kg      Pb..... 154 mg/kg Ba .....765 mg/kg      Sb..... 75.3 mg/kg Be .....167 mg/kg      Se..... 162 mg/kg Ca .....47200 mg/kg      Sn..... 148 mg/kg Cd .....60.6 mg/kg      Sr..... 445 mg/kg Co .....97.0 mg/kg      Tl..... 82.0 mg/kg Cr .....289 mg/kg      V..... 245 mg/kg Cu .....482 mg/kg      Zn ..... 1240 mg/kg Fe.....20100 mg/kg      pH..... 7.16 Hg .....12.5 mg/kg      Phosphorus (total)..... 2.14 Wt% K .....2420 mg/kg      Residue, total (TS)..... 86.4 Wt% Mn .....693 mg/kg      Residue-volatile ..... 56.2 Wt% Mg .....9210 mg/kg      Sulfur..... 11500 mg/kg	50 g
NIST-2781	Domestic sludge - Metals Certified values As..... 7.82 mg/kg      Mo .....46.7 mg/kg      Se ..... 16.0 mg/kg Cd ..... 12.78 mg/kg      N..... 4.78 %      Zn..... 1273 mg/kg Cu ..... 627.4 mg/kg      Ni.....80.2 mg/kg Hg ..... 3.64 mg/kg      Pb.....202.1 mg/kg Indicative values for Ag, Al, Ca, Cr, Fe, K, Mg, Na, P, Si, Ti	40 g
NIST-2782	Industrial sludge - Leachable and total metals Obtained from an industrial site in northern New Jersey, USA where pharmaceutical research is carried out. Certified values As..... 166 mg/kg      Hg..... 1.10 mg/kg      Se ..... 0.44 mg/kg Cd ..... 4.17 mg/kg      Mo .....10.07 mg/kg      Zn..... 1254 mg/kg Cr ..... 109 mg/kg      Ni.....154.1 mg/kg Cu ..... 2594 mg/kg      Pb.....574 mg/kg Indicative values for a wide range of additional elements	70 g

## WEPAL sewage sludge and compost reference materials

The Wageningen Evaluating Programmes for Analytical Laboratories (WEPAL) runs international sample exchange programmes for continuous quality control of analytical data as produced by chemical laboratories. There are almost 700 laboratories who take part in one or more of WEPAL's regular ring-tests programmes.

The WEPAL sewage sludge and compost reference samples are supplied with certificates including consensus values, indicative values and values for information, based on the results of the proficiency programme. The certificates are available on request.

<b>New</b>	WEPAL-MARSEP-202	Compost - Inorganic composition (please ask for detailed information)	20 g
<b>New</b>	WEPAL-MARSEP-205	Compost - Inorganic composition (please ask for detailed information)	20 g
<b>New</b>	WEPAL-MARSEP-207	Sewage sludge - Inorganic composition (please ask for detailed information)	20 g
<b>New</b>	WEPAL-MARSEP-208	Sewage sludge - Inorganic composition (please ask for detailed information)	20 g
<b>New</b>	WEPAL-MARSEP-217	Sewage sludge - Inorganic composition (please ask for detailed information)	20 g
<b>New</b>	WEPAL-MARSEP-223	Compost - Inorganic composition (please ask for detailed information)	20 g
<b>New</b>	WEPAL-MARSEP-241	Champost - Inorganic composition (please ask for detailed information)	20 g
<b>New</b>	WEPAL-MARSEP-247	Sewage sludge - Inorganic composition (please ask for detailed information)	20 g
<b>New</b>	WEPAL-MARSEP-249	Sewage sludge - Inorganic composition (please ask for detailed information)	20 g

<b>New</b> ERM-CD100	Wood - Trace elements and pentachlorophenol (PCP)	74 g
	The certified reference material ERM-CD100 is intended for the verification of a correct implementation of standardised analytical methods for waste wood characterisation such as GEN/TR 14823 for the determination of PCP or digestion methods according to EN 13657 for the determination of trace elements. Furthermore, it can be used for the validation of modified or new analytical procedures.	
	Arsenic (As) .....	3.1 ± 0.5 mg/kg
	Cadmium (Cd) .....	3.02 ± 0.24 mg/kg
	Chromium (Cr) .....	36.4 ± 2.6 mg/kg
	Copper (Cu) .....	22.9 ± 1.7 mg/kg

BCR-596	Aquatic plant ( <i>trapa natans</i> ) - Chromium Certified value Cr ..... 36.3 mg/kg	25 g
BCR-414	Plankton - Trace elements Certified values As ..... 6.82 µg/g Cd ..... 0.383 µg/g Cr ..... 23.8 µg/g Cu ..... 29.5 µg/g Hg ..... 0.276 µg/g Mn ..... 299 µg/g Ni ..... 18.8 µg/g Pb ..... 3.97 µg/g Se ..... 1.75 µg/g V ..... 8.10 µg/g Zn ..... 111.6 µg/g	5 g

## Plants

Code	Product	Unit
BCR-670	Aquatic plant ( <i>Lemna minor</i> ) - Trace elements Certified values Ce ..... 0.99 mg/kg      La ..... 0.487 mg/kg      Tb ..... 14.0 µg/kg Dy ..... 79 µg/kg      Lu ..... 6.3 µg/kg      Th ..... 0.159 mg/kg Er ..... 44.0 µg/kg      Nd ..... 0.473 mg/kg      Tm ..... 5.70 µg/kg Eu ..... 23.2 µg/kg      Pr ..... 0.121 mg/kg      U ..... 82 µg/kg Gd ..... 98 µg/kg      Sc ..... 0.191 mg/kg      Y ..... 0.46 mg/kg Ho ..... 15.8 µg/kg      Sm ..... 94 µg/kg      Yb ..... 40 µg/kg Indicative values for : As, Cd, Cr, Cs, Cu, Fe, Mo, Ni, Pb, Sb, Se and Zn	10 g
NIES03	Chlorella (green algae) - Trace elements The material was prepared from spray-dried chlorella ( <i>Chlorella pyrenoidosa</i> ) obtained from a commercial source. Certified values Ca ..... 0.49 %      Fe ..... 0.185 %      Mn ..... 69 µg/g Co ..... 0.87 µg/g      K ..... 1.24 %      Sr ..... 40 µg/g Cu ..... 3.5 µg/g      Mg ..... 0.33 %      Zn ..... 20.5 µg/g Indicative values for Cd, P, Pb, Sc	36 g
NIST-4359	Seaweed - Radioactivity NIST-4359 contains low levels of anthropogenic and natural radioactivity. Certified values for <sup>40</sup> K, <sup>137</sup> Cs, <sup>210</sup> Pb, <sup>210</sup> Po, <sup>228</sup> Ra, <sup>232</sup> Th, <sup>234</sup> U, <sup>235</sup> U, <sup>238</sup> U, <sup>238</sup> Pu, <sup>239</sup> Pu, <sup>239,240</sup> Pu, <sup>241</sup> Am Indicative values for further isotopes	300 g
<b>New</b> NIES26	Algae - Microcystines, trace elements Certified values Microcystins <sup>1)</sup> ..... 4.5 ± 0.4 mg/g Ca ..... 0.56 ± 0.02 %      Mg ..... 0.44 ± 0.03 %      Sr ..... 4.5 ± 0.3 mg/kg Fe ..... 0.086 ± 0.006 %      Na ..... 0.12 ± 0.02 %      Zn ..... 13 ± 2 mg/kg K ..... 0.90 ± 0.05 %      Mn ..... 39 ± 3 mg/kg Indicative values for S, P, Co, Cu, Ni, Pb <sup>1)</sup> The microcystins were determined in accordance with the manual for examination of substances requiring investigation by the Ministry of Environment, Japan (March 2003). This method followed those in reports for the determination of total microcystins. The microcystins were oxidatively decomposed to MMPB, which was determined using HPLC-mass spectrometry, or gas chromatography-mass spectrometry after esterification.	54 mg
IAEA-392	Algae - Trace elements Algae material (type: <i>Scenedesmus obliquus</i> 208) Recommended values Ca ..... 2680 ± 67.4 mg/kg      Mg ..... 2376 ± 78.8 mg/kg      Ni ..... 0.571 ± 0.028 mg/kg Cu ..... 23.2 ± 1.74 mg/kg      Mn ..... 67.5 ± 1.54 mg/kg      Pb ..... 0.574 ± 0.019 mg/kg Fe ..... 497 ± 13.6 mg/kg      Na ..... 680 ± 23.0 mg/kg      Zn ..... 128 ± 2.0 mg/kg Indicative values for As, Cd, Cr, K	20 g
IAEA-413	Algae - Trace elements Algae material (type: <i>Chlorella Boehm</i> ) Recommended values (based on dry mass) As ..... 127 ± 6.6 mg/kg      Fe ..... 1370 ± 39 mg/kg      Ni ..... 113 ± 4.9 mg/kg Ca ..... 3143 ± 112 mg/kg      K ..... 10740 ± 270 mg/kg      Pb ..... 242 ± 7 mg/kg Cd ..... 204 ± 8.5 mg/kg      Mg ..... 4058 ± 117 mg/kg      Zn ..... 169 ± 3.3 mg/kg Co ..... 4.24 ± 0.25 mg/kg      Mn ..... 158 ± 3.4 mg/kg Cr ..... 377 ± 14 mg/kg      Na ..... 375 ± 20 mg/kg Indicative values for further elements	10 g
<b>Miscellaneous</b>		
LGC7162	Strawberry leaves - Trace elements The raw material was collected from a private farm in the Czech Republic. The mixture was cut and jet milled to pass a 250 µm nylon sieve. The resulting powder was homogenised, separated in 20 g portions and placed in 60 mL bottles. Certified Values Ca ..... 1.53 g/100 g      Ba ..... 107 mg/kg      Mo ..... 0.32 mg/kg Mg ..... 0.377 g/100 g      Cd ..... 0.17 mg/kg      Hg ..... 0.027 mg/kg N ..... 2.01 g/100 g      Co ..... 0.47 mg/kg      Ni ..... 2.6 mg/kg P ..... 0.260 g/100 g      Cr ..... 2.15 mg/kg      Sr ..... 64 mg/kg K ..... 1.96 g/100 g      Fe ..... 818 mg/kg      Zn ..... 24 mg/kg S ..... 0.174 g/100 g      Pb ..... 1.8 mg/kg As ..... 0.28 mg/kg      Mn ..... 171 mg/kg	20 g
NIST-1573a	Tomato leaves - Trace elements Certified values Al ..... 598 mg/kg      Cu ..... 4.70 mg/kg      P ..... 0.216 % As ..... 0.112 mg/kg      Hg ..... 0.034 mg/kg      Rb ..... 14.89 mg/kg B ..... 33.3 mg/kg      K ..... 2.70 %      Sb ..... 0.063 mg/kg Cd ..... 1.52 mg/kg      Mn ..... 246 mg/kg      Se ..... 0.054 mg/kg Ca ..... 5.05 %      N ..... 3.03 %      V ..... 0.57 mg/kg Co ..... 0.57 mg/kg      Na ..... 136 mg/kg      Zn ..... 82 mg/kg Cr ..... 1.99 mg/kg      Ni ..... 1.59 mg/kg Indicative values for Eu, Gd, Mg, Pb, S, Sc, Sm, Sr, Th, U	50 g

Code	Product	Unit
NIST-RM 8491	Sugar cane bagasse - Whole biomass feedstocks This Reference Material (RM) is intended primarily for use in evaluating analytical methods for the determination of summative composition of lignocellulosic materials. Reference concentration values for the following constituents are given: Ash, 95% Ethanol extractives, Acid soluble lignin, Acid insoluble lignin, Total lignin. Glucuronic acid, Arabinan, Xylan, Mannan, Galactan and Glucan.	50 g
NIST-RM 8492	Eastern cottonwood - Whole biomass feedstocks This Reference Material (RM) is intended primarily for use in evaluating analytical methods for the determination of summative composition of lignocellulosic materials. Reference concentration values for the following constituents are given: Ash, 95% Ethanol extractives, Acid soluble lignin, Acid insoluble lignin, Total lignin. Glucuronic acid, Arabinan, Xylan, Mannan, Galactan and Glucan.	50 g
NIST-RM 8493	Monterey pine - Whole biomass feedstocks This Reference Material (RM) is intended primarily for use in evaluating analytical methods for the determination of summative composition of lignocellulosic materials. Reference concentration values for the following constituents are given: Ash, 95% Ethanol extractives, Acid soluble lignin, Acid insoluble lignin, Total lignin. Glucuronic acid, Arabinan, Xylan, Mannan, Galactan and Glucan.	50 g
NIST-RM 8494	Wheat straw - Whole biomass feedstocks This Reference Material (RM) is intended primarily for use in evaluating analytical methods for the determination of summative composition of lignocellulosic materials. Reference concentration values for the following constituents are given: Ash, 95% Ethanol extractives, Acid soluble lignin, Acid insoluble lignin, Total lignin. Glucuronic acid, Arabinan, Xylan, Mannan, Galactan and Glucan.	50 g
BCR-482	Lichen - Trace elements Certified values Al..... 1103 mg/kg      Cr ..... 4.12 mg/kg      Ni ..... 2.47 mg/kg As..... 0.85 mg/kg      Cu..... 7.03 mg/kg      Pb ..... 40.9 mg/kg Cd ..... 0.56 mg/kg      Hg..... 0.48 mg/kg      Zn..... 100.6 mg/kg	15 g

## Plants

### WEPAL plant reference materials

The Wageningen Evaluating Programmes for Analytical Laboratories (WEPAL) runs international sample exchange programmes for continuous quality control of analytical data as produced by chemical laboratories. There are almost 700 laboratories who take part in one or more of WEPAL's regular ring-tests programmes.

The WEPAL plants reference samples are supplied with certificates including consensus values, indicative values and values for information, based on the results of the proficiency programme. The certificates are available on request.

	Code	Product	Unit
<b>New</b>	WEPAL-IPE-101	Coast cross (grass) / <i>Cynodon dactylon</i> - Inorganic composition (please ask for detailed information)	10 g
<b>New</b>	WEPAL-IPE-103	Banana (seeds) / <i>Musa paradisiaca</i> (seeds) - Inorganic composition (please ask for detailed information)	10 g
<b>New</b>	WEPAL-IPE-105	Elephant grass / <i>Pennisetum purpurem schum</i> - Inorganic composition (please ask for detailed information)	10 g
<b>New</b>	WEPAL-IPE-108	Parsley / <i>Petroselinum crispum</i> - Inorganic composition (please ask for detailed information)	10 g
<b>New</b>	WEPAL-IPE-110	Clover (Honey-stalk) / <i>Melilotus officinalis desr.</i> - Inorganic composition (please ask for detailed information)	10 g
<b>New</b>	WEPAL-IPE-111	Chive(s) / <i>Allium schoenoprasum l.</i> - Inorganic composition (please ask for detailed information)	10 g
<b>New</b>	WEPAL-IPE-113	Rosa (plant) / <i>Rosa l.</i> - Inorganic composition (please ask for detailed information)	10 g
<b>New</b>	WEPAL-IPE-114	Rosa (plant) / <i>Rosa l.</i> - Inorganic composition (please ask for detailed information)	10 g
<b>New</b>	WEPAL-IPE-115	Rosa (plant) / <i>Rosa l.</i> - Inorganic composition (please ask for detailed information)	10 g
<b>New</b>	WEPAL-IPE-116	Rosa (plant) / <i>Rosa l.</i> - Inorganic composition (please ask for detailed information)	10 g
<b>New</b>	WEPAL-IPE-117	Rosa (plant) / <i>Rosa l.</i> - Inorganic composition (please ask for detailed information)	10 g
<b>New</b>	WEPAL-IPE-118	Rosa (plant) / <i>Rosa l.</i> - Inorganic composition (please ask for detailed information)	10 g
<b>New</b>	WEPAL-IPE-119	Rosa (plant) / <i>Rosa l.</i> - Inorganic composition (please ask for detailed information)	10 g
<b>New</b>	WEPAL-IPE-120	Mushroom / <i>Agaricus bisporus</i> - Inorganic composition (please ask for detailed information)	10 g
<b>New</b>	WEPAL-IPE-126	Maize (plant) / <i>Zea mays</i> - Inorganic composition (please ask for detailed information)	10 g
<b>New</b>	WEPAL-IPE-131	Potato (bulb) / <i>Solanum tuberosum</i> - Inorganic composition (please ask for detailed information)	10 g
<b>New</b>	WEPAL-IPE-132	Broccoli / <i>Brassica oleracea l.</i> - Inorganic composition (please ask for detailed information)	10 g
<b>New</b>	WEPAL-IPE-136	Bokashi / Bokashi - Inorganic composition (please ask for detailed information)	10 g
<b>New</b>	WEPAL-IPE-137	French bean / <i>Phaseolus vulgaris l.</i> - Inorganic composition (please ask for detailed information)	10 g
<b>New</b>	WEPAL-IPE-138	Kivi (leaf + stalk) / <i>Actinidia chinensis pl.</i> - Inorganic composition (please ask for detailed information)	20 g
<b>New</b>	WEPAL-IPE-140	Dandelion (root) / <i>Radix taraxaci tot.</i> - Inorganic composition (please ask for detailed information)	10 g
<b>New</b>	WEPAL-IPE-141	Thyme / <i>Folia thymus vulgaris cong</i> - Inorganic composition (please ask for detailed information)	20 g
<b>New</b>	WEPAL-IPE-143	Valerian root / <i>Valeriana officinalis</i> - Inorganic composition (please ask for detailed information)	20 g
<b>New</b>	WEPAL-IPE-145	Valerian (root) / <i>Radix valerianae tot.</i> - Inorganic composition (please ask for detailed information)	10 g
<b>New</b>	WEPAL-IPE-149	Luzerne / <i>Medicago sativum</i> - Inorganic composition (please ask for detailed information)	20 g
<b>New</b>	WEPAL-IPE-151	Grass / <i>Poaceae</i> - Inorganic composition (please ask for detailed information)	20 g
<b>New</b>	WEPAL-IPE-152	Lucerne/ <i>Medicago savitum</i> - Inorganic composition (please ask for detailed information)	20 g
<b>New</b>	WEPAL-IPE-162	Stinging nettle / <i>Urtica dioica</i> - Inorganic composition (please ask for detailed information)	20 g
<b>New</b>	WEPAL-IPE-164	Chrysanthemum / <i>Chrysanthemum l.</i> - Inorganic composition (please ask for detailed information)	20 g
<b>New</b>	WEPAL-IPE-165	Oil palm (leaf) / <i>Elaeis guineensis</i> - Inorganic composition (please ask for detailed information)	20 g

<b>New</b>	WEPAL-IPE-167	French bean / <i>Phaseolus vulgaris</i> - Inorganic composition (please ask for detailed information)	20 g

## Plants

	Code	Product	Unit
<b>New</b>	WEPAL-IPE-168	Sunflower / <i>Heliantus annuus</i> - Inorganic composition (please ask for detailed information)	20 g
<b>New</b>	WEPAL-IPE-174	Tulip (tuber) / <i>Tulipa l.</i> - Inorganic composition (please ask for detailed information)	20 g
<b>New</b>	WEPAL-IPE-176	Reed / <i>Phragmites communis</i> - Inorganic composition (please ask for detailed information)	20 g
<b>New</b>	WEPAL-IPE-178	Green pea / <i>Pisum sativum</i> - Inorganic composition (please ask for detailed information)	20 g
<b>New</b>	WEPAL-IPE-192	String bean ( pods) / <i>Phaseolus vulgaris</i> - Inorganic composition (please ask for detailed information)	20 g
<b>New</b>	WEPAL-IPE-200	Maize (shoots) / <i>Zea mays</i> - Inorganic composition (please ask for detailed information)	20 g
<b>New</b>	WEPAL-IPE-548	Barley (grain) / <i>Hordeum vulgare</i> - Inorganic composition (please ask for detailed information)	10 g
<b>New</b>	WEPAL-IPE-551	Peas (grain) / <i>Pisum sativum</i> - Inorganic composition (please ask for detailed information)	10 g
<b>New</b>	WEPAL-IPE-556	Wheat (grain) / <i>Triticum aestivum</i> - Inorganic composition (please ask for detailed information)	10 g
<b>New</b>	WEPAL-IPE-561	Summer barley (grain) / <i>Hordeum vulgare</i> - Inorganic composition (please ask for detailed information)	10 g
<b>New</b>	WEPAL-IPE-565	Summer barley (grain) / <i>Hordeum distichon</i> - Inorganic composition (please ask for detailed information)	10 g
<b>New</b>	WEPAL-IPE-568	Summer wheat (grain) / <i>Triticum aestivum</i> - Inorganic composition (please ask for detailed information)	10 g
<b>New</b>	WEPAL-IPE-599	Sprouts / <i>Brassica oleracea var. gemmifera</i> - Inorganic composition (please ask for detailed information)	10 g
<b>New</b>	WEPAL-IPE-605	Summer barley / <i>Hordeum vulgare</i> - Inorganic composition (please ask for detailed information)	10 g
<b>New</b>	WEPAL-IPE-606	Winter rye / <i>Secale cereale l.</i> - Inorganic composition (please ask for detailed information)	10 g
<b>New</b>	WEPAL-IPE-638	Maize (plant) / <i>Zea mays L.</i> - Inorganic composition (please ask for detailed information)	10 g
<b>New</b>	WEPAL-IPE-677	Maize (plant) / <i>Zea mays</i> - Inorganic composition (please ask for detailed information)	10 g
<b>New</b>	WEPAL-IPE-680	Barley (straw) / <i>Hordeum vulgare</i> - Inorganic composition (please ask for detailed information)	10 g
<b>New</b>	WEPAL-IPE-681	Sugar-beet (pulp) / <i>Beta vulgaris</i> - Inorganic composition (please ask for detailed information)	10 g
<b>New</b>	WEPAL-IPE-682	Wheat (straw) / <i>Triticum aestivum</i> - Inorganic composition (please ask for detailed information)	10 g
<b>New</b>	WEPAL-IPE-684	Wheat (grain) / <i>Triticum aestivum</i> - Inorganic composition (please ask for detailed information)	20 g
<b>New</b>	WEPAL-IPE-686	Grass / <i>Poaceae</i> - Inorganic composition (please ask for detailed information)	10 g
<b>New</b>	WEPAL-IPE-722	Amaryllis (leaf) / <i>Hippeastrum</i> - Inorganic composition (please ask for detailed information)	10 g
<b>New</b>	WEPAL-IPE-723	Maize (plant) / <i>Zea mays</i> - Inorganic composition (please ask for detailed information)	20 g
<b>New</b>	WEPAL-IPE-732	Cucumber (fruit) / <i>Cucumis sativus</i> - Inorganic composition (please ask for detailed information)	10 g
<b>New</b>	WEPAL-IPE-753	Cucumber (fruit) / <i>Cucumis sativus</i> - Inorganic composition (please ask for detailed information)	10 g
<b>New</b>	WEPAL-IPE-761	Pine (needles) / <i>Pinus radiata</i> - Inorganic composition (please ask for detailed information)	30 g
<b>New</b>	WEPAL-IPE-763	Lily (bulb) / <i>Lilium</i> - Inorganic composition (please ask for detailed information)	10 g
<b>New</b>	WEPAL-IPE-767	Amaryllis (shoot) / <i>Hippeastrum</i> - Inorganic composition (please ask for detailed information)	10 g
<b>New</b>	WEPAL-IPE-768	Amaryllis (bulb) / <i>Hippeastrum</i> - Inorganic composition (please ask for detailed information)	10 g
<b>New</b>	WEPAL-IPE-775	Endive mixture / <i>Cichorium endiva l.</i> - Inorganic composition (please ask for detailed information)	30 g
<b>New</b>	WEPAL-IPE-776	Lettuce / <i>Lactuca sativa</i> - Inorganic composition (please ask for detailed information)	10 g
<b>New</b>	WEPAL-IPE-778	Celery (turnip) / <i>Apium graveolens</i> (coarse, milled over 1 mm sieve) - Inorganic composition (please ask for detailed information)	10 g
<b>New</b>	WEPAL-IPE-780	Oats (grain) / <i>Avena sativa</i> - Inorganic composition (please ask for detailed information)	10 g

<sup>1</sup> Assigned value as determined by Manna Associates in the UK using Cofino analysis of raw interlaboratory study data.

<sup>2</sup> Reference value is the Assigned Value plus or minus two standard deviations. Negative numbers resulting from two standard deviations being greater than the assigned value have no significance.

<sup>3</sup> Number of laboratories providing results for this analyte.

<sup>4</sup> All numbers in parentheses refer to the IUPAC designation for the compound.

<b>New</b> NIST-1649B	Urban dust - Organic contaminants This Standard Reference Material® (SRM®) is an atmospheric particulate material collected in an urban area and is intended for use in evaluating analytical methods for the determination of selected polycyclic aromatic hydrocarbons (PAHs), polychlorinated biphenyl (PCB) congeners, and chlorinated pesticides in atmospheric particulate material and similar matrices. Reference values are also provided for nitro-substituted polycyclic aromatic hydrocarbons (nitro-PAHs), decabromodiphenyl ether, toxaphene congeners, and polychlorinated dibenzo-p-dioxin and dibenzofuran congeners. Information concentration values are provided for selected hydrocarbons, hopanes, steranes, ketones, and particle-size characteristics. All of the constituents for which certified, reference, and information values are provided in NIST-1649B are naturally present in the particulate material. 	<p>BCR-555</p> <p>Council directive 80/1107/EEC and national legislation prescribes that the exposure of each individual worker to certain potentially harmful vapours has to be monitored periodically. This requires "personal monitoring" where a tube, containing a suitable sorbing agent, is attached to the worker's clothes. After a set sampling period any harmful vapours absorbed onto the material in the tube are desorbed, either by heating or solvent extraction, and determined using gas chromatography.</p>

### Filter media

Code	Product	Unit
BCR-545	Glass fibre filter - Chromium Welding dust loaded on a filter. Certified values Cr (VI).....40.2 g/kg      total leachable Cr..... 39.5 g/kg	filter
NAMI() A-3 and NAMI() B-3 Intended for use in conjunction with measurements of elements in air filters collected from work-room air. The 37 mm cellulose ester membrane filters were prepared by spiking each filter with an aqueous solution containing 25 elements with concentrations gravimetrically traceable to ultrapure metals or stoichiometrically well defined oxides. The levels correspond to current threshold limit values of contaminants in workroom atmospheres (provided that the simulated filter has been exposed to one cubic meter of air). The certified values are based on a gravimetric procedure, i.e. weight per volume composition of the primary reference material dissolved in high purity sub-distilled acids.		
NAMI(1)/A-3	Cellulose ester membrane filter - Metals Certified values Al.....225 ± 1 µg      Fe..... 521 ± 2 µg      Sn .....37.7 ± 0.1 µg As.....7.65 ± 0.05 µg      Mg ..... 74.5 ± 0.4 µg      Sr .....35.2 ± 0.1 µg Ba .....37.4 ± 0.1 µg      Mn ..... 150 ± 1 µg      Ti .....37.0 ± 0.1 µg Be .....1.48 ± 0.01 µg      Mo ..... 37.6 ± 0.2 µg      Tl .....2.61 ± 0.01 µg Cd .....15.0 ± 0.1 µg      Ni ..... 60.3 ± 0.2 µg      V .....15.5 ± 0.1 µg Co .....37.3 ± 0.1 µg      Pb ..... 37.0 ± 0.1 µg      Zn .....226 ± 1 µg Cr .....47.8 ± 0.3 µg      Pt ..... 35.2 ± 0.1 µg      Zr .....37.3 ± 0.2 µg Cu .....75.0 ± 0.4 µg      Sb ..... 37.5 ± 0.1 µg Indicative values for B, W	filter
NAMI(5)/A-3	Cellulose ester membrane filter - Metals	5 filter

	Al..... 110 ± 1 µg      Fe ..... 256 ± 3 µg      Sn ..... 18.6 ± 0.2 µg As..... 3.76 ± 0.04 µg      Mg ..... 36.6 ± 0.4 µg      Sr ..... 17.3 ± 0.2 µg Ba ..... 18.4 ± 0.2 µg      Mn ..... 73.6 ± 0.8 µg      Ti ..... 17.8 ± 0.4 µg Be ..... 0.73 ± 0.01 µg      Mo ..... 15.9 ± 0.3 µg      Tl ..... 1.28 ± 0.01 µg Cd ..... 7.35 ± 0.07 µg      Ni ..... 29.7 ± 0.3 µg      V ..... 7.61 ± 0.08 µg Co ..... 18.3 ± 0.2 µg      Pb ..... 18.2 ± 0.2 µg      Zn ..... 111 ± 1 µg Cr ..... 23.5 ± 0.2 µg      Pt ..... 17.3 ± 0.2 µg      Zr ..... 18.3 ± 0.2 µg Cu ..... 36.9 ± 0.4 µg      Sb ..... 18.4 ± 0.2 µg	
	Indicative values for B, W	
NAMI(5)/B-3	Cellulose ester membrane filter - Metals	5 filter
NIST-2951	Respirable alpha quartz on filter media, 5 µg A unit of NIST-2951 consists of five filters, each containing a nominal mass of 5 µg of respirable alpha quartz. The SRM is provided with five blank PVC filters containing no alpha quartz.	set
NIST-2952	Respirable alpha quartz on filter media, 10 µg A unit of NIST-2952 consists of five filters, each containing a nominal mass of 10 µg of respirable alpha quartz. The SRM is provided with five blank PVC filters containing no alpha quartz.	set
NIST-2953	Respirable alpha quartz on filter media, 20 µg A unit of NIST-2953 consists of five filters, each containing a nominal mass of 20 µg of respirable alpha quartz. The SRM is provided with five blank PVC filters containing no alpha quartz.	set
NIST-2954	Respirable alpha quartz on filter media, 50 µg A unit of NIST-2954 consists of five filters, each containing a nominal mass of 50 µg of respirable alpha quartz. The SRM is provided with five blank PVC filters containing no alpha quartz.	set
NIST-2955	Respirable alpha quartz on filter media, 100 µg A unit of NIST-2955 consists of five filters, each containing a nominal mass of 100 µg of respirable alpha quartz. The SRM is provided with five blank PVC filters containing no alpha quartz.	set
NIST-2956	Respirable alpha quartz on filter media, 250 µg A unit of NIST-2956 consists of five filters, each containing a nominal mass of 250 µg of respirable alpha quartz. The SRM is provided with five blank PVC filters containing no alpha quartz.	set
NIST-2957	Respirable alpha quartz on filter media, 500 µg A unit of NIST-2957 consists of five filters, each containing a nominal mass of 500 µg of respirable alpha quartz. The SRM is provided with five blank PVC filters containing no alpha quartz.	set
NIST-2958	Respirable alpha quartz on filter media, 1000 µg A unit of NIST-2958 consists of five filters, each containing a nominal mass of 1000 µg of respirable alpha quartz. The SRM is provided with five blank PVC filters containing no alpha quartz.	set
NIST-2950	Respirable alpha quartz on filter media, 10-500 µg Each unit of NIST-2950 consists of one unit each of NIST 2952, 2953, 2954, 2955, 2956, and 2957.	set
NIST-2961	Respirable cristobalite on filter media, 5 µg A unit of NIST-2961 consists of five filters, each containing a nominal mass of 5 µg of respirable cristobalite and is provided with five blank PVC filters containing no cristobalite.	set
NIST-2962	Respirable cristobalite on filter media, 10 µg A unit of NIST-2962 consists of five filters, each containing a nominal mass of 10 µg of respirable cristobalite and is provided with five blank PVC filters containing no cristobalite.	set
NIST-2963	Respirable cristobalite on filter media, 20 µg A unit of NIST-2963 consists of five filters, each containing a nominal mass of 20 µg of respirable cristobalite and is provided with five blank PVC filters containing no cristobalite.	set
NIST-2964	Respirable cristobalite on filter media, 50 µg A unit of NIST-2964 consists of five filters, each containing a nominal mass of 50 µg of respirable cristobalite and is provided with five blank PVC filters containing no cristobalite.	set
NIST-2965	Respirable cristobalite on filter media, 100 µg A unit of NIST-2965 consists of five filters, each containing a nominal mass of 100 µg of respirable cristobalite and is provided with five blank PVC filters containing no cristobalite.	set
NIST-2966	Respirable cristobalite on filter media, 250 µg A unit of NIST-2966 consists of five filters, each containing a nominal mass of 250 µg of respirable cristobalite and is provided with five blank PVC filters containing no cristobalite.	set
NIST-2966	Respirable cristobalite on filter media, 250 µg A unit of NIST-2966 consists of five filters, each containing a nominal mass of 250 µg of respirable cristobalite and is provided with five blank PVC filters containing no cristobalite.	set
NIST-2960	Respirable cristobalite on filter media, 5 - 250 µg NIST-2960 consists of one unit each of NIST-2961, 2962, 2963, 2964, 2965, and 2966. Each unit of NIST-2961, 2962, 2963, 2964, 2965, and 2966 consists of five blank PVC filters containing no cristobalite and five loaded PVC filters containing a known mass of respirable cristobalite.	set

## Respirable materials (solid form)

Code	Product	Unit
NIST-2967	Respirable cristobalite on filter media, 500 µg A unit of NIST-2967 consists of five filters, each containing a nominal mass of 500 µg of respirable cristobalite and is provided with five blank PVC filters containing no cristobalite.	set
NIST-2783	Air particulate on filter media - Trace elements This Standard Reference Material is an air particulate sample reduced in particle size to simulate PM <sub>2.5</sub> air particulate matter (particles with an aerodynamic equivalent diameter of 2.5 µm) and deposited on a polycarbonate filter membrane. NIST-2783 included two loaded filters and two blank filters. Certified values Al..... 23210 ng      Cu..... 404 ng      Ni ..... 68 ng As..... 11.8 ng      Fe ..... 26500 ng      Pb ..... 317 ng Ba ..... 335 ng      K..... 5280 ng      Sb ..... 71.8 ng Ca ..... 13200 ng      Mg ..... 8620 ng      Ti ..... 1490 ng Co ..... 7.7 ng      Mn ..... 320 ng      V ..... 48.5 ng Cr ..... 135 ng      Na..... 2860 ng      Zn..... 1790 ng Indicative values for Ce, Rb, S, Sc, Si, SM, Th, U, W	4 filter
NIST-RM 8785	Filter media - Air particulate matter This Reference Material NIST-RM 8785 is intended primarily for use in the evaluation of analytical methods used to characterise the carbon composition of atmospheric fine-particulate matter (PM) for national air quality monitoring programs. This RM consists of only the fine fraction (nominally < 2.5 µm aerodynamic diameter) of NIST-1649a Urban Dust resuspended in air and filtered onto quartz-fiber filter. NIST-RM 8785 also provides the atmospheric chemistry and ocean-sciences community with a means to inter-compare methods and laboratories for the measurement of elemental (black) carbon. RM 8785 has value-assignments for total carbon, elemental carbon and organic carbon measured according to two thermal-optical methods: the NIOSH and IMPROVE protocols. A unit of NIST-RM 8785 consists of three loaded filters, each uniquely identified by its APM identification number (e.g., APM 1257), its production characteristics, i.e., batch and chamber-column-row (e.g., 12959-30 and IV-D-5, respectively) and its mass of fine NIST-1649a on the filter (e.g., 1948 µg).	3 filter
NIST-RM 8786	Filter blank for NIST-RM 8785 A unit of NIST-RM 8786 consists of a single production blank filter with a 37 mm diameter	filter
NIST-2678	Blank cellulose acetate membrane filter Set of 10 blank filters Intended for use in evaluating the performance of air sampling filter methods. Certified values or limits of detection for each of 30 constituent elements as well as 6 leachable anions and cations.	set (10)
NIST-2681	Blank ashless filter - Trace elements Intended for use in evaluating the performance of air sampling filter methods. Certified values or limits of detection for each of 30 constituent elements as well as 6 leachable anions and cations.	set (10)
RTC-CRM002-100	Activated charcoal filter - Trace elements From a commercial water treatment system. Certified values Lot AZ02 Ag ..... 18.3 mg/kg      Cr..... 36000 mg/kg      Cu ..... 96900 mg/kg Indicative values for 22 further elements	100 g
RTC-CRM004-100	Diatomaceous earth filter - Trace elements From a commercial water treatment system in the Eastern United States. Certified values Lot AY04 Ba ..... 1590 mg/kg      Cr..... 21.4 mg/kg Cd ..... 2.4 mg/kg      Pb..... 11900 mg/kg Indicative values for 20 further elements	100 g

## Respirable materials (solid form)

Code	Product	Unit
<b>New</b> NIST-1877	Beryllium oxide powder Certified value Beryllium mass fraction..... 0.3576 ± 0.0024 g/g Indicative values for specific surface area, specific gravity, count median diameter (CMD) and size distribution of the primary beryllium oxide particles, mass median diameter (MMD) and size distribution of the primary beryllium oxide particles.	20 g
NIST-1878a	Respirable alpha quartz One form of respirable silica Certified value Crystalline α-quartz..... 93.7 % ± 0.21 %	5 g

Code	Product	Unit
NIST-1879a	Respirable cristabolite One form of respirable silica Certified value Crystalline cristabolite..... 95.6 %	5 g

## Food matrix reference materials

### Milk and milk products

Code	Product	Unit
LGC7104	Sterilised cream - Proximates and nutrient elements LGC7104 is a cream product, sealed in cans in 170g portions. Assessed values Moisture ..... 70.2 g/100 g Nitrogen ..... 0.40 g/100 g Total fat..... 22.7 g/100 g Ash..... 0.58 g/100 g Ca..... 845 mg/kg K..... 1160 mg/kg Mg ..... 84 mg/kg Na..... 505 mg/kg P ..... 823mg/kg Zn..... 3.1 mg/kg Indicative values for Cl, Lactose	170 g
BCR-380R	Whole milk powder - Major nutrients Certified values Crude protein .....28.66 ± 0.28 g/100 g (Kjeldahl-N x 6.38) Fat.....26.95 ± 0.16 g/100 g Lactose (anhydrous).....37.1 ± 1.0 g/100 g Ash.....6.00 ± 0.13 g/100 g	100 g
BCR-685	Skimmed milk powder - Major nutrients Certified values Crude protein .....38.2 ± 0.4 g/100 g (Kjeldahl-N x 6.38) Fat.....0.96 ± 0.12 g/100 g	50 g
BCR-063R	Skimmed milk powder - Major and trace elements Natural elemental levels in skim milk powder. Certified values Ca ..... 13.49 mg/g Cl ..... 9.94 mg/g Cu ..... 0.602 µg/g Fe..... 2.32 µg/g I ..... 0.81 µg/g K..... 17.68 mg/g Mg ..... 1.263 mg/g N (total) ..... 62.3 mg/g Na ..... 4.37 mg/g P ..... 11.10 mg/g Pb ..... 18.5 ng/g Zn..... 49.0 µg/g	50 g
BCR-150	Spiked skimmed milk powder - Trace elements Milk spiked with Cd, Cu, Fe and Hg. Certified values Cd ..... 21.8 µg/kg Cu ..... 2.23 mg/kg Fe ..... 11.8 mg/kg Hg..... 9.4 µg/kg I..... 1.29 mg/kg Pb ..... 1.00 mg/kg Indicative values for Co, Mn, Ni, Se, Ti, Zn	23 g
BCR-151	Spiked skimmed milk powder - Trace elements Milk spiked with Cd, Cu, Fe and Hg. Certified values Cd ..... 101.0 µg/kg Cu ..... 5.23 mg/kg Fe ..... 50.1 mg/kg Hg..... 101 µg/kg I..... 5.35 mg/kg Pb ..... 2002 mg/kg Indicative values for Co, Mn, Ni, Se, Ti, Zn	23 g
NIST-1549	Non-fat milk powder - Trace elements Certified values Ca ..... 1.30 % Cd ..... 0.0005 mg/kg Cl ..... 1.09 % Cr ..... 0.0026 mg/kg Cu ..... 0.7 mg/kg I ..... 3.38 mg/kg Fe ..... 1.78 mg/kg Hg..... 0.0003 mg/kg K..... 1.69 % Mg ..... 0.120 % Mn ..... 0.26 mg/kg Na..... 0.497 % P ..... 1.06 % Pb ..... 0.019 mg/kg S ..... 0.351 % Se ..... 0.11 mg/kg Zn..... 46.1 mg/kg Indicative values for Ag, Al, As, Br, Co, F, Mo, Rb, Sb, Sn	100 g
IAEA-153	Milk powder - Trace elements Certified values Br ..... 12.3 mg/kg Ca ..... 12870 mg/kg Fe..... 2.53 mg/kg K..... 17620 mg/kg Mg ..... 1060 mg/kg Na..... 4180 mg/kg P ..... 10100 mg/kg Rb ..... 14 mg/kg Zn..... 39.6 mg/kg Indicative values for Cu, Mn, Mo, Sr	50 g

## Milk and milk products

## MUVA reference materials

MUVA reference materials are so-called secondary (non-certified) reference materials for chemical analysis of milk and milk products. They have been characterised at the MUVA Kempten laboratories for homogeneity and stability as well as for contents of relevant compounds by different methods, where possible. Reference values are characterised by interlaboratory studies. During storage at MUVA Kempten materials are regularly checked for their contents.

Code	Product	Unit
MUVA-RM56	Milk powder, roller dried - Proximates Best before: 12/2011 Reference values Fat (Röse-Gottlieb) .....26.02 ± 0.11 g/100 g Free Fat .....21.50 ± 0.18 g/100 g Dry matter (102 °C).....96.16 ± 0.04 g/100 g Protein (Kjeldahl) ..... 25.70 ± 0.09 g/100 g Lactose (Monohydrate) ..... 37.48 ± 0.22 g/100 g Ash..... 5.64 ± 0.04 g/100 g	
MUVA-RM 59	Milk powder, spray dried - Proximates Best before: 06/2014 Reference values Fat (Röse-Gottlieb) .....26.46 ± 0.15 g/100 g Free fat ..... 14.49 ± 0.60 g/100 g Dry matter (102 °C).....97.99 ± 0.08 g/100 g Protein (Kjeldahl) ..... 26.68 ± 0.08 g/100 g Lactose (Monohydrate) ..... 38.48 ± 0.54 g/100 g Ash..... 5.71 ± 0.04 g/100 g	70 g
MUVA-RM 58	Milk powder mixed - Proximates Best before: 01/2013 Reference values Fat (Röse-Gottlieb) .....13.84 ± 0.15 g/100 g Free Fat .....4.62 ± 0.36 g/100 g Dry matter (102 °C).....97.38 ± 0.07 g/100 g Protein (Kjeldahl) ..... 32.28 ± 0.11 g/100 g Lactose (Monohydrate) ..... 43.68 ± 0.40 g/100 g Ash..... 6.83 ± 0.04 g/100 g	70 g
MUVA-MP-0201	Skimmed milk powder spray dried - Proximates Best before: 11/2014 Reference values Fat (Röse-Gottlieb) .....0.71 ± 0.12 g/100 g Dry matter .....95.97 ± 0.08 g/100 g Protein (Kjeldahl) .....36.61 ± 0.11 g/100 g Lactose (Monohydrate) ..... 50.72 ± 0.54 g/100 g Ash..... 7.85 ± 0.07 g/100 g Nitrate ..... 35.1 ± 5.6 mg/kg	70 g
MUVA-MP-0202	Skimmed milk powder spray dried - Proximates Best before: 11/2014 Reference values Fat (Röse-Gottlieb) .....26.72 ± 0.54 g/100 g Dry matter .....97.80 ± 0.06 g/100 g Protein (Kjeldahl) .....27.14 ± 0.18 g/100 g Lactose (Monohydrate) ..... 38.11 ± 0.46 g/100 g Ash..... 5.66 ± 0.06 g/100 g Nitrate ..... 5.2 ± 2.8 mg/kg	70 g
MUVA-RM 71	Whey powder - Proximates Best before: 12/2011 Reference values Fat (Röse-Gottlieb) .....1.63 ± 0.05 g/100 g Dry matter (102 °C).....96.68 ± 0.08 g/100 g Dry matter (87 °C).....97.31 ± 0.05 g/100 g Protein (Kjeldahl) .....25.59 ± 0.16 g/100 g Lactose (Monohydrate).....48.06 ± 0.43 g/100 g Nitrate ..... 211 ± 11 mg/kg Calcium ..... 8129 ± 435 mg/kg Magnesium ..... 2233 ± 97 mg/kg Ash..... 15.04 ± 0.08 g/100 g	20 g
MUVA-RM 72	Whey powder - Proximates Best before: 12/2011 Reference values Fat (Röse-Gottlieb) .....0.98 ± 0.05 g/100 g Dry matter (102 °C).....97.95 ± 0.08 g/100 g Dry matter (87 °C).....98.35 ± 0.08 g/100 g Protein (Kjeldahl) .....13.28 ± 0.10 g/100 g Lactose (Monohydrate).....74.14 ± 0.61 g/100 g Nitrate ..... 158 ± 11 mg/kg Ash..... 7.62 ± 0.07 g/100 g Calcium ..... 4614 ± 310 mg/kg Magnesium ..... 1161 ± 66 mg/kg	20 g
MUVA-RM 74	Whey powder - Proximates Best before: 01/2013 Reference values Fat (Röse-Gottlieb) .....1.97 ± 0.12 g/100 g Dry matter (102 °C).....96.16 ± 0.12 g/100 g Dry matter (87 °C).....96.89 ± 0.09 g/100 g Protein (Kjeldahl) .....30.34 ± 0.63 g/100 g Lactose (Monohydrate) ..... 48.88 ± 0.89 g/100 g Ash..... 8.41 ± 0.10 g/100 g Lactic acid ..... 1101 ± 60 g/100 g Nitrate ..... 34.66 ± 5.25 mg/kg	70 g
MUVA-RM 803	Whey powder - Proximates Best before: 12/2011 Reference values Sodium .....6.26 ± 0.22 mg/g Potassium .....23.61 ± 0.66 mg/g Calcium.....4.67 ± 0.13 mg/g Magnesium ..... 1.15 ± 0.03 mg/g Lead ..... 11 ± 12 µg/kg	20 g

## MUVA reference materials

Code	Product	Unit
<b>New</b> MUVA-MO-0610	Whey powder - Proximates Best before: 08/2015 Reference values Fat (Röse-Gottlieb) ..... 0.84 ± 0.06 g/100 g Dry matter (87 °C)..... 97.92 ± 0.08 g/100 g Dry matter (102 °C)..... 97.62 ± 0.06 g/100 g Protein (Kjeldahl) ..... 13.07 ± 0.08 g/100 g Lactose (Monohydrate) ..... 79.17 ± 0.89 g/100 g Ash ..... 3.29 ± 0.02 g/100 g Calcium (AAS/ICP) ..... 3038 ± 154 mg/kg Magnesium (AAS/ICP)..... 901 ± 36 mg/kg NPN (Kjeldahl) ..... 2.93 ± 0.26 g/100 g	70 g
<b>New</b> MUVA-RM 84	Acid casein - Proximates Best before: 12/2011 Reference values Fat (SBR)..... 1.09 ± 0.16 g/100 g Water ..... 9.28 ± 0.22 g/100 g Protein (Kjeldahl) ..... 88.61 ± 0.27 g/100 g Lactose (Monohydrate) ..... 0.09 ± 0.03 g/100 g Ash ..... 1.73 ± 0.08 g/100 g Nitrate..... 4.94 ± 1.56 mg/kg	60 g
<b>New</b> MUVA-RM 85	Sodium casein - Proximates Best before: 12/2011 Reference values Fat (SBR)..... 1.15 ± 0.09 g/100 g Water ..... 6.82 ± 0.05 g/100 g Protein (Kjeldahl) ..... 89.00 ± 0.16 g/100 g Lactose (Monohydrate) ..... 0.10 ± 0.02 g/100 g Ash ..... 3.57 ± 0.11 g/100 g Nitrate..... 17.9 ± 2.20 mg/kg	60 g
<b>New</b> MUVA-KM-0504	Evaporated milk (4% fat) - Proximates Best before 2/2013 Reference values Fat (Röse-Gottlieb) ..... 4.03 ± 0.01 g/100 g Dry matter (102 °C)..... 24.20 ± 0.09 g/100 g Protein (Kjeldahl) ..... 7.37 ± 0.04 g/100 g Ash ..... 1.63 ± 0.01 g/100 g Phosphorus ..... 2157 ± 128 mg/100 g	170 g
<b>New</b> MUVA-HA-1505	Grana Padano / Hard cheese (grated) - Proximates Best before: 4 weeks after shipment Reference values Fat (SBR)..... 27.42 ± 0.30 g/100 g Dry matter (102 °C)..... 68.67 ± 0.22 g/100 g Protein (Kjeldahl) ..... 34.31 ± 0.30 g/100 g Sodium chloride ..... 1.31 ± 0.04 g/100 g pH-value..... 5.54 ± 0.02 Lactic acid ..... 1452 ± 262 mg/100 g	100 g
<b>New</b> MUVA-HA-1506	Hard cheese (grated, dehydrated) - Proximates Best before: 4 weeks after shipment Reference values Fat (SBR)..... 31.96 ± 0.11 g/100 g Dry matter (102 °C)..... 88.85 ± 20 g/100 g Protein (Kjeldahl) ..... 46.84 ± 0.19 g/100 g Sodium chloride ..... 3.34 ± 0.03 g/100 g pH-value..... 5.52 ± 0.05 Lactic acid ..... 1555 ± 176 mg/100 g	100 g
MUVA-FK-1207	Fresh cheese, 18% f.i.d.m. - Proximates Best before: 05/2012 Reference values Fat (SBR)..... 4.32 ± 0.07 g/100 g Dry matter (102 °C)..... 20.42 ± 0.18 g/100 g Protein (Kjeldahl) ..... 10.34 ± 0.08 g/100 g Lactic acid (enzyme) ..... 602.2 ± 19.0 mg/100 g	200 g
MUVA-FK-1208	Fresh cheese, 50% f.i.d.m. - Proximates Best before: 05/2012 Reference values Fat (SBR)..... 14.32 ± 0.08 g/100 g Dry matter (102 °C)..... 27.22 ± 0.27 g/100 g Protein (Kjeldahl) ..... 6.97 ± 0.12 g/100 g Lactic acid (enzyme) ..... 522.1 ± 16.6 mg/100 g	200 g
<b>New</b> MUVA-SK-0303	Processed cheese 45 % f.i.d.m. - Proximates Best before: 05/2013 Reference values Fat (SBR)..... 22.91 ± 0.13 g/100 g Dry matter (102 °C)..... 50.76 ± 0.24 g/100 g Protein (Kjeldahl) ..... 20.31 ± 0.12 g/100 g Sodium chloride ..... 1.89 ± 0.07 g/100 g pH value ..... 5.65 ± 0.02 Phosphorus ..... 0.97 ± 0.02 g/100 g	75 g
<b>New</b> MUVA-SK-0304	Processed cheese 55 % f.i.d.m. - Proximates Best before: 03/2013 Reference values Fat (SBR)..... 22.69 ± 0.39 g/100 g Dry matter (102 °C)..... 43.71 ± 0.72 g/100 g Protein (Kjeldahl) ..... 15.08 ± 0.17 g/100 g Sodium chloride ..... 1.46 ± 0.04 g/100 g pH value..... 5.84 ± 0.02 Citric acid ..... 142.9 ± 13.2 mg/100g Sodium ..... 11286 ± 607 mg/kg Potassium ..... 492 ± 74 mg/kg Ash ..... 492 ± 74 mg/kg Nitrate..... 4.7 ± 0.8 mg/kg	200 g

## MUVA reference materials

<b>New</b> NIST-1974B	Mussel tissue (frozen) - PAHs, PCBs, Pesticides	5 x 8 - 10 g

Standard Reference Material NIST-1974b is a frozen mussel tissue homogenate intended for use in evaluating analytical methods for the determination of selected polycyclic aromatic hydrocarbons (PAHs), polychlorinated biphenyl (PCB) congeners, and chlorinated pesticides in marine bivalve mollusk tissue and similar matrices. All of the constituents for which certified and reference values are provided in NIST-1974b were naturally present in the tissue material before processing. A unit of NIST-1974b consists of five bottles each containing approximately 8 g to 10 g (wet basis) of frozen tissue homogenate.

NIST-1566b	Oyster Tissue - Trace elements and methyl mercury This Standard Reference Material® (SRM®) is intended primarily for use in evaluating analytical methods and instruments used for the determination of the concentrations of selected elements and proximates, selected fatty acids, total dietary fibre, as well as the calorific content in marine bivalve tissue, foods, or similar materials. A unit of NIST-1566b contains approximately 25 g of freeze-dried oyster tissue. Certified values	25 g

# Fish and fish products

Code	Product	Unit
NIST-1947	Lake Michigan fish tissue - Organic contaminants	5 x 8 g

This Standard Reference Material® (SRM®) 1947 is a frozen fish tissue homogenate, which was prepared from fish collected from Lake Michigan, and is intended primarily for use in evaluating analytical methods for the determination of selected trace elements, methylmercury, total mercury, polychlorinated biphenyl (PCB) congeners, chlorinated pesticides, and polybrominated diphenyl ether (PBDE) congeners, proximates, caloric content and fatty acids in fish tissue and similar matrices. All of the constituents for which certified, reference, and information values are provided are naturally present in the fish tissue homogenate. A unit of NIST-1947 consists of five bottles, each containing approximately 8 g (wet basis) of frozen tissue homogenate.

trans-Chlordane	8.36 ± 0.91	4,4'-DDT..... 37.2 ± 3.5
cis-Nonachlor	59.1 ± 3.6	

Certified concentrations for fat and selected fatty acids

	Mass fraction (%) (wet- mass basis)
Fat (Extractable)	10.17 ± 0.48
Fat (Sum of Fatty Acids)	8.76 ± 0.17
	Mass fraction (%) (as the triglyceride) (wet- mass basis)
Tetradecanoic acid (C14:0)	0.316 ± 0.009
(Myristic acid)	
Hexadecanoic acid (C16:0)	1.22 ± 0.04
(Palmitic acid)	
(Z)-9-Hexadecenoic acid (C16:1)	0.816 ± 0.026
(Palmitoleic acid)	
Octadecanoic acid (C18:0)	0.263 ± 0.011
(Stearic acid)	
(Z)-9-Octadecenoic acid (C18:1)	2.64 ± 0.08
(Oleic acid)c	
(Z,Z)-9,12-Octadecadienoic acid (C18:2)	0.348 ± 0.023
(Linoleic acid)	
(Z,Z,Z)-9,12,15-Octadecatrienoic acid (C18:3)	0.221 ± 0.025
(Linolenic acid)	
Eicosanoic acid (C20:0)	0.0100 ± 0.0012
(Arachidic acid)	
(Z)-11-Eicosenoic acid (C20:1)	0.132 ± 0.012
(Z,Z)-11,14-Eicosadienoic acid (C20:2)	0.0990 ± 0.0043
(Z,Z,Z,Z)-5,8,11,14,17-Eicosapentaenoic acid (C20:5) (EPA)	0.296 ± 0.019
(Z,Z,Z,Z,Z)-7,10,13,16,19-Docosapentaenoic acid (C22:5) (DPA)	0.335 ± 0.026
(Z,Z,Z,Z,Z,Z)-4,7,10,13,16,19-Docosahexaenoic acid (C22:6) (DHA)	0.92 ± 0.10

Certified concentrations for methylmercury, total mercury, arsenic, and iron

	Mass fraction mg/kg (wet- mass basis)	Mass fraction mg/kg (wet- mass basis)
Methylmercury	0.394 ± 0.015	As..... 0.277 ± 0.010
Hg (Total)	0.433 ± 0.009	Fe..... 4.00 ± 0.32

Reference concentrations for PCBs, pesticides, fatty acids, proximates and caloric content.

## Fish and fish products

Code	Product	Unit
IAEA-406	Fish - Organic contaminants	35 g
	Recommended values	
	HCB ..... 1.5 ng/g      PCB 28 ..... 0.57 ng/g      PCB 153 ..... 3.7 ng/g p,p'-DDE ..... 9.2 ng/g      PCB 31 ..... 0.29 ng/g      PCB 156 ..... 0.27 ng/g p,p'-DDD ..... 2.8 ng/g      PCB 52 ..... 1.3 ng/g      PCB 170 ..... 0.54 ng/g o,p'-DDE ..... 0.76 ng/g      PCB 101 ..... 3.1 ng/g      PCB 180 ..... 1.2 ng/g Heptachlor ..... 0.32 ng/g      PCB 110 ..... 1.4 ng/g      Pyrene ..... 4.5 ng/g Aldrin ..... 0.75 ng/g      PCB 138 ..... 4 ng/g alpha-Chlordane ..... 2.8 ng/g      PCB 149 ..... 2 ng/g	
	Indicative values for PAHs, PCBs, pesticides	
IAEA-435	Tuna homogenate - Organic contaminants	30 g
	Recommended values	
	HCB ..... 2.6 ± 1.0 ng/g      PCB 183 ..... 11 ± 2.9 ng/g o,p'-DDD ..... 2.5 ± 0.52 ng/g      PCB 187 ..... 31 ± 10 ng/g PCB 28 ..... 1.4 ± 0.55 ng/g      PCB 194 ..... 3.9 ± 1.1 ng/g PCB 31 ..... 1.5 ± 0.66 ng/g      PCB 206 ..... 2.8 ± 1.4 ng/g PCB 66 ..... 5.0 ± 1.2 ng/g      PCB 209 ..... 2.0 ± 0.84 ng/g PCB 99 ..... 16 ± 4.1 ng/g      Phytane ..... 83 ± 40 ng/g PCB 105 ..... 6.7 ± 3.6 ng/g      Naphthalene ..... 7.8 ± 5.9 ng/g PCB 128 ..... 9.5 ± 4.7 ng/g      Phenanthrene ..... 8.4 ± 4.9 ng/g PCB 149 ..... 29 ± 7.1 ng/g      1-Methylphenanthrene ..... 4.8 ± 3.6 ng/g PCB 151 ..... 12 ± 2.7 ng/g      Chrysene ..... 2.8 ± 2.6 ng/g PCB 156 ..... 3.4 ± 1.3 ng/g      Acenaphthene ..... 3.4 ± 3.5 ng/g PCB 177 ..... 7.9 ± 4.2 ng/g

	Indicative values for further elements	

### Rye

<b>New</b> ERM-BC381	Rye flour - Proximates and essential elements	vial
	One unit contains about 37 g of rye flour filled under argon in a 100 mL amber glass vial.	
	Certified value      Uncertainty	
	Kjeldahl nitrogen ..... 1.562 g/100 g ..... 0.014 g/100 g	
	Total fat ..... 1.36 g/100 g ..... 0.16 g/100 g	
	Ash ..... 1.08 g/100 g ..... 0.11 g/100 g	
	Starch ..... 72.2 g/100 g ..... 1.9 g/100 g	
	K ..... 3.35 mg/g ..... 0.11 mg/g	
	Mg ..... 0.567 mg/g ..... 0.013 mg/g	
	Ca ..... 0.32 mg/g ..... 0.04 mg/g	
	P ..... 2.01 mg/g ..... 0.07 mg/g	

IAEA-V-8	Rye flour - Trace elements	50 g
	Certified values	
	Br ..... 0.38 mg/kg	Fe ..... 4.1 mg/kg
	Ca ..... 149 mg/kg	K ..... 1925 mg/kg
	Cl ..... 570 mg/kg	Mg ..... 121 mg/kg
	Cu ..... 0.95 mg/kg	Mn ..... 2.06 mg/kg
	P ..... 592 mg/kg	Rb ..... 0.48 mg/kg
	Zn ..... 2.53 mg/kg	
	Indicative values for Cd, Co, Na	

<b>New</b> B-MYC0852	Rye - Ergot alkaloids	55 g
	Certified values	
	Ergometrine ..... 595 ± 745 µg/kg	Ergotamine ..... 1349 ± 1156 µg/kg
	Ergometrinine ..... 335 ± 758 µg/kg	Ergotaminine ..... 464 ± 367 µg/kg
	Ergosine ..... 537 ± 260 µg/kg	Ergocornine ..... 614 ± 156 µg/kg
	Ergosinine ..... 331 ± 476 µg/kg	Ergocorninine ..... 362 ± 391 µg/kg
	alpha-Ergocryptine ..... 570 ± 52 µg/kg	Ergocristine ..... 923 ± 195 µg/kg
	alpha-Ergocryptinine ..... 477 ± 526 µg/kg	Ergocristinine ..... 462 ± 469 µg/kg

### Rice

BCR-465	Rice flour - Amylose (low level)	10 g
	Certified value	
	Amylose ..... 15.4 g/100 g	

BCR-466	Rice flour - Amylose (medium level)	10 g
	Certified value	
	Amylose ..... 23.1 g/100 g	

BCR-467	Rice flour - Amylose (high level)	10 g
	Certified value	
	Amylose ..... 27.7 g/100 g	

IRMM-804	Rice flour - Trace elements	15 g
	Compound      Certified value      Uncertainty	
	(mg/kg)      (mg/kg)	
	As ..... 0.049 ..... 0.004	
	Cd ..... 1.61 ..... 0.07	
	Cu ..... 2.74 ..... 0.24	
	Mn ..... 34.2 ..... 2.3	
	Pb ..... 0.42 ..... 0.07	
	Zn ..... 23.1 ..... 1.9	

## Cereals and genetically modified crops

Code	Product	Unit
NIST-1568a	Rice Flour - Trace elements Produced from 100% long grain rice from Arkansas. ERM-BF415F	Genetically modified NK603 Maize (5%)	vial
	Certified value g/kg      Uncertainty g/kg	
	NK603 maize content .....49.1 ..... 1.3	
ERM-BF416A - ERM-BF416D		
Dried maize powders with different mass fractions of genetically modified ("MON 863") maize, intended for the calibration of methods for the detection of genetically modified food.		
ERM-BF416A	Genetically modified MON 863 Maize (0%)	vial
	Certified value <sup>1</sup> g/kg	
	MON 863 Maize .....< 1.0	
	1) No contamination was detected in the non-GM material when applying event-specific MON 863 realtime PCR with a detection limit of 0.8 g / kg. With a confidence level of 95 % the MON 863 mass fraction is below the certified value.	
ERM-BF416B	Genetically modified MON 863 Maize (0.1%)	vial
	Certified value g/kg      Uncertainty g/kg	
	MON 863 Maize .....1.0 ..... -0.3 ; +1.0	
ERM-BF416C	Genetically modified MON 863 Maize (1%)	vial
	Certified value g/kg      Uncertainty g/kg	
	MON 863 Maize .....9.8 ..... -0.7 ; +1.2	
ERM-BF416D	Genetically modified MON 863 Maize (10%)	vial
	Certified value g/kg      Uncertainty g/kg	
	MON 863 Maize .....98.5 ..... -2.2 ; +2.5	
ERM-BF417a - ERM-BF417D		
Dried maize powders with different mass fractions of genetically modified ("MON 863 x MON 810") maize, intended for the calibration of methods for the detection of genetically modified food.		
ERM-BF417A	Stacked Genetically modified MON 863 x MON 810 Maize	vial
	Certified value <sup>1</sup> g/kg	
	MON 863 x MON 810 Maize .....< 1.0	
	1) No contamination was detected in the non-GM material when applying event-specific MON 863 realtime PCR with a detection limit of 0.8 g/kg and no contamination was detected when applying event-specific MON 810 realtime PCR with a detection limit of 1.1g /kg. With a confidence level of 95 % the MON 863 x MON 810 maize mass fraction is below the certified value.

ERM-BF421A- ERM-BF421B		
Dried potato powder powders with different mass fractions of genetically modified ("EH92-527-1") potato, intended for the calibration of methods for the detection of genetically modified food.		
ERM-BF421A	Genetically modified EH92-527-1 Potato (0%) ERM-BF421a is a blank material composed of milled, dried powder from solely "non-EH92-527-1" potatoes. The number fraction is calculated by counting the number of non-modified potatoes and the number of EH92-527-1 potatoes and expressing the result as a percentage. Each individual potato was tested for the presence of the genetic modification by staining a small potato piece for the presence of amylose (Lugol's test). The genetic identification is based on event-specific real-time PCR for EH92-527-1. Certified property      Certified value Number fraction of EH92-527-1 potatoes / total ..... 0 <sup>1</sup> number of potatoes [%] Genetic identity ..... Potato without the EH92-527-1 event <sup>2</sup> <sup>1</sup> Based on the experimental confirmation of the absence of the EH92-527-1 genetic modification in every individual potato used for the processing through colorimetric analysis of the amylose content in a surface slice. The uncertainty is considered zero. <sup>2</sup> Based on event-specific real-time PCR analysis. No uncertainty is applicable.	vial
ERM-BF421B	Genetically modified EH92-527-1 Potato (100%) ERM-BF421b is composed of milled, dried powder from purely EH92-527-1 potatoes and its genetic identity has been confirmed by nucleotide sequencing. The number fraction is calculated by counting the number of non-modified potatoes and the number of EH92-527-1 potatoes and expressing the result as a percentage. Each individual potato was tested for the presence of the genetic modification by staining a small potato piece for the presence of amylose (Lugol's test). The genetic identification is based on event-specific real-time PCR for EH92-527-1 and nucleotide sequencing around the junction region between the transgene insert and the potato genome. Certified property      Certified value Number fraction of EH92-527-1 potatoes / total ..... 100 <sup>1</sup> number of potatoes [%] Genetic identity ..... EH92-527-1 potato <sup>2</sup> <sup>1</sup> .Based on the experimental confirmation of the presence of the EH92-527-1 genetic modification in every individual potato used for the processing through colorimetric analysis of the amylose content in a cut tuber surface slice. The uncertainty is considered zero. <sup>2</sup> Based on event-specific real-time PCR analysis and nucleotide sequence analysis of the junction region between the transgene DNA insert and the potato genome in EH92-527-1. No uncertainty is applicable.	vial

## Food Authenticity

Isotopic analyses are now official or standard methods in Europe and beyond for routine use in food authenticity testing. Thus, the use of nuclear magnetic resonance (NMR) spectrometry based on the site-specific natural isotope fractionation (SNIF) is prescribed for instance by EC Regulation No. 2676/90 on analytical methods for wine quality control. These methods are based on the measurement of stable isotope content (deuterium, <sup>13</sup>C, <sup>18</sup>O, etc.) of the products or of a specific component such as an ingredient or target molecule of the product. The determinations, carried out using NMR and/or Isotopic Ratio Mass Spectrometry (IRMS), provide information on the botanical and geographical origin of the food product. In order to enable a clear comparison of results the following certified reference materials have been developed.

Code	Product	Unit
	BCR-123A and BCR-123B Quantitative analysis of deuterium in ethanol by NMR spectrometry based on the site-specific natural isotope fractionation (SNIF) is of considerable importance for the detection of wine enrichment. This technique is prescribed by EC regulation No. 2676/90 on analytical methods for wine quality control. BCR-123 consists of a set of 3 sealed NMR tubes containing forms of ethanol with a range of site specific isotopic ratios, to which tetramethylurea internal standard and the C <sub>6</sub> F <sub>6</sub> lock substance have been added.

	(D/H) <sub>l</sub> by <sup>2</sup> H-NMR.....	131.35 ppm..... 0.23 ppm
	R by <sup>2</sup> H-NMR.....	2.567..... 0.005
	δ <sup>13</sup> C <sub>V</sub> PDB by IRMS.....	-2.672%..... 0.009%
	(D/H) <sub>w</sub> of water (IRMS).....	148.68 ppm..... 0.14 ppm
	Alcoholic grade t <sub>D</sub> .....	11.96%..... 0.06% <sup>(1)</sup>
	<sup>(1)</sup> in v/v %	
STA-003k	Tetramethylurea (TMU) - Isotopic ratio (D/H) Used as internal standard for the determination of D/H isotope ratios of ethanol by 2H-NMR method (SNIF-NMR®) according to the formula 5-1 of Regulation EEC 2676/90.	500 mL
	(D/H) by NMR.....	Certified value 141.9 x 10 <sup>-6</sup> ..... Uncertainty 0.9 x 10 <sup>-6</sup>

## Food and drink products

Code	Product	Unit
<b>Processed food</b>		
LGC7107	Madeira cake - Proximates Lemon Madeira cakes were prepared by a UK food company. Each cake, weighing approx. 160 g, was sealed in a can. Assessed values	160 g
	Moisture..... 25.9 g/100 g	Total fat..... 13.4 g/100 g
	Nitrogen..... 0.66 g/100 g	Ash..... 1.76 g/100 g
		Sucrose..... 28.1 g/100 g
		Lactose..... 0.9 g/100 g
	Indicative value for starch content	
LGC7105	Rice pudding - Proximates and elements This reference material is a rice pudding dessert, sealed in retort pouches in 200g portions. Assessed values	200 g
	Moisture..... 71.3 g/100 g	Sucrose..... 7.2 g/100 g
	N..... 0.17 g/100 g	Ca..... 78 mg/kg
	Total fat..... 8.4 g/100 g	K..... 558 mg/kg
	Ash..... 0.22 g/100 g	Mg..... 30 mg/kg
		Mn..... 0.7 mg/kg
		Na..... 344 mg/kg
		P..... 346 mg/kg
		Zn..... 1.5 mg/kg
LGC7017	Sugar confectionery - Sugars A commercial supply of sugar confectionery, ground and supplied as 15g units contained in 30ml amber glass bottle with tamper evident caps. Assessed values	15 g
	Glucose..... 9.7 g/100 g	Sucrose..... 52.6 g/100 g
	Fructose..... 2.3 g/100 g	Maltose..... 4.2 g/100 g
LGC7103	Sweet digestive biscuit - Proximates and elements Assessed values	50 g
	Nitrogen..... 1.06 g/100 g	Sucrose..... 16.6 g/100 g
	Total fat..... 20.9 g/100 g	Chloride..... 0.55 g/100 g
	Ash..... 2.08 g/100 g	K..... 1530 mg/kg
	Fructose..... 0.24 g/100 g	Mn..... 5.9 mg/kg
	Indicative values for Moisture, Glucose, Starch, Ca and Mg	
BCR-644	Artificial foodstuff - Free sugars and starch/glucose Sugar	50 g
	Mass fraction on dry mass basis (g/100 g)	Certified value
	Fructose..... 16.2.....	Uncertainty (g/100 g)
	Sucrose..... 10.81.....	1.1
	Lactose..... 15.85.....	0.25
	Starch/glucose..... 35.1.....	0.29
		1.2
BCR-645	Artificial foodstuff - Free sugars and starch/glucose Sugar	50 g
	Mass fraction on dry mass basis (g/100 g)	Certified value
	Sucrose..... 26.2.....	Uncertainty (g/100 g)
	Lactose..... 27.8.....	0.8
	Starch/glucose..... 25.2.....	0.6
		0.9
ERM-BD518	Bran breakfast cereal - Dietary fibre Certified using five different methods of dietary fibre analysis Certified values	25 g
	AOAC 1990..... 30.2 g/100 g	AOAC 1992 MES-TRIS..... 30.5 g/100 g
	Englyst (GC)..... 24.1 g/100 g	Englyst (colorimetry)..... 25.0 g/100 g
	Uppsala..... 27.6 g/100 g	

Code	Product	Unit																																				
ERM-BD272	Crispbread - Acrylamide Certified value Acrylamide .... 0.98 ± 0.09 mg/kg	68 g																																				
ERM-BD273	Toasted bread - Acrylamide The matrix material ERM-BD273, consists of 30 g of toasted bread powder of particle size smaller than 500 µm, stored in amber glass bottles under inert atmosphere and stored at a temperature of - 20 °C. Certified value Acrylamide ..... 425 ng/g	vial																																				
<b>New</b> ERM-BD274	Rusk - Acrylamide Certified value Acrylamide ..... 47 ± 7 µg/kg	48 g																																				
<b>New</b> ERM-BD272-274	Crispbread - Acrylamide; Rusk - Acrylamide Set of ERM-BD272 and ERM-BD274	set																																				
BCR-191	Brown bread - Trace elements Certified values Cd ..... 28.4 µg/kg      Fe ..... 40.7 mg/kg      Pb ..... 187 µg/kg Cu ..... 2.6 mg/kg      Mn ..... 20.3 mg/kg      Zn ..... 19.5 mg/kg Indicative values for As, Ca, Cl, Cr, Hg, K, Mg, Na, Ni, P, Se	40 g																																				
NIST-2384	Baking chocolate - Fat, fatty acids Standard Reference Material (SRM <sup>®</sup> ) 2384 is intended primarily for use in validating methods for determining proximates, fatty acids, calories, vitamins, elements, catechins, caffeine, theobromine, and acrylamide in baking chocolate and similar matrices. Certified values for fat Fat (Extractable) ..... 51.4 ± 1.1 %      Fat (Sum of fatty acids) ..... 50.3 ± 1.1 % Certified values for selected fatty acids <table border="0" style="width: 100%; border-collapse: collapse;"> <thead> <tr> <th></th> <th style="text-align: center;">Mass fraction as the Triglyceride</th> <th style="text-align: center;">Mass fraction as the Fatty acid</th> </tr> </thead> <tbody> <tr> <td>Tetradecanoic acid (C14:0) ..... <b>New</b> NIST-1849	<p>Infant/Adult nutritional powder (milk) - Trace elements, proximates and nutrients</p> <p>NIST-1849 is intended primarily for validation of methods for determining proximates, fatty acids, vitamins, elements, amino acids, and nucleotides in infant and adult nutritional formulas and similar materials. It can also be used for quality assurance when assigning values to in-house reference materials. This material is a milk-based, hybrid infant/adult nutritional powder prepared by a manufacturer of infant formula and adult nutritional products. A unit of NIST-1849 consists of 10 packets, each containing approximately 10 g of material.</p> <p>Certified concentrations for fatty acids as triglycerides</p> <p>Octanoic acid (C8:0).....0.638 ± 0.067% (Caprylic acid)</p> <p>Decanoic acid (C10:0).....0.473 ± 0.019% (Capric acid)</p> <p>Dodecanoic acid (C12:0).....3.712 ± 0.075% (Lauric acid)</p> <p>Tetradecanoic acid (C14:0).....1.521 ± 0.021% (Myristic acid)</p> <p>Pentadecanoic acid (C15:0).....0.0070 ± 0.0003%</p> <p>Hexadecanoic acid (C16:0).....2.50 ± 0.16 % (Palmitic acid)</p> <p>(Z)-9-Hexadecenoic acid (C16:1 n-7).....0.0262 ± 0.0016% (Palmitoleic acid)</p> <p>Octadecanoic acid (C18:0).....0.905 ± 0.056% (Stearic acid)</p> <p>(Z)-9-Octadecenoic acid.....10.63 ± 0.88% (C18:1 n-9) (Oleic acid)</p> <p>(Z)-11-Octadecenoic acid (C18:1 n-7).....0.203 ± 0.021% (Vaccenic acid)</p> <p>(Z,Z)-9,12-Octadecadienoic acid (C18:2 n-6).....6.02 ± 0.10% (Linoleic acid)</p> <p>(Z,Z,Z)-9,12,15-Octadecatrienoic acid (C18:3 n-3).....0.561 ± 0.043% (α-Linolenic acid)</p> <p>Eicosanoic acid (C20:0).....0.095 ± 0.003% (Arachidic acid)</p> <p>(Z,Z,Z,Z)-5,8,11,14-Eicosatetraenoic acid (C20:4 n-6).....0.206 ± 0.022% (Arachidonic acid)</p> <p>(Z,Z,Z,Z,Z)-4,7,10,13,16,19-Docosahexaenoic acid (C22:6).....0.067 ± 0.006% Tetracosanoic acid (C24:0).....0.039 ± 0.003% (Lignoceric acid)</p> <p>Certified concentrations for selected elements</p> <table border="0"> <tr> <td>Ca..... 4900 ± 130 mg/kg</td> <td>I..... 1.37 ± 0.41 mg/kg</td> <td>Na..... 4150 ± 140 mg/kg</td> </tr> <tr> <td>Cl..... 6280 ± 140 mg/kg</td> <td>K..... 8860 ± 130 mg/kg</td> <td>P..... 3782 ± 36 mg/kg</td> </tr> <tr> <td>Cr..... 1.09 ± 0.21 mg/kg</td> <td>Mg..... 1578 ± 69 mg/kg</td> <td>Zn..... 152.3 ± 5.1 mg/kg</td> </tr> <tr> <td>Cu..... 20.29 ± 0.43 mg/kg</td> <td>Mn..... 51.00 ± 0.53 mg/kg</td> <td></td> </tr> <tr> <td>Fe..... 177.1 ± 3.3 mg/kg</td> <td>Mo..... 1.62 ± 0.15 mg/kg</td> <td></td> </tr> </table> <p>Certified concentrations for selected vitamins</p> <p>Retinol (Vitamin A).....16.4 ± 1.3 mg/kg</p> <p>Cholecalciferol (Vitamin D3).....0.251 ± 0.027 mg/kg</p> <p>α-Tocopherol.....369 ± 16 mg/kg</p> <p>γ-Tocopherol.....189 ± 13 mg/kg</p> <p>δ-Tocopherol.....79.2 ± 2.4 mg/kg</p> <p>β-Tocopherol.....5.77 ± 0.79 mg/kg</p> <p>Phylloquinone (Vitamin K1).....2.20 ± 0.18 mg/kg</p> <p>Thiamine (Vitamin B1) hydrochloride.....15.8 ± 1.3 mg/kg</p> <p>Riboflavin (Vitamin B2).....17.4 ± 1.0 mg/kg</p> <p>Niacinamide.....97.5 ± 2.3 mg/kg</p> <p>Pantothenic acid.....64.8 ± 2.2 mg/kg</p> <p>Pyridoxine (Vitamin B6) hydrochloride.....14.2 ± 1.5 mg/kg</p> <p>Folic acid.....2.11 ± 0.13 mg/kg</p> <p>Biotin.....1.92 ± 0.25 mg/kg</p> <p>Indicative values for selected fatty acids as triglycerides, proximates, cholesterol, lactose, and calories, selected vitamins, Se, amino acids, taurine and nucleotides</p>	Ca..... 4900 ± 130 mg/kg	I..... 1.37 ± 0.41 mg/kg	Na..... 4150 ± 140 mg/kg	Cl..... 6280 ± 140 mg/kg	K..... 8860 ± 130 mg/kg	P..... 3782 ± 36 mg/kg	Cr..... 1.09 ± 0.21 mg/kg	Mg..... 1578 ± 69 mg/kg	Zn..... 152.3 ± 5.1 mg/kg	Cu..... 20.29 ± 0.43 mg/kg	Mn..... 51.00 ± 0.53 mg/kg		Fe..... 177.1 ± 3.3 mg/kg	Mo..... 1.62 ± 0.15 mg/kg		10 x 10 g

## Food and drink products

Code	Product	Unit
NIES27	<b>Typical Japanese diet - Minor and trace elements</b> This certified reference material (CRM) is intended for use in the quality assurance of the analysis of minor and trace elements in the Japanese diet and in similar food matrices. Certified values Ca ..... 0.125 ± 0.004 %      Cd ..... 0.069 ± 0.009 mg/kg      Sn ..... 1.6 ± 0.1 mg/kg K ..... 0.550 ± 0.015 %      Cu ..... 2.8 ± 0.1 mg/kg      Sr ..... 4.9 ± 0.2 mg/kg Na ..... 1.00 ± 0.04 %      Mg ..... 576 ± 12 mg/kg      Zn ..... 20.9 ± 0.9 mg/kg As ..... 0.60 ± 0.04 mg/kg      Mn ..... 8.9 ± 0.2 mg/kg      U ..... 0.0029 ± 0.0004 mg/kg Ba ..... 1.1 ± 0.1 mg/kg      Se ..... 0.25 ± 0.02 mg/kg Reference values for Br, Cl, Co, Cs, I, Fe	18 g

## Drinks

LGC7140	<b>Soft drink - Colours</b> Known weights of three food colours were added to a diluted solution of commercial soft drink concentrate. Certified values Ponceau 4R (E124) ..... 18.7 mg/L      Tartrazine (E102) ..... 29.9 mg/L Sunset yellow (E110) ..... 19.6 mg/L	60 mL
<b>New</b> ERM-BD011	<b>Orange juice</b> This certified reference material is intended for use in the development, validation or quality control of analytical methods for the determination of degrees Brix or Refractive Index of sugar solutions and food extracts. Certified values Degrees Brix ..... 1.26      Refractive index ..... 1.3348	3 mL
<b>New</b> ERM-BD012	<b>Orange juice</b> This certified reference material is intended for use in the development, validation or quality control of analytical methods for the determination of degrees Brix or Refractive Index of sugar solutions and food extracts. Certified values Degrees Brix ..... 12.72      Refractive index ..... 1.3521	3 mL
<b>New</b> ERM-BD013	<b>Orange juice</b> This certified reference material is intended for use in the development, validation or quality control of analytical methods for the determination of degrees Brix or Refractive Index of sugar solutions and food extracts. Certified values Degrees Brix ..... 22.07      Refractive index ..... 1.3673	3 mL
<b>New</b> ERM-BD014	<b>Orange juice</b> This certified reference material is intended for use in the development, validation or quality control of analytical methods for the determination of degrees Brix or Refractive Index of sugar solutions and food extracts. Certified values Degrees Brix ..... 55.55      Refractive index ..... 1.4320	3 mL
<b>New</b> ERM-BD015	<b>Orange juice</b> This certified reference material is intended for use in the development, validation or quality control of analytical methods for the determination of degrees Brix or Refractive Index of sugar solutions and food extracts. Certified values Degrees Brix ..... 64.73      Refractive index ..... 1.4529	3 mL

**For refractive index standards see the listing of physical standards later in this catalogue.**

**LGC provides proficiency testing schemes for the soft drinks industry – see introduction “About proficiency testing (PT)” of this catalogue for further details.**

## Alcoholic beverage

ERM-BA006	<b>Brandy - Alcohol</b> European Reference Material ERM-BA006 is a commercial brandy available in 50mL portions contained in amber glass vials fitted with 20mm bromo-butyl stoppers and crimp caps. Certified values Apparent alcoholic strength ..... 37.83 % alcohol by volume, ABV Actual alcoholic strength ..... 40.12 % alcohol by volume, ABV Apparent density in air of the obscured spirit ..... 950.38 kg/m <sup>3</sup>	50 mL
LGC5100	<b>Whisky - Congeners</b> Whisky sourced from a commercial source is available in 10mL unit in amber glass vials using sealed septa with crimped caps. Certified values Methanol ..... 8.2 g/100 L      2-Methylbutan-1-ol ..... 19.6 g/100 L Propan-1-ol ..... 67.4 g/100 L      3-Methylbutan-1-ol ..... 51.4 g/100 L 2-Methylpropan-1-ol ..... 64.9 g/100 L      2+3-Methylbutan-1-ol ..... 70.1 g/100 L Indicative values for acetaldehyde, butan-1-ol, furfural, ethyl acetate	10 mL

Code	Product	Unit
	LGC5001 and LGC5003 LGC5001 and LGC5003 are wine certified reference materials obtained from a commercial source supplied in 250mL units. They are certified for alcoholic strengths ranging from 5% - 15%. The alcoholic strength was determined from the density of the distillate by reference to the laboratory alcohol tables issued by United Kingdom HM Customs and Excise (ref. RDC80/267).	
LGC5001	Wine - Alcohol (5%) Certified value Alcohol..... 5.04 mL/100 mL (at 20°C)	250 mL
LGC5003	Wine - Alcohol (15 %) Certified value Alcohol..... 14.66 % (at 20°C)	250 mL
LGC5004	Lager shandy - Alcohol This certified reference material for lager shandy is supplied in 150mL units and sealed in aluminium cans. Certified value Alcohol..... 1.02 mL/100 mL (at 20°C)	330 mL
ERM-BA005	Lager - Alcohol Alcohol..... 5.07 mL/100 mL (at 20°C)	330 mL
	LGC provides three proficiency testing schemes for the alcoholic beverage industry; BAPS (analysis of beer), MAPS (analysis of malted and unmalted barley) and DAPS (analysis of alcoholic beverages other than beer) – see section “About proficiency testing (PT)” of this catalogue for further details.	
BCR-651	Beer - Alcohol (low level) Certified value Ethanol..... 0.505 % (v/v)	10 mL
BCR-652	Beer - Alcohol (very low level) Certified value Ethanol..... 0.051 % (v/v)	10 mL
BCR-653	Wine - Alcohol (low level) Certified value Ethanol..... 0.539 % (v/v)	10 mL
	ERM-AC404 – ERM-AC407 European Reference Material ERM-AC404 – ERM-AC407 are Ethanol/ Water certified reference materials supplied in 50mL units in glass bottles and sealed with crimp cap. They are certified for alcoholic strength ranging from 5% - 70%.	
ERM-AC404	Ethanol/water - 5% Ethanol Certified value Ethanol..... 4.96 mL/100 mL at 20°C Density..... 990.05 kg/m <sup>3</sup> at 20°C	50 mL
ERM-AC405	Ethanol/water - 15% Ethanol Certified value Ethanol..... 14.99 mL/100mL at 20°C Density..... 977.94 kg/m <sup>3</sup> at 20°C	50 mL
ERM-AC406	Ethanol/water - 40% Ethanol Certified value Ethanol..... 40.04 mL/100 mL at 20°C Density..... 946.91 kg/m <sup>3</sup> at 20°C	50 mL
ERM-AC407	Ethanol/water - 70% Ethanol Certified value Ethanol..... 69.98 mL/100mL at 20°C Density..... 884.55 kg/m <sup>3</sup> at 20°C ABV: alcohol by volume	50 mL

## Food supplements

IRMM-311 Genomic DNA of *Bacillus licheniformis* DSM 5749 in agarose inserts for Pulsed Field Gel Electrophoresis (PFGE) vial

The intended use of this material is the taxonomic identification of the authorised probiotic feed additive *Bacillus licheniformis* DSM 5749 by pulsed field gel electrophoresis (PFGE). The material is supplied in a vial containing one agarose insert of undigested genomic DNA of *Bacillus licheniformis* DSM 5749. Certified values and uncertainties are provided for SfiI digested DNA fragments in the size interval 50 kb - 90 kb and requires the use of a specified analytical procedure.

These SRMs can also be used for quality assurance when assigning values to in-house control materials. The materials in the suite of bitter orange dietary supplement SRMs have been developed to cover a range of natural matrices and analyte levels.</p>	set																								

## Food and drink products

Code	Product	Unit
<b>New</b> NIST-3281	<b>Cranberry (Fruit) - Organic acids</b> A unit of NIST-3281 consists of five packets, each containing approximately 6 g of freeze-dried, powdered fruit. Certified values (dry-mass basis) Citric acid ..... 79.2 ± 6.4 mg/g      Quinic acid ..... 47.8 ± 6.8 mg/g Malic acid ..... 40.6 ± 2.3 mg/g      Shikimic acid ..... 2.09 ± 0.72 mg/g	5 x 6 g
<b>New</b> NIST-3282	<b>Low-calorie cranberry juice cocktail - Organic acids, Trace elements</b> A unit of NIST-3282 consists of five ampoules, each containing approximately 1.2 mL of liquid. Certified mass fraction values for organic acids Citric acid ..... 3.221 ± 0.053 mg/g      Quinic acid ..... 2.672 ± 0.048 mg/g Malic acid ..... 2.133 ± 0.042 mg/g Certified mass fraction values for elements Calcium ..... 26.3 ± 1.6 mg/kg      Manganese ..... 0.493 ± 0.016 mg/kg Copper ..... 0.23 ± 0.06 mg/kg      Potassium ..... 247 ± 12 mg/kg Magnesium ..... 12.97 ± 0.84 mg/kg      Sodium ..... 201 ± 20 mg/kg Indicative values for organic acids, anions, trace elements and sugars	5 x 1.2 mL
<b>New</b> NIST-3283	<b>Cranberry extract - Organic acids</b> A unit of NIST-3283 consists of five packets, each containing approximately 2.5 g of cranberry extract. Certified mass fraction values for organic acids (dry-mass basis) Citric acid ..... 18.7 ± 2.3 mg/g      Quinic acid ..... 16.6 ± 3.7 mg/g Malic acid ..... 9.9 ± 1.2 mg/g Indicative values for organic acids and anions	5 x 2.5 g
<b>New</b> NIST-3284	<b>Cranberry-containing solid oral dosage form - Organic acids</b> A unit of NIST-3284 consists of five packets, each containing approximately 2.5 g of powdered material. Certified mass fraction values for organic acids (dry-mass basis) Citric acid ..... 34.7 ± 4.8 mg/g      Quinic acid ..... 25.9 ± 3.5 mg/g Malic acid ..... 19.9 ± 1.9 mg/g Indicative values for organic acids and anions	5 x 2.5 g
<b>New</b> NIST-3285	<b>Mixed Berry-containing solid oral dosage form - Organic acids</b> This Standard Reference Material (SRM) is intended primarily for use in validating analytical methods for the determination of organic acids in solid oral dosage forms containing bilberries, blueberries, and cranberries and in similar matrices. This SRM can also be used for quality assurance when assigning values to in-house control materials. A unit of NIST-3285 consists of five packets, each containing approximately 2.5 g of powdered material. Certified values (dry-mass basis) Malic acid ..... 22.83 ± 0.53 mg/g      Quinic acid ..... 24.87 ± 0.42 mg/g Reference values for organic acids and anions	5 x 2.5 g
<b>New</b> NIST-3287	<b>Blueberry (Fruit) - Organic acids</b> A unit of NIST-3287 consists of five packets, each containing approximately 5 g of freeze-dried, powdered fruit. Certified values mass fraction values for organic acids (dry-mass basis) Citric acid ..... 24.33 ± 0.63 mg/g      Quinic acid ..... 25.53 ± 0.73 mg/g Malic acid ..... 1.711 ± 0.060 mg/g Certified mass fraction values for elements (dry-mass basis) Calcium (Ca) ..... 323 ± 16 mg/kg      Manganese (Mn) ..... 8.47 ± 0.59 mg/kg Copper (Cu) ..... 2.22 ± 0.16 mg/kg      Phosphorus (P) ..... 671 ± 21 mg/kg Iron (Fe) ..... 12.20 ± 0.74 mg/kg      Potassium (K) ..... 4490 ± 220 mg/kg Magnesium (Mg) ..... 313.7 ± 7.2 mg/kg      Zinc (Zn) ..... 6.49 ± 0.61 mg/kg Indicative values for organic acids, anions, proximates, sugars, total dietary fiber, sodium, calories, vitamins and amino acids	5 x 5 g
<b>New</b> NIST-3291	<b>Bilberry extract - Organic acids</b> A unit of NIST-3291 consists of five packets, each containing approximately 1 g of bilberry extract. Certified mass fraction values for organic acids (dry-mass basis) Citric acid ..... 22.9 ± 2.5 mg/g      Quinic acid ..... 12.2 ± 2.2 mg/g Malic acid ..... 5.9 ± 1.7 mg/g Indicative values for organic acids and anions	5 x 1 g

## Food allergens

NIST-RM 8445	<b>Spray-Dried Whole Egg for Allergen Detection</b> This Reference Material (RM) is intended primarily for the use in evaluating test kits for determination of the presence of allergenic egg proteins. The material provides a common matrix to the allergen research community, who may wish to conduct studies using a single broadly available material.	5 g

## Purified genomic DNA (gDNA)

The stable genomic DNA (gDNA) standards (IRMM-447, 448, 449) have been developed for the verification and detection of food-borne pathogens by diagnostic polymerase chain reaction (PCR) within the European FOOD-PCR project. These standards support harmonisation and validation of different PCR methods by their use as taxonomic controls in PCR reactions.

Code	Product	Unit
IRMM-447	Genomic DNA of <i>Listeria monocytogenes</i> Freeze dried genomic DNA Certified identity: genomic DNA <i>Listeria monocytogenes</i> (strain 4B, NCTC 11994) Indicative value for the mass of genomic DNA per vial Dry ice shipment required	vial
IRMM-448	Genomic DNA <i>Campylobacter jejuni</i> (NCTC 11351) Indicative value Mass of genomic DNA per vial ..... 71 ng Dry ice shipment required	vial
<b>New</b> IRMM-449	Genomic DNA of <i>Escherichia coli</i> Freeze dried genomic DNA Certified identity: genomic DNA <i>Escherichia coli</i> O157, strain EDL 933 Indicative value for the mass of genomic DNA per vial Dry ice shipment required	vial
IRMM-311	Genomic DNA of <i>Bacillus licheniformis</i> DSM 5749 in agarose inserts for Pulsed Field Gel Electrophoresis (PFGE) The intended use of this material is the taxonomic identification of the authorised probiotic feed additive <i>Bacillus licheniformis</i> DSM 5749 by pulsed field gel electrophoresis (PFGE). The material is supplied in a vial containing one agarose insert of undigested genomic DNA of <i>Bacillus licheniformis</i> DSM 5749. Certified values and uncertainties are provided for SfiI digested DNA fragments in the size interval 50 kb - 90 kb and requires the use of a specified analytical procedure.	vial

## DR CALUX® TEQ reference materials

BioDetection Systems - DR CALUX® is a cell based screening technology which can be used as an alternative to instrumental chemical analysis, as described by the European Commission Directive EC/1883/2006 and EC/152/2009 ('screening methods should be used'). Instead of separating and measuring each individual dioxin and dioxin-like PCB, the DR CALUX® works by mimicking the toxic effect of dioxins/PCBs. A receptor cell which is highly specific to those dioxins/PCBs that exhibit toxicity is used in the test. And the DR CALUX® gives a luminescent signal which is a direct measure of the total TEQ value.

This DR CALUX® does not require extensive sample preparation or sophisticated instrumentation and is faster and significantly cheaper to use than conventional HRGC/HRMS. This system offers an attractive alternative screening method to give a result which can be readily checked against the EU regulated limits. By such a screening strategy, compliant samples (25% below the EU limits for food/feed) can be easily selected for no further instrumental analysis. CALUX (Chemical Activated Luciferase gene eXpression)

# Industrial reference materials

Standards

*Excellence through measurement*

# Metals reference materials

The use of reference materials and standards is an essential part of all production stages in the metals industry; from the acceptance of raw materials, through the production process, and finally verifying the end product.

LGC Standards and Breitländer (Germany) joined forces in 2008 to offer the widest range of analytical and industrial materials for laboratories around the world.

LGC Standards has a comprehensive metals database which acts as an important tool to find the most suitable standard for the customer based on their application. Developed over 30 years, it contains products from some 20 premier suppliers including NIST, IRMM and BAM, as well as the world's most respected private manufacturers of metals and metal standards. We continually seek to expand our portfolio to ensure we have the best fit for our customers needs, sourcing materials from across the world including unique suppliers in Asia, USA, Europe and India.

LGC Standards offers an extensive range of reference materials for use in industrial applications, from Setting-Up Samples (SUS) for daily process control, and custom standards designed to your own specification, to Certified Reference Materials (CRM) for method validation and calibration.

We supply a wide range of materials in the following ranges:

- Iron and steel products
- Non-ferrous metals and alloys
- Ores
- Bauxite and fluorspar
- Refractories and carbides
- Slags
- Coals
- Petrochemical standards
- Solid fuels
- Rocks, ceramic materials and minerals
- Cement
- Plastics
- Paint and industrial sludges
- Fertilizers

*Excellence through measurement*

## The use of reference materials

Reference materials are instrumental in ensuring the reliability of analytical measurements and so ensuring that decisions are based on reliable data. When choosing a matrix reference material for a particular application the analyst should consider the following factors before selecting a material:

- Matrix match and potential interferences
- Analytes
- Measurement range
- Measurement uncertainties
- Certification procedures used by the producer
- Documentation supplied with the material (e.g. certificate or report).

## Sourcing of reference materials

Through our network of offices and extensive experience in sourcing reference materials, we are able to provide a comprehensive list of materials.

Please request one of our metals catalogues for further information on the products available, by contacting your local LGC Standards office.

# ICP glassware and consumables from MEINHARD®

For the best performance and value, look no further than MEINHARD® accessories for your ICP.

## Superior sample introduction

- Available for an unrivalled range of ICP and ICP-MS instruments
- All nebulizers are offered in quartz, or borosilicate glass, for more demanding low-background measurements
- New high-purity quartz - TQH series. Designed primarily for ICP-MS use, providing the lowest possible elemental background as demanded by the semiconductor industry
- Nebulizers in Teflon PFA and polypropylene from Elemental Scientific. These microconcentric nebulizers are especially useful for small-volume samples and highly-corrosive solutions like HF
- High Efficiency Nebulizer - the top-rated glass microconcentric nebulizer. Especially well suited for microsample analysis. It exhibits detection limits comparable to those of a standard MEINHARD® nebulizer whilst consuming 25 times less sample.

Representative Detection Limits (µG/L)

## Petrochemical standards

### Conostan<sup>®</sup> Oil Analysis Standards

Reference standards for lubricant/oil analysis include: Element (metallo-organic) standards and associated blank oils and solvent (for ICP application), Particle Counting (contamination) and standards for Automatic Particle Counters.

The division of SCP science "CONOSTAN<sup>®</sup> Oil Analysis Standards" is the world's leading manufacturer and marketer of elements (metallo-organic) in oil standards and related spectroscopy products. Its leading position is derived from superior product chemistry, manufacturing technology, and blending techniques. CONOSTAN<sup>®</sup> products are used extensively in the calibration and operation of analytical instruments for the analysis of elements in oil and other organic fluids. CONOSTAN<sup>®</sup> is the only source of multi-element metallo-organic standards in the history of the National Institute of Standards & Technology (NIST), for example, NIST-1085b is CONOSTAN<sup>®</sup> S-21:300, Code CON-S214300 and CON-S218300. The variety of products afford convenience as reference and routine analytical materials for ICP, DCP, Rotating Disc Electrode (RDE), XRF, AA, and other analytical spectrometer techniques. CONOSTAN products are optimized for:

- **Compatibility:** 33 elements can be combined over an extensive concentration range
- **Solubility:** CONOSTAN<sup>®</sup> element standards are soluble in CONOSTAN<sup>®</sup> PremiSolv<sup>™</sup> ICP solvent, CONOSTAN<sup>®</sup> base oils, ketones, such as 4-methyl-2-pentanone (MIBK), as well as in paraffinic and aromatic hydrocarbons, such as mineral oil, xylene, and kerosene.
- **Volatility:** CONOSTAN<sup>®</sup> element standards are made in ultra-pure, highly processed hydrocarbon oil only; no solubilizers are used. These element standards are extremely stable to volatile loss.
- **Viscosity:** Viscosity range at room temperature is ideal for instrumental applications.
- **Instrumental Response:** Excellent analytical response over a wide range of analytical applications.
- **Shelf life:** All CONOSTAN<sup>®</sup> element standards and spectroscopy products have a one year minimum shelf life from the date of shipment.

### Single element standards in oil

Single-element CONOSTAN<sup>®</sup> standards are especially useful for atomic absorption and X-ray fluorescence determinations. The matrix oil for these standards is high purity hydrocarbon oil with a 17 cSt viscosity at 40°C and flash point of 175°C (20 Blank Oil). They are available at the following metal concentrations.

The 1000 and 5000 ppm standards can be used as a source of single-element calibration standard for your specific applications using all types of spectroscopic methods of analysis.

Cobalt 1000 & 5000 ppm, yttrium 1000 & 5000 ppm, and scandium 2000 ppm are often used as internal standards for inductively coupled plasma (ICP) analysis.

Stock concentrations are listed in the table below.

**Concentrations not listed in the table below are available as custom single element standards on request.**

Code	Product		Unit
CON-150-100-135	Aluminium in 20 blank oil, 1000 µg/g	Al:1000 ppm	50 g

## Petrochemical standards

Code	Product	Unit
<b>Multi-element standards in oil</b>		
<p>Multi-element Conostan standards are especially useful for ICP, RDE, and DCP analysis of metals in oil. They are available in high purity hydrocarbon oil solutions and are blended to approximately 70 cSt viscosity at 40°C and flash point of 215°C (75 Blank Oil). They contain equal amounts of each element. <b>Concentrations not listed are available as custom multi-element standards on request. You may create your own S-21 and S-12 standards by adding additional elements to the stocked product standards, listed as follows.</b></p>		
CON-150-021-002	Multi-element standard in 75 blank oil: S-21:10 ppm	100 g

## Petrochemical standards

Code	Product	Unit
<b>Custom Multi-Element Standards in Mineral Oil</b>		
<p>Customised standards can be prepared if your spectrometric analysis of metals requires a specific combination of elements and concentrations. Custom standards allow testing for unusual combinations and concentrations of elements with minimal spectral interference and repeatable results. Both single element and multi-element custom standards are available. Any element available (All except S, Cl, As, Hg, and Se) can be combined to prepare multi-element custom standards. Create your own S-21, S-12, and AM Special standards by adding additional elements to the stocked product standards. Popular additions to S-21 are potassium, lithium, and antimony. Standards are designated, for example, by S-21+K+Sb:100 ppm, AM Special+Fe:900 ppm, S-12+Mo:100 ppm, etc. Custom standards are available in 100 g, 200 g, and 400 g. Custom standards can be shipped to customers within 5 - 7 days of receipt of an order.</p>		

### Sulfur in mineral oil

Sulfur and chlorine calibration standards are specifically designed for analysis of sulfur and chlorine in a wide variety of petroleum products by XRF, ICP and other analytical techniques. All standards are prepared on a weight/weight basis in high purity hydrocarbon oil with a 70 cSt viscosity at 40°C (75 Blank Oil). Stock concentrations are listed in the table below. Concentrations not listed are available as custom standards on request.

CON-150-400-025	Sulfur in mineral oil, blank	S:blank	100 g
CON-150-400-018	Sulfur in mineral oil, 50 µg/g	S:50 ppm; 0.005 wt%	100 g
CON-150-400-002	Sulphur in mineral oil, 100 µg/g	S:100 ppm; 0.01 wt%	100 g
CON-150-400-010	Sulfur in mineral oil, 250 µg/g	S:250 ppm; 0.025 wt%	100 g
CON-150-400-019	Sulfur in mineral oil, 500 µg/g	S:500 ppm; 0.05 wt%	100 g
CON-150-400-023	Sulfur in mineral oil, 750 µg/g	S:750 ppm; 0.075 wt%	100 g
CON-150-400-003	Sulphur in mineral oil, 1000 µg/g	S:1000 ppm; 0.1 wt%	100 g
CON-150-400-011	Sulfur in mineral oil, 2500 µg/g	S:2500 ppm; 0.25 wt%	100 g
CON-150-400-020	Sulfur in mineral oil, 5000 µg/g	S:5000 ppm; 0.5 wt%	100 g

Code Product Unit

**PartiStan™ particle standards- Compliant with ISO 11171:1999**

Automatic particle counters (APC), using a laser source, are used for measurement of contamination in lubrication products, especially hydraulic fluids. These products are necessary for instrument calibration and verification of performance, and may, also, be used for non-laser based particle counting instruments.

**PartiStan™ Particle Standard Features:**

- Traceable to NIST SRM 2806.
- ISO 11171 compliant, Per Annex F; uses ISO medium test dust.
- Certificate of analysis for 4-30 um(c) (micrometers, certified).
- Maintain conformance to ISO programs (ISO 4402 is obsolete).
- Independent of APC manufacturer.

**Routine Products Usage:**

- PartiStan™ 2806.
  - Sizing calibration (Clause 6, ISO 11171).
  - Verification fluid for APC performance.
- PartiStan™ SCF (Super Clean Fluid).
  - APC system cleaning.
  - Test sample dilution.
- PartiStan™ Calibration Kits - All fluids for ISO 11171 APC calibration.
- PartiStan™ UFTD.
  - Ultra fine test dust suspensions for ISO 11171 - Annexes A,B,C, & E.

CON-150-701-005	PartiStan™ UFTD - Ultra Fine test dust suspension in Super Clean Fluid	400/250 mL

**CONOSTAN D-Series® Element (metallo-organic) Standards: D-3, D-12, D-19 (JOAP)**

The CONOSTAN-D-Series® standards are specially designed for military laboratories required to conform to the JOAP (Joint Oil Analysis Program –U.S.) program for emission spectrometers. These standards **should not be used unless the laboratory instrument is JOAP certified**. Refer to and use CONOSTAN multi-element standards, otherwise.

**D-3 series (Note: U.S. Dept. Of Defense NSN # equivalent shown with product identity)**

**Oils and liquid fuels**

ERM-EF213 – ERM-EF211		
Petroleum products containing Sulfur (S) in its natural forms, closely matching petrol fuels. The material is supplied in 19mL units in glass ampoules.		
ERM-EF213	Petrol - Sulfur Certified value S ..... 9.1 ± 0.8 mg/kg	Amp.
ERM-EF212	Petrol - Sulfur Certified value S ..... 20.2 ± 1.1 mg/kg	19 mL
ERM-EF211	Petrol - Sulfur Certified value S ..... 48.8 ± 1.7 mg/kg	Amp.
ERM-EF674 – ERM-EF673		
Petroleum products containing Sulfur (S) in its natural forms, closely matching diesel fuels. The material is supplied in 100mL units in glass bottles with tamper evident tops.		
ERM-EF673	Diesel - Sulfur Certified value S ..... 52.4 ± 1.3 mg/kg Indicative value for density	100 mL
ERM-EF672 - ERM-EF104		
The material is intended to control that gas oil does not contain more sulfur than allowed by Directive 1999/32/EEC so that maximum atmospheric sulfur emissions are not exceeded. It can be used to validate and/or calibrate analytical methods applied.		
ERM-EF674	Diesel - Sulfur Certified value S ..... 11.0 ± 0.9 mg/kg Indicative value for density	100 mL
ERM-EF672	Gas oil - Sulfur Certified value S ..... 0.0203 %	8 mL
ERM-EF671	Gas oil - Sulfur Certified value S ..... 0.0452 %	8 mL
ERM-EF104	Gas oil - Sulfur Certified value S ..... 0.1019 %	8 mL

## Petrochemical standards

NIST-2037	Solvent Red 24 diesel fuel dye This Standard Reference Material® (SRM®) is intended for the verification and calibration of spectrophotometers used to measure the concentration of Solvent Red dyes employed as colorants to mark "off-road" diesel fuel. NIST-2037 is certified for the purity of the Solvent Red 24 Dye (C <sub>24</sub> H <sub>20</sub> N <sub>4</sub> O, molecular mass 380.45) and for the second-derivative-based molecular absorption coefficients (extinction coefficients) of solutions of Solvent Red 24 Dye in p-xylene and in 97:3 (v:v) kerosene:p-xylene. Each unit of NIST-2037 consists of an amber 30 mL (1 oz), screw-capped bottle containing approximately 100 mg of solid Solvent Red 24 Dye. Certified values Mass Fraction (Purity) of Solvent Red 24 Dye <table border="1"> <thead> <tr> <th>Constituent</th> <th>Mass Fraction (%)</th> <th>95% Uncertainty Interval</th> </tr> </thead> <tbody> <tr> <td>Solvent Red 24 Dye</td> <td>98.0</td> <td>92.3 % to 100 %</td> </tr> </tbody> </table> Second-Derivative-Based Molecular Absorption Coefficients for Solutions of Solvent Red 24 Dye <table border="1"> <thead> <tr> <th></th> <th>Wavelength of Second Derivative Maximum (nm)</th> <th>Wavelength of Second Derivative Minimum (nm)</th> <th>Second-Derivative-Based Solvent Absorption Coefficients (L g<sup>-1</sup> cm<sup>-1</sup>)</th> <th>Second-Derivative-Based Solvent Absorption Coefficients (L mol<sup>-1</sup> cm<sup>-1</sup>)</th> </tr> </thead> <tbody> <tr> <td>p-Xylene</td> <td>534</td> <td>557</td> <td>0.088 ± 0.005</td> <td>33 ± 2</td> </tr> <tr> <td>Kerosene:p-Xylene</td> <td>531</td> <td>555</td> <td>0.101 ± 0.006</td> <td>39 ± 3</td> </tr> </tbody> </table>	Constituent	Mass Fraction (%)	95% Uncertainty Interval	Solvent Red 24 Dye	98.0	92.3 % to 100 %		Wavelength of Second Derivative Maximum (nm)	Wavelength of Second Derivative Minimum (nm)	Second-Derivative-Based Solvent Absorption Coefficients (L g <sup>-1</sup> cm <sup>-1</sup> )	Second-Derivative-Based Solvent Absorption Coefficients (L mol <sup>-1</sup> cm <sup>-1</sup> )	p-Xylene	534	557	0.088 ± 0.005	33 ± 2	Kerosene:p-Xylene	531	555	0.101 ± 0.006	39 ± 3	100 mg

<b>New</b> RTC-CRM920-010	Transformer oil - PCBs Oil taken from an electrical transformer. The sample was certified by USEPA SW846, 3 <sup>rd</sup> edition Method 3540A/8081 and is suitable for use by these and other similar methods. Certified value Aroclor 1260 ..... 35.2 mg/kg	10 g																					
NIST-1818A	Lubricating base oil - Chlorine Set of 5 x 20 mL ampoules Certified values I Cl ..... 31.6 mg/kg II Cl ..... 60.0 mg/kg III Cl ..... 78.2 mg/kg IV C ..... 154.4 mg/kg V Cl ..... 234.0 mg/kg	set																					

## Petrochemical standards

Code	Product	Unit
NIST-2720	<b>Di-n-butyl sulfide - Sulfur</b> This Standard Reference Material® (SRM) is intended for use as an internal standard in X-ray fluorescence spectrometry (XRF) measurements of sulfur in oils and other liquid hydrocarbon matrices. Certified value of sulfur (mass fraction) .....21.91 % ± 0.15 %	5 x 4.5 mL
NIST-1819A	<b>Lubricating base oil - Sulfur</b> NIST-1819a consists of five lubricating base oils at different sulphur concentrations. Certified values I S ..... 423.5 mg/kg II S ..... 741.1 mg/kg III S ..... 4022 mg/kg IV S ..... 4689 mg/kg V S ..... 6135 mg/kg	set
SS99863-0	<b>Lube oil - Trace elements</b> ASTM-IP method ICP, Ca in the range 0.18 to 0.35 % m/m ASTM-IP method ICP, P in the range 0.08 to 0.16 %m/m ASTM-IP method ICP, Zn in the range 0.09 to 0.15 %m/m	50 mL
NIST-1848	<b>Lubricating oil additive package</b> This Standard Reference Material (SRM®) is intended primarily for use in the evaluation of methods and the calibration of equipment used in the analysis of lubricating oil additive packages, engine lubricating oils, and materials of a similar matrix. NIST-1848 consists of a typical additive package used in the manufacture of crankcase lubricating oil for gasoline engines. Certified values B ..... 0.137 ± 0.019 %      Mg .....0.821 ± 0.038 %      Zn..... 0.873 ± 0.022 % Ca ..... 0.359 ± 0.01 %      P .....0.788 ± 0.028 % Cl ..... 0.0927 ± 0.020 %      S .....2.3270 ± 0.043 % Indicative values for H, N, Si, total base number by ASTM D 2896, total base number by ASTM D 4739	100 g
NIST-1634C	<b>Fuel oil - Trace elements</b> Certified values As..... 0.1426 mg/kg      Ni..... 17.54 mg/kg      V ..... 28.19 mg/kg Co ..... 0.1510 mg/kg      Se..... 0.1020 mg/kg Indicative values for Ba, Cl, Na, S	100 mL
SS99860-0	<b>Fuel oil - Vanadium and nickel</b> ASTM-IP method IP288, V in the range 16 to 140 µg/g ASTM-IP method IP288, Ni in the range 7 to 45 µg/g	50 mL
SS99862-0	<b>Fuel oil - Sulfur ED X-ray</b> ASTM D4294-IP336, Sulfur in the range 0.981 to 2.572 %m/m	50 mL
SS99866-0	<b>Fuel oil - Sulfur WD X-ray</b> ASTM D2622, Sulfur in the range 0.9931 to 2.578 %m/m	50 mL
SS99898-0	<b>Gas oil - Aromatics HPLC</b> ASTM D6379, Aromatics- Di HPLC in the range 1.44 to 2.82 %m/m ASTM D6379, Aromatics- Mono HPLC in the range 15.2 to 21.2 %m/m ASTM D6379, Aromatics- Total HPLC in the range 16.9 to 22.82 %m/m	50 mL
SS99857-0	<b>Kerosene - Naphthalenes</b> ASTM D1840, Naphthalenes in the range 1.35 to 2.4 %vol	50 mL
NIST-1580	<b>Shale oil - PAHs</b> Set of 5 x 2 mL ampoules Certified values Benzo[a]pyrene..... 21 mg/kg      o-Cresol ..... 385 mg/kg      Pyrene ..... 104 mg/kg Benzo[e]pyrene..... 18 mg/kg      Phenol ..... 407 mg/kg      2,6-Dimethylphenol... 175 mg/kg Fluoranthene..... 54 mg/kg      Perylene ..... 3.4 mg/kg      Benzo[f]quinoline ..... 16 mg/kg	set
NIST-1582	<b>Petroleum crude oil - PAHs</b> Set of 5 x 2 mL Certified values Benzo[a]anthracene... 3.0 mg/kg      Fluoranthene ..... 2.5 mg/kg      Phenanthrene ..... 101 mg/kg Benzo[e]pyrene..... 1.1 mg/kg      Perylene ..... 31 mg/kg      Dibenzothiophene..... 33 mg/kg	set (5)
NIST-2721	<b>Crude oil (light-sour) - Sulfur and mercury</b> Certified values S ..... 1.5832 %      Hg..... 41.7 ng/kg	5 x 10 mL
NIST-2722	<b>Crude oil (heavy-sweet) - Sulfur and mercury</b> Certified values S ..... 0.21037 %      Hg..... 129 ng/kg	5 x 10 mL
NIST-1616b	<b>Kerosene - Sulfur</b> Certified value S ..... 8.41 mg/kg	100 mL

## Petrochemical standards

Code	Product	Unit
NIST-2298	Gasoline (High-Octane) - Sulfur Certified value S ..... 4.7 µg/g Indicative value for the density	5 x 20 mL
NIST-2299	Gasoline (Reformulated) - Sulfur Certified value S ..... 13.6 µg/g Indicative value for the density	5 x 20 mL
SS99868-0	Gasoline - Sulfur UVF ASTM D5453, Sulfur in the range 2.2 to 129 mg/kg	50 mL
SS99858-0	Kerosene - Sulfur ED X-ray ASTM D4294-IP336, Sulphur in the range 0.0032 to 0.07 %m/m	50 mL
NIST-1619B	Residual fuel oil - Sulfur Certified value S ..... 0.6960 %      Hg ..... 3.46 ng/kg	100 mL
NIST-1621E	Residual fuel oil - Sulfur Certified value S ..... 0.9480 %	100 mL
NIST-1622E	Residual fuel oil - Sulfur Certified value S ..... 2.1468 %	100 mL
NIST-2717A	Residual fuel oil - Sulfur Certified value S ..... 2.9957 %	100 mL
NIST-1620C	Residual fuel oil - Sulfur Certified value S ..... 4.561 %	100 mL
NIST-2770	Diesel fuel oil - Sulfur NIST-2770 is a commercial "No. 2-D" distillate fuel oil as defined by ASTM D 975-97 Standard Specification for Diesel Fuel Oils. A unit of NIST-2770 consists of 10 amber ampoules, each containing approximately 10 mL of diesel fuel sealed under an argon atmosphere. Certified value S ..... 41.57 mg/kg	10 x 10 mL
<b>New</b> NIST-2771	Diesel fuel blend stock - Sulfur Certified value Sulfur (S).....0.102 ± 0.014 mg/kg	100 mL
NIST-1624d	Diesel fuel oil - Sulphur NIST-1624d is a commercial "No. 2-D" distillate fuel oil as defined by ASTM D 975-97 Standard Specification for Diesel Fuel Oils. A unit of NIST-1624d consists of 10 amber ampoules, each containing approximately 10 mL of diesel fuel sealed under an argon atmosphere. Certified value S ..... 3882 mg/kg	100 mL
IRMM-441 and IRMM-442 High purity n-heptane and isooctane intended for use as a primary standard in the octane rating of motor and aviation fuels as specified in ASTM test methods (see Volume 05.04, Annual Book of ASTM Standards) and in evaluating ASTM methods for chemical analysis of fuels by gas chromatography (D2268).		
IRMM-441	n-Heptane <u>n-Heptane</u> Certified value: Purity by difference 99.985% <u>Impurities</u> Certified values Total organics (other than n-Heptane)..... 0.012 %      Water ..... 0.003 % Isooctane ..... 0.007 %      Pb.....<0.5 µg/L	100 mL
IRMM-442	Isooctane <u>Isooctane</u> Certified value: Purity by difference 99.985% <u>Impurities</u> Certified values Total organics (other than Isooctane)..... 0.011%      Water ..... 0.004%, n-Heptane ..... 0.002 %      Pb.....<1 µg/L	100 mL

## Petrochemical standards

Code	Product	Unit
NIST-1815a	n-Heptane Certified purity..... 99.987 %	100 mL
NIST-1816A	Isooctane (2,2,4-Trimethylpentane) Certified purity..... 99.987 %	100 mL
NIST-2724b	Diesel fuel oil - Sulfur and mercury This Standard Reference Material® (SRM®) is intended for use in the evaluation of methods and the calibration of instruments used in the determination of total sulfur and mercury in fuel oils or materials of similar matrix. NIST-2724B is a commercial "No. 2-D" distillate fuel oil as defined by ASTM D 975-96a Standard Specification for Diesel Fuel Oils. Certified value S ..... 0.04265 % Hg ..... 0.034 ng/kg	10 x 10 mL
NIST-2890	Water saturated octanol NIST-2890 is a solution of water saturated 1-octanol which is certified for its water content. Certified values Water ..... 47.3 mg/g      Water ..... 39.24 mg/mL	5 x 2 mL
NIST-RM 8505	Crude oil - Vanadium Reference value V ..... 390 mg/kg	275 mL
NIST-RM 8506A	Transformer oil - Water A unit of NIST-RM 8506a consists of five ampoules with each ampoule containing 9.5 mL of petroleum electrical insulating oil. The first coulometric value is the NIST result corrected for the coulometrically detected material present in the oil that reacts with iodine but is not water (interfering substances). Because the correction is new, two additional uncorrected values determined by the coulometric method in ASTM Standard D 1533-99 are provided: the NIST result and a consensus result obtained from an interlaboratory study conducted among 14 laboratories from industry. The volumetric reference value, which has not been corrected for interfering substances, is significantly different from the coulometric results. Applying the coulometrically determined correction for interfering substances does not resolve this difference. The basis of the difference between coulometric and volumetric results in this material has not been fully resolved. Reference values for water content NIST coulometric mass concentration of water, ASTM method minus interferences ..... 12.1 mg/kg ± 1.9 mg/kg NIST coulometric mass concentration of water, ASTM method ..... 18.3 mg/kg ± 1.9 mg/kg Consensus coulometric mass concentration of water, ASTM method: ..... 21.2 mg/kg ± 1.7 mg/kg NIST volumetric mass concentration of water, modified ASTM method: ..... 34.5 mg/kg ± 2.2 mg/kg	set
NIST-RM 8509	Methanol - Water Set of 5 x 5 mL Reference value Water ..... 93 mg/kg Indicative values for Ag, Al, Cr, Cu, Fe, Mg, Mn, Mo, Na, Ni, Pb, S, Si, Sn, Ti, V, Zn	set
NIST-RM 8510	Methanol - Water Set of 5 x 5 mL Reference value Water ..... 325 mg/kg	set
NIST-1083	Oil (base oil) - Wear metals Indicative values for Ag, Al, Cr, Cu, Fe, Mg, Mn, Mo, Na, Ni, Pb, S, Si, Sn, Ti, V, Zn	150 mL
NIST-1084A	Oil - Wear metals Set of 5 x approx. 1.6 g of the oil blend Certified values Ag ..... 101.4 mg/kg      Mg ..... 99.5 mg/kg      Sn ..... 97.2 mg/kg Cr ..... 98.3 mg/kg      Mo ..... 100.3 mg/kg      Ti ..... 100.4 mg/kg Cu ..... 100.0 mg/kg      Ni ..... 99.7 mg/kg      V ..... 95.9 mg/kg Fe ..... 98.9 mg/kg      Pb ..... 101.1 mg/kg Indicative values for Al, S, Si	set
<b>New</b> NIST-1085B	Oil - Wear metals This Standard Reference Material® (SRM®) is intended primarily for use in the evaluation of methods and in the calibration of apparatus used in the analysis of engine lubricating oils and other materials of similar matrix for metal content. A unit of NIST-085b consists of 10 ampoules: five 5 mL amber borosilicate ampoules, each containing approximately 1.2 g of a blend of 21 constituent elements in a base oil at a nominal concentration of 300 mg/kg; and five ampoules, each containing approximately 1.2 g of a matching base oil intended for use as an analytical blank and for matrix matching. Certified values for elements in NIST-1085b Cadmium (Cd) ..... 302.9 ± 5.1 mg/kg      Nickel (Ni) ..... 295.9 ± 7.4 mg/kg Chromium (Cr) ..... 302.9 ± 3.9 mg/kg      Silver (Ag) ..... 304.6 ± 8.9 mg/kg Copper (Cu) ..... 295.6 ± 8.5 mg/kg      Sodium (Na) ..... 305.2 ± 7.0 mg/kg Lead (Pb) ..... 297.7 ± 6.8 mg/kg      Vanadium (V) ..... 297.8 ± 4.6 mg/kg Magnesium (Mg) ..... 297.3 ± 4.1 mg/kg      Zinc (Zn) ..... 296.8 ± 6.8 mg/kg Indicative values for further elements.	set (5)

### Multi-test verification materials (MTVMs)

The Multi-Test Verification Materials (MTVMs) are unique because, unlike most other reference materials, they enable a laboratory to use a single sample to validate different tests and instrumentation. Each unit is supplied with data for multiple types of internationally accepted test methods.

**Biodiesel fuel calibration standards (ASTM D6584, EN 14105:2003)**

Oil companies and vehicle manufacturers are actively working with biofuel extender producers to have agreed standards for esterified vegetable oils suitable for blending with conventional diesel to ensure that the product meets the technical requirements of modern diesel engines. The minimum test requirements for biodiesel blend extenders are specified in ASTM D6751 in USA and EN14214 within Europe. All road fuels are subject to strict quality controls, these are vital to maintain standards and provide authorities with the ability to assess safety risks and environmental pollution. In 1997 the European committee for standardisation was given the task to develop a uniform standard for fatty acid methyl esters (FAME). The result was the EN14214 specification. This standard was introduced in 2004 and is valid for all member states of the European Union. In particular this standard gives engine and automobile makers the ability to give warranties to those vehicles which run on biodiesel. At present a limit of 5% FAME is allowed in diesel and this 5% must conform to the EN14214 standard.

Both ASTM D-6751 and EN 14214 specify the use of ASTM Method D-6584 for glycerin determination.

**ASTM D 6584 standard solutions**

This test method covers the quantitative determination of free and total glycerin in B-100 methyl esters by gas chromatography. The range of detection for free glycerin is 0.005 to 0.05 mass %, and total glycerin from 0.05 to 0.5 mass %. This procedure is not applicable to vegetable oil methyl esters obtained from lauric oils, such as coconut oil and palm kernel oil.

#### Free and total glycerol and mono-, di-, tri-glyceride content

Method EN 14105 is used to determine glycerin and total glycerine in fatty acid methyl esters (FAME) used in biodiesel products. Samples are derivatized, then analyzed by high temperature gas chromatography (HTGC). It is similar to ASTM D6584.

## ASTM Methods for petrochemical analysis

### ASTM Method D2887

#### Boiling range distribution of petroleum fractions

Method D2887 covers the determination of the boiling range distribution of petroleum products. The test method is applicable to petroleum products and fractions having a final boiling point of 538°C (1000°F) or lower at atmospheric pressure as measured by this test method. The test method is limited to samples having a boiling range greater than 55°C (100°F), and having a vapor pressure sufficiently low to permit sampling at ambient temperature.

Code	Product	Unit
U-ASTM-120-1	ASTM Method D2887 Column Test Mix 1% (w/v) in n-Octane Each analyte at 1 % (w/v) in n-Octane n-Hexadecane      n-Octadecane	1 mL

## ASTM Methods for petrochemical analysis

Code	Product	Unit
U-ASTM-110	ASTM Method D2887 Column Test Mixture	4 x 1 mL

### ASTM Method D3710

#### Boiling range distribution of gasoline and gasoline fractions

Method D3710 covers the determination of the boiling range distribution of gasoline and gasoline components. The test method is applicable to petroleum products and fractions with a final boiling point of 500°F (260°C) or lower.

U-ASTM-100-1	ASTM Method D3710 Calibration Mixture	1 mL																		
	<table style="width: 100%; border: none;"> <tr> <td style="width: 33%;">2-Methylbutane ..... 10 % (v/v)</td> <td style="width: 33%;">Toluene ..... 12 % (v/v)</td> <td style="width: 33%;">n-Dodecane ..... 4 % (v/v)</td> </tr> <tr> <td>n-Pentane ..... 8 % (v/v)</td> <td>n-Octane ..... 5 % (v/v)</td> <td>n-Tridecane ..... 2 % (v/v)</td> </tr> <tr> <td>2-methylpentane ..... 6 % (v/v)</td> <td>p-Xylene ..... 14 % (v/v)</td> <td>n-Tetradecane ..... 2 % (v/v)</td> </tr> <tr> <td>n-Hexane ..... 6 % (v/v)</td> <td>n-Propylbenzene ..... 5 % (v/v)</td> <td>n-Pentadecane ..... 2 % (v/v)</td> </tr> <tr> <td>2,4-Dimethylpentane.... 6 % (v/v)</td> <td>n-Decane ..... 4 % (v/v)</td> <td></td> </tr> <tr> <td>n-Heptane ..... 10 % (v/v)</td> <td>n-Butylbenzene ..... 4 % (v/v)</td> <td></td> </tr> </table>	2-Methylbutane ..... 10 % (v/v)	Toluene ..... 12 % (v/v)	n-Dodecane ..... 4 % (v/v)	n-Pentane ..... 8 % (v/v)	n-Octane ..... 5 % (v/v)	n-Tridecane ..... 2 % (v/v)	2-methylpentane ..... 6 % (v/v)	p-Xylene ..... 14 % (v/v)	n-Tetradecane ..... 2 % (v/v)	n-Hexane ..... 6 % (v/v)	n-Propylbenzene ..... 5 % (v/v)	n-Pentadecane ..... 2 % (v/v)	2,4-Dimethylpentane.... 6 % (v/v)	n-Decane ..... 4 % (v/v)		n-Heptane ..... 10 % (v/v)	n-Butylbenzene ..... 4 % (v/v)

Butylsulfide (as S) in Isooctane .....1.0 mg/L Ampoule 3 ... Butylsulfide (as S) in Isooctane .....10 mg/L Ampoule 4 ... Butylsulfide (as S) in Isooctane .....40 mg/L Ampoule 5 ... Butylsulfide (as S) in Isooctane .....75 mg/L Ampoule 6 ... Butylsulfide (as S) in Isooctane .....100 mg/L <b>Concentration</b>	6 x 2 mL
<b>New</b>	U-PANAL0217-1 ASTM D3120, D3246 and D3961 - Isooctane (blank)	2 mL
<b>New</b>	U-PANAL0217-2 ASTM D3120, D3246 and D3961 - Butyl sulfide (as S) - 1 mg/L in Isooctane	2 mL
<b>New</b>	U-PANAL0217-3 ASTM D3120, D3246 and D3961 - Butyl sulfide (as S) - 10 mg/L in Isooctane	2 mL
<b>New</b>	U-PANAL0217-4 ASTM D3120, D3246 and D3961 - Butyl sulfide (as S) - 40 mg/L in Isooctane	2 mL
<b>New</b>	U-PANAL0217-5 ASTM D3120, D3246 and D3961 - Butyl sulfide (as S) - 75 mg/L in Isooctane	2 mL
<b>New</b>	U-PANAL0217-6 ASTM D3120, D3246 and D3961 - Butyl sulfide (as S) - 100 mg/L in Isooctane	2 mL

## ASTM Methods for petrochemical analysis

Code	Product	Unit
------	---------	------

### ASTM Method D4629

#### Trace nitrogen in liquid petroleum hydrocarbons

Method D4629 covers the determination of trace total nitrogen in liquid petroleum hydrocarbons by syringe/inlet oxidative combustion and chemiluminescence detection.

#### ASTM D4629 - Trace nitrogen by chemiluminescence kit (low)

<b>New</b>	U-PANAL0218	ASTM D4629 Trace nitrogen by chemiluminescence kit (low)	6 x 2 mL
------------	-------------	--	----------

Each kit contains:

Description .	Concentration
Ampoule 1.... Isooctane .....	Solvent blank
Ampoule 2.... Pyridine (as N) in Isooctane.....	1 mg/L
Ampoule 3.... Pyridine (as N) in Isooctane.....	2 mg/L
Ampoule 4.... Pyridine (as N) in Isooctane.....	5 mg/L
Ampoule 5.... Pyridine (as N) in Isooctane.....	10 mg/L
Ampoule 6.... Pyridine (as N) in Isooctane.....	20 mg/L

<b>New</b>	U-PANAL0218-1	ASTM D4629 - Isooctane (blank)	2 mL
------------	---------------	--------------------------------	------

<b>New</b>	U-PANAL0218-2	ASTM D4629 - Pyridine (as N) - 1 mg/L in Isooctane	2 mL
------------	---------------	--	------

<b>New</b>	U-PANAL0218-3	ASTM D4629 - Pyridine (as N) - 2 mg/L in Isooctane	2 mL
------------	---------------	--	------

<b>New</b>	U-PANAL0218-4	ASTM D4629 - Pyridine (as N) - 5 mg/L in Isooctane	2 mL
------------	---------------	--	------

<b>New</b>	U-PANAL0218-5	ASTM D4629 - Pyridine (as N) - 10 mg/L in Isooctane	2 mL
------------	---------------	---	------

<b>New</b>	U-PANAL0218-6	ASTM D4629 - Pyridine (as N) - 20 mg/L in Isooctane	2 mL
------------	---------------	---	------

#### ASTM D4629 - Trace nitrogen by chemiluminescence (medium)

<b>New</b>	U-PANAL0219	ASTM D4629 Trace nitrogen by chemiluminescence kit (medium)	6 x 2 mL
------------	-------------	---	----------

Each kit contains:

Description .	Concentration
Ampoule 1.... Isooctane .....	Solvent blank
Ampoule 2.... Pyridine (as N) in Isooctane.....	50 mg/L
Ampoule 3.... Pyridine (as N) in Isooctane.....	100 mg/L
Ampoule 4.... Pyridine (as N) in Isooctane.....	200 mg/L
Ampoule 5.... Pyridine (as N) in Isooctane.....	500 mg/L
Ampoule 6.... Pyridine (as N) in Isooctane.....	1000 mg/L

<b>New</b>	U-PANAL0219-1	ASTM D4629 - Isooctane (blank)	2 mL
------------	---------------	--------------------------------	------

<b>New</b>	U-PANAL0219-2	ASTM D4629 - Pyridine (as N) - 50 mg/L in Isooctane	2 mL
------------	---------------	---	------

<b>New</b>	U-PANAL0219-3	ASTM D4629 - Pyridine (as N) - 100 mg/L in Isooctane	2 mL
------------	---------------	--	------

<b>New</b>	U-PANAL0219-4	ASTM D4629 - Pyridine (as N) - 200 mg/L in Isooctane	2 mL
------------	---------------	--	------

<b>New</b>	U-PANAL0219-5	ASTM D4629 - Pyridine (as N) - 500 mg/L in Isooctane	2 mL
------------	---------------	--	------

<b>New</b>	U-PANAL0219-6	ASTM D4629 - Pyridine (as N) - 1000 mg/L in Isooctane	2 mL
------------	---------------	---	------

#### ASTM D4629 - Trace nitrogen by chemiluminescence (high)

<b>New</b>	U-PANAL0220	ASTM D4629 Trace nitrogen by chemiluminescence kit	6 x 2 mL
------------	-------------	--	----------

Each kit contains:

Description .	Concentration
Ampoule 1.... Isooctane .....	Solvent blank
Ampoule 2.... Pyridine (as N) in Isooctane.....	500 mg/L
Ampoule 3.... Pyridine (as N) in Isooctane.....	1000 mg/L
Ampoule 4.... Pyridine (as N) in Isooctane.....	2000 mg/L
Ampoule 5.... Pyridine (as N) in Isooctane.....	5000 mg/L
Ampoule 6.... Pyridine (as N) in Isooctane.....	10000 mg/L

<b>New</b>	U-PANAL0220-1	ASTM D4629 - Isooctane (blank)	2 mL
------------	---------------	--------------------------------	------

<b>New</b>	U-PANAL0220-2	ASTM D4629 - Pyridine (as N) - 500 mg/L in Isooctane	2 mL
------------	---------------	--	------

<b>New</b>	U-PANAL0220-3	ASTM D4629 - Pyridine (as N) - 1000 mg/L in Isooctane	2 mL
------------	---------------	---	------

<b>New</b>	U-PANAL0220-4	ASTM D4629 - Pyridine (as N) - 2000 mg/L in Isooctane	2 mL
------------	---------------	---	------

<b>New</b>	U-PANAL0220-5	ASTM D4629 - Pyridine (as N) - 5000 mg/L in Isooctane	2 mL
------------	---------------	---	------

<b>New</b>	U-PANAL0220-6	ASTM D4629 - Pyridine (as N) - 10000 mg/L in Isooctane	2 mL
------------	---------------	--	------

Code Product Unit

**ASTM D5762 - Trace nitrogen by chemiluminescence**

**New** U-PANAL0221 ASTM D5762 Trace Nitrogen by Chemiluminescence kit 6 x 2 mL

Each kit contains:

Description.	Concentration
Ampoule 1 ... Toluene.....	Solvent blank
Ampoule 2 ... Acridine (as N) in Toluene.....	1 mg/L
Ampoule 3 ... Acridine (as N) in Toluene.....	5 mg/L
Ampoule 4 ... Acridine (as N) in Toluene.....	10 mg/L
Ampoule 5 ... Acridine (as N) in Toluene.....	50 mg/L
Ampoule 6 ... Acridine (as N) in Toluene.....	100 mg/L

**New** U-PANAL0221-1 ASTM D5762 - Toluene (blank) 2 mL

**New** U-PANAL0221-2 ASTM D5762 - Pyridine (as N) - 1 mg/L in Toluene 2 mL

**New** U-PANAL0221-3 ASTM D5762 - Pyridine (as N) - 5 mg/L in Toluene 2 mL

**New** U-PANAL0221-4 ASTM D5762 - Pyridine (as N) - 10 mg/L in Toluene 2 mL

**New** U-PANAL0221-5 ASTM D5762 - Pyridine (as N) - 50 mg/L in Toluene 2 mL

**New** U-PANAL0221-6 ASTM D5762 - Pyridine (as N) - 100 mg/L in Toluene 2 mL

**ASTM D4929 (B) organic chloride in crude oil**

**New** U-PANAL0223 ASTM D4929 (B) Organic chloride in crude Oil kit 6 x 2 mL

Each kit contains:

Description.	Concentration
Ampoule 1 ... Isooctane.....	Solvent blank
Ampoule 2 ... Chlorobenzene (as Cl) in Isooctane.....	5 mg/L
Ampoule 3 ... Chlorobenzene (as Cl) in Isooctane.....	10 mg/L
Ampoule 4 ... Chlorobenzene (as Cl) in Isooctane.....	25 mg/L
Ampoule 5 ... Chlorobenzene (as Cl) in Isooctane.....	50 mg/L
Ampoule 6 ... Chlorobenzene (as Cl) in Isooctane.....	100 mg/L

**ASTM D5808 organic chlorine in hydrocarbons**

**Organic chloride in aromatic hydrocarbons**

Method D5808 covers the determination of organic chloride in aromatic hydrocarbons and related chemicals by microcoulometry.

**New** U-PANAL0224 ASTM D5808 Organic chloride in hydrocarbons kit 6 x 2 mL

Each kit contains:

Description.	Concentration
Ampoule 1 ... Methanol.....	Solvent blank
Ampoule 2 ... Trichlorophenol (as Cl) in Isooctane.....	1 mg/L
Ampoule 3 ... Trichlorophenol (as Cl) in Isooctane.....	5 mg/L
Ampoule 4 ... Trichlorophenol (as Cl) in Isooctane.....	10 mg/L
Ampoule 5 ... Trichlorophenol (as Cl) in Isooctane.....	15 mg/L
Ampoule 6 ... Trichlorophenol (as Cl) in Isooctane.....	25 mg/L

**Viscosity oil standards**

PSL2700V01 - PSL2700V19

These standards are calibrated by the PSL Calibration ISO 17025 Accredited Laboratory. The standards will be supplied complete with UKAS calibration certificates and have direct traceability to NIST and other international laboratories. Uncertainties of measurement are stated on the calibration certificates. Long shelf lives are provided by using stable base oils. The viscosity oil standards are suitable for the calibration and verification of the following:

- Glass Capillary viscometers
- Automated Kinematic Viscometer Systems
- Rotational/Cone & Plate Viscometers
- Low Temperature Viscometer Systems
- Cold Cranking Simulators
- Flow Cups

PSL2700V01 N4 - Viscosity oil standard 500 mL

Kinematic viscosity (nominal)

0.47 mm<sup>2</sup>/s,cSt (20 °C)    0.45 mm<sup>2</sup>/s,cSt (25 °C)    0.40 mm<sup>2</sup>/s,cSt (40 °C)

Dynamic viscosity (nominal)

0.31 mPa.s,cP (20 °C)    0.29 mPa.s,cP (25 °C)    0.26 mPa.s,cP (40 °C)

NIST-607	Potassium feldspar - Trace elements Certified values Rb ..... 523.90 mg/kg      Sr ..... 65.485 mg/kg	5 g
NIST-610	NIST-610 and NIST-611 NIST-610 and NIST-611 are the same material and therefore have the same certified values. NIST-610 consists of glass 3 mm thick and NIST-611 is 1 mm thick. Glass - Trace elements Certified values Fe ..... 458 mg/kg      Pb ..... 426 mg/kg      Th ..... 457.2 mg/kg Mn ..... 485 mg/kg      Rb ..... 425.7 mg/kg      U ..... 461.5 mg/kg Ni ..... 458.7 mg/kg      Sr ..... 515.5 mg/kg Indicative values for Ag, Au, Co, Cu, K, Ti, Tl, Zn	6 wafers
NIST-611	Glass - Trace elements	6 wafers
NIST-612	NIST-612 and NIST-613 NIST-612 and NIST-613 are the same material and therefore have the same certified values. NIST-612 consists of glass 3 mm thick and NIST-613 is 1 mm thick. Glass - Trace elements Certified value Ag ..... 22.0 mg/kg      Pb ..... 38.57 mg/kg      Th ..... 37.9 mg/kg Fe ..... 51 mg/kg      Rb ..... 31.4 mg/kg      U ..... 37.38 mg/kg Ni ..... 38.8 mg/kg      Sr ..... 78.4 mg/kg Indicative values for Au, B, Ba, Ce, Co, Cu, Dy, Er, Eu, Gd, K, La, Mn, Nd, Sm, Ti, Tl, Zn	6 wafers
NIST-613	Glass - Trace elements	6 wafers
NIST-614	NIST-614 and NIST-615 NIST-614 and NIST-615 are the same material and therefore have the same certified values. NIST-614 consists of wafers of glass 3 mm thick and NIST-615 is 1 mm thick. Glass - Trace elements Certified values Ag ..... 0.42 mg/kg      Pb ..... 2.32 mg/kg      Th ..... 0.748 mg/kg Cu ..... 1.37 mg/kg      Rb ..... 0.855 mg/kg      U ..... 0.823 mg/kg K ..... 30 mg/kg      Sr ..... 78.4 mg/kg Indicative values for Au, B, Cd, Co, Eu, Fe, Ga, La, Ni, Sb, Sc, Ti, Tl	6 wafers
NIST-615	Glass - Trace elements	6 wafers
NIST-616	NIST-616 and NIST-617 NIST-616 and NIST-617 are the same material and therefore have the same certified values. NIST-616 consists of wafers of glass 3 mm thick and NIST-617 is 1 mm thick. Glass - Trace elements Certified values K ..... 29 mg/kg      Sr ..... 41.72 mg/kg      U ..... 0.0721 mg/kg Pb ..... 1.85 mg/kg      Th ..... 0.0252 mg/kg Indicative values for Au, B, Cu, Fe, Ga, La, Rb, Sb, Sc, Ti, Tl	6 wafers
NIST-617	Glass - Trace elements	6 wafers
NIST-1872	Synthetic glass - Lead and germanium NIST-1872 consists of three different lead-germanate glasses in rod form approximately 2 x 2 x 20 mm. <u>K-453</u> Certified values Ge ..... 28.43 %      Pb ..... 54.21 % Indicative value for O <u>K-491</u> Certified values Ge ..... 26.10 %      Pb ..... 54.69 % Indicative values for Al, Ce, Fe, O, Si, Ta, Ti, Zr <u>K-968</u> Certified values Ge ..... 25.93 %      Pb ..... 54.74 % Indicative values for Ba, Cr, Eu, Mg, Ni, O, P, Si, Th, Ti, U, Zr	set (3)

## Plastics

Code	Product	Unit
NIST-2066	<p><b>K-411 glass microspheres</b></p> <p>This Standard Reference Material (SRM<sup>®</sup>) is intended for use as a standard for the quantitative microanalysis of particles and for the development of particle matrix correction procedures. The elements present in these microspheres, common to many classes of particles, are silicon, calcium, magnesium, iron, and oxygen. NIST-2066 consists of approximately 50 mg of glass microspheres of known composition and size (1 µm to 40 µm) with minimal microheterogeneity.</p> <p>Certified concentration in mass fraction of microspheres larger than 2 µm</p> <p>Silicon ..... 0.256 ± 0.017 kg/kg      Magnesium 0.092 ± 0.014 kg/kg            Calcium ..... 0.112 ± 0.023 kg/kg      Iron ..... 0.112 ± 0.023 kg/kg</p> <p>Indicative value for oxygen kg/kg</p>	50 mg

## Plastics

Code	Product	Unit
	<p>The "Packaging-Directive" – EC-Directive 94/62/EEC – regulates the amount of metals such as Cd, Cr, Hg and Pb in plastics. The materials VDA 001-4 as well as ERM-EC680 and ERM-EC681 were produced to facilitate the implementation of this directive and to allow the effective introduction of QA-systems for elemental analysis of plastic materials.</p>	
VDA 001-4	<p><b>Polyethylene - Cadmium</b></p> <p>Four polyethylene reference materials have been certified by IRMM on behalf of Verband der Automobilindustrie e.V. (VDA).</p> <p>Certified values</p> <p><u>Sicolen Yellow 09/16493</u>            Cd ..... 40.9 ± 1.2 mg/kg</p> <p><u>Sicolen Orange 28/16494</u>            Cd ..... 75.9 ± 2.1 mg/kg</p> <p><u>Sicolen Red 39/16495</u>            Cd ..... 198 ± 5 mg/kg</p> <p><u>Sicolen Bordeaux 49/16496</u>            Cd ..... 407 ± 12 mg/kg</p>	4 bottles

## Paint and industrial sludges

Code	Product	Unit
NIST-2579a	Set of six lead paint films (NIST-2570 - NIST-2575) - Lead A unit of NIST-2579a consists of a set of six coated polyester sheets, approximately 7.6 cm wide and 10.2 cm long. Five of the six sheets, NIST-2571 to NIST-2575, are coated with a single, uniform paint layer. The units are color coded and each color indicates a different level of lead content. The paint layer and white polyester sheet are approximately 0.04 mm and 0.2 mm thick, respectively. The sixth sheet, NIST-2570, is coated with a lead-free, lacquer layer of the same thickness as the lead paint samples and is included as a blank. All sheets are over-coated with a clear, thin, plastic laminate to protect the surface from abrasion.	set (6)
	NIST-2570 - NIST-2576 These items consist of one Mylarä sheet per unit. Each sheet, 7.6 cm x 10.2 cm, is coated with a single uniform paint layer for use with portable x-ray fluorescence analysers.	
NIST-2570	Lead paint film (white/blank) - Lead Certified value Pb ..... <0.01 mg/cm <sup>2</sup>	2 sheets
NIST-2571	Lead paint film (yellow) - Lead A unit of NIST-2571 consists of a white polyester sheet, approximately 7.6 cm wide, 10.2 cm long, and 0.2 mm thick, coated with a single, yellow-colored paint layer, approximately 0.04 mm thick. A blank, SRM 2570, is also provided. Certified value Pb ..... 3.58 mg/cm <sup>2</sup>	2 sheets
NIST-2572	Lead paint film (orange) - Lead A unit of NIST-2572 consists of a white polyester sheet, approximately 7.6 cm wide, 10.2 cm long, and 0.2 mm thick, coated with a single, orange-colored paint layer, approximately 0.04 mm thick. A blank, NIST-2570, is also provided. Certified value Pb ..... 1.527 mg/cm <sup>2</sup>	2 sheets
NIST-2573	Lead paint film (red) - Lead A unit of NIST-2573 consists of a white polyester sheet, approximately 7.6 cm wide, 10.2 cm long, and 0.2 mm thick, coated with a single, red-colored paint layer, approximately 0.04 mm thick. A blank, NIST-2570, is also provided. Certified value Pb ..... 1.040 mg/cm <sup>2</sup>	2 sheets
NIST-2574	Lead paint film (gold) - Lead A unit of NIST-2574 consists of a white polyester sheet, approximately 7.6 cm wide, 10.2 cm long, and 0.2 mm thick, coated with a single, gold-colored paint layer, approximately 0.04 mm thick. A blank, NIST-2570, is also provided. Certified value Pb ..... 0.714 mg/cm <sup>2</sup>	2 sheets
NIST-2575	Lead paint film (green) - Lead A unit of NIST-2575 consists of a white polyester sheet, approximately 7.6 cm wide, 10.2 cm long, and 0.2 mm thick, coated with a single, green-colored paint layer, approximately 0.04 mm thick. A blank, NIST-2570, is also provided. Certified value Pb ..... 0.307 mg/cm <sup>2</sup>	2 sheets
NIST-2576	Lead paint film (blue) - Lead A unit of NIST-2576 consists of a white polyester sheet, approximately 7.6 cm wide, 10.2 cm long, and 0.2 mm thick, coated with a single, blue-colored paint layer, approximately 0.04 mm thick. A blank, NIST-2570, is also provided. Certified value Pb ..... 5.59 mg/cm <sup>2</sup>	2 sheets
NIST-2589	Powdered paint - Lead NIST-2589 is composed of paint collected from the interior surface of housing. Certified value Pb ..... 9.99 % ± 1.6 %	35 g
NIST-2580	Powdered paint - Lead Certified value Pb ..... 4.34 %	30 g
NIST-2581	Powdered paint - Lead Certified value Pb ..... 0.449 %	35 g
NIST-2582	Powdered paint - Lead Certified value Pb ..... 209 mg/kg	20 g

## Paint and industrial sludges

Code	Product	Unit
NIST-RM 8680	Paint on fiberboard - Lead 10.2 x 15.2 x 1.3 cm sheet Indicative value for Pb	sheet
RTC-CRM017-020	Powdered paint - Lead The value was determined by USEPA SW-846 Methods 3050, 3051, 6010, and 7420 and NIOSH 7082. The sample is traceable to NIST by analysis, and is suitable for use by these and other similar methods. Certified value Pb ..... 7418 mg/kg	20 g
RTC-CRM050-020	Black powder paint - Lead Certified value Pb ..... <0.01 mg/kg	20 g
RTC-CRM013-050	Paint chips/waste - Trace elements The values were determined by USEPA SW846 (3rd edition) Methods 3050 and 6010. The sample is suitable for other 3000-series metals digestion procedure and 7000-series spectroscopic methods. Certified values Cd ..... 38 mg/kg      Cr ..... 618 mg/kg      Pb ..... 643 mg/kg	50 g
RTC-CRM006-050	Paint sludge - Trace elements Certified values Al ..... 73 mg/kg      Cr ..... 11 mg/kg      Na ..... 91 mg/kg Ba ..... 9970 mg/kg      Fe ..... 64 mg/kg      Pb ..... 753 mg/kg Ca ..... 111 mg/kg      K ..... 8710 mg/kg      Zn ..... 737431 mg/kg Cd ..... 32 mg/kg      Mg ..... 47 mg/kg Indicative values for B, Cu, Mn, Ni, Se, Sn, Sr, Ti, Tl	50 g
NIST-2586	Soil containing lead from paint - Trace elements Soil collected from urban areas where the principal source of lead is believed to be from old lead-based house paint. Certified values As ..... 8.7 mg/kg      Cr ..... 301 mg/kg Cd ..... 2.71 mg/kg      Pb ..... 432 mg/kg Indicative values for a wide range of additional elements	55 g
NIST-2587	Soil containing lead from paint - Trace elements Soil collected from a suburban garden known to have been contaminated by lead-based house paint. Certified values As ..... 13.7 mg/kg      Cr ..... 92 mg/kg Cd ..... 1.92 mg/kg      Pb ..... 3242 mg/kg Indicative values for a wide range of additional elements	55 g
RTC-CRM009-100	Electroplating sludge no. 1 - Trace metals The Reference Values were determined by USEPA SW846 (3rd edition) Methods 3050 and 6010. The sample is suitable for other 3000-series metals digestion procedures and 7000-series spectroscopic methods. Reference values Ag ..... 8.9 mg/kg      Cu ..... 121000 mg/kg Cr ..... 50.3 mg/kg      Ni ..... 343 mg/kg	100 g
RTC-CRM010-100	Electroplating sludge no. 2 - Trace metals The values were determined by USEPA SW846 (3rd edition) Methods 3050 and 6010, except for Mercury (Method 7471). The sample is suitable for other 3000-series metals digestion procedures and 7000-series spectroscopic methods. Certified values Ag ..... 56 mg/kg      Cr ..... 79 mg/kg      Mn ..... 17 mg/kg Al ..... 692 mg/kg      Cu ..... 63169 mg/kg      Ni ..... 194 mg/kg Ba ..... 175 mg/kg      Fe ..... 2,699 mg/kg      Zn ..... 183 mg/kg Ca ..... 563 mg/kg      Pb ..... 119344 mg/kg Indicative values for Hg, Mg, Mo, Na	100 g
RTC-CRM011-100	Electroplating sludge no. 3 - Trace metals Certified values Cr ..... 59225 mg/kg      Ni ..... 41975 mg/kg Cu ..... 108 mg/kg      Pb ..... 269 mg/kg Indicative values for a further 21 elements	100 g
RTC-CRM101-100	API separator sludge - PAHs Polynuclear aromatic hydrocarbons (PAH) contaminated oily sludge from a refinery located in the Western United States. The values were determined by USEPA SW846 (3rd edition) Methods 3540, 3550 and 8270. Sample is suitable for use by these and other similar methods. Certified values Chrysene ..... 10.6 mg/kg      Phenanthrene ..... 169 mg/kg 2-Methylnaphthalene ..... 250 mg/kg      Phenol ..... (30.09) mg/kg Fluorene ..... 68.4 mg/kg      Pyrene ..... 17 mg/kg Naphthalene ..... 89.5 mg/kg	100 g

## Standards for the semiconductor industry

Code	Product	Unit
NIST-2841	Semiconductor thin film Al mole fraction x near 0.20  This Standard Reference Material (SRM <sup>®</sup> ) is intended for use as a reference standard for analytical methods that measure the composition of thin films, such as electron microprobe analysis (EMPA), photoluminescence (PL), auger electron spectroscopy (AES) and X-ray photoelectron spectroscopy (XPS). A unit of NIST-2841 consists of an epitaxial layer of Al <sub>x</sub> Ga <sub>1-x</sub> As with certified Al mole fraction x grown on a GaAs substrate mounted to a stainless steel disc by the use of adhesive tape. Each unit is sealed in a Mylar envelope containing a nitrogen atmosphere.	disc
NIST-1994	Standard silicon single crystal wafer for crystalline orientation  This Standard Reference Material (SRM <sup>®</sup> ) is intended for use in the calibration of instruments (X-ray diffractometers) used to measure the crystal orientation of wafers relative to the crystal surface. The SRM unit consists of a 100-mm diameter silicon wafer. The crystal orientation of the (001) silicon crystal planes relative to the surface normal has been measured both parallel and perpendicular to an edge flat that is manufactured into the wafer.	unit
<b>New</b> NIST-1995	Standard sapphire single crystal wafer for crystalline orientation  This Standard Reference Material <sup>®</sup> (SRM <sup>®</sup> ) is intended for use in the calibration of instruments (X-ray diffractometers) used to measure the crystal orientation of wafers relative to the crystal surface. NIST-1995 consists of a 50 mm diameter sapphire wafer. Certified values for crystal orientation. Please ask for details.	50-mm wafer

## High tech ceramics

Code	Product	Unit
NIST-2842	Semiconductor thin film: Al <sub>x</sub> Ga <sub>1-x</sub> As epitaxial layers Al mole fraction x near 0.30  This Standard Reference Material (SRM <sup>®</sup> ) is intended for use as a reference standard for analytical methods that measure the composition of thin films, such as electron microprobe analysis (EMPA), photoluminescence (PL), auger electron spectroscopy (AES) and X-ray photoelectron spectroscopy (XPS). A unit of NIST-2842 consists of an epitaxial layer of Al <sub>x</sub> Ga <sub>1-x</sub> As with certified Al mole fraction x grown on a GaAs substrate mounted to a stainless steel disc by the use of adhesive tape. Each unit is sealed in a Mylar envelope containing a nitrogen atmosphere.	disc

## Miscellaneous matrix reference materials

Code	Product	Unit
ERM-AC316	Solvent Yellow 124 (SY124, Sudan 455, Somalia Yellow, T10) The fuel dye Solvent Yellow 124 (SY124) was introduced as a common marker in the European Union in 2002 to distinguish low duty fuels from higher taxed road fuels. ERM-AC316 is a solvent-free certified reference material for SY124 to be used to help accurately determine the amount of SY124 in solutions, thus enabling the appropriate quantity of marker to be added. Certified purity..... 95 %	200 mg
<b>New</b> NIST-RM 8395	Tissue Engineering Reference Scaffold This Reference Material (RM) is intended to provide a common tissue-engineering scaffold for measurement comparisons. A unit consists of one free-form fabricated poly( $\epsilon$ -caprolactone) scaffold approximately 20 mm in external diameter, 5 mm in external height, 200 $\mu$ m in strut diameter, 200 $\mu$ m in strut spacing, and 47 % porosity. Reference values for strut diameter, strut spacing, and porosity are provided	1 scaffold
<b>New</b> NIST-RM 8396	Tissue Engineering Reference Scaffold This Reference Material (RM) is intended to provide a common tissue-engineering scaffold for measurement comparisons. A unit consists of one free-form fabricated poly( $\epsilon$ -caprolactone) scaffold approximately 20 mm in external diameter, 5 mm in external height, 200 $\mu$ m in strut diameter, 300 $\mu$ m in strut spacing, and 60 % porosity. Reference values for strut diameter, strut spacing, and porosity are provided.	1 scaffold
<b>New</b> NIST-RM 8397	Tissue Engineering Reference Scaffold This Reference Material (RM) is intended to provide a common source tissue-engineering scaffold for measurement comparisons. A unit consists of one free-form fabricated poly( $\epsilon$ -caprolactone) scaffold approximately 20 mm in external diameter, 5 mm in external height, 200 $\mu$ m in strut diameter, 450 $\mu$ m in strut spacing, and 69 % porosity. Reference values for strut diameter, strut spacing, and porosity are provided.	1 scaffold

## Miscellaneous matrix reference materials

### Forensic matrix reference materials

Code	Product	Unit
NIST-2460	Standard bullet Standard Reference Material (SRM <sup>®</sup> ) NIST-2460 is a bullet signature standard comprising bullet profile signatures of six land engraved areas (LEAs) from fired bullets. This SRM is intended primarily for use as a check standard for crime laboratories to help verify that the computerized optical equipment for bullet imaging and profiling is operating properly. A unit of NIST-2460 consists of an SRM standard bullet that is mounted on a blue stub.	Each
<b>New</b> NIST-2905	Trace particulate explosive simulants Standard Reference Material (SRM) 2905 is a surrogate for explosives residues and is intended for use in evaluating analytical equipment used for the detection of trace explosives, which may include those based on ion mobility spectrometry. NIST-2905 consists of four non-explosive materials prepared from inert particles having a diameter of approximately 20 $\mu$ m to 30 $\mu$ m that are coated with trace levels of explosives. Two materials contain military-grade trinitrotoluene (TNT) with nominal concentrations of 0.01 % and 0.1 % mass fractions, and two materials contain Composition C-4 plastic explosive with nominal concentrations of 0.01 % and 0.1 % mass fractions. The Composition C-4 materials contain the explosives hexahydro-1,3,5-trinitro-1,3,5-triazine (RDX) and octahydro-1,3,5,7-tetranitro-1,3,5,7-tetrazocine (HMX). Certified concentrations are provided for TNT, RDX, and HMX. A unit of NIST-2905 consists of four individual plastic squeeze bottles each containing approximately 1 g of the trace particulate explosives materials. Certified concentrations for RDX and HMX in NIST-2905, 0.01 % Composition C-4 (nominal) Explosive            Mass Fraction RDX ..... 0.0777 $\pm$ 0.0009 mg/g            HMX.....0.00866 $\pm$ 0.00008 mg/g Certified Concentrations for RDX and HMX in NIST2905, 0.1 % Composition C-4 (nominal) Explosive            Mass Fraction RDX ..... 0.687 $\pm$ 0.014 mg/g            HMX.....0.0757 $\pm$ 0.0009 mg/g Certified Concentrations for TNT in NIST-2905, 0.01 % TNT (nominal) Explosive            Mass Fraction TNT ..... 0.097 $\pm$ 0.001 mg/g Certified Concentrations for TNT in NIST-2905, 0.1 % TNT (nominal) Explosive            Mass Fraction TNT ..... 0.976 $\pm$ 0.007 mg/g	150 g

<b>Miscellaneous matrix reference materials</b>																				
NIST-RM 8480	<p>Secondary ferrite number standard - Low range</p> <p>This Reference Material (RM) is intended for the calibration of instruments used to measure weld metal ferrite content in accordance with American National Standards Institute (ANSI), American Welding Society (AWS) and International Standards Organisation (ISO) normative standards ANSI/AWS A4.2 and ISO 8249. The ferrite content is measured in terms of a method defined quantity, the Ferrite Number (FN). NIST measurements were made in accordance with ANSI/AWS A4.2. Description and Source of Material: Each RM unit is a set of eight individually measured specimens. Each specimen is approximately 10 mm × 12 mm × 20 mm, and has an identification number scribed on one of the 12 mm × 20 mm faces. The measurement surface is the face opposite the surface that contains the identification number. RM 8480 comprises eight specimens having FN values ranging from 0 FN to 30 FN. The related RM 8481 Secondary Ferrite Number Standard - High Range, comprises eight specimens having FN values ranging from 30 FN to 120 FN.</p> <p>The RM was made from centrifugal castings of chromium-nickel steel alloys. The ferrite content was varied by adjusting the composition of the alloy. The cast specimens approximate the ferrite distribution in a weld deposit and have a solidification structure similar to that of welds. Like the ferrite in welds, the magnetic response of the ferritic (magnetic) phase varies with alloy composition. The homogeneity of the cast material was demonstrated to be sufficient for use as secondary FN standards.</p>	set

# Customised standards and CERTAN<sup>®</sup>

*Excellence through measurement*

# CERTAN®

## The ampoule in a bottle

Unopened glass ampoules are ideal for storing volatile standards, but once opened they are no longer suitable for storage. The alternative use of screw cap bottles can result in evaporation through the thread. There is also a risk of contamination from the cap.

The CERTAN® bottle is a sample container with a capillary-opening. It has been specifically developed for use with organic reference solutions. Using the CERTAN® bottle makes the problems of storing volatile solutions a thing of the past. The bottles come in a range of sizes to meet your needs.

### Advantages of CERTAN®

- Minimal change in concentration, even when open
- Totally secure, free of losses
- Less risk of contamination
- Aliquots easily removed using a standard GC syringe
- Proven usability from -30°C to +50°C
- Almost impossible to spill.

### Applications for CERTAN®

- Supply of standard solutions
- Long term storage for solutions from ampoules
- Storage of stock solution
- Archiving of production samples
- Holding challenging samples, such as BTEX aromatics
- Transport and storage of ring-test samples.

For further information on these products or to receive any one of our catalogues, please contact your local office or visit our website.

*Excellence through measurement*

## CERTAN® - The ampoule in the bottle

Unopened glass ampoules are ideal for storing volatile standards, but once opened they are no longer suitable for storage. The alternative use of screw cap bottles can result in evaporation through the thread. There is also a risk of contamination from the cap.

The CERTAN® bottle is a sample container with a capillary-opening. It has been specifically developed for use with organic reference solutions. Using the CERTAN® bottle makes the problems of storing volatile solutions a thing of the past.

### CERTAN® the solution for solutions!

### CERTAN® Advantages

- Minimal change in concentration even when open
- Totally secure, free of losses
- Less risk of contamination
- Aliquots easily removed using a standard GC syringe
- Proven usability from -30°C to +50°C
- Almost impossible to spill.

### CERTAN® Application Examples

- Supply of standard solutions
- Long term storage for solutions from ampoules
- Storage of working stock
- Archiving of production samples
- Storage of difficult samples, such as BTEX aromatics
- Transport and storage of ring-test samples.

### CERTAN® Principle

The properties of the patented CERTAN® capillary bottle depend on the unique way in which the glass bottle, capillary and screw cap closures have been engineered. The 1.2 mm diameter and 28 mm long capillary works as a re-condensation zone for any vapourised solvent. The reduced surface area inside the cap ensures a more efficient sealing of the bottle. It also minimises the chance of contamination from the cap insert. The CERTAN® bottle combines the advantages of a sealed ampoule with the flexibility of a screw cap bottle or a septum vial. Both cap and insert have been manufactured in materials which have been tested to ensure they retain their sealing properties, even with critical solvents such as diethylether.

### CERTAN® Cleaning Protocol

The CERTAN® bottle can be easily cleaned using the following method:

A 0.53 mm quartz capillary is inserted into the CERTAN® bottle which is then inverted over a solvent container similar to a wash bottle. (See illustration below). Dry nitrogen from a standard gas cylinder pressurises the container forcing the cleaning solvent up the capillary tube spraying the inside of the bottle and cleaning the bottle thoroughly. The capillary of the CERTAN® bottle itself is cleaned by the action of the cleaning solvent draining through. Tests using different cleaning solvents showed that toluene was the most effective solvent for cleaning the CERTAN® bottle.

Once the cleaning process is complete the CERTAN® bottle should be dried by flushing with nitrogen and then placing in a suitable flameproof oven at 400 °C for at least two hours.

Please note that the CERTAN® capillary bottles are gamma-irradiated to give the brown colour. However, at elevated temperatures this colour will disappear leaving no residues.

### Advice

The process used to manufacture the CERTAN® bottle, ensures that as far as possible the bottles are free of any chemical contamination. However it is good practice to rinse the bottles out with the same solvent used for the standard. The bottle should also be checked for minute glass particles which may occasionally be found, these can be easily flushed out using dry nitrogen which has been passed through an activated charcoal filter. In the same way the bottle can be dried after rinsing with the appropriate solvent.

Care should be taken when removing aliquots from the CERTAN® bottle, ensuring that no droplets adhere to the end of the needle. Prior to opening a full CERTAN® bottle, check to see if a small column of the solution has migrated into the capillary, if so this can be returned to the bottle easily by a quick flick of the wrist, as you would mercury in clinical thermometer. When replacing the cap on a CERTAN® bottle, it should be firmly tightened so that the top of the capillary leaves a clear indentation on the insert of the cap. We also recommend that with new CERTAN® bottles the cap should be re-tightened after 30 minutes to take up any slack caused by the initial indentation on the insert. The CERTAN® bottle is manufactured using high quality Duran glass, and is robust in its construction. However, care should be taken when handling to avoid dropping onto hard surfaces.

## Organic contaminants quotation request form

Customised standards solutions - you tell us the components, solvent, concentration and quantity you need. LGC Standards works in close co-operation with ULTRA Scientific and other suppliers to provide the products our customers need. So why not request a free quotation for a standard individually prepared to your specification? A certificate detailing the concentration of each component accompanies all organic custom standards and there is the option of ordering an additional DATApak<sup>®</sup> with full analytical and gravimetric data.

*New!* In response to our customer's requirements we also offer customised standard solutions produced in accordance with ISO Guide 34.

Please fax back this form to your local office (see list of offices on the inside front cover).

## CONTAINER & QUANTITY

CERTAN® capillary bottle	1.5 mL	<input type="checkbox"/>	4.5 mL	<input type="checkbox"/>	10 mL	<input type="checkbox"/>
Ampoule	1.5 mL	<input type="checkbox"/>				
Bottle with screw cap	10 mL	<input type="checkbox"/>				

We recommend that all standard solutions are packed in CERTAN® capillary bottles as this ensures the concentration over a long term storage period.

## TYPE OF ANALYSIS

Gravimetric validation  
Each standard is prepared by ULTRA Scientific according to their ISO 9001 registered quality system. Every component in the standard is guaranteed to be within the manufactured tolerance limits ( $\pm 0.5\%$ ). The gravimetric preparation data is reviewed by ULTRA's ISO 17025 accredited laboratory. A certificate accompanies each standard documenting the true gravimetric concentration.

Quantitative validation  
Each standard is prepared as per a gravimetric validation. In addition to the certificate of analysis, a DATApak® is provided which includes gravimetric data and extensive instrumental analysis results.

ISO 34  
Produced in accordance with ISO/IEC 17025 and ISO Guide 34.

## Inorganic standards quotation request form

ULTRA Scientific is recognized as a leading player in the chemical standards industry. Although the ULTRA range includes hundreds of inorganic standards, sometimes it is not possible to find exactly the one you need. If this happens why not request a custom standard that is individually prepared to your specification? Each inorganic custom standard comes with a certificate detailing the exact gravimetric concentration. There is also the option of ordering an additional DATApak<sup>®</sup> with full analytical and gravimetric data.

*New!* In response to our customer's requirements we also offer customised standard solutions produced in accordance with ISO Guide 34.

Please fax back this form to your local office (see list of offices on the inside front cover).

# Food specific standards

# Genuine ATCC® cultures and bioproducts

LGC Standards is the exclusive distributor of ATCC® cultures and bioproducts in Europe. We are committed to providing authentic, high-quality ATCC cultures to support quality control and research activities across the food and environmental industries.

With a local stock of all key quality control strains and a wide selection of other cultures, LGC Standards is able to offer:

- Faster delivery of ATCC products
- Expert technical support
- Expedited handling of special forms and paperwork to meet import regulations
- Reduced shipping costs

For further information or to receive a copy of the application based microbial Quality Control catalogue, please contact your local office or visit our website.

**Quality control strains**

**Nucleic acids**

**Microbial media and supplements**

**Cryopreservation products**

**Animal and plant viruses**

## Natural products and food constituents

### Phytochemical from ChromaDex

The following list of phytochemicals (sugars, carotenoids, amino acids, vitamins, tea related polyphenols, stevia related compounds and caffeine related compounds) is an extract from the extensive ChromaDex product range.

ChromaDex offers several different grades of reference standards. If you require information about the different grades of the listed compounds to check their suitability for your application, or to get the complete list of available products, please contact any of the LGC Standards offices listed on the inside cover.

### Sugars

Code	Product	Unit
CDX-00001045-100	2-Acetamido-2-deoxy-D-galactopyranose	100 mg
CDX-00001180-100	N-Acetyl-beta-D-galactosamine	100 mg
CDX-00001190-100	N-Acetyl-DL-glucosamine	100 mg
CDX-00001190-250	N-Acetyl-DL-glucosamine	250 mg
CDX-00001240-010	N-Acetyl-D-mannosamine	10 mg
CDX-00001240-050	N-Acetyl-D-mannosamine	50 mg
CDX-00001265-010	N-Acetylneuraminic acid	10 mg
CDX-00001265-025	N-Acetylneuraminic acid	25 mg
CDX-00001572-025	D-(+)-Allose	25 mg
CDX-00001572-100	D-(+)-Allose	100 mg
CDX-00001634-025	D-Altrose	25 mg
CDX-00001664-050	4-Aminophenyl-1-thio-beta-D-galactopyranoside	50 mg
CDX-00001665-001	Amylopectine	1 g
CDX-00001666-001	1,4-Anhydroerythritol	1 g
CDX-00001682-001	Arabinic acid	1 g
CDX-00001945-001	D-(-)-Arabinose	1 g
CDX-00001945-005	D-(-)-Arabinose	5 g
CDX-00001950-001	DL-Arabinose	1 g
CDX-00001950-010	DL-Arabinose	10 g
CDX-00001955-001	D-(+)-Arabitol	1 g
CDX-00001955-010	D-(+)-Arabitol	10 g
CDX-00001960-001	L-(-)-Arabitol	1 g
CDX-00001960-005	L-(-)-Arabitol	5 g
CDX-00001960-010	L-(-)-Arabitol	10 g
CDX-00002430-001	6-Bromo-2-naphthyl-beta-D-glucofuranoside	1 g
CDX-00002430-100	6-Bromo-2-naphthyl-beta-D-glucofuranoside	100 mg
CDX-00003112-010	Chitobiose	10 mg
CDX-00003335-001	D-(+)-Cellobiose	1 g
CDX-00003420-001	Chitin	1 g
CDX-00003420-005	Chitin	5 g
CDX-00003423-001	Chitosan	1 g
CDX-00003425-001	alpha-Chloralose	1 g
CDX-00003425-250	alpha-Chloralose	250 mg
CDX-00003592-001	Chondroitin sulfate XRM	1 g
CDX-00003592-005	Chondroitin hydrogensulfate	5 g
CDX-00003593-001	Chondroitin sulfate sodium salt	1 g
CDX-00003593-005	Chondroitin sulfate sodium salt	5 g
CDX-00003594-001	Chondroitin sulfate A sodium salt	1 g
CDX-00003596-025	Chondroitin sulfate B sodium salt	25 mg

## Natural products and food constituents

Code	Product	Unit
CDX-00003597-001	Chondroitin sulfate C sodium salt	1 g
CDX-00003607-001	Chondroitin sulfate sodium salt bovine	1 g
CDX-00003607-002	Chondroitin	2 g
CDX-00004165-001	2-Deoxy-D-glucose	1 g
CDX-00004165-100	2-Deoxy-D-glucose	100 mg
CDX-00004171-001	2-Deoxy-D-galactose	1 g
CDX-00004205-001	2-Deoxy-D-ribose	1 g
CDX-00004248-001	Dextrose	1 g
CDX-00004248-500	Dextrose	500 mg
CDX-00004430-001	D-(+)-Digitoxose	1 g
CDX-00004430-100	D-(+)-Digitoxose	100 mg
CDX-00005447-001	4,6-O-Ethylidene-alpha-D-glucopyranoside	1 g
CDX-00006244-001	D-(-)-Fructose	1 g
CDX-00006244-005	D-(-)-Fructose	5 g
CDX-00006260-001	D-Fructose-1,6-diphosphate barium salt	1 g
CDX-00006285-001	D-(+)-Fucose	1 g
CDX-00006285-100	D-(+)-Fucose	100 mg
CDX-00006290-100	L-Fucose	100 mg
CDX-00006290-500	L-Fucose	500 mg
CDX-00007010-001	Galactan	1 g
CDX-00007010-005	Galactan	5 g
CDX-00007015-001	D-Galactono-1,4-lactone	1 g
CDX-00007020-001	D-Galactosamine HCl	1 g
CDX-00007020-100	D-Galactosamine HCl	100 mg
CDX-00007021-001	D-(+)-Galactose	1 g
CDX-00007026-001	D-Galacturonic acid	1 g
CDX-00007026-250	D-Galacturonic acid	250 mg
CDX-00007047-005	1,3,6-Tri-O-galloyl-beta-D-glucose	5 mg
CDX-00007047-010	1,3,6-Tri-O-galloyl-beta-D-glucose	10 mg
CDX-00007110-010	Gentianose	10 mg
CDX-00007120-001	beta-Gentiobiose octaacetate	1 g
CDX-00007240-050	alpha-D-Glucoheptose	50 mg
CDX-00007245-001	D-(+)-Gluconic acid D-lactone	1 g
CDX-00007245-005	D-(+)-Gluconic acid D-lactone	5 g
CDX-00007256-001	D-(+)-Glucosamine HCl	1 g
CDX-00007256-500	D-(+)-Glucosamine HCl	500 mg
CDX-00007257-001	D-Glucosamine sulfate potassium salt	1 g
CDX-00007257-500	D-Glucosamine sulfate potassium salt	500 mg
CDX-00007258-001	Glucosamine sulfate	1 g
CDX-00007258-005	Glucosamine sulfate	5 g
CDX-00007260-010	L-Glucose	10 mg
CDX-00007260-100	L-Glucose	100 mg
CDX-00007261-001	D-(+)-Glucose	1 g
CDX-00007261-005	D-(+)-Glucose	5 g
CDX-00007265-001	beta-D-(+)-Glucose	1 g
CDX-00007285-001	alpha-D-Glucose pentaacetate	1 g
CDX-00007290-001	alpha-D-Glucose pentaacetate	1 g
CDX-00007295-100	D-Glucosaminic acid	100 mg
CDX-00007425-001	L-Gluconolactone	1 g
CDX-00008345-010	Hyaluronic acid potassium salt	10 mg
CDX-00009131-100	myo-Inositol	100 mg

## Natural products and food constituents

Code	Product	Unit
CDX-00009131-250	myo-Inositol	250 mg
CDX-00009305-010	Isomaltose	10 mg
CDX-00009305-100	Isomaltose	100 mg
CDX-00009475-001	Isopropyl-beta-D-thiogalactopyranoside	1 g
CDX-00009475-100	Isopropyl-beta-D-thiogalactopyranoside	100 mg
CDX-00009490-001	1,2-O-Isopropylidene-D-glucofuranose	1 g
CDX-00009495-001	1,2-Isopropylidene-D-xylofuranose	1 g
CDX-00011060-010	1-Thio-beta-D-glucose sodium salt	10 mg
CDX-00011060-100	1-Thio-beta-D-glucose sodium salt	100 mg
CDX-00011520-005	Kojibiose	5 mg
CDX-00012005-001	alpha-Lactose	1 g
CDX-00012020-100	Laminarin	100 mg
CDX-00012160-010	Levoglucosan	10 mg
CDX-00012160-100	Levoglucosan	100 mg
CDX-00013055-001	D-Maltose	1 g
CDX-00013057-100	D-(+)-Maltotriose	100 mg
CDX-00013057-500	D-(+)-Maltotriose	500 mg

## Natural products and food constituents

Code	Product	Unit	
U-FLPK-003	<b>Fatty acids and methyl esters kit</b> Each kit contains 25 mg each of sixteen compounds. Nonanoic acid Undecanoic acid Tridecanoic acid Pentadecanoic acid Heptadecanoic acid Nonadecanoic acid Heneicosanoic acid Tricosanoic acid	Methyl nonanoate Methyl undecanoate Methyl tridecanoate Methyl pentadecanoate Methyl heptadecanoate Methyl nondecanoate Methyl heneicosanoate Methyl tricosanoate	kit
U-FLPK-004	<b>Fatty acids and methyl esters kit</b> Each kit contains 100 mg each of twenty compounds. Hexanoic acid (Caproic acid) Octanoic acid (Caprylic acid) Decanoic acid (Capric acid) Dodecanoic acid (Lauric acid) Tetradecanoic acid (Myristic acid) Hexadecanoic acid (Palmitic acid) Octadecanoic acid (Stearic acid) Eicosanoic acid (Arachidic acid) Docosanoic acid (Behenic acid) Tetracosanoic acid (Lignoceric acid) (25 mg)	Hexanoic acid methyl ester Octanoic acid methyl ester Decanoic acid methyl ester Dodecanoic acid methyl ester Tetradecanoic acid methyl ester Hexadecanoic acid methyl ester Octadecanoic acid methyl ester Eicosanoic acid methyl ester Docosanoic acid methyl ester Tetracosanoic acid methyl ester (25 mg)	kit
U-FLPK-005	<b>Volatile fatty acids</b> Each kit contains 1 gm each of ten compounds plus 5 mL of a mixture. Methanoic acid (Formic acid) Acetic acid Propanoic acid (Propionic acid) Butanoic acid (Butyric acid) Isobutyric acid Pentanoic acid (Valeric acid)	Isovaleric acid Hexanoic acid (Caproic acid) Heptanoic acid Octanoic acid (Caprylic acid) 0.1% C1-C5 Acids test solution in H <sub>2</sub> O (5 mL)	kit

Code	Product	Unit																																																																																																																																																															
<b>New</b> NIST-2377	Fatty acid methyl esters in 2,2,4-trimethylpentane This Standard Reference Material (SRM <sup>®</sup> ) is a solution of 26 fatty acid methyl esters (FAMES) in 2,2,4-trimethylpentane. This SRM is intended primarily for use in the calibration of chromatographic instrumentation used for the determination of FAMES. Certified Mass Fraction Values of FAMES	5 x 1.2mL

Conjugated PUFAs  
 Oxylipins  
 Hydroxy fatty acids  
 Epoxy fatty acids  
 Methyl branched fatty acids  
 Glycerides - Mono-/Di-/Tri-  
 Fatty alcohols  
 Wax esters  
 Phospholipids - natural/semisynthetic  
 Sphingolipids  
 Gangliosides and related compounds  
 Polyprenols

## Amino acids

### Amino acids

Code	Product	Unit																																										
NIST-2389	Amino acids mixture This material is a solution of 17 amino acids in a 0.1 mol/L aqueous solution of hydrochloric acid. It is intended primarily for the use in calibration of chromatographic instrumentation for the determination of amino acids. A unit of consists of five 2 mL ampoules each containing approximately 1.2 mL of the solution.	5 x 2 mL

## Food additives

### Colour standards

Code	Product	Unit
<b>New</b> NIM-GBW(E)100192	Allura Red (E 129) 100 µg/mL in Water	5 mL
<b>New</b> NIM-GBW(E)100002A	Amaranth colour 0.5 mg/mL in Water	10 mL
<b>New</b> NIM-GBW(E)100005A	Brilliant Blue 0.5 mg/mL in Water	10 mL
<b>New</b> NIM-GBW(E)100191	Erythrosine (E 127) 100 µg/mL in Water	5 mL
<b>New</b> NIM-GBW(E)100004A	Ponceau 4R 0.5 mg/mL in Water	10 mL
<b>New</b> NIM-GBW(E)100003A	Sunset Yellow 0.5 mg/mL in Water	10 mL
<b>New</b> NIM-GBW(E)100001A	Tartrazine 0.5 mg/mL in Water	10 mL

#### IBPO colour standards

Colour standards from the Institute of Dyes and Organic Products (IBPO) in Poland. The IBPO is accredited by PCA (Polish Centre for Accreditation) according to the standard PN-EN 17025.

Colour standards with E code

Food colours are usually mixtures containing several major constituents: the main coloring compound, inorganic salt and volatiles. Apart from main colour they often also contain isomeric dyes and dye intermediates. The following standards of colours from IBPO, used in the food industry, are arranged by E code for easy reference. Each colour reference standard is supplied with a detailed certificate of analysis which includes dye content value, determined by spectrophotometry, and values of impurities.

IBPO008	Tartrazine (E 102)	1 g
IBPO007	Quinoline Yellow (E 104)	1 g
IBPO009	Sunset Yellow FCF (E 110)	1 g
IBPO003	Azorubin (E 122)	1 g
IBPO005	Amaranth (E 123)	1 g
IBPO004	Ponceau 4R (E 124)	1 g
IBPO011	Erythrosine (E 127)	1 g
IBPO013	Red 2 G (E 128)	1 g
IBPO014	Allura Red AC (E 129)	1 g
IBPO012	Patent Blue V (E 131)	1 g

## Food additives

Code	Product	Unit
IBPO002	Indigotine (E 132)	1 g
IBPO015	Brilliant Blue FCF (E 133)	1 g
IBPO016	Brilliant Green BS (E 142)	1 g
IBPO010	Brilliant Black PN (E 151)	1 g
IBPO017	Brown HT(E 155)	1 g
	Dyes used for cosmetics	
IBPO006	Cosmetic Red A ( Acid Red 33 ) C.I. 17200	1 g
	Sudan dyes	
IBPO018	Sudan I C.I. 12055	1 g
IBPO019	Sudan II (Solvent orange 7) C.I. 12140	1 g
IBPO020	Sudan III (Solvent Red 23) C.I. 26100	1 g
IBPO021	Sudan IV (Solvent Red 24) C.I. 26105	1 g
IBPO022	Sudan Orange G (Solvent Orange 1) C.I. 11920	250 mg
IBPO023	Sudan Red 7B (Solvent Red 19) C.I. 26050	250 mg
IBPO027	Sudan Red 1 (Solvent Red G) C.I. 12150	1 g
	Other food dyes	
IBPO024	C.I. Pigment Red 1 (Para Red BS) C.I. 12070	1 g
IBPO025	Basic Violet 10 (Rhodamine B) C.I. 45170	1 g
IBPO026	Acid Orange 7 (Orange II) C.I. 15510	1 g
IBPO028	Solvent Yellow 56 C.I.11021	1 g
IBPO029	Solvent Yellow 2 (Butter yellow) C.I.11020	1 g

### Preservatives

	IPO F 170	Sorbic acid E 200 Certified purity..... 99.9%	250 mg
<b>New</b>	NIM-GBW(E)100007	Sorbic acid 1.0 mg/mL in Water	10 mL
	LGC7305	Potassium sorbate E 202 Certified purity..... 99.8 %	500 mg
	IPO F 010	Benzoic acid E 210 Certified purity..... 99.9%	250 mg
<b>New</b>	NIM-GBW(E)100006	Benzoic acid 1.0 mg/mL in Water	10 mL
	IPO F 022	Sodium benzoate (E 211)	250 mg
	IPO F 070	Ethyl-4-hydroxybenzoate (Ethylparaben) E 214 Certified purity..... 99.4%	250 mg
	IPO F 080	Propyl-4-hydroxybenzoate (Propylparaben) E 216 Certified purity..... 98.9%	250 mg

## Food additives

Code	Product	Unit
IPO F 075	Methyl-4-hydroxybenzoate (Methylparaben) E 218 Certified purity..... 99.9%	250 mg
IPO 054	Biphenyl (PCB 0) E 230 Certified purity..... 99.6%	250 mg
IPO 735	Thiabendazole E 233 Certified purity..... 98.8%	250 mg
IPO F 016	Hexamethylenetetraamine (E 239)	1 mL
U-FLSA-032	Propanoic acid (Propionic acid) E 280	1 g
IPO F 005	Propionic acid E 280, in preparation, available in April/June 2005	1 mL
IPO F 013	Fumaric acid (E 297)	250 mg
U-FLPK-002	Antimicrobial food additives kit Each kit contains 1 g each of thirteen compounds. Acetic acid Benzoic acid Butyl paraben Octanoic acid (Caprylic acid) Ethyl paraben Methyl paraben Potassium sorbate	kit
	Propanoic acid (Propionic acid) Propyl paraben Sodium benzoate Sodium nitrate Sodium nitrite Sorbic acid	

## Antioxidants

IPO F 009	Adipic acid (E 355)	250 mg
IPO F 014	Ascorbic acid (E 300)	250 mg
IPO F 015	Butylated hydroxyanisole (BHA) (E 320)	250 mg
IPO F 018	2,6-Di-tert-butyl-4-methylphenol (BHT) E 321 Certified purity..... 99.9%	250 mg
ERM-AC301	2-t-Butyl-4-methoxyphenol (BHA) E 320 Certified purity..... 99.2%	500 mg
IPO F 011	Citric acid (E 330)	250 mg
LGC7300	2,6-Di-tert-butyl-4-methylphenol (BHT) E 321 Certified purity..... 99.8%	500 mg
CIL-DLM-2943-1.2	2,6-Di-(tert-butyl)-4-methylphenol (BHT) (D <sub>21</sub> , 98%) 100 µg/mL in Nonane	1.2 mL
IPO F 021	Dodecyl gallate (E312)	250 mg
IPO F 007	D-(-)-Isoascorbic acid (E 315)	250 mg
IPO F 006	Octyl gallate E 311, in preparation, available in April/June 2005	250 mg
IPO F 003	Propyl gallate E 310 Certified purity..... 99.6%	250 mg
IPO F 012	Succinic acid (E 363)	250 mg
IPO F 008	L-(+)-Tartaric acid (E 334)	250 mg
U-FLPK-007	Antioxidant food additives kit Each kit contains 1 g each of thirteen compounds. Ascorbic acid Ascorbyl palmitate BHA (2 & 3-t-Butyl-4-methoxyphenol) BHT (2,6-di-tert-Butyl-4-methylphenol) t-Butylhydroquinone Ethoxyquin (1,2-Dihydro-6-ethoxy-2,2,4-trimethylquinoline) Erythorbic acid (Isoascorbic acid) Dilaurel thiodipropionate 4-Hydroxymethyl-2,6-di-t-butylphenol L-Glycine Propyl gallate Thiodipropionic acid THBP (2,4,5-Trihydroxybutyrophenone)	kit

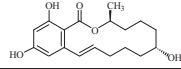

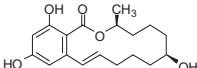

## Mycotoxins

	Code	Product	Unit
	B-MYC0400-1	Fumonisin B1 50 µg/mL in Acetonitrile/water (1:1)	1 mL
<b>New</b>	B-MYC0400-2	Fumonisin B1 50 µg/mL in Acetonitrile/water (1:1)	2 mL
	B-MYC0400-5	Fumonisin B1 50 µg/mL in Acetonitrile/water (1:1)	5 mL
	B-MYC0400-C	Fumonisin B1	5 mg
	B-MYC0405-C	Fumonisin B1	10 mg
	B-MYC0410-1.2	Fumonisin B1 ( <sup>13</sup> C <sub>34</sub> ) 25 µg/mL in Acetonitrile/water (1:1) CERTAN®	1.2 mL
	B-MYC0420-1	Fumonisin B2 50 µg/mL in Acetonitrile/water (1:1)	1 mL
<b>New</b>	B-MYC0420-2	Fumonisin B2 50 µg/mL in Acetonitrile/water (1:1)	2 mL
	B-MYC0420-5	Fumonisin B2 50 µg/mL in Acetonitrile/water (1:1)	5 mL
	B-MYC0423-1.2	Fumonisin B2 (U- <sup>13</sup> C <sub>34</sub> ) 10 µg/mL in Acetonitrile/water (1:1) CERTAN®	1.2 mL
	B-MYC0425-1	Fumonisin B3 50 µg/mL in Acetonitrile/water (1:1)	1 mL
	B-MYC0430-1.2	Fumonisin B3 (U- <sup>13</sup> C <sub>34</sub> ) 10 µg/mL in Acetonitrile/water (1:1) CERTAN®	1.2 mL
	B-MYC0450-1	Fusarenon X 100 µg/mL in Acetonitrile	1 mL
<b>New</b>	B-MYC0450-2	Fusarenon X 100 µg/mL in Acetonitrile	2 mL
	B-MYC0450	Fusarenon X 100 µg/mL in Acetonitrile	5 mL
	B-MYC0450-C	Fusarenon X	5 mg
	B-MYC0455-C	Fusarenon X	10 mg
	B-MYC1600-1	Glitoxin 100 µg/mL in Acetonitrile	1 mL
	B-MYC0560-1	HT-2 Toxin (HT-2) 100 µg/mL in Acetonitrile	1 mL
<b>New</b>	B-MYC0560-2	HT-2 Toxin (HT-2) 100 µg/mL in Acetonitrile	2 mL
	B-MYC0560-5	HT-2 Toxin (HT-2) 100 µg/mL in Acetonitrile	5 mL
	B-MYC0565-1.2	HT-2 Toxin ( <sup>13</sup> C <sub>22</sub> ) 25 µg/mL in Acetonitrile CERTAN®	1.2 mL
	B-MYC1800-1	Monoliformin 100 µg/mL in Acetonitrile	1 mL
	B-MYC0457-1	Mycophenolic acid 100 µg/mL in Acetonitrile	1 mL
<b>New</b>	B-MYC0457-2	Mycophenolic acid 100 µg/mL in Acetonitrile	2 mL
	B-MYC0457-5	Mycophenolic acid 100 µg/mL in Acetonitrile	5 mL
<b>New</b>	B-MYC0458-1.2	Mycophenolic acid ( <sup>13</sup> C <sub>17</sub> ) 100 µg/mL in Acetonitrile CERTAN®	1.2 mL
	B-MYC0460-1	Neosolaniol (NEO) 100 µg/mL in Acetonitrile Used as internal standard (IS) in mycotoxin analysis	1 mL
<b>New</b>	B-MYC0460-2	Neosolaniol (NEO) 100 µg/mL in Acetonitrile	2 mL
	B-MYC0460-5	Neosolaniol (NEO) 100 µg/mL in Acetonitrile	5 mL
	B-MYC0465-C	Neosolaniol	5 mg
	B-MYC0470-C	Neosolaniol	10 mg
	B-MYC0480-1	Nivalenol 100 µg/mL in Acetonitrile	1 mL
<b>New</b>	B-MYC0480-2	Nivalenol 100 µg/mL in Acetonitrile	2 mL
	B-MYC0480-5	Nivalenol 100 µg/mL in Acetonitrile	5 mL
	IRMM-316	Nivalenol in Acetonitrile The material is provided in amber glass ampoules filled with 4 mL. Certified value Nivalenol .....24.0 ± 1.1 µg/g	Amp.
	B-MYC0480-C	Nivalenol hydrate	5 mg
	B-MYC0485-C	Nivalenol hydrate	10 mg
	B-MYC0490-1	Ochratoxin A 10 µg/mL in Acetonitrile	1 mL
<b>New</b>	B-MYC0490-2	Ochratoxin A 10 µg/mL in Acetonitrile	2 mL
	B-MYC0490-5	Ochratoxin A 10 µg/mL in Acetonitrile	5 mL
	B-MYC0490-C	Ochratoxin A	5 mg
	B-MYC0495-C	Ochratoxin A	10 mg
	B-MYC0495-1.2	Ochratoxin A ( <sup>13</sup> C <sub>20</sub> ) 10 µg/mL in Acetonitrile CERTAN®	1.2 mL
	B-MYC2000-1	Ochratoxin B 10 µg/mL in Acetonitrile	1 mL
	B-MYC2050-1	Ochratoxin-alpha 10 µg/mL in Acetonitrile	1 mL
	B-MYC0500-1	Patulin 100 µg/mL in Acetonitrile	1 mL

## Mycotoxins

		alpha-Ergocryptinine.....477 ± 526 µg/kg	Ergocristinine ..... 462 ± 469 µg/kg

## Shellfish toxins

Not all hazardous substances found in foodstuffs are anthropogenic, and the shellfish toxins are a case in point. These toxins, which are produced by algae, accumulate in various seafoods, and are generally classified as follows:

Paralytic shellfish poisoning (PSP) toxins are the most common and dangerous family of marine biotoxins found around the world. PSP toxins are produced by microscopic algae in seawater that periodically form dense blooms and then die off. The toxin, a mixture of tetrahydropurines, named Saxitoxins has been known for centuries and has caused respiratory paralysis.

Okadaic acid (OA) and the dinophysistoxins (DTX) are the principal toxin associated with diarrhetic shellfish poisoning (DSP). These are less dangerous than the PSP toxins.

Domoic acid is known to be the toxin responsible for incidents of amnesic shellfish poisoning (ASP), in humans and sea animals on the east and west coasts of North America. Monitoring programs have shown that the causative organisms, diatoms of the Pseudonitzshia species, are found worldwide and that shellfish contamination occurs in many countries.

## Diarrhetic shellfish poisons (DSP) and other lipophilic toxins

Code	Product	Unit
NRCCRM-OA-C	Okadaic acid solution in methanol Each ampoule contains approximately 0.5 mL of solution with 17.7 ± 1.8 µmoles/L (at 20 °C)/14.3 ± 1.5 µg/mL (at 20 °C)/18.1 ± 1.8 µg/g of Okadaic acid in methanol.	0.5 mL
<b>New</b>	NRCCRM-DSP-MUSMussel tissue - Okadaic acid and Dinophysistoxin-1 A thermally sterilized mixed homogenate of mussel ( <i>Mytilus edulis</i> ) digestive gland tissue and a small amount of the dinoflagellate <i>Prorocentrum lima</i> . Certified values Okadaic acid (OA) ..... 10.1 µg/g Dinophysistoxin 1 (DTX1) ..... 1.3 µg/g	4 g
NRCCRM-SPX1	13-Desmethyl Spirolide C solution Each ampoule contains approximately 0.5 mL of solution with 10.2 ± 0.5 µmoles/L at 20°C (8.9 µg/g) of 13-Desmethyl Spirolide C in methanol with 0.05% trifluoroacetic acid (TFA).	0.5 mL
NRCCRM-GYM	Gymnodimine (GYM) Each ampoule contains approximately 0.5 mL of solution with 10.0 ± 0.5 µmoles/L at 20°C (6.4 ± 0.3 µg/g) of Gymnodimine (GYM) in methanol with 0.05% trifluoroacetic acid (TFA).	0.5 mL
NRCCRM-PTX2	Pectenotoxin-2 (PTX2) solution Each ampoule contains approximately 0.5 mL of solution with 10.0 ± 0.4 µmoles/L at 20°C (10.9 ± 0.4 µg/g) of Pectenotoxin-2 (PTX2) in methanol.	0.5 mL
NRCCRM-YTX	Yessotoxin (YTX) Each ampoule contains approximately 0.5 mL of solution with 4.5 µmol/L (5.3 µg/mL) YTX in methanol.	0.5 mL
NRCCRM-AZA1	Azaspiracid-1 solution Each ampoule contains approximately 0.5 mL of solution with 1.47 ± 0.08 µmol/L AZA1 in methanol.	0.5 mL
<b>New</b>	NRCCRM-AZA2 Azaspiracid-2 solution Each ampoule contains approximately 0.5 mL of solution with 1.5 ± 0.06 µmol/L AZA2 in methanol.	0.5 mL
<b>New</b>	NRCCRM-AZA3 Azaspiracid-3 solution Each ampoule contains approximately 0.5 mL of solution with 1.25 ± 0.05 µmol/L AZA3 in methanol.	0.5 mL

## Miscellaneous food related standards

Code	Product	Unit
CHE 100	Acetone	2 mL
CIL-ULM-6721-1.2	Acrylamide (unlabelled) (+100 ppm Hydroquinone 100 µg/mL in Methanol)	1.2 mL
CIL-CLM-813-1.2	Acrylamide (1,2,3- <sup>13</sup> C <sub>3</sub> ,99%) (+100 ppm Hydroquinone) 1000 µg/mL in Methanol	1.2 mL
IPO F 004	Benzyl alcohol	250 mg
CHE 123	Ethyl acetate	2 mL
CHE 111	n-Hexane	2 mL
IPO F 165	Nicotinic acid	250 mg
CIL-CDLM-7279-S	N-Nitrosodimethylamine ( <sup>13</sup> C <sub>2</sub> ,99%;D <sub>6</sub> ,98%) 1 mg/mL in Methylene chloride-D <sub>2</sub>	1 mL

## Tobacco related standards

Code	Product	Unit
ERM-AC802	Nicotine	0.6 mL
IPO 505	Nicotine	500 mg
DE-SAL-0100	Nicotine salicylate (in accordance to ISO/DIS 13276)	1 g
DE-SAL-0200	Nicotinehydrogen-L-tartrate (in accordance to ISO/DIS 13276)	1 g
DE-SAL-4100	1,3 Propanediol 99 % (GC)	1 g
DE-SAL-4200	1,2-Propanediol 99.5 % (GC)	1 g
DE-SAL-4300	1,2,3-Propanetriol (Glycerol) 99 % (HPLC)	1 g
IPO F 010	Benzoic acid E 210 Certified purity.....99.9%	250 mg
CIL-DLM-122-1	Benzoic acid (ring-D <sub>5</sub> ,98%)	1 g
CIL-DLM-122-5	Benzoic acid (ring-D <sub>5</sub> ,99%)	5 g
IPO F 170	Sorbic acid E 200 Certified purity.....99.9%	250 mg
CIL-ULM-7309-1.2	4-Methylumbelliferone (unlabelled) 100 µg/mL in Acetonitrile	1.2 mL
CIL-CLM-6023-1.2	4-Methylumbelliferone (2,3,4-methyl- <sup>13</sup> C <sub>4</sub> ,99%) 100 µg/mL in Acetonitrile	1.2 mL
CIL-ULM-7168-1.2	NAB (Nitrosoanabasine) (unlabelled) 0.5 mg/mL in Acetonitrile	1.2 mL
CIL-ULM-7207-1.2	NAT (Nitrosoanatabine) (unlabelled) 2000 µg/mL in Acetonitrile	1.2 mL
CIL-CLM-4555-1.2	NNK (Nicotine-derived nitrosamine ketone) (1,2',3',4',5',6'- <sup>13</sup> C <sub>6</sub> ,99%) 100 µg/mL in Nonane/Ethanol (9:1)	1.2 mL
CIL-CLM-4557-1.2	NNN (N-Nitrosornicotine) (2,2',3,4,5,6- <sup>13</sup> C <sub>6</sub> ,99%) 100 µg/mL in Nonane/Ethanol (9:1)	1.2 mL

# Contaminant standards

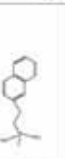

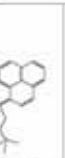

# HPLC COSMOSIL columns from Nacalai Tesque

LGC Standards, in partnership with Nacalai Tesque, offers a range of high performance liquid chromatography (HPLC) Cosmosil columns. Cosmosil HPLC columns are based on high purity spherical silica gels giving excellent separation and reproducibility. Each Cosmosil HPLC column is tested prior to sale and supplied with an inspection report.

Nacalai Tesque is an ISO 9001:2000 certified and registered manufacturer of products for research fields including Molecular Biology, Proteomics and Liquid Chromatography. Nacalai Tesque's Quality Control Systems assure that every product conforms to strict regulations and customer requirements.

## COSMOSIL specialities

	Cholesterol	ω18AP	PYE	HILIC	Protein-R	Sugar-D
Packing Material	High Purity Porous Spherical Silica					
Average Particle Size	5 µm					
Average Pore Size	approx. 120 Å			approx. 300 Å		
Stationary Phase						
Key Interaction	Hydrophobic Interaction Molecular Sieve Separation	Hydrophobic Interaction π-π Interaction	Hydrophobic Interaction π-π Interaction Dipole-dipole Interaction Charge-charge Interaction	Hydrophobic Interaction	Hydrophobic Interaction	Hydrophobic Interaction
Column Content	approx. 20%	approx. 15%	approx. 10%	---	---	---
Features	Specialty for steroidal compounds under the same conditions as C <sub>18</sub>	Stronger π-π interaction than phenyl column	The most powerful π-π interaction	Suitable for highly polar compounds regardless of their weight	High recovery with small amount	High stability Low absorption Suitable for bioassay analysis

Please contact your local LGC Standards office for further information.

**Cosmosil ODS and speciality columns include:**

**COSMOSIL 5C18-MS-II**

**COSMOSIL 5C18-AR-II**

**COSMOSIL 5C18-PAQ**

**COSMOSIL Cholester**

**COSMOSIL $\pi$ NAP**

**COSMOSIL PYE**

**COSMOSIL HILIC**

**COSMOSIL Protein-R**

## Camphechlor (Toxaphene) congeners

### Introduction

Camphechlor a non-systemic insecticide that was first introduced in 1948 and continues to be used in some countries today. It is prepared by the chlorination of technical camphene, and shows 670 signals in GC/ECD. Camphechlor is soluble in water - 3 mg/L - and a degree of dehydrochlorination takes place with heat, strong sunlight and certain catalysts such as iron. The inherent instability of Camphechlor complicates what is already a great challenge to the analytical chemist.

L. Alder and B. Vieth<sup>1</sup> of the German Federal Institute for Consumer Health Protection and Veterinary Medicine (BgVV) in paper entitled "A congener-specific method for the quantification of Camphechlor (Toxaphene) residues in fish and other foodstuffs" point out that fish appears to be the main source of human Camphechlor intake, and propose the ECD/GC determination of 3 individual chlorobornanes (DE-TOX 401, 402, 403) as indicators representing about 25-50% of the camphechlor residues. A fourth compound (DE-TOX 404), which may serve as an indicator of recent contamination, is also suggested.

In the past few years a number of other chlorinated terpenes have been found to be important contaminants in food and biological samples. The modern congener-specific analysis procedure includes separate determination of at least three other octachlorobornanes – Parlar No. 40, 41 and 44 (DE-TOX 445, 454 and 453 respectively). In contrast, in sediment samples the above mentioned compounds are rare. The dominant two are lower chlorinated Hex-Sed and Hp-Sed (DE-TOX 441 and DE-TOX 442)<sup>2</sup>, possessing no geminal chlorine atoms.

In our research project on the isolation of Camphechlor components with Dr. V. Nikiforov and his co-workers at the University of St. Petersburg well over 100 compounds have so far been isolated, with structural confirmation by NMR, X-ray and characteristic retention times on DB-5 column<sup>3</sup>. 49 are now available as crystalline compounds and individual standard solutions.

A number of multi-component standard solutions have also been prepared.

**DE-USL 420** is a three component mixture of the most important congeners Parlar No. 26, 50 and 62, examined by BAM. It can be recommended as primary standard for Toxaphene residue analysis.

**DE-USL 421** contains the three Parlar No. 26, 50 and 62 and an additional isomer Toxicant B (Parlar No. 32), one of the major and most toxic components of technical Toxaphene.

**DE-TOX 483** is designed for routine congener-specific analysis of food and biota samples. In addition to the most environmentally relevant Parlar No. 26, 50, 62, 40, 41 and 44 it contains two other structurally related compounds.

**DE-TOX 484** is designed for analysis of sediment samples. It contains the two most frequently found Hex-Sed and Hp-Sed, as well as one hexa- and one heptachlorobornane, also without geminal chlorine atoms in a molecule.

**DE-TOX 485** is a standard solution of 9 chlorinated dihydrocamphenes, which are present in technical Toxaphene. Their environmental importance is somewhat less studied to date.

**DE-TOX 486** is a 7-component solution for determination of compounds of general formula C<sub>10</sub>H<sub>x</sub>Cl<sub>16-x</sub>. It contains four chlorinated bornenes, two chlorinated camphenes (Parlar No. 25 and Parlar No. 31), reported in environmental samples and a unique tricyclic compound DE-TOX 456, the most polar polychloroterpene, known so far (according to its extremely late elution on Hexane/silicagel column).

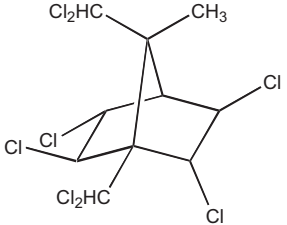

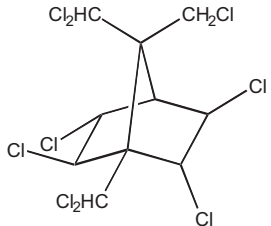

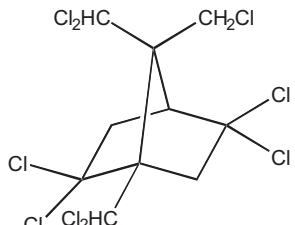

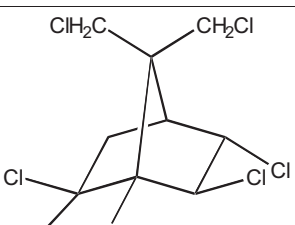

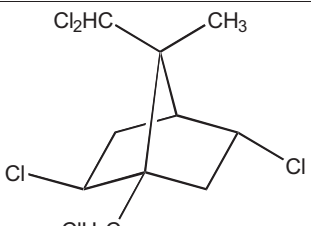

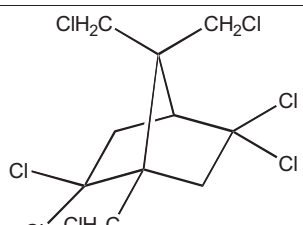

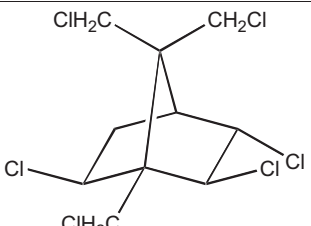

**DE-TOX 487** contains highly chlorinated congeners – two nonachlorodihydrocamphenes and three decachlorobornanes. These compounds have not been included into the 25-component mixture. They might decompose during GC run, care must be taken to avoid interference with decomposition products. On the other hand, this mixture can be used to verify the suitability of GC system for Toxaphene analysis.

**DE-TOX 488** is a standard solution of three congeners, selected for their behavior during clean-up. DE-TOX 409 and DE-TOX 410 are the earliest and the latest eluters among polychlorobornanes on silicagel column, with hexane as eluent. The tricyclic compounds DE-TOX 456 seems to be the most polar among polychloroterpenes of all types. Its elution volume is approximately two times more than that of DE-TOX 410. This mixture can be used to verify complete extraction of all Toxaphene compounds during sample work-up.

## Polyhalogenated compounds

### Polychloro-*n*-alkanes

#### Introduction

Polychloro-*n*-alkanes (PCAs) with carbon chains between 10 and 30 are used for a variety of industrial applications and are components of lubricants, flame-retardants, adhesives, sealants and a number of other miscellaneous products. Commercial PCA formulations, also known as chlorinated paraffins (CPs), are prepared by the direct chlorination of *n*-alkanes with Cl<sub>2</sub> at elevated temperatures and pressures and/or in the presence of UV light. Based on the starting material, PCA mixtures fall into three categories: C<sub>10</sub>-C<sub>13</sub> (short), C<sub>14</sub>-C<sub>17</sub> (medium) and C<sub>20</sub>-C<sub>30</sub> (long); they are further subcategorised into their weight content of chlorine (30-70%) depending on the extent of chlorination [1].

There are particular concerns about the C<sub>10</sub>-C<sub>13</sub> PCAs because of their possible adverse effects on terrestrial and aquatic organisms, and potential carcinogenicity to humans [2]. Their release into the environment could occur during production, storage, transportation, or industrial use; leaching from landfill sites is also possible [3-5]. Much of this release is to the aquatic environment, either directly or from sewage treatment systems.

To date, reliable environmental concentrations of PCAs have been a concern because of the unavoidable impurities present in formulations that arise during the industrial synthesis. In addition to the desired products, preparations can be contaminated with isoparaffins, aromatic compounds, sulfur, metals and unreacted *n*-alkanes [6]. Stabilisers such as epoxides and organotin compounds, are also frequently added during the chlorination process to inhibit the decomposition, *i.e.*, loss of HCl, at elevated temperatures [6].

The amount of impurities present in commercial mixtures can differ from one manufacturer to another and because they are currently being used as standards for environmental analysis, this can compromise the accuracy of quantitative measurements [7]. A need exists, therefore, for pure PCA mixtures that can be used as reliable analytical standards.

LGC Standards offers individual PCA mixtures that have been prepared by chlorination of highly pure *n*-alkane starting materials (>99%), with products purified by a series of chromatography steps that removed any unreacted starting material from their chlorinated analogs. GC/MS was used to confirm components and to guarantee purity.

**Products of chlorination.** Figure 1 shows the negative ion elution profiles of the C<sub>12</sub>PCA, determined by monitoring a characteristic fragment ion, *i.e.*, [M - Cl]<sup>-</sup> ion [8], formed by the chlorination process. The relative abundance of each molecular formula is also shown. The most predominant component was the C<sub>12</sub>H<sub>20</sub>Cl<sub>6</sub> species, which accounted for 72% of the total abundance of all the C<sub>12</sub>congeners. In a similar manner, the compositions of the C<sub>10</sub>, C<sub>11</sub> and C<sub>13</sub> mixtures were determined, with the results are shown in Table 1.

Chlorine atoms	C10	C11	C12	C13
4	4.9	0.3	0.3	1.5
5	30.2	25.1	13.6	33.2
6	59.9	62.0	71.7	59.2
7	3.7	11.1	12.9	5.6
8	1.2	1.4	1.6	0.5

**Table 1.** Responses (%) of the congeners present in each mixture.

**Figure 1.** Elution profiles of the C<sub>12</sub>-chlorinated alkanes, determined by monitoring their respective [M-Cl]<sup>-</sup> ion. The relative abundance of each formula is also shown.

**Confirmation of purity.** Each reaction mixture was checked to ensure that the chromatography cleanup steps had removed all the unreacted n-alkanes. Figure 2(a-c) shows the EI full scan total ion chromatogram of (a) dodecane, (b) the products derived by the chlorination of dodecane and (c) cleaned-up products free of starting material. It is clear from Figure 1(c) that no residual C12-alkane is present. The other mixtures were cleaned-up and checked for purity in the same manner. In all cases no residual n-alkanes were present.

**Figure 2.** Electron ionisation full scan total ion chromatogram of (a) dodecane, (b) products derived by chlorination of dodecane, and (c) chromatography cleaned-up products.

Similarity of the synthesised mixtures to an industrial preparation. Figure 3 illustrates the similarity in GC-elution profiles of a typical industrial formulation and a mixture created by combining equal amounts of the individual mixtures available from LGC Standards. Depending on the formula group abundance profile of a sample under investigation, and by combining different amounts of the individual standards together, it is possible to create a standard that closely resembles that of the environmental sample under investigation.

**Figure 3.** EI-MS total ion chromatogram of (a) industrial formulation and (b) one created by combining equal amounts of the individual mixtures.

## Polychlorinated biphenyls (PCBs)

### Introduction

The first PCBs were manufactured as long ago as 1930. Fifty years later an estimated one to two million metric tons had been produced in the industrialised countries, and marketed widely under various trade names.

Trade name	Manufactured in
<b>Aroclor</b>	United States, United Kingdom
<b>Clophen, Elaol</b>	Germany
<b>Pyroclor</b>	United Kingdom
<b>Phenoclor, Pyralene</b>	France
<b>Fenclor</b>	Italy
<b>Chemko</b>	Czech Republic
<b>Sovol</b>	Russia

The industrial PCBs were invariably used as dielectric fluids in transformers and capacitors and as hydraulic and heat transfer fluids. Unfortunately their chemical and physical characteristics which make them so eminently suitable for these applications also qualify them as persistent bioaccumulative environmental pollutants. Jensen first drew attention to this problem in the early sixties, and today the WHO continues to recommend and organise programmes on identification, surveillance and control of potential PCB sources.

### Industrial PCBs

Each manufacturer produced a series with varying chlorine content.

	NIST-3085 ..... Aroclor 1254 .....7.08 ± 0.16 mg/kg	5.66 ± 0.13 mg/L
	NIST-3086 ..... Aroclor 1260 ....6.18 ± 0.17 mg/kg	4.94 ± 0.14 mg/L

### Aroclors in transformer oil

NIST-3075	Aroclor 1016 in transformer oil Certified value Aroclor 1016 .....17.1 mg/kg ± 1.0 mg/kg or 15.2 mg/L ± 0.9 mg/L	5 x 1.2 mL
NIST-3076	Aroclor 1232 in transformer oil Certified value Aroclor 1232 .....4252 mg/kg ± 114 mg/kg or 3789 mg/L ± 106 mg/L	5 x 1.2 mL
NIST-3077	Aroclor 1242 in transformer oil Certified value Aroclor 1242 .....4102 mg/kg ± 87 mg/kg or 3656 mg/L ± 82 mg/L	5 x 1.2 mL
NIST-3078	Aroclor 1248 in transformer oil Certified value Aroclor 1248 .....3658 mg/kg ± 161 mg/kg or 3260 mg ± 146 mg/L	5 x 1.2 mL
NIST-3079	Aroclor 1254 in transformer oil Certified value Aroclor 1254 .....3579 mg/kg ± 154 mg/kg or 3190 mg/L ± 139 mg/L	5 x 1.2 mL
NIST-3080	Aroclor 1260 in transformer oil Certified value Aroclor 1260 .....1079 mg/kg ± 98 mg/kg or 962 mg/L ± 88 mg/L	5 x 1.2 mL
NIST-3090	Aroclors in transformer oil This Standard Reference Material® (SRM®) is a set of six different solutions of individual Aroclors in transformer oil. Certified values	6 x 1.2 mL
	NIST-3075 ..... Aroclor 1016 ..... 17.1 ± 1.0 mg/kg ..... 15.2 ± 0.9 mg/L	
	NIST-3076 ..... Aroclor 1232 ..... 4252 ± 114 mg/kg ..... 3789 ± 106 mg/L	
	NIST-3077 ..... Aroclor 1242 ..... 4102 ± 87 mg/kg ..... 3656 ± 82 mg/L	
	NIST-3078 ..... Aroclor 1248 ..... 3658 ± 161 mg/kg ..... 3260 ± 146 mg/L	
	NIST-3079 ..... Aroclor 1254 ..... 3579 ± 154 mg/kg ..... 3190 ± 139 mg/L	
	NIST-3080 ..... Aroclor 1260 ..... 1079 ± 98 mg/kg ..... 962 ± 88 mg/L	

### Aroclor in transformer oil kits (wt/vol)

U-1016TK	Aroclor 1016 Kit 3 x 2 mL of Aroclor at 100 µg/mL in PCB free transformer oil 1 x 2 mL of PCB free transformer oil	kit
----------	--	-----

## Polychlorinated biphenyls (PCBs)

Code	Product	Unit
U-1221TK	Aroclor 1221 Kit 3 x 2 mL of Aroclor at 100 µg/mL in PCB free transformer oil 1 x 2 mL of PCB free transformer oil	kit
U-1232TK	Aroclor 1232 Kit 3 x 2 mL of Aroclor at 100 µg/mL in PCB free transformer oil 1 x 2 mL of PCB free transformer oil	kit
U-1242TK	Aroclor 1242 Kit 3 x 2 mL of Aroclor at 100 µg/mL in PCB free transformer oil 1 x 2 mL of PCB free transformer oil	Kit (3 x 2 mL)
U-1248TK	Aroclor 1248 Kit 3 x 2 mL of Aroclor at 100 µg/mL in PCB free transformer oil 1 x 2 mL of PCB free transformer oil	kit
U-1254TK	Aroclor 1254 Kit 3 x 2 mL of Aroclor at 100 µg/mL in PCB free transformer oil 1 x 2 mL of PCB free transformer oil	kit
U-1260TK	Aroclor 1260 Kit 3 x 2 mL of Aroclor at 100 µg/mL in PCB free transformer oil 1 x 2 mL of PCB free transformer oil	kit
U-1262TK	Aroclor 1262 Kit 3 x 2 mL of Aroclor at 100 µg/mL in PCB free transformer oil 1 x 2 mL of PCB free transformer oil	kit
U-1268TK	Aroclor 1268 Kit 3 x 2 mL of Aroclor at 100 µg/mL in PCB free transformer oil 1 x 2 mL of PCB free transformer oil	kit

### Aroclor in transformer oil (wt/wt)

U-1242TK-B1	Aroclor 1242 50 µg/g in Transformer Oil	1 mL
U-1242TK-B2	Aroclor 1242 500 µg/g in Transformer Oil	1 mL
U-1248TK-B1	Aroclor 1248 50 µg/g in Transformer Oil	1 mL
U-1248TK-B2	Aroclor 1248 500 µg/g in Transformer Oil	1 mL
U-1254TK-B1	Aroclor 1254 50 µg/g in Transformer Oil	1 mL
U-1254TK-B2	Aroclor 1254 500 µg/g in Transformer Oil	1 mL
U-1260TK-B1	Aroclor 1260 50 µg/g in Transformer Oil	1 mL
U-1260TK-B2	Aroclor 1260 500 µg/g in Transformer Oil	1 mL

### PCB contaminant kits (wt/wt)

U-1242TK-B	PCB Contaminant Kit - Aroclor 1242 in Transformer Oil 2 x 1 mL of Aroclor at 50 µg/g in PCB free transformer oil 2 x 1 mL of Aroclor at 500 µg/g in PCB free transformer oil	kit
U-1248TK-B	PCB Contaminant Kit - Aroclor 1248 in Transformer Oil 2 x 1 mL of Aroclor at 50 µg/g in PCB free transformer oil 2 x 1 mL of Aroclor at 500 µg/g in PCB free transformer oil	kit
U-1254TK-B	PCB Contaminant Kit - Aroclor 1254 in Transformer Oil 2 x 1 mL of Aroclor at 50 µg/g in PCB free transformer oil 2 x 1 mL of Aroclor at 500 µg/g in PCB free transformer oil	kit
U-1260TK-B	PCB Contaminant Kit - Aroclor 1260 in Transformer Oil 2 x 1 mL of Aroclor at 50 µg/g in PCB free transformer oil 2 x 1 mL of Aroclor at 500 µg/g in PCB free transformer oil	kit

### PCB contaminant kits (wt/vol)

U-1242TK-A	PCB Contaminant Kit - Aroclor 1242 in Transformer Oil 2 x 1 mL of Aroclor at 50 µg/mL in PCB free transformer oil 2 x 1 mL of Aroclor at 500 µg/mL in PCB free transformer oil	Kit (4 x 1 mL)
U-1254TK-A	PCB Contaminant Kit - Aroclor 1254 in Transformer Oil 2 x 1 mL of Aroclor at 50 µg/mL in PCB free transformer oil 2 x 1 mL of Aroclor at 500 µg/mL in PCB free transformer oil	kit
U-1260TK-A	PCB Contaminant Kit - Aroclor 1260 in Transformer Oil 2 x 1 mL of Aroclor at 50 µg/mL in PCB free transformer oil 2 x 1 mL of Aroclor at 500 µg/mL in PCB free transformer oil	kit

## Polychlorinated biphenyls (PCBs)

Code	Product	Unit
<b>Single congeners</b>		
<p>The PCB numbers represent the Ballschmider numbers used to identify each specific congener. These numbers are equivalent to the IUPAC numbers for PCBs, with three exceptions. Congeners number 199, 200, and 201 have the IUPAC numbers 200, 201, and 199, respectively. Both usages are found in the literature.</p>		
IPO 054	Biphenyl (PCB 0) E 230 Certified purity..... 99.6%	250 mg
	U-RPC-001S Biphenyl (PCB 0), 100 µg/mL in Hexane	2 mL
<b>New</b>	U-RPC-001AS Biphenyl (PCB 0), 100 µg/mL in Isooctane	2 mL
	CIL-CLM-3235-1.2 Biphenyl ( <sup>13</sup> C <sub>12</sub> ,99%) 100 µg/mL in Nonane	1.2 mL
	U-RPC-006 2-Chlorobiphenyl (PCB 1)	50 mg
	U-RPC-006S 2-Chlorobiphenyl (PCB 1), 100 µg/mL in Hexane	2 mL
<b>New</b>	U-RPC-006AS 2-Chlorobiphenyl (PCB 1), 100 µg/mL in Isooctane	2 mL
	CIL-EC-4908-1.2 2-Monochlorobiphenyl ( <sup>13</sup> C <sub>12</sub> ,99%) (IUPAC #1) 40 µg/mL in Nonane	1.2 mL
	CIL-EC-4908-3 2-Monochlorobiphenyl ( <sup>13</sup> C <sub>12</sub> ,99%) (IUPAC #1) 40 µg/mL in Nonane	3 mL
	U-RPC-007 3-Chlorobiphenyl (PCB 2)	10 mg
	U-RPC-007S 3-Chlorobiphenyl (PCB 2), 100 µg/mL in Hexane	2 mL
<b>New</b>	U-RPC-007AS 3-Chlorobiphenyl (PCB 2), 100 µg/mL in Isooctane	2 mL
	U-RPC-008 4-Chlorobiphenyl (PCB 3)	50 mg
	U-RPC-008S 4-Chlorobiphenyl (PCB 3), 100 µg/mL in Hexane	2 mL
<b>New</b>	U-RPC-008AS 4-Chlorobiphenyl (PCB 3), 100 µg/mL in Isooctane	2 mL
	CIL-EC-4990-1.2 4-Monochlorobiphenyl ( <sup>13</sup> C <sub>12</sub> ,99%) (IUPAC #3) 40 µg/mL in Nonane	1.2 mL
	CIL-EC-4990-3 4-Monochlorobiphenyl ( <sup>13</sup> C <sub>12</sub> ,99%) (IUPAC #3) 40 µg/mL in Nonane	3 mL
	U-RPC-009 2,2'-Dichlorobiphenyl (PCB 4)	25 mg
	CERERD-113 2,2'-Dichlorobiphenyl (PCB 4)	25 mg
	U-RPC-009S 2,2'-Dichlorobiphenyl (PCB 4), 100 µg/mL in Hexane	2 mL
<b>New</b>	U-RPC-009AS 2,2'-Dichlorobiphenyl (PCB 4), 100 µg/mL in Isooctane	2 mL
	CIL-EC-4911-1.2 2,2'-Dichlorobiphenyl ( <sup>13</sup> C <sub>12</sub> ,99%) (IUPAC #4) 40 µg/mL in Nonane	1.2 mL
	CIL-EC-4911-3 2,2'-Dichlorobiphenyl ( <sup>13</sup> C <sub>12</sub> ,99%) (IUPAC #4) 40 µg/mL in Nonane	3 mL

## Multicomponent standard solutions

	<b>Isotope labelled PCB standard mixtures see section "Environmental contaminant standards from CIL".</b>	
	U-RPCW-100 - U-RPCW-111 PCB elution window mixtures	
	ULTRA Scientific has prepared a series of mixtures containing the first and last eluting isomers (based on a DB-5 capillary column) for each PCB isomer group, from monochlorobiphenyls to the nonachlorobiphenyls.	
	U-RPCW-100-1	PCB Elution Window Mix Biphenyl 100 µg/mL of each analyte in Hexane
		RRt*
		Biphenyl ..... 0.0997
	U-RPCW-100	PCB Elution Window Mix Biphenyl
		4 x 1 mL

## Polychlorinated biphenyls (PCBs)

Code	Product	Unit
U-RPCW-101-1	PCB Elution Window Mix Chlorobiphenyl 100 µg/mL in Hexane	1 mL
	RRt*	RRt*
	2-Chlorobiphenyl.....0.1544      4-Chlorobiphenyl..... 0.1975	
U-RPCW-101	PCB Elution Window Mix Chlorobiphenyl	4 x 1 mL
U-RPCW-102-1	PCB Elution Window Mix Dichlorobiphenyl 100 µg/mL in Hexane	1 mL
	RRt*	RRt*
	2,6-Dichlorobiphenyl .....0.2243      4,4'-Dichlorobiphenyl ..... 0.3387	
U-RPCW-102	PCB Elution Window Mix Dichlorobiphenyl	4 x 1 mL
U-RPCW-103-1	PCB Elution Window Mix Trichlorobiphenyl 100 µg/mL of each analyte in Hexane	1 mL
	RRt*	RRt*
	2,2',6-Trichlorobiphenyl.....0.3045      3,4,4'-Trichlorobiphenyl..... 0.4858	
U-RPCW-103	PCB Elution Window Mix Trichlorobiphenyl	4 x 1 mL
U-RPCW-104-1	PCB Elution Window Mix Tetrachlorobiphenyl 100 µg/mL of each analyte in Hexane	1 mL
	RRt*	RRt*
	2,2',6,6'-Tetrachlorobiphenyl.....0.38      3,3',4,4'-Tetrachlorobiphenyl ..... 0.6295	
U-RPCW-104	PCB Elution Window Mix Tetrachlorobiphenyl	4 x 1 mL
U-RPCW-105-1	PCB Elution Window Mix Pentachlorobiphenyl 100 µg/mL of each analyte in Hexane	1 mL
	RRt*	RRt*
	2,2',4,6,6'-Pentachlorobiphenyl.....0.4757      3,3',4,4',5-Pentachlorobiphenyl..... 0.7512	
U-RPCW-105	PCB Elution Window Mix Pentachlorobiphenyl	4 x 1 mL
U-RPCW-106-1	PCB Elution Window Mix Hexachlorobiphenyl 100 µg/mL of each analyte in Hexane	1 mL
	RRt*	RRt*
	2,2',4,4',6,6'-Hexachlorobiphenyl .....0.5666      3,3',4,4',5,5'-Hexachlorobiphenyl ..... 0.8625	
U-RPCW-106	PCB Elution Window Mix Hexachlorobiphenyl	4 x 1 mL
U-RPCW-107-1	PCB Elution Window Mix Heptachlorobiphenyl 100 µg/mL of each analyte in Hexane	1 mL
	RRt*	RRt*
	2,2',3,4',5,6,6'-Heptachlorobiphenyl.....0.692      2,3,3',4,4',5,5'-Heptachlorobiphenyl ..... 0.9142	
U-RPCW-107	PCB Elution Window Mix Heptachlorobiphenyl	4 x 1 mL
U-RPCW-108-1	PCB Elution Window Mix Octachlorobiphenyl 100 µg/mL of each analyte in Hexane	1 mL
	RRt*	RRt*
	2,2',3,3',5,5',6,6'-Octachlorobiphenyl .....0.8089      2,3,3',4,4',5,5',6-Octachlorobiphenyl ..... 0.9678	
U-RPCW-108	PCB Elution Window Mix Octachlorobiphenyl	4 x 1 mL
U-RPCW-109-1	PCB Elution Window Mix Nonachlorobiphenyl 100 µg/mL of each analyte in Hexane	1 mL
	RRt*	RRt*
	2,2',3,3',4,5,5',6,6'-Nonachlorobiphenyl .....0.932      2,2',3,3',4,4',5,5',6-Nonachlorobiphenyl ..... 1.0103	
U-RPCW-109	PCB Elution Window Mix Nonachlorobiphenyl	4 x 1 mL
U-RPCW-110-1	PCB Elution Window Mixture Decachlorobiphenyl 100 µg/mL of each analyte in Hexane	1 mL
	RRt*	
	Decachlorobiphenyl .....1.0496	
U-RPCW-110	PCB Elution Window Mixture Decachlorobiphenyl	4 x 1 mL
U-RPCW-111-1	PCB Elution Window Mix Octachloronaphthalene 100 µg/mL of each analyte in Hexane	1 mL
	RRt*	
	Octachloronaphthalene.....1.0000	
U-RPCW-111	PCB Elution Window Mix Octachloronaphthalene	4 x 1 mL

\*Relative retention time versus octachloronaphthalene; see M.D. Mullin, et al., *Environ. Sci. Technol.*, 18, 468(1984).

## Polychlorinated biphenyls (PCBs)

Code	Product	Unit
U-RPCWK	PCB Elution Window Kit Kit contains eleven ampoules: 1 x 1 mL of each of the PCB Window mixtures, RPCW-100 through RPCW-110	kit
U-RPCM-200-1	Dutch Seven PCB Mixture (NEN 5734/VPR C85-16) 10 µg/ml of each analyte in iso-Octane (2,2,4-Trimethylpentane). PCB 28 ..... 2,4,4'-Trichlorobiphenyl      PCB 138 ..... 2,2',3,4,4',5'-Hexachlorobiphenyl PCB 52 ..... 2,2',5,5'-Tetrachlorobiphenyl      PCB 153 ..... 2,2',4,4',5,5'-Hexachlorobiphenyl PCB 101 ..... 2,2',4,5,5'-Pentachlorobiphenyl      PCB 180 ..... 2,2',3,4,4',5,5'-Heptachlorobiphenyl PCB 118 ..... 2,3',4,4',5-Pentachlorobiphenyl	1 mL
U-RPCM-200	Dutch Seven PCB Mixture (NEN 5734/VPR C85-16)	4 x 1 mL
U-RPCM-8082-1	PCB Congeners Mixture 100 µg/mL analytes in iso-Octane (2,2,4-Trimethylpentane) 2-Chlorobiphenyl      2,2',3,4,4',5'-Hexachlorobiphenyl 2,3-Dichlorobiphenyl      2,2',3,4,5,5'-Hexachlorobiphenyl 2,2',5-Trichlorobiphenyl      2,2',3,5,5',6-Hexachlorobiphenyl 2,4',5-Trichlorobiphenyl      2,2',4,4',5,5'-Hexachlorobiphenyl 2,2',3,5'-Tetrachlorobiphenyl      2,2',3,3',4,4',5-Heptachlorobiphenyl 2,2',5,5'-Tetrachlorobiphenyl      2,2',3,4,4',5,5'-Heptachlorobiphenyl 2,3',4,4'-Tetrachlorobiphenyl      2,2',3,4,4',5',6-Heptachlorobiphenyl 2,2',3,4,5'-Pentachlorobiphenyl      2,2',3,4',5,5',6-Heptachlorobiphenyl 2,2',4,5,5'-Pentachlorobiphenyl      2,2',3,3',4,4',5,5',6-Nonachlorobiphenyl 2,3,3',4',6-Pentachlorobiphenyl	1 mL
U-RPCM-8082	PCB Congeners Mixture	4 x 1 mL
NE5570	World Health Organisation (WHO) coplanar & mono-ortho PCB Mix CERTAN® 10 µg/mL of each analyte in iso-Octane Non-ortho PCBs PCB 77      PCB 81      PCB 126      PCB 169 Mono-ortho PCBs PCB 105      PCB 118      PCB 156      PCB 167 PCB 114      PCB 123      PCB 157      PCB 189	1.5 mL
U-RPCM-220-1	WHO - PCB Mixture 10 µg/mL of each isomer in Isooctane PCB 77 ..... 3,3',4,4'-Tetrachlorobiphenyl      PCB 126 ..... 3,3',4,4',5-Pentachlorobiphenyl PCB 81 ..... 3,4,4',5-Tetrachlorobiphenyl      PCB 156 ..... 2,3,3',4,4',5-Hexachlorobiphenyl PCB 105 ..... 2,3,3',4,4',5-Pentachlorobiphenyl      PCB 157 ..... 2,3,3',4,4',5'-Hexachlorobiphenyl PCB 114 ..... 2,3,4,4',5-Pentachlorobiphenyl      PCB 167 ..... 2,3',4,4',5,5'-Hexachlorobiphenyl PCB 118 ..... 2,3',4,4',5-Pentachlorobiphenyl      PCB 169 ..... 3,3',4,4',5,5'-Hexachlorobiphenyl PCB 123 ..... 2',3,4,4',5-Pentachlorobiphenyl      PCB 189 ..... 2,3,3',4,4',5,5'-Heptachlorobiphenyl	1 mL
U-RPCM-220	WHO - PCB Mixture	4 x 1 mL

PCB 206	2,2',3,3',4,4',5,5',6-Nonachlorobiphenyl	40186-72-9	3.01 ± 0.22 µg/g
PCB 207	2,2',3,3',4,4',5,6,6'-Nonachlorobiphenyl	52663-79-3	1.030 ± 0.021 µg/g
PCB 208	2,2',3,3',4,5,5',6,6'-Nonachlorobiphenyl	52663-77-1	1.96 ± 0.11 µg/g
PCB 209	2,2',3,3',4,4',5,5',6,6'-Decachlorobiphenyl	2051-24-3	2.89 ± 0.25 µg/g

\*PCBs are numbered based on the IUPAC numberings scheme which differs from the Ballschmiter and Zell numbering scheme for the PCBs noted in the table.

**For labelled PCB Mixtures see section "Environmental contaminant standards from CIL"**

## PCB metabolites - Chlorohydroxybiphenyls

The PCBs are initially metabolised to chlorohydroxybiphenyls, and work has shown that the compound formed depends on the number of chlorine atoms, their position and the animal involved.

Code	Product	Unit
U-RPM-027	2-Biphenylol	100 mg
U-RPM-028	3-Biphenylol	100 mg
U-RPM-029	4-Biphenylol	100 mg
U-RPM-030	2,2'-Biphenyldiol	100 mg
U-RPM-032	4,4'-Biphenyldiol	100 mg
U-RPM-033	2,5-Biphenyldiol	100 mg
U-RPM-034	3,4-Biphenyldiol	100 mg
U-RPM-001	2-Chloro-4-biphenylol	5 mg
U-RPM-003	3-Chloro-4-biphenylol	10 mg
U-RPM-004	4'-Chloro-4-biphenylol	10 mg
U-RPM-009	2',5'-Dichloro-4-biphenylol	10 mg
U-RPM-010	2',5'-Dichloro-3-biphenylol	10 mg
U-RPM-011	3,5-Dichloro-2-biphenylol	10 mg
U-RPM-013	4,4'-Dichloro-3-biphenylol	10 mg
U-RPM-017	2,2',5'-Trichloro-4-biphenylol	10 mg
U-RPM-018	2',3,5'-Trichloro-2-biphenylol	10 mg
U-RPM-020	2',5,5'-Trichloro-2-biphenylol	10 mg
U-RPM-021	3,4',5-Trichloro-4-biphenylol	5 mg
U-RPM-022	2',3',4',5'-Tetrachloro-4-biphenylol	10 mg
U-RPM-023	2',3',4',5'-Tetrachloro-3-biphenylol	10 mg
U-RPM-024	3,3',5,5'-Tetrachloro-4,4'-biphenyldiol	10 mg
U-RPM-025	2',3',4',5,5'-Pentachloro-2-biphenylol	5 mg

## Polychlorinated terphenyls (PCTs)

Three chlorinated terphenyl products were produced:  
Aroclor 5442 (42% Chlorine), Aroclor 5460 (60% Chlorine) and Aroclor 5060 (60% Chlorine).

Code	Product	Unit
U-RTP-1A	Chlorinated Terphenyls Kit 1 x 1 mL of each Aroclor Aroclor 5442 ..... 100 µg/mL in Hexane Aroclor 5460 ..... 100 µg/mL in Hexane Aroclor 5060 ..... 100 µg/mL in Hexane	3 x 1 mL
U-RTP-019	4-Chloro-o-terphenyl	10 mg
U-RTP-002	4-Chloro-p-terphenyl	20 mg
U-RTP-014	2,4-Dichloro-p-terphenyl	20 mg

U-RTP-018	2,2''',5,5'''-Tetrachloro-p,p-quaterphenyl	5 mg

## Polychlorinated naphthalenes

### Introduction

The polychlorinated naphthalenes (PCNs) have been long recognised as persistent, ubiquitous environmental pollutants. Their presence in the environment is largely the result of the use of technical products, such as the Halowax series, as flame retardants and dielectric fluids.

Code	Product	Unit
<b>Industrial products</b>		
U-HPCK-2F	Halowax 1000 100 µg/mL in Hexane	2 mL
U-HPCK-2G	Halowax 1001 100 µg/mL in Hexane	2 mL
U-HPCK-2E	Halowax 1013 100 µg/mL in Hexane	2 mL
U-HPCK-2C	Halowax 1051 100 µg/mL in Hexane	2 mL
U-HPCK-2D	Halowax 1099 100 µg/mL in Hexane	2 mL
<b>Single congeners</b>

## Polychlorinated benzenes

Chlorobenzenes are multipurpose industrial chemicals used as solvents for oils, fats, waxes, resins, ethyl cellulose and synthetic rubbers. They are also used in the synthesis of insecticides, dyes, pharmaceutical actives and perfumes.

Code	Product	Unit
<b>Chlorobenzenes</b>		
IPO 087	Chlorobenzene	250 mg
U-RCP-020	Chlorobenzene	100 mg
U-HC-050-1	Chlorobenzene 100 µg/mL in Methanol	1 mL

## Flame retardants (technical)

Flame retardants have been used to reduce the flammability and consequent fire risk of polymer plastics. In the late 1950s pentabromobiphenyl oxide was the first aromatic brominated flame retardant to gain commercial significance. Since then a number of other flame retardants have been developed, among them tetrabromobisphenol-A the largest selling brominated flame retardant. Brominated flame retardants have been found in sewage sludge and biological samples. Some investigations had been carried out regarding the formation of polybrominated dibenzofurans and -dioxins from the combustion of polybromobiphenyl ethers.

Code	Product	Unit
U-RBF-075	Hexabromobiphenyl (technical) (Firemaster BP-6, Michigan Chemicals)	10 mg
U-RBF-074	Octabromobiphenyl (technical) (FR250 BA, Dow Chemicals)	50 mg
DE-USC 912S	Pentabromodiphenyloxide (technical) (DE-71-Great Lakes) 50 µg/mL in Methanol CERTAN®	1.5 mL

### Polybrominated biphenyls

U-RPE-043A	1,2,3,4,7,8-Hexachlorodibenzofuran	5 mg
U-RPE-043S	1,2,3,4,7,8-Hexachlorodibenzofuran 50 µg/mL in Toluene	1 mL
U-RPE-044A	1,2,3,4,6,7,8-Heptachlorodibenzofuran	5 mg
U-RPE-044S	1,2,3,4,6,7,8-Heptachlorodibenzofuran 50 µg/mL in Toluene	1 mL
U-RPE-019A	Octachlorodibenzofuran	50 mg
U-RPE-019S	Octachlorodibenzofuran 50 µg/mL in Toluene	1 mL

**Isotope labelled and unlabelled chlorinated dibenzo-p-dioxins see also "Environmental contaminant standards from CIL" section "Dioxin and furan standards".**

# Chlorinated dibenzo-p-dioxins and chlorinated dibenzofurans

Code	Product	Unit
------	---------	------

## Dioxin/Furan multicomponent standard solutions

BCR-614	Solutions of Polychlorodibenzo-p-dioxins and Polychlorodibenzofurans in n-Nonane (EN 1948)	set
---------	--	-----

The set consists of 11 ampoules, one of BCR-614S2, BCR-614S4-9 and two of BCR-614S1 and BCR-614S3.

The nine solutions of natural and labelled PCDD and PCDF congeners in n-nonane are presented in brown glass ampoules sealed under helium gas. Ampoules S1 to S7 contain about 1 mL solution and ampoule S8 about 0.5 mL. Solutions S1-8 are supplied in one set together with a non-certified solution S9 intended to verify performance of the chromatographic separation system.

The solutions BCR 614 S1 to S5 are intended as GC-HRMS calibration solutions and are ready for use. An additional solution S0 is available separately for very low level determinations. To apply solutions BCR 614 S6 to S8 in accordance with the European Standard EN 1948, appropriate dilutions should be prepared following the recommendations given in the latter document. Solution BCR 614 S9 may serve to check the instrumental performance, particularly with regard to the chromatographic separation of the 2,3,7,8-Cl substituted congeners from potential interfering compounds. With the current technology, the separation of all analytes from interfering isomers in environmental samples requires the analysis to be performed on at least two capillary columns with different polarity. More details are given in the certification report of BCR-614 in the chapter on instructions for use.

Certified purity of the individual <sup>12</sup>C and <sup>13</sup>C labeled PCDD and PCDF congeners used for the preparation of the solutions

Further isotope labelled and unlabelled dioxin and furan mixtures see "Environmental contaminant standards from CIL".

## Perfluorinated compounds

### Labelled perfluorocarboxylic acids

Code	Product	Unit
CIL-CLM-8005-1.2	Perfluorooctanoic acid (PFOA) ( <sup>13</sup> C <sub>8</sub> ,99%) 50 µg/mL in Methanol	1.2 mL
CIL-CLM-8060-1.2	Perfluorononanoic acid ( <sup>13</sup> C <sub>9</sub> ,99%) 50 µg/mL in Methanol	1.2 mL
<b>New</b> CIL-CLM-8172-1.2	Perfluorodecanoic acid (PFDA) ( <sup>13</sup> C <sub>9</sub> ,99%) 50 µg/mL in Methanol	1.2 mL

### Native perfluorocarboxylic acids

CIL-U LM-7451-1.2	Perfluorooctanoic acid (PFOA) (unlabelled) 50 µg/mL in Methanol	1.2 mL
CIL-U LM-8066-1.2	Perfluorononanoic acid (PFNA) (unlabelled) 50 µg/mL in Methanol	1.2 mL
<b>New</b> CIL-U LM-8067-1.2	Perfluorodecanoic acid (PFDA) (unlabelled) 50 µg/mL in Methanol	1.2 mL
<b>New</b> CIL-U LM-8084-1.2	Perfluoroundecanoic acid (unlabelled) 50 µg/mL in Methanol	1.2 mL

## Hydrocarbons

## n-Alkane mixtures

Code	Product	Unit																																																
NIST-2285	Arson Test Mixture in Methylene Chloride This Standard Reference Material (SRM <sup>®</sup> ) is intended primarily for use in the calibration of chromatographic instrumentation used for the classification of an ignitable liquid residue. This SRM <sup>®</sup> is a solution of 15 compounds, including even carbon number aliphatic hydrocarbons from hexane to tetracosane, toluene, p-xylene, 2-ethyltoluene, 3-ethyltoluene, and 1,2,4-trimethylbenzene in methylene chloride. Certified values	5 x 1.2 mL

## Polycyclic aromatic compounds

### Introduction

The Polycyclic Aromatic Compounds (PACs) contain the largest number of confirmed and suspected carcinogenic and/or mutagenic chemical compounds known to man. The term PAC is used to describe both the homocyclic and hetero-cyclic compounds. The parent homocyclic polyaromatic hydrocarbons are well known by abbreviation PAH. Work on these compounds started in the early 1930's when Dibenzo(a,h)anthracene was identified as the first chemical carcinogen, and Benzo(a)pyrene isolated from coal tar as a cancer producing hydrocarbon. The many anthropogenic sources of potential PAC carcinogens led to work on the substituted PAHs - usually nitro, amino, methyl or hydroxy - and on the more polar heterocyclic compounds such as the nitrogen, sulfur or oxygen containing PACs.

### Nomenclature

The IUPAC nomenclature has not been followed in all cases. Examples are Benzo(b)fluoranthene, Benzo(a)pyrene and Anthanthrene which are frequently not recognised under their respective IUPAC names of Benzo(e)acephenanthrylene, Benzo(def)chrysene and Dibenzo(def,mno)chrysene. Cross references are given. The substituted compounds are listed under the parent compound e.g.

Chrysene  
Chrysene, 1-methyl  
Chrysene, 2-methyl

Code	Product	Unit
U-RAH-001	Acenaphthene	100 mg
CERERA-009	Acenaphthene	250 mg

## Polycyclic aromatic compounds

Code	Product	Unit																																																																												
NIST-1597a	<b>Complex mixture of PAHs from coal tar in Toluene</b> This Standard Reference Material (SRM <sup>®</sup> ) is a natural, combustion-related mixture of polycyclic aromatic hydrocarbons (PAHs) isolated from a coal tar sample and dissolved in toluene. NIST-1597a is intended for use in the evaluation and validation of analytical methods for the determination of PAHs. It is suitable for direct analysis (i.e., without sample cleanup or concentration) in the determination of PAHs using analytical techniques such as gas chromatography (GC), liquid chromatography (LC), or gas chromatography/mass spectrometry (GC/MS). This SRM <sup>®</sup> may also be used to evaluate procedures for measurement of mutagenic activity of combustion-related mixtures of PAHs and related compounds. Certified concentrations for selected PAHs in NIST-1597a	3 x 1.3 mL

U-PM-831-1	PAH Mixture 500 µg/mL of each analyte in Acetonitrile/Acetone/Toluene (6:3:1) Acenaphthene      Benzo(b)fluoranthene      Chrysene      Indeno(1,2,3-cd)pyrene Acenaphthylene      Benzo(k)fluoranthene      Dibenzo(a,h)anthracene      Naphthalene Anthracene      Benzo(ghi)perylene      Fluoranthene      Phenanthrene Benzo(a)anthracene      Benzo(a)pyrene      Fluorene      Pyrene	1 mL
U-PM-831	PAH Mixture	4 x 1 mL
U-US-126	PAH Mixture 2000 µg/mL of each analyte in Methylene chloride/Benzene (1:1) Acenaphthene      Benzo(k)fluoranthene      Dibenzo(a,h)anthracene      Phenanthrene Acenaphthylene      Benzo(ghi)perylene      Fluoranthene      Pyrene Anthracene      Benzo(a)pyrene      Fluorene Benzo(a)anthracene      Carbazole      Indeno(1,2,3-cd)pyrene Benzo(b)fluoranthene      Chrysene      Naphthalene	1 mL
CERERS-009	PAH Standard Solution 100 µg/mL of each analyte in Acetonitrile Acenaphthene      Benzo(b)fluoranthene      Chrysene      Indeno(1,2,3-cd)pyrene Acenaphthylene      Benzo(k)fluoranthene      Dibenzo(a,h)anthracene      Naphthalene Anthracene      Benzo(ghi)perylene      Fluoranthene      Phenanthrene Benzo(a)anthracene      Benzo(a)pyrene      Fluorene      Pyrene	1.2 mL

## Standards for the analysis of the mineral oil content

The hydrocarbon contamination of soil and water by the spillage or leakage of petrol, diesel, or lubricants is one of the most common forms of environmental pollution. Standards e.g. EN-ISO 9377-2 or ISO 16703 have been developed for the determination of the mineral oil content in water and soil by gas chromatography.

Code	Product	Unit
DE-RIV 1	Oil standard (ISO 9377-2, ISO 16703) Equal amounts of: - Kuwait Gasoil without volatile compounds - Agip Basis Oil HVI 60 (formerly Shell)	5 mL
BAM-K010	Diesel Fuel/Lubricating Oil (1:1) (ISO 9377-2, ISO 16703, EN 14039) Equal amounts of: - Diesel fuel - Lubricating oil	7 mL
BAM-K008	Diesel oil (ISO 9377-2, ISO 16703, EN 14039) Diesel oil, certified mass fraction of the boiling range C10 - C40 to be used as calibration standard (type A) for the determination of TPH by GC/FID	7 mL
BAM-K009	Lubricating oil (ISO 9377-2, ISO 16703, EN 14039) Lubricating oil, certified mass fraction of the boiling range C10 - C40 to be used as calibration standard (type B) for the determination of TPH by GC/FID and recovery standard for the gravimetric TPH determination.	7 mL
<b>New</b> U-RGO-330-1	ISO 9377 Mineral Oil Mixture Standard Solvent: Hexane Mineral oil (type a) (no additives)..... 5 mg/mL Mineral oil (type b) (no additives)..... 5 mg/mL n-Tetracontane ..... 2 mg/L n-Decane ..... 2 µL/L	1 mL
<b>New</b> U-RGO-330	ISO 9377 Mineral Oil Mixture Standard	4 x 1 mL
<b>New</b> U-RGO-320-1	EN 14039/ISO 16703 Hydrocarbon Standard Solvent: n-Heptane Mineral oil (type a) (no additives)..... 4 g/L Mineral oil (type b) (no additives)..... 4 g/L n-Tetracontane ..... 30 mg/L n-Decane ..... 30 µL/L	1 mL
<b>New</b> U-RGO-320	EN 14039/ISO 16703 Hydrocarbon Standard	4 x 1 mL
NE1315	Oil Standard (RIV 1) in Petroleum ether (40 - 60°C) CERTAN® 10.000 µg/mL of DE-RIV 1 in Petroleum ether DE-RIV 1 consists of equal amounts of: - Kuwait Gasoil without volatile compounds - Agip Basis Oil HVI 60 (formerly Shell)	1.5 mL
NE0875	Oil Standard (RIV 1) in Cyclohexane CERTAN® 10.000 µg/mL of DE-RIV 1 in Cyclohexane DE-RIV 1 consists of equal amounts of: - Kuwait Gasoil without volatile compounds - Agip Basis Oil HVI 60 (formerly Shell)	1.5 mL

U-RGO-692-1	JP-5 Military Fuel 50000 µg/mL in Methylene chloride	1 mL
U-RGO-692	JP-5 Military Fuel 50000 µg/mL in Methylene chloride	4 x 1 mL
U-RGO-722-1	SAE 10W30 Motor Oil 1000 µg/mL in Methylene chloride	1 mL
U-RGO-722	SAE 10W30 Motor Oil 1000 µg/mL in Methylene chloride	4 x 1 mL

## Weathered hydrocarbon fuel standards

Weathered fuel standards are designed to simulate the effects of exposure on hydrocarbon fuel samples. The standards are prepared by evaporation of the low boiling components of the fuel sample until the desired percentage reduction is achieved. Matrix effects have not been simulated.

### Unleaded gasoline standards

Code	Product	Unit
U-RGO-601-1	Unleaded Gasoline (Unweathered) 5000 µg/mL in Methanol	1 mL
U-RGO-601	Unleaded Gasoline (Unweathered) 5000 µg/mL in Methanol	4 x 1 mL
U-RGO-602-1	Unleaded Gasoline (25% Weathered) 5000 µg/mL in Methanol	1 mL
U-RGO-602	Unleaded Gasoline (25% Weathered) 5000 µg/mL in Methanol	4 x 1 mL
U-RGO-603-1	Unleaded Gasoline (50% Weathered) 5000 µg/mL in Methanol	1 mL
U-RGO-603	Unleaded Gasoline (50% Weathered) 5000 µg/mL in Methanol	4 x 1 mL
U-RGO-604-1	Unleaded Gasoline (75% Weathered) 5000 µg/mL in Methanol	1 mL
U-RGO-604	Unleaded Gasoline (75% Weathered) 5000 µg/mL in Methanol	4 x 1 mL
U-RGO-611-1	Diesel Fuel 2 (Unweathered) 5000 µg/mL in Methylene chloride	1 mL
U-RGO-611	Diesel Fuel 2 (Unweathered) 5000 µg/mL in Methylene chloride	4 x 1 mL

## Veterinary medicines and pharmaceuticals

Code	Product	Unit
U-RGO-612-1	Diesel Fuel 2 (25% Weathered) 5000 µg/mL in Methylene chloride	1 mL
U-RGO-612	Diesel Fuel 2 (25% Weathered) 5000 µg/mL in Methylene chloride	4 x 1 mL
U-RGO-613-1	Diesel Fuel 2 (50% Weathered) 5000 µg/mL in Methylene chloride	1 mL
U-RGO-613	Diesel Fuel 2 (50% Weathered) 5000 µg/mL in Methylene chloride	4 x 1 mL
U-RGO-614-1	Diesel Fuel 2 (75% Weathered) 5000 µg/mL in Methylene chloride	1 mL
U-RGO-614	Diesel Fuel 2 (75% Weathered) 5000 µg/mL in Methylene chloride	4 x 1 mL

### Kerosene standards

U-RGO-621-1	Kerosene (Unweathered) 5000 µg/mL in Methylene chloride	1 mL
U-RGO-621	Kerosene (Unweathered) 5000 µg/mL in Methylene chloride	4 x 1 mL
U-RGO-622-1	Kerosene (25% Weathered) 5000 µg/mL in Methylene chloride	1 mL
U-RGO-622	Kerosene (25% Weathered) 5000 µg/mL in Methylene chloride	4 x 1 mL
U-RGO-623-1	Kerosene (50% Weathered) 5000 µg/mL in Methylene chloride	1 mL
U-RGO-623	Kerosene (50% Weathered) 5000 µg/mL in Methylene chloride	4 x 1 mL
U-RGO-624-1	Kerosene (75% weathered) 5000 µg/mL in Methylene chloride	1 mL
U-RGO-624	Kerosene (75% weathered) 5000 µg/mL in Methylene chloride	4 x 1 mL

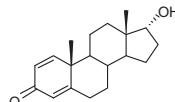

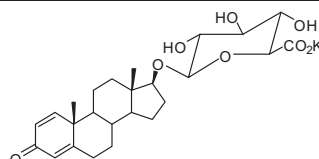

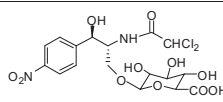

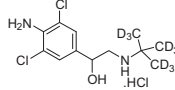

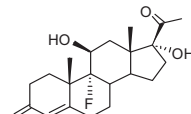

### Mineral sprits standards

U-RGO-701-1	Mineral Spirits (Unweathered) 5000 µg/mL in Methylene chloride	1 mL
U-RGO-701	Mineral Spirits (Unweathered) 5000 µg/mL in Methylene chloride	4 x 1 mL
U-RGO-702-1	Mineral Spirits (25% Weathered) 5000 µg/mL in Methylene chloride	1 mL
U-RGO-702	Mineral Spirits (25% Weathered) 5000 µg/mL in Methylene chloride	4 x 1 mL
U-RGO-703-1	Mineral Spirits (50% Weathered) 5000 µg/mL in Methylene chloride	1 mL
U-RGO-703	Mineral Spirits (50% Weathered) 5000 µg/mL in Methylene chloride	4 x 1 mL
U-RGO-704-1	Mineral Spirits (75% Weathered) 5000 µg/mL in Methylene chloride	1 mL
U-RGO-704	Mineral Spirits (75% Weathered) 5000 µg/mL in Methylene chloride	4 x 1 mL

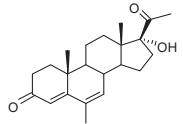

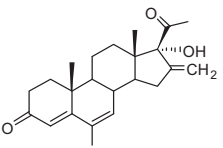

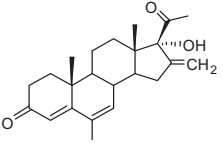

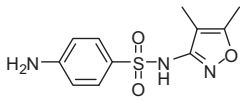

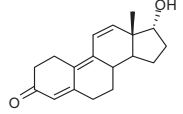

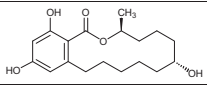

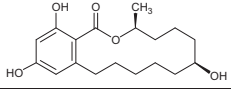

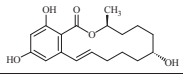

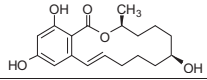

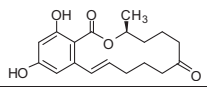

## Veterinary medicines and pharmaceuticals

### NMIA-Reference materials

The certified reference materials produced by the Australian National Measurement Institute are prepared in accordance with their accreditation from NATA to "ISO Guide 34:2000 General requirements for the competence of reference materials producers"

Code	Product	Unit
NMIAD582	17alpha-Boldenone (Epiboldenone) °	1 mg
		
NMIAD862	17-beta-Boldenone glucuronide potassium salt °	1 mg
		
NMIAD714	Chloramphenicol glucuronide °	1 mg
		
NMIAM954	Clenbuterol-D9 HCl	1 mg
		
NMIAD652	Fluorogestone (Flugestone) °	5 mg
		

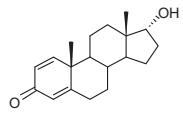

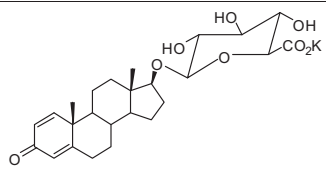

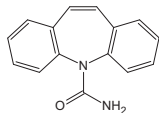

## Veterinary medicines and pharmaceuticals

Code	Product	Unit
NMIAD651	Megesterol °	5 mg
		
NMIAD655	Melengestrol °	5 mg
		
NMIAD632	Melengestrol acetate °	50 mg
NMIAD861	17-beta-Nandrolone glucuronide potassium salt °	1 mg
		
NMIAM890	Sulfatroxazole	50 mg
		
NMIAD708	17alpha-Trenbolone (Epitrenbolone) °	5 mg
		
NMIAP1801	alpha-Zearalanol	5 mg
		
NMIAP1802	beta-Zearalanol	5 mg
		
NMIAP1795	alpha-Zearalenol	5 mg
		
NMIAP1796	beta-Zearalenol	5 mg
		
NMIAP1787	Zearalenone	10 mg

## Volatile analyte mixtures

Code	Product	Unit
U-AMM-812-1	Aromatic Volatiles Mixture 2000 µg/mL of each analyte in Methanol. Benzene                      1,3-Dichlorobenzene                      Toluene                      p-Xylene Chlorobenzene                      1,4-Dichlorobenzene                      o-Xylene 1,2-Dichlorobenzene                      Ethylbenzene                      m-Xylene	1 mL
U-AMM-812	Aromatic Volatiles Mixture	4 x 1 mL
U-NVM-8015-1	Non-Halogenated Volatiles Mixture 100 µg/mL of each analyte in Methanol. Acetonitrile                      Ethyl methacrylate Acrylamide                      Isobutyl alcohol 2-butanone (MEK)                      Methacrylonitrile Diethyl ether                      Methyl methacrylate 1,4-Dioxane                      4-Methyl-2-pentanone (MIBK) Ethyl alcohol (Ethanol)                      Propionitrile	1 mL
U-NVM-8015	Non-Halogenated Volatiles Mixture	4 x 1 mL
U-NVM-8115-1	Method 8015A Non-Halogenated Volatiles Mixture 2000 µg/mL of each analyte in Methanol. Diethyl ether                      2-Butanone (MEK) Ethyl alcohol (Ethanol)                      4-Methyl-2-pentanone (MIBK)	1 mL
U-NVM-8115	Method 8015A Non-Halogenated Volatiles Mixture	4 x 1 mL
U-NVM-8241-1	Non-Halogenated Volatiles Mixture 100 µg/mL of each analyte in Methanol. Acetone                      Carbon disulfide                      2-Hexanone	1 mL
U-NVM-8241	Non-Halogenated Volatiles Mixture	4 x 1 mL
U-NVM-826-1	Volatiles Mixture 2000 µg/mL of each analyte in Water. Acetone                      2-Hexanone 2-Butanone (MEK)                      Isobutyl alcohol n-Butyl alcohol                      Isopropyl alcohol (Isopropanol) tert-Butanol                      Methanol Diethyl ether                      4-Methyl-2-pentanone (MIBK) 1,4-Dioxane                      1-Propanol Ethyl acetate                      2-Pentanone Ethyl alcohol (Ethanol)	1 mL
U-NVM-826	Volatiles Mixture	4 x 1 mL
U-CLP-110-1	Volatiles Calibration Check Compounds Mixture 2000 µg/mL of each analyte in Methanol. Chloroform                      1,2-Dichloropropane                      Toluene 1,1-Dichloroethene                      Ethylbenzene                      Vinyl chloride	1 mL
U-CLP-110	Volatiles Calibration Check Compounds Mixture	4 x 1 mL
U-CLP-120-1	Volatiles System Performance Check Mixture 2000 µg/mL of each analyte in Methanol. Bromoform                      1,1-Dichloroethane Chlorobenzene                      1,1,2,2-Tetrachloroethane Chloromethane	1 mL
U-CLP-120	Volatiles System Performance Check Mixture	4 x 1 mL
U-CLP-100N-1	Volatiles Matrix Spiking Solution 1000 µg/mL of each analyte in Methanol. Benzene                      1,1-Dichloroethene                      Trichloroethene Chlorobenzene                      Toluene	1 mL
U-CLP-100N	Volatiles Matrix Spiking Solution	4 x 1 mL
U-STM-240N-1	Internal Standard Mixture 2000 µg/mL of each analyte in Methanol. 2-Bromo-1-chloropropane                      Fluorobenzene	1 mL
U-STM-240N	Internal Standard Mixture	4 x 1 mL
U-STM-250N-1	Internal Standard Mixture 2000 µg/mL of each analyte in Methanol. 1,2-Dichlorobenzene-D <sub>4</sub> Fluorobenzene	1 mL
U-STM-250N	Internal Standard Mixture	4 x 1 mL
U-STM-260N-1	Surrogate Standard Mixture 1000 µg/mL of each analyte in Methanol. 4-Bromofluorobenzene                      1,2-Dichloroethane-D <sub>4</sub> Toluene-D <sub>8</sub>	1 mL
U-STM-260N	Surrogate Standard Mixture	4 x 1 mL

## Volatile analyte mixtures

Code	Product	Unit
U-STM-320N-1	Internal Standard Mixture 2000 µg/mL of each analyte in Methanol. 4-Bromofluorobenzene 1,2-Dichlorobenzene-D <sub>4</sub>	1 mL Fluorobenzene
U-STM-320N	Internal Standard Mixture	4 x 1 mL
U-STM-330N-1	Surrogate Standard Mixture 2000 µg/mL of each analyte in Methanol. 4-Bromofluorobenzene    Dibromofluoromethane	1 mL Toluene-D <sub>8</sub>
U-STM-330N	Surrogate Standard Mixture	4 x 1 mL
U-STM-341N-1	Internal Standard Mixture 2000 µg/mL of each analyte in Methanol. Chlorobenzene-D <sub>5</sub> 1,4-Dichlorobenzene-D <sub>4</sub>	1 mL 1,4-Difluorobenzene Pentafluorobenzene
U-STM-341N	Internal Standard Mixture	4 x 1 mL
U-STM-520-1	Internal Standard Mixture 2500 µg/mL of each analyte in Methanol. Chlorobenzene-D <sub>5</sub> 1,4-Dichlorobenzene-D <sub>4</sub>	1 mL Fluorobenzene
U-STM-520	Internal Standard Mixture	4 x 1 mL
U-STM-530-1	Surrogate Standard Mixture 2500 µg/mL of each analyte in Methanol 4-Bromofluorobenzene    Dibromofluoromethane	1 mL 1,2-Dichloroethane-D <sub>4</sub> Toluene-D <sub>8</sub>
U-STM-530	Surrogate Standard Mixture	4 x 1 mL

These mixtures are used in US Pharmacopeia Method 467 to determine residual solvents in pharmaceutical preparations. The latest revision (July 2008) uses a risk-based system to classify solvents. Class 1 solvents are known or strongly suspected carcinogens that pose a risk to both the consumer and the environment and are to be avoided. Class 2 solvents are non-genotoxic animal carcinogens or compounds suspected of other significant but reversible toxicities.

### USP 467 residual solvents mixture

These mixtures are used in US Pharmacopeia Method 467 to determine residual solvents in pharmaceutical preparations. The latest revision (July 2008) uses a risk-based system to classify solvents. Class 1 solvents are known or strongly suspected carcinogens that pose a risk to both the consumer and the environment and are to be avoided. Class 2 solvents are non-genotoxic animal carcinogens or compounds suspected of other significant but reversible toxicities.

## Explosives and their degradation products

Two World Wars led to the production of large amounts of explosives. Inadequate storage, careless disposal of production residues, but also accidents, testing procedures and finally the dismantling of production plants caused extensive soil contamination. In a first report in 1987 Preuß and Haas listed 151 production sites in Germany<sup>1</sup> alone. Concern regarding the ecological and human toxicity of explosives and their degradation products are reflected in the growing number of publications on the analysis of these compounds<sup>2-7</sup>, many of which are known or suspected carcinogens<sup>8</sup>. An exact assessment of the hazard on a given site is very complex as a result of the large number of degradation products. The degradation of TNT (2,4,6-Trinitrotoluene) has been described by F.P.M. Karg and G. Kass<sup>9</sup>.

CERERE-012	Method 8330 Calibration Standard Solution B 100 µg/mL of each analyte in Acetonitrile 4-Amino-2,6-dinitrotoluene 3-Nitrotoluene 2,6-Dinitrotoluene 4-Nitrotoluene 2-Nitrotoluene Tetryl	1.2 mL												
CERERE-042	Method 529 Explosives Stock Standard 2000 µg/mL of each analyte in Ethyl acetate 2-Amino-4,6-dinitrotoluene 2-Nitrotoluene 4-Amino-2,6-dinitrotoluene 3-Nitrotoluene 3,5-Dinitroaniline 4-Nitrotoluene 1,3-Dinitrobenzene 1,3,5-Trinitrobenzene 2,4-Dinitrotoluene 2,4,6-Trinitrotoluene (TNT) 2,6-Dinitrotoluene RDX Nitrobenzene Tetryl	1.2 mL												
<b>New</b> NIST-2906	Trace explosives calibration solutions This Standard Reference Material (SRM <sup>®</sup> ) is intended for use in calibrating and evaluating analytical equipment used for the detection of trace explosives, which may include those based on ion mobility spectrometry. NIST-2906 consists of three dilute solutions of hexahydro-1,3,5-trinitro-1,3,5-triazine (RDX), 2,4,6-trinitrotoluene (TNT), and pentaerythritol tetranitrate (PETN) A unit of NIST-2906 consists of four glass ampoules of each of the three explosives containing approximately 1 mL of the solution and four vials of the 2-propanol solvent used to prepare the solutions. In addition, there are four labeled dropper bottles for temporary storage of the solutions once opened. The concentrations of the explosives in NIST 2906 were prepared to approximately satisfy the requirements of ASTM Standard E2520-07 <i>Standard Practice for Verifying Minimum Acceptable Performance of Trace Explosive Detectors</i> . Certified Concentrations for RDX, PETN, and TNT in NIST-2906 <table border="1"> <thead> <tr> <th>Explosive</th> <th>Mass Fraction (µg/g)</th> <th>Mass Concentration (µg/mL)</th> </tr> </thead> <tbody> <tr> <td>RDX</td> <td>0.189 ± 0.005</td> <td>0.148 ± 0.004</td> </tr> <tr> <td>PETN</td> <td>2.15 ± 0.06</td> <td>1.68 ± 0.05</td> </tr> <tr> <td>TNT</td> <td>1.27 ± 0.07</td> <td>0.99 ± 0.05</td> </tr> </tbody> </table> Information values for the mass of RDX, PETN, and TNT dispensed per drop of NIST2906 using the provided dropper bottles	Explosive	Mass Fraction (µg/g)	Mass Concentration (µg/mL)	RDX	0.189 ± 0.005	0.148 ± 0.004	PETN	2.15 ± 0.06	1.68 ± 0.05	TNT	1.27 ± 0.07	0.99 ± 0.05	3 sets
Explosive	Mass Fraction (µg/g)	Mass Concentration (µg/mL)												
RDX	0.189 ± 0.005	0.148 ± 0.004

## Neat reference materials kits

Code	Product	Unit
U-FRCK-013	<b>Chlorophenols Kit</b> Each kit contains 20 mg each of nineteen compounds. 2-Chlorophenol 3-Chlorophenol 4-Chlorophenol 2,3-Dichlorophenol 2,4-Dichlorophenol 2,5-Dichlorophenol 2,6-Dichlorophenol 3,4-Dichlorophenol 3,5-Dichlorophenol 2,3,4-Trichlorophenol	kit 2,3,5-Trichlorophenol 2,3,6-Trichlorophenol 2,4,5-Trichlorophenol 2,4,6-Trichlorophenol 3,4,5-Trichlorophenol 2,3,4,5-Tetrachlorophenol 2,3,4,6-Tetrachlorophenol 2,3,5,6-Tetrachlorophenol Pentachlorophenol
U-FRCS-156	<b>Phthalates Esters Kit</b> Each kit contains 1 g each of eighteen compounds. Dimethyl phthalate Dimethyl isophthalate Diethyl phthalate Dibutyl phthalate Diisobutyl phthalate Diallyl phthalate Dimethoxyethyl phthalate (Bis(2-methoxyethyl)phthalate) Diisohexyl phthalate Dicyclohexyl phthalate	kit Diphenyl phthalate Diphenyl isophthalate Isobutylcyclohexyl phthalate Butylisooctyl phthalate Diisooctyl phthalate Bis(2-ethylhexyl) isophthalate Diisononyl phthalate Diisodecyl phthalate Butyl phthalyl butyl glyconate
<b>New</b> U-FRCK-009	<b>Nitroaromatics and Isophorone Kit</b> Each kit contains 1 x 100 mg of each of four compounds. Isophorone Nitrobenzene	kit 2,4-Dinitrotoluene 2,6-Dinitrotoluene
U-FRCK-010	<b>Nitrosamines Kit</b> Each kit contains 100 mg each of ten compounds. N-Nitrosodimethylamine N-Nitrosodiethylamine N-Nitrosodi-n-propylamine N-Nitrosodi-n-butylamine N-Nitrosodiphenylamine	kit N-Nitrosomorpholine (4-Nitrosomorpholine) N-Nitrosopiperidine (1-Nitrosopiperidine) N-Nitrosopyrrolidine (1-Nitrosopyrrolidine) 4-Nitroso-N,N-diethylaniline N,N-Dimethyl-4-nitrosoaniline
U-FRNH-179	<b>Anilines Kit</b> Each kit contains 100 mg each of eighteen compounds. Aniline 2-Chloroaniline 3-Chloroaniline 4-Chloroaniline 3,4-Dichloroaniline 2,4,5-Trichloroaniline 4-Bromoaniline 2-Nitroaniline 3-Nitroaniline	kit 4-Nitroaniline 2,4-Dinitroaniline 2-Chloro-4-nitroaniline 4-Chloro-2-nitroaniline 2,6-Dichloro-4-nitroaniline 2-Chloro-4,6-dinitroaniline 2,6-Dibromo-4-nitroaniline 2-Bromo-4,6-dinitroaniline 2,6-Dimethylaniline
U-FRCK-015	<b>Halobutanes Kit</b> Each kit contains 100 mg each of fourteen compounds. 1-Chlorobutane 2-Chlorobutane 1,3-Dichlorobutane 1,4-Dichlorobutane 2,2-Dichlorobutane 2,3-Dichlorobutane 1-Bromobutane	kit 2-Bromobutane 1,3-Dibromobutane 1,4-Dibromobutane 1,1,2-Tribromobutane 2,2,3-Tribromobutane 1,2,3,4-Tetrabromobutane 1-Bromo-4-chlorobutane
U-FRCK-005	<b>Halobutenes Kit</b> Each kit contains 100 mg each of eight compounds. 1-Chloro-2-butene 3-Chloro-1-butene 1,2-Dichloro-3-butene (3,4-Dichloro-1-butene) 1,3-Dichloro-2-butene	kit cis-1,4-Dichloro-2-butene Hexachloro-1,3-butadiene 1-Bromo-2-butene 4-Bromo-1-butene

## ULTRAKits®

Kits for **qualitative** measurements. Each Kit contains 2 mL each of twenty different standards in a convenient box. Solid compounds are dissolved in an appropriate solvent. All standards are packaged in screw-capped vials, and are 98+% pure. The ULTRAKits® are supplied without certificates of analysis.

Code	Product	Unit
U-WRK-100	Hydrocarbons ULTRAKit® for <b>qualitative</b> measurements	kit
	n-Hexane ..... 2 mL      Heptene-1 ..... 2 mL n-Heptane ..... 2 mL      Octene-1 ..... 2 mL n-Octane ..... 2 mL      Nonene-1 ..... 2 mL n-Nonane ..... 2 mL      Decene-1 ..... 2 mL n-Decane ..... 2 mL      Undecene-1 ..... 2 mL n-Undecane ..... 2 mL      Dodecene-1 ..... 2 mL n-Dodecane ..... 2 mL      Tetradecene-1 ..... 2 mL n-Tetradecane ..... 2 mL      Hexadecene-1 ..... 2 mL n-Hexadecane ..... 2 mL      Octadecene-1 ..... 2 mL Hexene-1 ..... 2 mL      n-Octadecane (10% w/v in Chloroform) ..... 2 mL	
U-WRK-101	Wax Range Hydrocarbons ULTRAKit® for <b>qualitative</b> measurements (Wax range) Each at 1% w/v in Tetradecane	kit
	Hexadecane ..... 2 mL      Docosane ..... 2 mL      Squalane ..... 2 mL Heptadecane ..... 2 mL      Tricosane ..... 2 mL      Dotriacontane ..... 2 mL Octadecane ..... 2 mL      Tetracosane ..... 2 mL      Tetraatriacontane ..... 2 mL Nonadecane ..... 2 mL      Pentacosane ..... 2 mL      Hexatriacontane ..... 2 mL Pristane ..... 2 mL      Hexacosane ..... 2 mL      Octatriacontane ..... 2 mL Eicosane ..... 2 mL      Octacosane ..... 2 mL      Tetracontane ..... 2 mL Heneicosane ..... 2 mL      Triacontane ..... 2 mL

## Miscellaneous individual analytes

Code	Product	Unit
FL-45921-250MG	2,6-Diaminotoluene OEKANAL®	250 mg
U-DMP-016	Diamyl phthalate	100 mg
U-SV-150-1	Dibenzofuran 100 µg/mL in Methanol	1 mL
U-SV-150	Dibenzofuran 100 µg/mL in Methanol	4 x 1 mL
U-EPA-1100	Dibenzofuran 5000 µg/mL in Methanol	1 mL
FL-45775-250MG	Dibenzofuran OEKANAL®	250 mg
FL-45776-250MG	Dibenzothiophene OEKANAL®	250 mg
U-EPA-1211	Dibromoacetic acid 1000 µg/mL in Methyl tert-butyl ether	1 mL
U-EPA-1212	Dibromoacetonitrile 1000 µg/mL in Methanol	1 mL
U-RBF-002A	1,2-Dibromobenzene	100 mg
U-RBF-002B	1,3-Dibromobenzene	100 mg
U-RBF-002C	1,4-Dibromobenzene	100 mg
FL-35975-1G	1,2-Dibromo-1-chloroethane OEKANAL®	1 g
U-HC-100-1	Dibromochloromethane 100 µg/mL in Methanol	1 mL
U-HC-100	Dibromochloromethane 100 µg/mL in Methanol	4 x 1 mL
U-EPA-1020	Dibromochloromethane 5000 µg/mL in Methanol	1 mL
CHE 08	Dibromochloromethane	1.5 mL
FL-36971-1G	Dibromochloromethane OEKANAL®	1 g
U-HC-340-1	1,2-Dibromo-3-chloropropane (DBCP) 100 µg/mL in Methanol	1 mL
U-HC-340	1,2-Dibromo-3-chloropropane (DBCP) 100 µg/mL in Methanol	4 x 1 mL
U-EPA-1021	1,2-Dibromo-3-chloropropane (DBCP) 5000 µg/mL in Methanol	1 mL
U-HC-350-1	1,2-Dibromoethane 100 µg/mL in Methanol	1 mL
U-HC-350	1,2-Dibromoethane 100 µg/mL in Methanol	4 x 1 mL
U-EPA-1022	1,2-Dibromoethane 5000 µg/mL in Methanol	1 mL
U-RHH-027	1,2-Dibromoethene	1 g
U-STS-350-1	Dibromofluoromethane 2000 µg/mL in Methanol	1 mL
U-STS-350	Dibromofluoromethane 2000 µg/mL in Methanol	4 x 1 mL
U-HC-360-1	Dibromomethane 100 µg/mL in Methanol	1 mL
U-HC-360	Dibromomethane 100 µg/mL in Methanol	4 x 1 mL
U-EPA-1023	Dibromomethane 5000 µg/mL in Methanol	1 mL
U-RHH-004	Dibromomethane	1 g
U-RBF-014	1,4-Dibromonaphthalene	100 mg
U-RBF-013	2,3-Dibromonaphthalene	50 mg
U-RBF-017	1,6-Dibromo-2-naphthol	100 mg
U-IST-140-1	4,4'-Dibromooctafluorobiphenyl 1000 µg/mL in Methylene chloride	1 mL
U-IST-140	4,4'-Dibromooctafluorobiphenyl 1000 µg/mL in Methylene chloride	4 x 1 mL
U-PPS-170-1	4,4'-Dibromooctafluorobiphenyl 100 µg/mL in Methyl tert-butyl ether (MTBE)	1 mL
U-PPS-170	4,4'-Dibromooctafluorobiphenyl 100 µg/mL in Methyl tert-butyl ether (MTBE)	4 x 1 mL
U-PPS-171-1	4,4'-Dibromooctafluorobiphenyl 250 µg/mL in Acetone	1 mL
U-PPS-171	4,4'-Dibromooctafluorobiphenyl 250 µg/mL in Acetone	4 x 1 mL
U-PPS-172-1	4,4'-Dibromooctafluorobiphenyl 5000 µg/mL in Methanol	1 mL
U-RBF-007	2,4-Dibromophenol	100 mg
U-RBF-008	2,6-Dibromophenol	100 mg
U-RHH-050	1,2-Dibromopropane	1 g
U-RHH-051	1,3-Dibromopropane	1 g
U-PS-120-1	Di-n-butyl phthalate 100 µg/mL in Methanol	1 mL
U-PS-120	Di-n-butyl phthalate 100 µg/mL in Methanol	4 x 1 mL
U-EPA-1101	Di-n-butyl phthalate 5000 µg/mL in Methanol	1 mL
U-DMP-015	Di-n-butyl phthalate	100 mg
<b>New</b> IPO 903	Dibutyl phthalate	1 mL
CHE 145	Di-n-butyl phthalate	1 g

## Miscellaneous individual analytes

Code	Product	Unit
U-PPS-172	4,4'-Dibromooctafluorobiphenyl 5000 µg/mL in Methanol	4 x 1 mL
U-EPA-1214	Dichloroacetic acid 1000 µg/mL in Methyl tert-butyl ether	1 mL
U-EPA-1215	Dichloroacetonitrile 1000 µg/mL in Methanol	1 mL
U-RCA-004	2,3-Dichloroaniline	100 mg
U-RCA-005	2,4-Dichloroaniline	100 mg

## ULTRA QuECh<sup>TM</sup> Standards

The QuEChERS method was introduced in 2003 by Anastassiades, Lehotay, et. al. and thereafter codified in two methods: EN 15662 and AOC 2007.1. It is an acronym for Quick, Easy, Cheap, Effective, Rugged and Safe. The four-step process requires homogenization of the food sample, partitioning of the pesticide analytes into an organic phase and final cleanup by a dispersive solid phase extraction. The supernatant is ready to be analyzed by GC/MS or HPLC.

### EN 15662 & Mini-Multiresidue Method

Code	Product	Unit
<b>New</b> U-PPS-490X	QuEChERS PCB 52 Standard, 50 µg/mL in Acetonitrile	5 mL

## Standards for the Italian Environmental Regulation DM 471

DM471 is an Italian environmental regulation used primarily for the detection of organic and inorganic pollutants in soil. DM471 was included in D.L. 152/06, the recognized Italian regulation for environmental analysis of soil, water, emissions, etc. Various labs around the globe that used EPA Method 8270C for the analysis have now switched to DM471.

Code	Product	Unit
U-D471-A-1	Method DM 471 Standard Mixture 1 1000 µg/mL of each analyte in Methanol Benzene Ethylbenzene Styrene tert-Butylmethyl ether (MTBE)	1 mL

U-PPM-471	Method DM 471 Pesticides Standard	4 x 1 mL

## Organotin compounds

As a result of their antibacterial and fungicidal properties organotin compounds have, for many years, been used as preservatives for wood, textiles, leather, and paper, and as a disinfectant in cooling water systems. In agriculture they have been used as acaricides for the treatment of algal infestation in rice and potato rot. The high toxicity of organotin compounds to a wide variety of aquatic organisms including fish, oysters and mussels has led to a ban on such compounds in marine antifouling paints in a growing number of countries. In the environment the more toxic trialkyl tin compounds are broken down by UV light to the di- and monoalkyl tin compounds.

Code	Product	Unit
CRO-TF 03435-3X	Dimethyltin dichloride	3 x 100 mg
DE-MS-03436-0.3	Tripropyltin chloride	300 mg
DE-MS-02122-0.3	Tetrapropyltin	300 mg
DE-MS-03437-0.3	Monobutyltin trichloride	300 mg
DE-MS-03438-0.3	Dibutyltin dichloride	300 mg
DE-MS-03439-0.3	Tributyltin chloride	300 mg
CIL-ULM-8061-1.2	Tributyltin chloride 100 µg/mL in Methylene chloride	1.2 mL

## Standards for the determination of AOX (EN ISO 9562)

Code	Product	Unit
<b>GC/MS system performance</b>		
NIST-1543	GC/MS system performance This Standard Reference Material (SRM <sup>®</sup> ) is intended primarily for use in evaluating the sensitivity of gas chromatography/mass spectrometry (GC/MS) instrumentation. NIST-1543 consists of four solutions; two concentrations of methyl stearate in hexane and two concentrations of benzphenone in hexane.	set (4)
<b>LC test mixtures</b>		
NIST-870	Column performance test mixture for liquid chromatography 5 x 1.1 mL NIST-870 is a mixture of five organic compounds in methanol intended for use in characterising general aspects of liquid chromatographic (LC) column performance, including efficiency, void volume, methylene selectivity, retentiveness, and activity toward chelators and organic bases. Other possible uses include column classification to aid column selection during method development, as a control material for monitoring LC column performance over time, and in quality control for column manufacturing. NIST-870 consists of a mixture of the following five organic compounds in methanol: uracil, toluene, ethylbenzene, quinizarin, and amitriptyline.	set
NIST-877	Chiral selectivity test mixtures for liquid chromatography NIST-877 consists of five solutions of chiral compounds in ethanol designed primarily to indicate enantioselectivity of chiral stationary phases for liquid chromatography and supercritical fluid chromatography. NIST-877 is also suitable for use as a control material for monitoring column performance, comparisons of columns having similar chiral selectors, and (3) use in quality control for column manufacturing. A unit of NIST-877 consists of 5 ampoules, each containing 1.1 mL of a solution of one racemic or enantiomerically enriched (nonracemic) compound. The five compounds are ketoprofen, indapamide, N-carbobenzyloxy-phenylalanine (N-CBZ-phenylalanine), propranolol hydrochloride, and warfarin.	set
NIST-869B	Column selectivity test mixture for liquid chromatography This Standard Reference Material <sup>®</sup> (SRM <sup>®</sup> ) is a mixture of three polycyclic aromatic hydrocarbons (PAHs) in acetonitrile: benzo[a]pyrene (BaP), 1,2:3,4:5,6:7,8-tetrabenzonaphthalene (TBN, dibenzo[g,p]chrysene), and phenanthro[3,4-c]phenanthrene (PhPh). NIST-869b is useful for characterising liquid chromatographic (LC) column selectivity for separation of PAHs. Depending on the elution order of the three components, column selectivity can be predicted for complex PAH mixtures (particularly isomeric PAHs). Even though the primary use of this mixture in the past has been to characterise columns for PAH separations, applications to the assessment of column selectivity for other classes of compounds such as carotene isomers has also been demonstrated. A unit of NIST-869b consists of 5 ampoules, each containing 1.1 mL of the PAH mixture.	set
CERERR-004	HPLC Reverse Phase Test Mix Solvent: Acetonitrile:Water (60:40) Methylbenzoate..... 3210 µg/mL      Phenetole .....5130 µg/mL      o-Xylene ..... 7019 µg/mL 4-Nitroaniline..... 240 µg/mL      Theophylline .....100 µg/mL	1.2 mL
<b>New</b> U-LCS-6762	LC Caffeine Standards Kit Each kit contains five vials 1 x 5 mL of each individual standard in Water Caffeine ..... 5 µg/mL Caffeine .....25 µg/mL Caffeine ..... 125 µg/mL Caffeine .....250 µg/mL Caffeine .....500 µg/mL	5 x 5 mL
<b>New</b> U-LCS-4045	LC Caffeine Standards Kit Each kit contains six vials 1 x 10 mL of each individual standard in Water Caffeine ..... 15 µg/mL Caffeine .....40 µg/mL Caffeine .....60 µg/mL Caffeine .....80 µg/mL Caffeine ..... 100 µg/mL Caffeine ..... 1000 µg/mL	kit
<b>New</b> U-LCS-6917	LC/MS Caffeine Standards Kit Each kit contains five vials 1 x 5 mL of each individual standard in Water Caffeine .....0.5 µg/mL Caffeine ..... 1 µg/mL Caffeine ..... 5 µg/mL Caffeine .....25 µg/mL Caffeine .....50 µg/mL	5 x 5 mL

## Standards for the determination of AOX (EN ISO 9562)

Code	Product	Unit
SL36000	4-Chlorophenol stock solution for the determination of AOX (ISO 9562:2004) 725 mg/L in Water (AOX = 200 mg/L)	100 mL
SL36010	4-Chlorophenol working solution for the determination of AOX (ISO 9562:2004) 3.625 mg/L in Water (AOX = 1 mg/L)	100 mL

## Standards for the determination of EOX and POX (DIN 38414-S 17)

Code	Product	Unit
SL36050	4-Chlorophenol stock solution for DIN 38414-S 17 363 mg/L in n-Heptane (Cl = 100 mg/L)	100 mL
SL36060	4-Chlorophenol working solution for DIN 38414-S 17 36.3 mg/L in n-Heptane (Cl = 10 mg/L)	100 mL
SL36080	Sodium chloride stock solution for DIN 38414-S 17 165 mg/L in Water (Cl = 100 mg/L)	100 mL
SL36090	Sodium chloride standard solution for DIN 38414-S 17 1.65 mg/L in Water (Cl = 1000 µg/L)	100 mL

## Standards for TOC and TIC

Total Organic Carbon (TOC) detection is an important measurement because of the effects it may have on the environment, human health, and manufacturing processes. TOC detection is a highly sensitive, non-specific measurement of all organics present in a sample. Low TOC can confirm the absence of potentially harmful organic chemicals in water used to manufacture pharmaceutical products or to regulate the organic chemical discharge to the environment in a manufacturing plant. Total Inorganic Carbon (TIC) is measured as part of the equation to determine TOC:  $TOC = TC$  (Total Carbon)-TIC.

Code	Product	Unit
U-IQC-111	Total Organic Carbon (TOC) Standard 0.5 mg/L	250 mL
U-IQC-111-5	Total Organic Carbon (TOC) Standard 0.5 mg/L	500 mL
U-IQC-107	Total Organic Carbon (TOC) Standard 1 mg/L	250 mL
U-IQC-107-5	Total Organic Carbon (TOC) Standard 1 mg/L	500 mL
U-IQC-108	Total Organic Carbon (TOC) Standard 10 mg/L	250 mL
U-IQC-108-5	Total Organic Carbon (TOC) Standard 10 mg/L	500 mL
U-IQC-101	Total Organic Carbon (TOC) Standard in Water 25 mg/L	250 mL
U-IQC-101-5	Total Organic Carbon (TOC) Standard in Water 25 mg/L	500 mL
U-IQC-102	Total Organic Carbon (TOC) Standard in Water 50 mg/L	250 mL
U-IQC-102-5	Total Organic Carbon (TOC) Standard in Water 50 mg/L	500 mL
U-IQC-103	Total Organic Carbon (TOC) Standard in Water 100 mg/L	250 mL
U-IQC-103-5	Total Organic Carbon (TOC) Standard in Water 100 mg/L	500 mL
U-IQC-104	Total Organic Carbon (TOC) Standard in Water 250 mg/L	250 mL
U-IQC-104-5	Total Organic Carbon (TOC) Standard in Water 250 mg/L	500 mL
U-IQC-105	Total Organic Carbon (TOC) Standard in Water 500 mg/L	250 mL
U-IQC-105-5	Total Organic Carbon (TOC) Standard in Water 500 mg/L	500 mL
U-IQC-106	Total Organic Carbon (TOC) Standard in Water 1000 mg/L	250 mL
U-IQC-106-5	Total Organic Carbon (TOC) Standard in Water 1000 mg/L	500 mL
U-ICC-033	Total Inorganic Carbon (TIC) Standard in Water 1000 mg/L	250 mL
U-ICC-033-5	Total Inorganic Carbon (TIC) Standard in Water 1000 mg/L	4 x 125mL
U-ICC-033-L	Total Inorganic Carbon (TIC) Standard in Water 1000 mg/L	1000 mL

## Derivatisation reagents

Code	Product	Unit
CERB-023	BSTFA with 1% TMCS	10 x 1 mL
U-RGO-200	MSTFA (N-methyl-N-(trimethylsilyl) trifluoroacetamide)	5 g

Code	Product	Unit
CERM-108	MTBSTFA (with 1% t-BDMCS)	5 x 1 mL
DE-MS-03401-1*	Sodium tetraethylborate	1 g
DE-MS-03401-5*	Sodium tetraethylborate	5 g
DE-MS-03401-25*	Sodium tetraethylborate	25 g
DE-MS-03410-1	Sodium tetra-n-propylborate	1 g
DE-MS-03410-5	Sodium tetra-n-propylborate	5 g

\*Sodium tetraethylborate and Sodium tetra-n-propylborate is not available in all countries. Please contact your local office for more details.

## Standards for Spectroscopy

### Introduction

This comprehensive range of elemental standards has been compiled by selecting complementary materials from two sources, NIST and ULTRA Scientific Inc. Their combined range covers virtually all calibration needs for elemental emission spectroscopy instruments.

It is important to understand that there are fundamental differences between standards prepared for atomic absorption spectroscopy (AAS) and ICP and ICP-MS techniques. This is because of the intrinsic difference in the way measurement is carried out. In AAS the sample is energised by combustion, a specific light source is passed through the flame and elements present in the sample absorb at a specific wavelength. With ICP and ICP-MS the sample is energised to the point where the elements in the sample emit energy at a specific wavelength. Because measurement is dependent on specific emission there is a considerable potential for impurities to interfere with the analyte of interest. The distinction between AAS and ICP standards is the purity of starting materials. Typically material of 99.9 or 99.99% purity is suitable for AAS, but for critical ICP work the standards need to be produced from a starting material that is 99.999% or better. Remember that ICP/ICP-MS standards are perfectly suitable for AAS, but not the reverse.

### NIST Standard Reference Materials® (SRMs®)

NIST Standard Reference Materials® are certified by procedures that conform with the requirements of ISO Guides 30 to 35, and are therefore accepted as primary standards for use in atomic absorption spectroscopy (AAS), optical emission spectroscopy (OES), inductively coupled plasma (ICP), mass [plasma] spectroscopy (MS), ion chromatography or any other analytical technique that requires aqueous solutions of elements for calibration. These SRM® Standards are the most precise and accurate solutions available and are best used as single element solutions.

### ULTRA Scientific certified ICP/AA standards

The ULTRA Scientific range of single and multi-element solutions in this catalogue are of the highest quality. ULTRA Scientific are one of the leading manufacturers in the US and have an ISO 9001 registered quality system verified by their ISO 17025 accredited laboratory. The ICP/AA standards are prepared from starting materials having a purity of 99.999% (where possible), high purity acids and ASTM Type I water (18 megohm). Standards are traceable to NIST Standard Reference Materials® (SRM®) whenever possible. Solution density data are available for single element standards.

### New ULTRAgold® ISO Guide 34 products to meet the needs of accredited laboratories

#### From 100 mL to 125 mL

ULTRA Scientific inorganic standards - 25% extra free!

ULTRA Scientific increased the volume of their inorganic standards from 100 mL to 125 mL for the same price as 100 mL !

#### From 500 mL to 4 x 125 mL

ULTRA has changed the standard unit size from 500 mL to 4 x 125 mL. This convenient standard size allows to work with a freshly opened standard solution and minimizes possible concentration changes and contamination.

## Single element standards for ICP

	Code	Product	Unit
<b>Aluminium - Al</b>			
	NIST-3101a	Al in 10% HNO <sub>3</sub> , 10 mg/g	50 mL
<b>New</b>	U-ICP-413	ULTRAgold® Aluminum (Al) in dilute HNO <sub>3</sub> , 10 µg/mL - ISO Guide 34	125 mL
<b>New</b>	U-ICP-313	ULTRAgold® Aluminum (Al) in dilute HNO <sub>3</sub> , 1000 µg/mL - ISO Guide 34	125 mL
	U-ICP-013	Al in dilute HNO <sub>3</sub> , 1000 µg/mL	125 mL
	U-ICP-013-5	Al in dilute HNO <sub>3</sub> , 1000 µg/mL	4 x 125mL
	U-ICP-013-L	Al in dilute HNO <sub>3</sub> , 1000 µg/mL	1 L
	U-ICP-113	Al in dilute HNO <sub>3</sub> , 10 000 µg/mL	125 mL
	U-ICP-113-5	Al in dilute HNO <sub>3</sub> , 10 000 µg/mL	4 x 125mL
	U-ICP-113-L	Aluminum (Al) in dilute HNO <sub>3</sub> , 10 000 µg/mL	1 L
<b>Antimony - Sb</b>			
	NIST-3102a	Sb in 10% HNO <sub>3</sub> + 2% HF, 10 mg/g	50 mL
<b>New</b>	U-ICP-451	ULTRAgold® Antimony (Sb) in dilute HNO <sub>3</sub> with trace tartaric acid, 10 µg/mL - ISO Guide 34	125 mL
<b>New</b>	U-ICP-351	ULTRAgold® Antimony (Sb) in dilute HNO <sub>3</sub> with trace tartaric acid, 1000 µg/mL - ISO Guide 34	125 mL
	U-ICP-051	Sb in dilute HNO <sub>3</sub> /C <sub>4</sub> H <sub>6</sub> O <sub>6</sub> , 1000 µg/mL	125 mL
	U-ICP-051-5	Sb in dilute HNO <sub>3</sub> /C <sub>4</sub> H <sub>6</sub> O <sub>6</sub> , 1000 µg/mL	4 x 125mL
	U-ICP-051-L	Sb in dilute HNO <sub>3</sub> /C <sub>4</sub> H <sub>6</sub> O <sub>6</sub> , 1000 µg/mL	1 L
	U-ICP-151	Sb in dilute HNO <sub>3</sub> /C <sub>4</sub> H <sub>6</sub> O <sub>6</sub> , 10 000 µg/mL	125 mL
	U-ICP-151-5	Sb in dilute HNO <sub>3</sub> /C <sub>4</sub> H <sub>6</sub> O <sub>6</sub> , 10 000 µg/mL	4 x 125mL
	U-ICP-151-L	Sb in dilute HNO <sub>3</sub> /C <sub>4</sub> H <sub>6</sub> O <sub>6</sub> , 10 000 µg/mL	1 L
<b>Arsenic - As</b>			
	NIST-3103a	As in 15% HNO <sub>3</sub> , 10 mg/g	50 mL
<b>New</b>	U-ICP-433	ULTRAgold® Arsenic (As) in dilute HNO <sub>3</sub> , 10 µg/mL - ISO Guide 34	125 mL
<b>New</b>	U-ICP-333	ULTRAgold® Arsenic (As) in dilute HNO <sub>3</sub> , 1000 µg/mL - ISO Guide 34	125 mL
	U-ICP-033	As in dilute HNO <sub>3</sub> , 1000 µg/mL	125 mL
	U-ICP-033-5	As in dilute HNO <sub>3</sub> , 1000 µg/mL	4 x 125mL
	U-ICP-033-L	As in dilute HNO <sub>3</sub> , 1000 µg/mL	1 L
	U-ICP-133	As in dilute HNO <sub>3</sub> , 10 000 µg/mL	125 mL
	U-ICP-133-5	As in dilute HNO <sub>3</sub> , 10 000 µg/mL	4 x 125mL
	U-ICP-133-L	As in dilute HNO <sub>3</sub> , 10 000 µg/mL	1 L
<b>Barium - Ba</b>			
	NIST-3104a	Ba in 1% HNO <sub>3</sub> , 10 mg/g	50 mL
<b>New</b>	U-ICP-456	ULTRAgold® Barium (Ba) in dilute HNO <sub>3</sub> , 10 µg/mL - ISO Guide 34	125 mL
<b>New</b>	U-ICP-356	ULTRAgold® Barium (Ba) in dilute HNO <sub>3</sub> , 1000 µg/mL - ISO Guide 34	125 mL
	U-ICP-056	Ba in dilute HNO <sub>3</sub> , 1000 µg/mL	125 mL
	U-ICP-056-5	Ba in dilute HNO <sub>3</sub> , 1000 µg/mL	4 x 125mL
	U-ICP-056-L	Ba in dilute HNO <sub>3</sub> , 1000 µg/mL	1 L
	U-ICP-156	Ba in dilute HNO <sub>3</sub> , 10 000 µg/mL	125 mL
	U-ICP-156-5	Ba in dilute HNO <sub>3</sub> , 10 000 µg/mL	4 x 125mL
	U-ICP-156-L	Ba in dilute HNO <sub>3</sub> , 10 000 µg/mL	1 L
<b>Beryllium - Be</b>			
	NIST-3105a	Be in 10% HNO <sub>3</sub> , 10 mg/g	5 x 10 mL
<b>New</b>	U-ICP-404	ULTRAgold® Beryllium (Be) in dilute HNO <sub>3</sub> , 10 µg/mL - ISO Guide 34	125 mL
<b>New</b>	U-ICP-304	ULTRAgold® Beryllium (Br) in dilute HNO <sub>3</sub> , 1000 µg/mL - ISO Guide 34	125 mL
	U-ICP-004	Be in dilute HNO <sub>3</sub> , 1000 µg/mL	125 mL
	U-ICP-004-5	Be in dilute HNO <sub>3</sub> , 1000 µg/mL	4 x 125mL

## Single element standards for ICP

Code	Product	Unit
U-ICP-004-L	Be in dilute HNO <sub>3</sub> , 1000 µg/mL	1 L
U-ICP-104	Be in dilute HNO <sub>3</sub> , 10 000 µg/mL	125 mL
U-ICP-104-5	Be in dilute HNO <sub>3</sub> , 10 000 µg/mL	4 x 125mL
U-ICP-104-L	Be in dilute HNO <sub>3</sub> , 10 000 µg/mL	1 L
<b>Bismuth - Bi</b>		
NIST-3106	Bi in 10% HNO <sub>3</sub> , 10 mg/g	5 x 10 mL
U-ICP-083	Bi in dilute HNO <sub>3</sub> , 1000 µg/mL	125 mL
U-ICP-083-5	Bi in dilute HNO <sub>3</sub> , 1000 µg/mL	4 x 125mL
U-ICP-083-L	Bi in dilute HNO <sub>3</sub> , 1000 µg/mL	1 L
U-ICP-183	Bi in dilute HNO <sub>3</sub> , 10 000 µg/mL	125 mL
<b>Boron - B</b>		
NIST-3107	B in water, 5 mg/g	50 mL
<b>New</b> U-ICP-405	ULTRAgold® Boron (B) in dilute NH <sub>4</sub> NO <sub>3</sub> , 10 µg/mL - ISO Guide 34	125 mL
<b>New</b> U-ICP-305	ULTRAgold® Boron (B) in dilute NH <sub>4</sub> NO <sub>3</sub> , 1000 µg/mL - ISO Guide 34	125 mL
U-ICP-005	B in water with trace NH <sub>4</sub> OH, 1000 µg/mL	125 mL
U-ICP-005-5	B in water with trace NH <sub>4</sub> OH, 1000 µg/mL	4 x 125mL
U-ICP-005-L	B in water with trace NH <sub>4</sub> OH, 1000 µg/mL	1 L
U-ICP-105	B in water with trace NH <sub>4</sub> OH, 10 000 µg/mL	125 mL
U-ICP-105-5	B in water with trace NH <sub>4</sub> OH, 10 000 µg/mL	4 x 125mL
U-ICP-105-L	B in dilute HNO <sub>3</sub> , 10 000 µg/mL	1 L
<b>Cadmium - Cd</b>		
NIST-3108	Cd in 10% HNO <sub>3</sub> , 10 mg/g	50 mL
<b>New</b> U-ICP-448	ULTRAgold® Cadmium (Cd) in dilute HNO <sub>3</sub> , 10 µg/mL - ISO Guide 34	125 mL
<b>New</b> U-ICP-348	ULTRAgold® Cadmium (Cd) in dilute HNO <sub>3</sub> , 1000 µg/mL - ISO Guide 34	125 mL
U-ICP-048	Cd in dilute HNO <sub>3</sub> , 1000 µg/mL	125 mL
U-ICP-048-5	Cd in dilute HNO <sub>3</sub> , 1000 µg/mL	4 x 125mL
U-ICP-048-L	Cd in dilute HNO <sub>3</sub> , 1000 µg/mL	1 L
U-ICP-148	Cd in dilute HNO <sub>3</sub> , 10 000 µg/mL	125 mL
U-ICP-148-5	Cd in dilute HNO <sub>3</sub> , 10 000 µg/mL	4 x 125mL
U-ICP-148-L	Cd in dilute HNO <sub>3</sub> , 10 000 µg/mL	1 L
<b>Caesium - Cs</b>		
NIST-3111a	Cs in 1% HNO <sub>3</sub> , 10 mg/g	50 mL
U-ICP-055	Cs in dilute HNO <sub>3</sub> , 1000 µg/mL	125 mL
U-ICP-055-5	Cs in dilute HNO <sub>3</sub> , 1000 µg/mL	4 x 125mL
U-ICP-055-L	Cs in dilute HNO <sub>3</sub> , 1000 µg/mL	1 L
U-ICP-155	Cs in dilute HNO <sub>3</sub> , 10 000 µg/mL	125 mL
<b>Calcium - Ca</b>		
NIST-3109a	This material is intended for use as a primary calibration standard for the quantitative determination of calcium. A unit consists of five 10 mL sealed borosilicate glass ampoules of an acidified solution prepared gravimetrically to contain a known mass fraction of calcium. The solution contains nitric acid at a volume fraction of approximately 10 %. Certified value.....10.025 ± 0.017 mg/g	5 x 10 mL
<b>New</b> U-ICP-420	ULTRAgold® Calcium (Ca) in dilute HNO <sub>3</sub> , 10 µg/mL - ISO Guide 34	125 mL
<b>New</b> U-ICP-320	ULTRAgold® Calcium (Ca) in dilute HNO <sub>3</sub> , 1000 µg/mL - ISO Guide 34	125 mL
U-ICP-020	Ca in dilute HNO <sub>3</sub> , 1000 µg/mL	125 mL
U-ICP-020-5	Ca in dilute HNO <sub>3</sub> , 1000 µg/mL	4 x 125mL
U-ICP-020-L	Ca in dilute HNO <sub>3</sub> , 1000 µg/mL	1 L
U-ICP-120	Ca in dilute HNO <sub>3</sub> , 10 000 µg/mL	125 mL
U-ICP-120-5	Ca in dilute HNO <sub>3</sub> , 10 000 µg/mL	4 x 125mL
U-ICP-120-L	Ca in dilute HNO <sub>3</sub> , 10 000 µg/mL	1 L

## Single element standards for ICP

	Code	Product	Unit
<b>Cerium - Ce</b>			
	NIST-3110	Ce in 10% HNO <sub>3</sub> , 10 mg/g	5 x 10 mL
	U-ICP-058	Ce in dilute HNO <sub>3</sub> , 1000 µg/mL	125 mL
	U-ICP-058-5	Ce in dilute HNO <sub>3</sub> , 1000 µg/mL	4 x 125mL
	U-ICP-058-L	Ce in dilute HNO <sub>3</sub> , 1000 µg/mL	1 L
	U-ICP-158	Ce in dilute HNO <sub>3</sub> , 10 000 µg/mL	125 mL
<b>Chromium - Cr</b>			
	NIST-3112a	Cr in 10% HNO <sub>3</sub> , 10 mg/g	5 x 10 mL
<b>New</b>	U-ICP-424	ULTRAgold® Chromium (Cr) in dilute HNO <sub>3</sub> , 10 µg/mL - ISO Guide 34	125 mL
<b>New</b>	U-ICP-324	ULTRAgold® Chromium (Cr) in dilute HNO <sub>3</sub> , 1000 µg/mL - ISO Guide 34	125 mL
	U-ICP-024	Cr in dilute HNO <sub>3</sub> , 1000 µg/mL	125 mL
	U-ICP-024-5	Cr in dilute HNO <sub>3</sub> , 1000 µg/mL	4 x 125mL
	U-ICP-024-L	Cr in dilute HNO <sub>3</sub> , 1000 µg/mL	1 L
	U-ICP-124	Cr in dilute HNO <sub>3</sub> , 10 000 µg/mL	125 mL
	U-ICP-124-5	Cr in dilute HNO <sub>3</sub> , 10 000 µg/mL	4 x 125mL
	U-ICP-124-L	Cr in dilute HNO <sub>3</sub> , 10 000 µg/mL	1 L
<b>Chromium (VI) - Cr</b>			
	U-ICP-024A	Chromium (VI) (Cr) in water, 1000 µg/mL	125 mL
<b>New</b>	U-ICP-424A	ULTRAgold® Hexavalent Chromium (VI) (Cr) in water, 10 µg/mL - ISO Guide 34	125 mL
<b>New</b>	U-ICP-324A	ULTRAgold® Hexavalent Chromium (VI) (Cr) in water, 1000 µg/mL - ISO Guide 34	125 mL
	U-ICP-024A-5	Chromium (VI) (Cr) in water, 1000 µg/mL	4 x 125mL
	U-ICP-024A-L	Chromium (VI) (Cr) in water, 1000 µg/mL	1 L
<b>Cobalt - Co</b>			
	NIST-3113	Co in 10% HNO <sub>3</sub> , 10 mg/g	5 x 10 mL
<b>New</b>	U-ICP-427	ULTRAgold® Cobalt (Co) in dilute HNO <sub>3</sub> , 10 µg/mL - ISO Guide 34	125 mL
<b>New</b>	U-ICP-327	ULTRAgold® Cobalt (Co) in dilute HNO <sub>3</sub> , 1000 µg/mL - ISO Guide 34	125 mL
	U-ICP-027	Co in dilute HNO <sub>3</sub> , 1000 µg/mL	125 mL
	U-ICP-027-5	Co in dilute HNO <sub>3</sub> , 1000 µg/mL	4 x 125mL
	U-ICP-027-L	Co in dilute HNO <sub>3</sub> , 1000 µg/mL	1 L
	U-ICP-127	Co in dilute HNO <sub>3</sub> , 10 000 µg/mL	127 mL
	U-ICP-127-5	Co in dilute HNO <sub>3</sub> , 10 000 µg/mL	4 x 125mL
	U-ICP-127-L	Co in dilute HNO <sub>3</sub> , 10 000 µg/mL	1 L
<b>Copper - Cu</b>			
	NIST-3114	Cu in 10% HNO <sub>3</sub> , 10 mg/g	5 x 10 mL
<b>New</b>	U-ICP-429	ULTRAgold® Copper (Cu) in dilute HNO <sub>3</sub> , 10 µg/mL - ISO Guide 34	125 mL
<b>New</b>	U-ICP-329	ULTRAgold® Copper (Cu) in dilute HNO <sub>3</sub> , 1000 µg/mL - ISO Guide 34	125 mL
	U-ICP-029	Cu in dilute HNO <sub>3</sub> , 1000 µg/mL	125 mL
	U-ICP-029-5	Cu in dilute HNO <sub>3</sub> , 1000 µg/mL	4 x 125mL
	U-ICP-029-L	Cu in dilute HNO <sub>3</sub> , 1000 µg/mL	1 L
	U-ICP-129	Cu in dilute HNO <sub>3</sub> , 10 000 µg/mL	125 mL
	U-ICP-129-5	Cu in dilute HNO <sub>3</sub> , 10 000 µg/mL	4 x 125mL
	U-ICP-129-L	Cu in dilute HNO <sub>3</sub> , 10 000 µg/mL	1 L
<b>Dysprosium - Dy</b>			
	NIST-3115a	Dy in 10% HNO <sub>3</sub> , 10 mg/g	5 x 10 mL
	U-ICP-066	Dy in dilute HNO <sub>3</sub> , 1000 µg/mL	125 mL
	U-ICP-066-5	Dy in dilute HNO <sub>3</sub> , 1000 µg/mL	4 x 125mL
	U-ICP-066-L	Dy in dilute HNO <sub>3</sub> , 1000 µg/mL	1 L
	U-ICP-166	Dy in dilute HNO <sub>3</sub> , 10 000 µg/mL	125 mL

## Single element standards for ICP

Code	Product	Unit
<b>Erbium - Er</b>		
NIST-3116a	Er in 10% HNO <sub>3</sub> , 10 mg/g	5 x 10 mL
U-ICP-068	Er in dilute HNO <sub>3</sub> , 1000 µg/mL	125 mL
U-ICP-068-5	Er in dilute HNO <sub>3</sub> , 1000 µg/mL	4 x 125mL
U-ICP-068-L	Er in dilute HNO <sub>3</sub> , 1000 µg/mL	1 L
U-ICP-168	Er in dilute HNO <sub>3</sub> , 10 000 µg/mL	125 mL
<b>Europium - Eu</b>		
NIST-3117a	Eu in 10% HNO <sub>3</sub> , 10 mg/g	5 x 10 mL
U-ICP-063	Eu in dilute HNO <sub>3</sub> , 1000 µg/mL	125 mL
U-ICP-063-5	Eu in dilute HNO <sub>3</sub> , 1000 µg/mL	4 x 125mL
U-ICP-063-L	Eu in dilute HNO <sub>3</sub> , 1000 µg/mL	1 L
U-ICP-163	Eu in dilute HNO <sub>3</sub> , 10 000 µg/mL	125 mL
<b>Gadolinium - Gd</b>		
NIST-3118a	Gd in 10% HNO <sub>3</sub> , 10 mg/g	5 x 10 mL
U-ICP-064	Gd in dilute HNO <sub>3</sub> , 1000 µg/mL	125 mL
U-ICP-064-5	Gd in dilute HNO <sub>3</sub> , 1000 µg/mL	4 x 125mL
U-ICP-064-L	Ga in dilute HNO <sub>3</sub> , 1000 µg/mL	1 L
U-ICP-164	Gd in dilute HNO <sub>3</sub> , 10 000 µg/mL	125 mL
<b>Gallium - Ga</b>		
NIST-3119a	Ga in 10% HNO <sub>3</sub> , 10 mg/g	5 x 10 mL
U-ICP-031	Ga in dilute HNO <sub>3</sub> , 1000 µg/mL	125 mL
U-ICP-031-5	Ga in dilute HNO <sub>3</sub> , 1000 µg/mL	4 x 125mL
U-ICP-031-L	Ga in dilute HNO <sub>3</sub> , 1000 µg/mL	1 L
U-ICP-131	Ga in dilute HNO <sub>3</sub> , 10 000 µg/mL	125 mL
<b>Germanium - Ge</b>		
NIST-3120a	Ge in 10% Oxalic acid, 10 mg/g	50 mL
U-ICP-032	Ge in water with trace HF, 1000 µg/mL	125 mL
U-ICP-032-5	Ge in water with trace HF, 1000 µg/mL	4 x 125mL
U-ICP-032-L	Germanium (Ge) in water with trace HF, 1000 µg/mL	1 L
U-ICP-132	Ge in water with trace HF, 10 000 µg/mL	125 mL
<b>Gold - Au</b>		
NIST-3121	Au in 5% HNO <sub>3</sub> + 2% HF, 10 mg/g	5 x 10 mL
<b>New</b> U-ICP-479	ULTRAgold® Gold (Au) in dilute HCl, 10 µg/mL - ISO Guide 34	125 mL
<b>New</b> U-ICP-379	ULTRAgold® Gold (Au) in dilute HCl, 1000 µg/mL - ISO Guide 34	125 mL
U-ICP-079	Au in dilute HCl, 1000 µg/mL	125 mL
U-ICP-079-5	Au in dilute HCl, 1000 µg/mL	4 x 125mL
U-ICP-079-L	Gold (Au) in dilute HCl, 1000 µg/mL	1 L
U-ICP-179	Au in dilute HCl, 10 000 µg/mL	125 mL
U-ICP-179-5	Au in dilute HCl, 10 000 µg/mL	4 x 125mL
U-ICP-179-L	Au in dilute HCl, 10 000 µg/mL	1 L
<b>Hafnium - Hf</b>		
NIST-3122	Hf in 10% HNO <sub>3</sub> + 2% HF, 10 mg/g	50 mL
U-ICP-072	Hf in dilute HCl, 1000 µg/mL	125 mL
U-ICP-072-5	Hf in dilute HCl, 1000 µg/mL	4 x 125mL
U-ICP-072-L	Hafnium (Hf) in dilute HCl, 1000 µg/mL	1 L
U-ICP-172	Hf in dilute HCl, 10 000 µg/mL	125 mL
<b>Holmium - Ho</b>		
NIST-3123a	Ho in 10% HNO <sub>3</sub> , 10 mg/g	5 x 10 mL

## Single element standards for ICP

Code	Product	Unit
U-ICP-067	Ho in dilute HNO <sub>3</sub> , 1000 µg/mL	125 mL
U-ICP-067-5	Ho in dilute HNO <sub>3</sub> , 1000 µg/mL	4 x 125mL
U-ICP-067-L	Ho in dilute HNO <sub>3</sub> , 1000 µg/mL	1 L
U-ICP-167	Ho in dilute HNO <sub>3</sub> , 10 000 µg/mL	125 mL
<b>Indium - In</b>		
NIST-3124a	In in 10% HNO <sub>3</sub> , 10 mg/g	5 x 10 mL
U-ICP-049	In in dilute HNO <sub>3</sub> , 1000 µg/mL	125 mL
U-ICP-049-5	In in dilute HNO <sub>3</sub> , 1000 µg/mL	4 x 125mL
U-ICP-049-L	In in dilute HNO <sub>3</sub> , 1000 µg/mL	1 L
U-ICP-149	In in dilute HNO <sub>3</sub> , 10 000 µg/mL	125 mL
<b>Iridium - Ir</b>		
U-ICP-077	Ir in dilute HCl, 1000 µg/mL	125 mL
U-ICP-077-5	Ir in dilute HCl, 1000 µg/mL	4 x 125mL
U-ICP-077-L	Iridium (Ir) in dilute HCl, 1000 µg/mL	1 L
U-ICP-177	Ir in dilute HCl, 10 000 µg/mL	125 mL
<b>Iron - Fe</b>		
NIST-3126a	Fe in 10% HNO <sub>3</sub> , 10 mg/g	50 mL
<b>New</b> U-ICP-426	ULTRAgold® Iron (Fe) in dilute HNO <sub>3</sub> , 10 µg/mL - ISO Guide 34	125 mL
<b>New</b> U-ICP-326	ULTRAgold® Iron (Fe) in dilute HNO <sub>3</sub> , 1000 µg/mL - ISO Guide 34	125 mL
U-ICP-026	Fe in dilute HNO <sub>3</sub> , 1000 µg/mL	125 mL
U-ICP-026-5	Fe in dilute HNO <sub>3</sub> , 1000 µg/mL	4 x 125mL
U-ICP-026-L	Fe in dilute HNO <sub>3</sub> , 1000 µg/mL	1 L
U-ICP-126	Fe in dilute HNO <sub>3</sub> , 10 000 µg/mL	125 mL
U-ICP-126-5	Fe in dilute HNO <sub>3</sub> , 10 000 µg/mL	4 x 125mL
U-ICP-126-L	Fe in dilute HNO <sub>3</sub> , 10 000 µg/mL	1 L
<b>Lanthanum - La</b>		
NIST-3127a	La in 10% HNO <sub>3</sub> , 10 mg/g	5 x 10 mL
U-ICP-057	La in dilute HNO <sub>3</sub> , 1000 µg/mL	125 mL
U-ICP-057-5	La in dilute HNO <sub>3</sub> , 1000 µg/mL	4 x 125mL
U-ICP-057-L	La in dilute HNO <sub>3</sub> , 1000 µg/mL	1 L
U-ICP-157	La in dilute HNO <sub>3</sub> , 10 000 µg/mL	125 mL
<b>Lead - Pb</b>		
NIST-3128	Pb in 10% HNO <sub>3</sub> , 10 mg/g	5 x 10 mL
<b>New</b> U-ICP-482	ULTRAgold® Lead (Pb) in dilute HNO <sub>3</sub> , 10 µg/mL - ISO Guide 34	125 mL
<b>New</b> U-ICP-382	ULTRAgold® Lead (Pb) in dilute HNO <sub>3</sub> , 1000 µg/mL - ISO Guide 34	125 mL
U-ICP-082	Pb in dilute HNO <sub>3</sub> , 1000 µg/mL	125 mL
U-ICP-082-5	Pb in dilute HNO <sub>3</sub> , 1000 µg/mL	4 x 125mL
U-ICP-082-L	Pb in dilute HNO <sub>3</sub> , 1000 µg/mL	1 L
U-ICP-182	Pb in dilute HNO <sub>3</sub> , 10 000 µg/mL	125 mL
U-ICP-182-5	Pb in dilute HNO <sub>3</sub> , 10 000 µg/mL	4 x 125mL
U-ICP-182-L	Pb in dilute HNO <sub>3</sub> , 10 000 µg/mL	1 L
<b>Lithium - Li</b>		
NIST-3129a	This material is intended for use as a primary calibration standard for the quantitative determination of lithium. One unit consists of five 10 mL sealed borosilicate glass ampoules of an acidified aqueous solution prepared gravimetrically from high-purity lithium carbonate to contain a known mass fraction of lithium. The solution contains nitric acid at a volume fraction of approximately 1 %.  Certified value: ..... 10.01 ± 0.04 mg/g	5 x 10 mL
<b>New</b> U-ICP-403	ULTRAgold® Lithium (Li) in dilute HNO <sub>3</sub> , 10 µg/mL - ISO Guide 34	125 mL
<b>New</b> U-ICP-303	ULTRAgold® Lithium (Li) in dilute HNO <sub>3</sub> , 1000 µg/mL - ISO Guide 34	125 mL
U-ICP-003	Li in dilute HNO <sub>3</sub> , 1000 µg/mL	125 mL

## Single element standards for ICP

Code	Product	Unit
U-ICP-003-5	Li in dilute HNO <sub>3</sub> , 1000 µg/mL	4 x 125mL
U-ICP-003-L	Li in dilute HNO <sub>3</sub> , 1000 µg/mL	1 L
U-ICP-103	Li in dilute HNO <sub>3</sub> , 10 000 µg/mL	125 mL
U-ICP-103-5	Li in dilute HNO <sub>3</sub> , 10 000 µg/mL	4 x 125mL
U-ICP-103-L	Li in dilute HNO <sub>3</sub> , 10 000 µg/mL	1 L
<b>Lutetium - Lu</b>		
NIST-3130a	Lu in 10% HNO <sub>3</sub> , 10 mg/g	5 x 10 mL
U-ICP-071	Lu in dilute HNO <sub>3</sub> , 1000 µg/mL	125 mL
U-ICP-071-L	Lu in dilute HNO <sub>3</sub> , 1000 µg/mL	1 L
U-ICP-071-5	Lu in dilute HNO <sub>3</sub> , 1000 µg/mL	4 x 125mL
U-ICP-171	Lu in dilute HNO <sub>3</sub> , 10 000 µg/mL	125 mL
<b>Magnesium - Mg</b>		
NIST-3131a	This material is intended for use as a primary calibration standard for the quantitative determination of magnesium. One unit consists of 50 mL of a single element solution in a high density polyethylene bottle sealed in an aluminized bag. The solution is prepared gravimetrically to contain a known mass fraction of magnesium. The solution contains nitric acid at a volume fraction of approximately 10 %.  Certified value:.....9.99 ± 0.02 mg/g	50 mL
<b>New</b> U-ICP-412	ULTRAgold® Magnesium (Mg) in dilute HNO <sub>3</sub> , 10 µg/mL - ISO Guide 34	125 mL
<b>New</b> U-ICP-312	ULTRAgold® Magnesium (Mg) in dilute HNO <sub>3</sub> , 1000 µg/mL - ISO Guide 34	125 mL
U-ICP-012	Mg in dilute HNO <sub>3</sub> , 1000 µg/mL	125 mL
U-ICP-012-5	Mg in dilute HNO <sub>3</sub> , 1000 µg/mL	4 x 125mL
U-ICP-012-L	Mg in dilute HNO <sub>3</sub> , 1000 µg/mL	1 L
U-ICP-112	Mg in dilute HNO <sub>3</sub> , 10 000 µg/mL	125 mL
U-ICP-112-5	Mg in dilute HNO <sub>3</sub> , 10 000 µg/mL	4 x 125mL
U-ICP-112-L	Mg in dilute HNO <sub>3</sub> , 10 000 µg/mL	1 L
<b>Manganese - Mn</b>		
NIST-3132	Mn in 10% HNO <sub>3</sub> , 10 mg/mL	5 x 10 mL
<b>New</b> U-ICP-425	ULTRAgold® Manganese (Mn) in dilute HNO <sub>3</sub> , 10 µg/mL - ISO Guide 34	125 mL
<b>New</b> U-ICP-325	ULTRAgold® Manganese (Mn) in dilute HNO <sub>3</sub> , 1000 µg/mL - ISO Guide 34	125 mL
U-ICP-025	Mn in dilute HNO <sub>3</sub> , 1000 µg/mL	125 mL
U-ICP-025-5	Mn in dilute HNO <sub>3</sub> , 1000 µg/mL	4 x 125mL
U-ICP-025-L	Mn in dilute HNO <sub>3</sub> , 1000 µg/mL	1 L
U-ICP-125	Mn in dilute HNO <sub>3</sub> , 10 000 µg/mL	125 mL
U-ICP-125-5	Mn in dilute HNO <sub>3</sub> , 10 000 µg/mL	4 x 125mL
U-ICP-125-L	Mn in dilute HNO <sub>3</sub> , 10 000 µg/mL	1 L
<b>Mercury - Hg</b>		
NIST-3133	Hg in 10% HNO <sub>3</sub> , 10 mg/g	5 x 10 mL
<b>New</b> U-ICP-480	ULTRAgold® Mercury (Hg) in dilute HNO <sub>3</sub> , 10 µg/mL - ISO Guide 34	125 mL
<b>New</b> U-ICP-380	ULTRAgold® Mercury (Hg) in dilute HNO <sub>3</sub> , 1000 µg/mL - ISO Guide 34	125 mL
<b>New</b> NIST-3177	Hg (II) in 3% HNO <sub>3</sub> and 4% HCL, 0.9981 mg/g ± 0.0044 mg/g	5 x 10 mL
U-ICP-080	Hg in dilute HNO <sub>3</sub> , 1000 µg/mL	125 mL
U-ICP-080-5	Hg in dilute HNO <sub>3</sub> , 1000 µg/mL	4 x 125mL
U-ICP-080-L	Hg in dilute HNO <sub>3</sub> , 1000 µg/mL	1 L
U-ICP-180	Hg in dilute HNO <sub>3</sub> , 10 000 µg/mL	125 mL
U-ICP-180-5	Hg in dilute HNO <sub>3</sub> , 10 000 µg/mL	4 x 125mL
U-ICP-180-L	Hg in dilute HNO <sub>3</sub> , 10 000 µg/mL	1 L
<b>Molybdenum - Mo</b>		
NIST-3134	Mo in 10% HCl, 10 mg/g	5 x 10 mL
<b>New</b> U-ICP-442	ULTRAgold® Molybdenum (Mo) in dilute NH <sub>4</sub> NO <sub>3</sub> , 10 µg/mL - ISO Guide 34	125 mL
<b>New</b> U-ICP-342	ULTRAgold® Molybdenum (Mo) in dilute NH <sub>4</sub> NO <sub>3</sub> , 1000 µg/mL - ISO Guide 34	125 mL

## Single element standards for ICP

Code	Product	Unit
U-ICP-042	Mo in water with trace NH <sub>4</sub> OH, 1000 µg/mL	125 mL
U-ICP-042-5	Mo in water with trace NH <sub>4</sub> OH, 1000 µg/mL	4 x 125mL
U-ICP-042-L	Molybdenum (Mo) in water with trace NH <sub>4</sub> OH, 1000 µg/mL	1 L
U-ICP-142	Mo in water with trace NH <sub>4</sub> OH, 10 000 µg/mL	125 mL
U-ICP-142-5	Mo in water with trace NH <sub>4</sub> OH, 10 000 µg/mL	4 x 125mL
U-ICP-142-L	Mo in water with trace NH <sub>4</sub> OH, 10 000 µg/mL	1 L

### Neodymium - Nd

NIST-3135a	Nd in 10% HNO <sub>3</sub> , 10 mg/g	5 x 10 mL
U-ICP-060	Nd in dilute HNO <sub>3</sub> , 1000 µg/mL	125 mL
U-ICP-060-5	Nd in dilute HNO <sub>3</sub> , 1000 µg/mL	4 x 125mL
U-ICP-060-L	Nd in dilute HNO <sub>3</sub> , 1000 µg/mL	1 L
U-ICP-160	Nd in dilute HNO <sub>3</sub> , 10 000 µg/mL	125 mL

### Nickel - Ni

NIST-3136	Ni in 10% HNO <sub>3</sub> , 10 mg/g	5 x 10 mL
<b>New</b> U-ICP-428	ULTRAgold® Nickel (Ni) in dilute HNO <sub>3</sub> , 10 µg/mL - ISO Guide 34	125 mL
<b>New</b> U-ICP-328	ULTRAgold® Nickel (Ni) in dilute HNO <sub>3</sub> , 1000 µg/mL - ISO Guide 34	125 mL
U-ICP-028	Ni in dilute HNO <sub>3</sub> , 1000 µg/mL	125 mL
U-ICP-028-5	Ni in dilute HNO <sub>3</sub> , 1000 µg/mL	4 x 125mL
U-ICP-028-L	Ni in dilute HNO <sub>3</sub> , 1000 µg/mL	1 L
U-ICP-128	Ni in dilute HNO <sub>3</sub> , 10 000 µg/mL	125 mL
U-ICP-128-5	Ni in dilute HNO <sub>3</sub> , 10 000 µg/mL	4 x 125mL
U-ICP-128-L	Ni in dilute HNO <sub>3</sub> , 10 000 µg/mL	1 L

### Niobium - Nb

NIST-3137	Nb in 5% HNO <sub>3</sub> + 2% HF, 10 mg/g	50 mL
U-ICP-041	Nb in water with trace HF, 1000 µg/mL	125 mL
U-ICP-041-5	Nb in water with trace HF, 1000 µg/mL	4 x 125mL
U-ICP-041-L	Niobium (Nb) in water with trace HF, 1000 µg/mL	1 L
U-ICP-141	Nb in water with trace HF, 10 000 µg/mL	125 mL

### Palladium - Pd

U-ICP-046	Pd in dilute HNO <sub>3</sub> , 1000 µg/mL	125 mL
U-ICP-046-5	Pd in dilute HNO <sub>3</sub> , 1000 µg/mL	4 x 125mL
U-ICP-046-L	Pd in dilute HNO <sub>3</sub> , 1000 µg/mL	1 L
U-ICP-146	Pd in dilute HNO <sub>3</sub> , 10 000 µg/mL	125 mL

### Phosphorus - P

NIST-3139a	P in 0.8% HNO <sub>3</sub> , 10 mg/g	5 x 10 mL
<b>New</b> U-ICP-415	ULTRAgold® Phosphorus (P) in dilute HNO <sub>3</sub> , 10 µg/mL - ISO Guide 34	125 mL
<b>New</b> U-ICP-315	ULTRAgold® Phosphorus (P) in dilute HNO <sub>3</sub> , 1000 µg/mL - ISO Guide 34	125 mL
U-ICP-015	P in dilute HNO <sub>3</sub> , 1000 µg/mL	125 mL
U-ICP-015-5	P in dilute HNO <sub>3</sub> , 1000 µg/mL	4 x 125mL
U-ICP-015-L	P in dilute HNO <sub>3</sub> , 1000 µg/mL	1 L
U-ICP-115	P in dilute HNO <sub>3</sub> , 10 000 µg/mL	125 mL
U-ICP-115-5	P in dilute HNO <sub>3</sub> , 10 000 µg/mL	4 x 125mL
U-ICP-115-L	P in dilute HNO <sub>3</sub> , 10 000 µg/mL	1 L

### Platinum - Pt

NIST-3140	Pt in 10% HCl, 10 mg/g	5 x 10 mL
U-ICP-078	Pt in dilute HCl, 1000 µg/mL	125 mL
U-ICP-078-5	Pt in dilute HCl, 1000 µg/mL	4 x 125mL
U-ICP-078-L	Platinum (Pt) in dilute HCl, 1000 µg/mL	1 L

## Single element standards for ICP

Code	Product	Unit
U-ICP-178	Pt in dilute HCl, 10 000 µg/mL	125 mL
U-ICP-178-5	Pt in dilute HCl, 10 000 µg/mL	4 x 125mL
U-ICP-178-L	Pt in dilute HCl, 10 000 µg/mL	1 L
<b>Potassium - K</b>		
NIST-3141a	This material is intended for use as a primary calibration standard for the quantitative determination of potassium. One unit consists of 50 mL of a single element solution in a high density polyethylene bottle sealed in an aluminized bag. The solution is prepared gravimetrically to contain a known mass fraction of potassium. The solution contains nitric acid at a volume fraction of approximately 1 %.  Certified value:.....10.011 ± 0.029 mg/g	50 mL
<b>New</b> U-ICP-419	ULTRAgold® Potassium (K) in dilute HNO <sub>3</sub> , 10 µg/mL - ISO Guide 34	125 mL
<b>New</b> U-ICP-319	ULTRAgold® Potassium (K) in dilute HNO <sub>3</sub> , 1000 µg/mL - ISO Guide 34	125 mL
U-ICP-019	K in dilute HNO <sub>3</sub> , 1000 µg/mL	125 mL
U-ICP-019-5	K in dilute HNO <sub>3</sub> , 1000 µg/mL	4 x 125mL
U-ICP-019-L	K in dilute HNO <sub>3</sub> , 1000 µg/mL	1 L
U-ICP-119	K in dilute HNO <sub>3</sub> , 10 000 µg/mL	125 mL
U-ICP-119-5	K in dilute HNO <sub>3</sub> , 10 000 µg/mL	4 x 125mL
U-ICP-119-L	K in dilute HNO <sub>3</sub> , 10 000 µg/mL	1 L
<b>Praseodymium - Pr</b>		
NIST-3142a	Pr in 10% HNO <sub>3</sub> , 10 mg/g	5 x 10 mL
U-ICP-059	Pr in dilute HNO <sub>3</sub> , 1000 µg/mL	125 mL
U-ICP-059-5	Pr in dilute HNO <sub>3</sub> , 1000 µg/mL	4 x 125mL
U-ICP-059-L	Pr in dilute HNO <sub>3</sub> , 1000 µg/mL	1 L
U-ICP-159	Pr in dilute HNO <sub>3</sub> , 10 000 µg/mL	125 mL
<b>Rhenium - Re</b>		
NIST-3143	Re in 10% HNO <sub>3</sub> , 10 mg/g	50 mL
U-ICP-075	Re in water, 1000 µg/mL	125 mL
U-ICP-075-5	Re in water, 1000 µg/mL	4 x 125mL
U-ICP-075-L	Rhenium (Re) in water, 1000 µg/mL	1 L
U-ICP-175	Re in water, 10 000 µg/mL	125 mL
<b>Rhodium - Rh</b>		
NIST-3144	Rh in 10% HCl, 10 mg/g	5 x 10 mL
U-ICP-045	Rh in dilute HCl, 1000 µg/mL	125 mL
<b>Rubidium - Rb</b>		
NIST-3145a	Rb in 1% HNO <sub>3</sub> , 10 mg/g	5 x 10 mL
U-ICP-037	Rb in dilute HNO <sub>3</sub> , 1000 µg/mL	125 mL
U-ICP-037-L	Rb in dilute HNO <sub>3</sub> , 1000 µg/mL	1 L
U-ICP-037-5	Rb in dilute HNO <sub>3</sub> , 1000 µg/mL	4 x 125mL
U-ICP-137	Rb in dilute HNO <sub>3</sub> , 10 000 µg/mL	125 mL
<b>Ruthenium - Ru</b>		
U-ICP-044	Ru in dilute HCl, 1000 µg/mL	125 mL
U-ICP-044-5	Ru in dilute HCl, 1000 µg/mL	4 x 125mL
U-ICP-044-L	Ruthenium (Ru) in dilute HCl, 1000 µg/mL	1 L
<b>Samarium - Sm</b>		
NIST-3147a	Sm in 10% HNO <sub>3</sub> , 10 mg/g	5 x 10 mL
U-ICP-062	Sm in dilute HNO <sub>3</sub> , 1000 µg/mL	125 mL
U-ICP-062-5	Sm in dilute HNO <sub>3</sub> , 1000 µg/mL	4 x 125mL
U-ICP-062-L	Sa in dilute HNO <sub>3</sub> , 1000 µg/mL	1 L
U-ICP-162	Sm in dilute HNO <sub>3</sub> , 10 000 µg/mL	125 mL

## Single element standards for ICP

	Code	Product	Unit
<b>Scandium - Sc</b>			
	NIST-3148a	Sc in 10% HNO <sub>3</sub> , 10 mg/g	5 x 10 mL
	U-ICP-021	Sc in dilute HNO <sub>3</sub> , 1000 µg/mL	125 mL
	U-ICP-021-5	Sc in dilute HNO <sub>3</sub> , 1000 µg/mL	4 x 125mL
	U-ICP-021-L	Sc in dilute HNO <sub>3</sub> , 1000 µg/mL	1 L
	U-ICP-121	Sc in dilute HNO <sub>3</sub> , 10 000 µg/mL	125 mL
	U-ICP-121-5	Sc in dilute HNO <sub>3</sub> , 10 000 µg/mL	4 x 125mL
	U-ICP-121-L	Sc in dilute HNO <sub>3</sub> , 10 000 µg/mL	1 L
<b>Selenium - Se</b>			
	NIST-3149	Se in 10% HNO <sub>3</sub> , 10 mg/g	5 x 10 mL
<b>New</b>	U-ICP-434	ULTRAgold® Selenium (Se) in dilute HNO <sub>3</sub> , 10 µg/mL - ISO Guide 34	125 mL
<b>New</b>	U-ICP-334	ULTRAgold® Selenium (Se) in dilute HNO <sub>3</sub> , 1000 µg/mL - ISO Guide 34	125 mL
	U-ICP-034	Se in dilute HNO <sub>3</sub> , 1000 µg/mL	125 mL
	U-ICP-034-5	Se in dilute HNO <sub>3</sub> , 1000 µg/mL	4 x 125mL
	U-ICP-034-L	Se in dilute HNO <sub>3</sub> , 1000 µg/mL	1 L
	U-ICP-134	Se in dilute HNO <sub>3</sub> , 10 000 µg/mL	125 mL
	U-ICP-134-5	Se in dilute HNO <sub>3</sub> , 10 000 µg/mL	4 x 125mL
	U-ICP-134-L	Se in dilute HNO <sub>3</sub> , 10 000 µg/mL	1 L
<b>Silicon - Si</b>			
	NIST-3150	Si in water, 10 mg/g	50 mL
<b>New</b>	U-ICP-414	ULTRAgold® Silicon (Si) in dilute HNO <sub>3</sub> with trace HF, 10 µg/mL - ISO Guide 34	125 mL
<b>New</b>	U-ICP-314	ULTRAgold® Silicon (Si) in dilute HNO <sub>3</sub> with trace HF, 1000 µg/mL - ISO Guide 34	125 mL
	U-ICP-014	Si in dilute HNO <sub>3</sub> , 1000 µg/mL	125 mL
	U-ICP-014-5	Si in dilute HNO <sub>3</sub> , 1000 µg/mL	4 x 125mL
	U-ICP-014-L	Si in dilute HNO <sub>3</sub> , 1000 µg/mL	1 L
	U-ICP-114	Si in dilute HNO <sub>3</sub> , 10 000 µg/mL	125 mL
	U-ICP-114-5	Si in dilute HNO <sub>3</sub> , 10 000 µg/mL	4 x 125mL
	U-ICP-114-L	Si in dilute HNO <sub>3</sub> , 10 000 µg/mL	1 L
<b>Silica - SiO<sub>2</sub></b>			
	U-ICP-014A	SiO <sub>2</sub> in dilute NaOH, 1000 µg/mL	125 mL
	U-ICP-014A-5	SiO <sub>2</sub> in dilute NaOH, 1000 µg/mL	4 x 125mL
	U-ICP-014A-L	SiO <sub>2</sub> in dilute NaOH, 1000 µg/mL	1 L
<b>Silver - Ag</b>			
	NIST-3151	Ag in 10% HNO <sub>3</sub> , 10 mg/g	5 x 10 mL
<b>New</b>	U-ICP-447	ULTRAgold® Silver (Ag) in dilute HNO <sub>3</sub> , 10 µg/mL - ISO Guide 34	125 mL
<b>New</b>	U-ICP-347	ULTRAgold® Silver (Ag) in dilute HNO <sub>3</sub> , 1000 µg/mL - ISO Guide 34	125 mL
	U-ICP-047	Ag in dilute HNO <sub>3</sub> , 1000 µg/mL	125 mL
	U-ICP-047-5	Ag in dilute HNO <sub>3</sub> , 1000 µg/mL	4 x 125mL
	U-ICP-047-L	Ag in dilute HNO <sub>3</sub> , 1000 µg/mL	1 L
	U-ICP-147	Ag in dilute HNO <sub>3</sub> , 10 000 µg/mL	125 mL
	U-ICP-147-5	Ag in dilute HNO <sub>3</sub> , 10 000 µg/mL	4 x 125mL
	U-ICP-147-L	Ag in dilute HNO <sub>3</sub> , 10 000 µg/mL	1 L
<b>Sodium - Na</b>			
	NIST-3152a	This material is intended for use as a primary calibration standard for the quantitative determination of sodium. One unit consists of 50 mL of a single element solution in a high density polyethylene bottle sealed in an aluminized bag. The solution is prepared gravimetrically to contain a known mass fraction of sodium. The solution contains nitric acid at a volume fraction of approximately 1 %.  Certified value..... 9.949 ± 0.020 mg/g	50 mL
<b>New</b>	U-ICP-411	ULTRAgold® Sodium (Na) in dilute HNO <sub>3</sub> , 10 µg/mL - ISO Guide 34	125 mL
<b>New</b>	U-ICP-311	ULTRAgold® Sodium (Na) in dilute HNO <sub>3</sub> , 1000 µg/mL - ISO Guide 34	125 mL

## Single element standards for ICP

	Code	Product	Unit
	U-ICP-011	Na in dilute HNO <sub>3</sub> , 1000 µg/mL	125 mL
	U-ICP-011-5	Na in dilute HNO <sub>3</sub> , 1000 µg/mL	4 x 125mL
	U-ICP-011-L	Na in dilute HNO <sub>3</sub> , 1000 µg/mL	1 L
	U-ICP-111	Na in dilute HNO <sub>3</sub> , 10 000 µg/mL	125 mL
	U-ICP-111-5	Na in dilute HNO <sub>3</sub> , 10 000 µg/mL	4 x 125mL
	U-ICP-111-L	Na in dilute HNO <sub>3</sub> , 10 000 µg/mL	1 L
<b>Strontium - Sr</b>			
	NIST-3153a	Sr in 10% HNO <sub>3</sub> , 10 mg/g	5 x 10 mL
<b>New</b>	U-ICP-438	ULTRAgold® Strontium (Sr) in dilute HNO <sub>3</sub> , 10 µg/mL - ISO Guide 34	125 mL
<b>New</b>	U-ICP-338	ULTRAgold® Strontium (Sr) in dilute HNO <sub>3</sub> , 1000 µg/mL - ISO Guide 34	125 mL
	U-ICP-038	Sr in dilute HNO <sub>3</sub> , 1000 µg/mL	125 mL
	U-ICP-038-5	Sr in dilute HNO <sub>3</sub> , 1000 µg/mL	4 x 125mL
	U-ICP-038-L	Sr in dilute HNO <sub>3</sub> , 1000 µg/mL	1 L
	U-ICP-138	Sr in dilute HNO <sub>3</sub> , 10 000 µg/mL	125 mL
	U-ICP-138-5	Sr in dilute HNO <sub>3</sub> , 10 000 µg/mL	4 x 125mL
	U-ICP-138-L	Sr in dilute HNO <sub>3</sub> , 10 000 µg/mL	1 L
<b>Sulfur - S</b>			
	NIST-3154	S in 0.1% H <sub>2</sub> SO <sub>4</sub> , 10 mg/g	5 x 10 mL
<b>New</b>	U-ICP-316	ULTRAgold® Sulfur (S) in water, 1000 µg/mL - ISO Guide 34	125 mL
<b>New</b>	U-ICP-416	ULTRAgold® Sulfur (S) in water, 10 µg/mL - ISO Guide 34	125 mL
	U-ICP-016	S in water, 1000 µg/mL	125 mL
	U-ICP-016-5	S in water, 1000 µg/mL	4 x 125mL
	U-ICP-016-L	Sulfur (S) in water, 1000 µg/mL	1 L
	U-ICP-116	S in water, 10 000 µg/mL	125 mL
	U-ICP-116-L	S in water, 10 000 µg/mL	1 L
<b>Tantalum - Ta</b>			
	NIST-3155	Ta in 5% HNO <sub>3</sub> + 2% HF, 10 mg/g	50 mL
	U-ICP-073	Ta in water with trace HF, 1000 µg/mL	125 mL
	U-ICP-073-5	Ta in water with trace HF, 1000 µg/mL	4 x 125mL
	U-ICP-073-L	Tantalum (Ta) in water with trace HF, 1000 µg/mL	1 L
	U-ICP-173	Ta in water with trace HF, 10 000 µg/mL	125 mL
<b>Tellurium - Te</b>			
	NIST-3156	Te in 20% HCl, 10 mg/g	5 x 10 mL
	U-ICP-052	Te in dilute HCl, 1000 µg/mL	125 mL
	U-ICP-052-5	Te in dilute HCl, 1000 µg/mL	4 x 125mL
	U-ICP-052-L	Tellurium (Te) in dilute HCl, 1000 µg/mL	1 L
	U-ICP-152	Te in dilute HCl, 10 000 µg/mL	125 mL
<b>Terbium - Tb</b>			
	NIST-3157a	Tb in 16% HNO <sub>3</sub> , 10 mg/g	5 x 10 mL
	U-ICP-065	Tb in dilute HNO <sub>3</sub> , 1000 µg/mL	125 mL
	U-ICP-065-5	Tb in dilute HNO <sub>3</sub> , 1000 µg/mL	4 x 125mL
	U-ICP-065-L	Tb in dilute HNO <sub>3</sub> , 1000 µg/mL	1 L
	U-ICP-165	Tb in dilute HNO <sub>3</sub> , 10 000 µg/mL	125 mL
<b>Thallium - Tl</b>			
	NIST-3158a	Tl in 10% HNO <sub>3</sub> , 10 mg/g	5 x 10 mL
<b>New</b>	U-ICP-481	ULTRAgold® Thallium (Tl) in dilute HNO <sub>3</sub> , 10 µg/mL - ISO Guide 34	125 mL
<b>New</b>	U-ICP-381	ULTRAgold® Thallium (Tl) in dilute HNO <sub>3</sub> , 1000 µg/mL - ISO Guide 34	125 mL
	U-ICP-081	Tl in dilute HNO <sub>3</sub> , 1000 µg/mL	125 mL

## Single element standards for ICP

Code	Product	Unit
U-ICP-081-5	Tl in dilute HNO <sub>3</sub> , 1000 µg/mL	4 x 125mL
U-ICP-081-L	Tl in dilute HNO <sub>3</sub> , 1000 µg/mL	1 L
U-ICP-181	Tl in dilute HNO <sub>3</sub> , 10 000 µg/mL	125 mL
U-ICP-181-5	Tl in dilute HNO <sub>3</sub> , 10 000 µg/mL	4 x 125mL
U-ICP-181-L	Tl in dilute HNO <sub>3</sub> , 10 000 µg/mL	1 L

### Thorium - Th

NIST-3159	Th in 10% HNO <sub>3</sub> , 10 mg/g	50 mL
U-ICP-090	Th in dilute HNO <sub>3</sub> , 1000 µg/mL	125 mL
U-ICP-090-5	Th in dilute HNO <sub>3</sub> , 1000 µg/mL	4 x 125mL
U-ICP-090-L	Th in dilute HNO <sub>3</sub> , 1000 µg/mL	1 L
U-ICP-190	Th in dilute HNO <sub>3</sub> , 10 000 µg/mL	125 mL

### Thulium - Tm

NIST-3160a	Tm in 10% HNO <sub>3</sub> , 10 mg/g	5 x 10 mL
U-ICP-069	Tm in dilute HNO <sub>3</sub> , 1000 µg/mL	125 mL
U-ICP-069-5	Tm in dilute HNO <sub>3</sub> , 1000 µg/mL	4 x 125mL
U-ICP-069-L	Tm in dilute HNO <sub>3</sub> , 1000 µg/mL	1 L
U-ICP-169	Tm in dilute HNO <sub>3</sub> , 10 000 µg/mL	125 mL

### Tin - Sn

NIST-3161a	Sn in 5% HNO <sub>3</sub> + 2% HF, 10 mg/g	50 mL
<b>New</b> U-ICP-450	ULTRAgold® Tin (Sn) in dilute HNO <sub>3</sub> with trace HF, 10 µg/mL - ISO Guide 34	125 mL
<b>New</b> U-ICP-350	ULTRAgold® Tin (Sn) in dilute HNO <sub>3</sub> with trace HF, 1000 µg/mL - ISO Guide 34	125 mL
U-ICP-050	Sn in dilute HNO <sub>3</sub> , 1000 µg/mL	125 mL
U-ICP-050-5	Sn in dilute HNO <sub>3</sub> , 1000 µg/mL	4 x 125mL
U-ICP-050-L	Sn in dilute HNO <sub>3</sub> , 1000 µg/mL	1 L
U-ICP-150	Sn in dilute HNO <sub>3</sub> , 10 000 µg/mL	125 mL
U-ICP-150-5	Sn in dilute HNO <sub>3</sub> , 10 000 µg/mL	4 x 125mL
U-ICP-150-L	Sn in dilute HNO <sub>3</sub> , 10 000 µg/mL	1 L

### Titanium - Ti

NIST-3162a	Ti in 10% HNO <sub>3</sub> + 2% HF, 10 mg/g	50 mL
<b>New</b> U-ICP-422	ULTRAgold® Titanium (Ti) in dilute HNO <sub>3</sub> with trace HF, 10 µg/mL - ISO Guide 34	125 mL
<b>New</b> U-ICP-322	ULTRAgold® Titanium (Ti) in dilute HNO <sub>3</sub> with trace HF, 1000 µg/mL - ISO Guide 34	125 mL
U-ICP-022	Ti in dilute HNO <sub>3</sub> , 1000 µg/mL	125 mL
U-ICP-022-5	Ti in dilute HNO <sub>3</sub> , 1000 µg/mL	4 x 125mL
U-ICP-022-L	Ti in dilute HNO <sub>3</sub> , 1000 µg/mL	1 L
U-ICP-122	Ti in dilute HNO <sub>3</sub> , 10 000 µg/mL	125 mL
U-ICP-122-5	Ti in dilute HNO <sub>3</sub> , 10 000 µg/mL	4 x 125mL
U-ICP-122-L	Ti in dilute HNO <sub>3</sub> , 10 000 µg/mL	1 L

### Tungsten - W

NIST-3163	W in 7% HNO <sub>3</sub> + 4% HF, 10 mg/g	50 mL
U-ICP-074	W in water with trace NH <sub>4</sub> OH, 1000 µg/mL	125 mL
U-ICP-074-5	W in water with trace NH <sub>4</sub> OH, 1000 µg/mL	4 x 125mL
U-ICP-074-L	W in water with trace NH <sub>4</sub> OH, 1000 µg/mL	1 L
U-ICP-174	W in water with trace NH <sub>4</sub> OH, 10 000 µg/mL	125 mL

### Uranium - U

NIST-3164	U in 10% HNO <sub>3</sub> , 10 mg/g	5 x 10 mL
U-ICP-092	U in dilute HNO <sub>3</sub> , 1000 µg/mL	125 mL
U-ICP-092-5	U in dilute HNO <sub>3</sub> , 1000 µg/mL	4 x 125mL
U-ICP-092-L	U in dilute HNO <sub>3</sub> , 1000 µg/mL	1 L

## Single element standards for ICP

Code	Product	Unit
U-ICP-192	U in dilute HNO <sub>3</sub> , 10 000 µg/mL	125 mL
<b>Vanadium - V</b>		
NIST-3165	V in 10% HNO <sub>3</sub> , 10 mg/g	5 x 10 mL
<b>New</b> U-ICP-423	ULTRAGold® Vanadium (V) in dilute HNO <sub>3</sub> with trace HF, 10 µg/mL - ISO Guide 34	125 mL
<b>New</b> U-ICP-323	ULTRAGold® Vanadium (V) in dilute HNO <sub>3</sub> with trace HF, 1000 µg/mL - ISO Guide 34	125 mL
U-ICP-023	V in dilute HNO <sub>3</sub> , 1000 µg/mL	125 mL
U-ICP-023-5	V in dilute HNO <sub>3</sub> , 1000 µg/mL	4 x 125mL
U-ICP-023-L	V in dilute HNO <sub>3</sub> , 1000 µg/mL	1 L
U-ICP-123	V in dilute HNO <sub>3</sub> , 10 000 µg/mL	125 mL
U-ICP-123-5	V in dilute HNO <sub>3</sub> , 10 000 µg/mL	4 x 125mL
U-ICP-123-L	V in dilute HNO <sub>3</sub> , 10 000 µg/mL	1 L
<b>Ytterbium - Yb</b>		
NIST-3166a	Yb in 16% HNO <sub>3</sub> , 10 mg/g	5 x 10 mL
U-ICP-070	Yb in dilute HNO <sub>3</sub> , 1000 µg/mL	125 mL
U-ICP-070-5	Yb in dilute HNO <sub>3</sub> , 1000 µg/mL	4 x 125mL
U-ICP-070-L	Yb in dilute HNO <sub>3</sub> , 1000 µg/mL	1 L
U-ICP-170	Yb in dilute HNO <sub>3</sub> , 10 000 µg/mL	125 mL
<b>Yttrium - Y</b>		
NIST-3167a	Y in 10% HNO <sub>3</sub> , 10 mg/g	5 x 10 mL
U-ICP-039	Y in dilute HNO <sub>3</sub> , 1000 µg/mL	125 mL
U-ICP-039-5	Y in dilute HNO <sub>3</sub> , 1000 µg/mL	4 x 125mL
U-ICP-039-L	Y in dilute HNO <sub>3</sub> , 1000 µg/mL	1 L
U-ICP-139	Y in dilute HNO <sub>3</sub> , 10 000 µg/mL	125 mL
<b>Zinc - Zn</b>		
NIST-3168a	Zn in 10% HCl, 10 mg/g	50 mL
<b>New</b> U-ICP-430	ULTRAGold® Zinc (Zn) in dilute HNO <sub>3</sub> , 10 µg/mL - ISO Guide 34	125 mL
<b>New</b> U-ICP-330	ULTRAGold® Zinc (Zn) in dilute HNO <sub>3</sub> , 1000 µg/mL - ISO Guide 34	125 mL
U-ICP-030	Zn in dilute HNO <sub>3</sub> , 1000 µg/mL	125 mL
U-ICP-030-5	Zn in dilute HNO <sub>3</sub> , 1000 µg/mL	4 x 125mL
U-ICP-030-L	Zn in dilute HNO <sub>3</sub> , 1000 µg/mL	1 L
U-ICP-130	Zn in dilute HNO <sub>3</sub> , 10 000 µg/mL	125 mL
U-ICP-130-5	Zn in dilute HNO <sub>3</sub> , 10 000 µg/mL	4 x 125mL
U-ICP-130-L	Zn in dilute HNO <sub>3</sub> , 10 000 µg/mL	1 L
<b>Zirconium - Zr</b>		
NIST-3169	Zr in 10% HNO <sub>3</sub> + 2% HF, 10 mg/g	50 mL
U-ICP-040	Zr in dilute HNO <sub>3</sub> , 1000 µg/mL	125 mL
U-ICP-040-5	Zr in dilute HNO <sub>3</sub> , 1000 µg/mL	4 x 125mL
U-ICP-040-L	Zr in dilute HNO <sub>3</sub> , 1000 µg/mL	1 L
U-ICP-140	Zr in dilute HNO <sub>3</sub> , 10 000 µg/mL	125 mL

## ULTRA Scientific's EnviroConcentrate™ kits for ICP

Kit

- 20 mL of analyte solution at 10000 µg/mL
- yields 2 x 100 mL 1000 ppm standards
- 500 ml of ASTM Type I water
- 125 mL pre-cleaned LDPE bottle for storage
- starting material 99.999 % pure, where available
- Traceable to NIST Standard, wherever possible

Code	Product	Unit
<b>Aluminum - Al</b>		
U-ECK-013	Al in dilute HNO <sub>3</sub> , 10000 µg/mL	kit
<b>Antimony - Sb</b>		
U-ECK-051	Sb in dilute HNO <sub>3</sub> , 10000 µg/mL	kit
<b>Arsenic - As</b>		
U-ECK-033	As in dilute HNO <sub>3</sub> , 10000 µg/mL	kit
<b>Barium - Ba</b>		
U-ECK-056	Ba in dilute HNO <sub>3</sub> , 10000 µg/mL	kit
<b>Beryllium - Be</b>		
U-ECK-004	Be in dilute HNO <sub>3</sub> , 10000 µg/mL	kit
<b>Boron - B</b>		
U-ECK-005	B in water with trace NH <sub>4</sub> OH, 10000 µg/mL	kit
<b>Cadmium - Cd</b>		
U-ECK-048	Cd in dilute HNO <sub>3</sub> , 10000 µg/mL	kit
<b>Calcium - Ca</b>		
U-ECK-020	Ca in dilute HNO <sub>3</sub> , 10000 µg/mL	kit
<b>Chromium - Cr</b>		
U-ECK-024	Cr in dilute HNO <sub>3</sub> , 10000 µg/mL	kit
<b>Cobalt - Co</b>		
U-ECK-027	Co in dilute HNO <sub>3</sub> , 10000 µg/mL	kit
<b>Copper - Cu</b>		
U-ECK-029	Cu in dilute HNO <sub>3</sub> , 10000 µg/mL	kit
<b>Iron - Fe</b>		
U-ECK-026	Fe in dilute HNO <sub>3</sub> , 10000 µg/mL	kit
<b>Lead - Pb</b>		
U-ECK-082	Pb in dilute HNO <sub>3</sub> , 10000 µg/mL	kit
<b>Lithium - Li</b>		
U-ECK-003	Li in dilute HNO <sub>3</sub> , 10000 µg/mL	kit
<b>Magnesium - Mg</b>		
U-ECK-012	Mg in dilute HNO <sub>3</sub> , 10000 µg/mL	kit
<b>Manganese - Mn</b>		
U-ECK-025	Mn in dilute HNO <sub>3</sub> , 10000 µg/mL	kit
<b>Mercury - Hg</b>		
U-ECK-080	Hg in dilute HNO <sub>3</sub> , 10000 µg/mL	kit
<b>Molybdenum - Mo</b>		
U-ECK-042	Mo in water with trace NH <sub>4</sub> OH, 10000 µg/mL	kit

## ULTRAGrade® single element standards for atomic absorption spectroscopy

Code	Product	Unit
<b>Nickel - Ni</b>		
U-ECK-028	Ni in dilute HNO <sub>3</sub> , 10000 µg/mL	kit
<b>Phosphorus - P</b>		
U-ECK-015	P in dilute HNO <sub>3</sub> , 10000 µg/mL	kit
<b>Potassium - K</b>		
U-ECK-019	K in dilute HNO <sub>3</sub> , 10000 µg/mL	kit
<b>Selenium - Se</b>		
U-ECK-034	Se in dilute HNO <sub>3</sub> , 10000 µg/mL	kit
<b>Silicon - Si</b>		
U-ECK-014	Si in dilute HNO <sub>3</sub> with trace HF, 10000 µg/mL	kit
<b>Silver - Ag</b>		
U-ECK-047	Ag in dilute HNO <sub>3</sub> , 10000 µg/mL	kit
<b>Sodium - Na</b>		
U-ECK-011	Na in dilute HNO <sub>3</sub> , 10000 µg/mL	kit
<b>Strontium - Sr</b>		
U-ECK-038	Sr in dilute HNO <sub>3</sub> , 10000 µg/mL	kit
<b>Thallium - Tl</b>		
U-ECK-081	Tl in dilute HNO <sub>3</sub> , 10000 µg/mL	kit
<b>Tin - Sn</b>		
U-ECK-050	Sn in dilute HNO <sub>3</sub> with trace HF, 10000 µg/mL	kit
<b>Titanium - Ti</b>		
U-ECK-022	Ti in water with trace HF, 10000 µg/mL	kit
<b>Vanadium - V</b>		
U-ECK-023	V in dilute HNO <sub>3</sub> , 10000 µg/mL	kit
<b>Zinc - Zn</b>		
U-ECK-030	Zn in dilute HNO <sub>3</sub> , 10000 µg/mL	kit

## ULTRAGrade® single element standards for atomic absorption spectroscopy

### ULTRAGrade® Quality

- Manufactured and tested under ULTRA's ISO 9001 and ISO 17025 quality systems
- Starting materials 99.99% pure, wherever possible
- Traceable to NIST SRMs, wherever possible

Confirmed against an independent second-source standard

Code	Product	Unit
<b>Aluminium - Al</b>		
U-IAA-213	Al in dilute HNO <sub>3</sub> , 1000 µg/mL	125 mL
<b>Antimony - Sb</b>		
U-IAA-251	Sb in dilute HNO <sub>3</sub> , 1000 µg/mL	125 mL
<b>Arsenic - As</b>		
U-IAA-233	As in dilute HNO <sub>3</sub> , 1000 µg/mL	125 mL
<b>Barium - Ba</b>		
U-IAA-256	Ba in dilute HNO <sub>3</sub> , 1000 µg/mL	125 mL

## ULTRAGrade® single element standards for atomic absorption spectroscopy

Code	Product	Unit
<b>Beryllium - Be</b>		
U-IAA-204	Be in dilute HNO <sub>3</sub> , 1000 µg/mL	125 mL

U-IAA-258	Ce in dilute HNO <sub>3</sub> , 1000 µg/mL	125 mL
<b>Chromium - Cr</b>		
U-IAA-224	Cr in dilute HNO <sub>3</sub> , 1000 µg/mL	125 mL
<b>Cobalt - Co</b>		
U-IAA-227	Co in dilute HNO <sub>3</sub> , 1000 µg/mL	125 mL
<b>Copper - Cu</b>		
U-IAA-229	Cu in dilute HNO <sub>3</sub> , 1000 µg/mL	125 mL
<b>Dysprosium - Dy</b>		
U-IAA-266	Dy in dilute HNO <sub>3</sub> , 1000 µg/mL	125 mL
<b>Erbium - Er</b>		
U-IAA-268	Er in dilute HNO <sub>3</sub> , 1000 µg/mL	125 mL
<b>Europium - Eu</b>		
U-IAA-263	Eu in dilute HNO <sub>3</sub> , 1000 µg/mL	125 mL
<b>Gadolinium - Gd</b>		
U-IAA-264	Gd in dilute HNO <sub>3</sub> , 1000 µg/mL	125 mL
<b>Gallium - Ga</b>		
U-IAA-231	Ga in dilute HNO <sub>3</sub> , 1000 µg/mL	125 mL
<b>Germanium - Ge</b>		
U-IAA-232	Germanium (Ge) in water with trace HF, 1000 µg/mL	125 mL
<b>Gold - Au</b>		
U-IAA-279	Au in dilute HCl, 1000 µg/mL	125 mL
<b>Hafnium - Hf</b>		
U-IAA-272	Hf in dilute HCl, 1000 µg/mL	125 mL
<b>Holmium - Ho</b>		
U-IAA-267	Ho in dilute HNO <sub>3</sub> , 1000 µg/mL	125 mL
<b>Indium - In</b>		
U-IAA-249	In in dilute HNO <sub>3</sub> , 1000 µg/mL	125 mL
<b>Iridium - Ir</b>		
U-IAA-277	Ir in dilute HCl, 1000 µg/mL	125 mL

**ULTRAGrade® single element standards for atomic absorption spectroscopy**

Code	Product	Unit
<b>Iron - Fe</b>		
U-IAA-226	Fe in dilute HNO <sub>3</sub> , 1000 µg/mL	125 mL
<b>Lanthanum - La</b>		
U-IAA-257	La in dilute HNO <sub>3</sub> , 1000 µg/mL	125 mL
<b>Lead - Pb</b>		
U-IAA-282	Pb in dilute HNO <sub>3</sub> , 1000 µg/mL	125 mL
<b>Lithium - Li</b>		
U-IAA-203	Li in dilute HNO <sub>3</sub> , 1000 µg/mL	125 mL
<b>Lutetium - Lu</b>		
U-IAA-271	Lu in dilute HNO <sub>3</sub> , 1000 µg/mL	125 mL
<b>Magnesium - Mg</b>		
U-IAA-212	Mg in dilute HNO <sub>3</sub> , 1000 µg/mL	125 mL
<b>Manganese - Mn</b>		
U-IAA-225	Mn in dilute HNO <sub>3</sub> , 1000 µg/mL	125 mL
<b>Mercury - Hg</b>		
U-IAA-280	Hg in dilute HNO <sub>3</sub> , 1000 µg/mL	125 mL
<b>Molybdenum - Mo</b>		
U-IAA-242	Mo in water with trace NH <sub>4</sub> OH, 1000 µg/mL	125 mL
<b>Neodymium - Nd</b>		
U-IAA-260	Nd in dilute HNO <sub>3</sub> , 1000 µg/mL	125 mL
<b>Nickel - Ni</b>		
U-IAA-228	Ni in dilute HNO <sub>3</sub> , 1000 µg/mL	125 mL
<b>Niobium - Nb</b>		
U-IAA-241	Nb in water with trace HF, 1000 µg/mL	125 mL
<b>Palladium - Pd</b>		
U-IAA-246	Pd in dilute HNO <sub>3</sub> , 1000 µg/mL	125 mL
<b>Phosphorus - P</b>		
U-IAA-215	P in dilute HNO <sub>3</sub> , 1000 µg/mL	125 mL
<b>Platinum - Pt</b>		
U-IAA-278	Pt in dilute HCl, 1000 µg/mL	125 mL
<b>Potassium - K</b>		
U-IAA-219	K in dilute HNO <sub>3</sub> , 1000 µg/mL	125 mL
<b>Praseodymium - Pr</b>		
U-IAA-259	Pr in dilute HNO <sub>3</sub> , 1000 µg/mL	125 mL
<b>Rhenium - Re</b>		
U-IAA-275	Re in water, 1000 µg/mL	125 mL
<b>Rhodium - Rh</b>		
U-IAA-245	Rh in dilute HCl, 1000 µg/mL	125 mL
<b>Rubidium - Rb</b>		
U-IAA-237	Rb in dilute HNO <sub>3</sub> , 1000 µg/mL	125 mL
<b>Ruthenium - Ru</b>		
U-IAA-244	Ru in dilute HCl, 1000 µg/mL	125 mL

## ULTRAGrade® single element standards for atomic absorption spectroscopy

Code	Product	Unit
<b>Samarium - Sm</b>		
U-IAA-262	Sm in dilute HNO <sub>3</sub> , 1000 µg/mL	125 mL
<b>Scandium - Sc</b>		
U-IAA-221	Sc in dilute HNO <sub>3</sub> , 1000 µg/mL	125 mL
<b>Selenium - Se</b>		
U-IAA-234	Se in dilute HNO <sub>3</sub> , 1000 µg/mL	125 mL
<b>Silicon - Si</b>		
U-IAA-214	Si in dilute HNO <sub>3</sub> with trace HF, 1000 µg/mL	125 mL
<b>Silver - Ag</b>		
U-IAA-247	Ag in dilute HNO <sub>3</sub> , 1000 µg/mL	125 mL
<b>Sodium - Na</b>		
U-IAA-211	Na in dilute HNO <sub>3</sub> , 1000 µg/mL	125 mL
<b>Strontium - Sr</b>		
U-IAA-238	Sr in dilute HNO <sub>3</sub> , 1000 µg/mL	125 mL
<b>Sulfur - S</b>		
U-IAA-216	Sulfur (S) in water, 1000 µg/mL	125 mL
<b>Tantalum - Ta</b>		
U-IAA-273	Ta in water with trace HF, 1000 µg/mL	125 mL
<b>Tellurium - Te</b>		
U-IAA-252	Te in dilute HCl 1000 µg/mL	125 mL
<b>Terbium - Tb</b>		
U-IAA-265	Tb in dilute HNO <sub>3</sub> , 1000 µg/mL	125 mL
<b>Thallium - Tl</b>		
U-IAA-281	Tl in dilute HNO <sub>3</sub> , 1000 µg/mL	125 mL
<b>Thorium - Th</b>		
U-IAA-290	Th in dilute HNO <sub>3</sub> , 1000 µg/mL	125 mL
<b>Thulium - Tm</b>		
U-IAA-269	Tm in dilute HNO <sub>3</sub> , 1000 µg/mL	125 mL
<b>Tin - Sn</b>		
U-IAA-250	Sn in dilute HNO <sub>3</sub> , 1000 µg/mL	125 mL
<b>Titanium - Ti</b>		
U-IAA-222	Ti in dilute HNO <sub>3</sub> , 1000 µg/mL	125 mL
<b>Tungsten - W</b>		
U-IAA-274	W in water with trace NH <sub>4</sub> (OH), 1000 µg/mL	125 mL
<b>Uranium - U</b>		
U-IAA-292	U in dilute HNO <sub>3</sub> , 1000 µg/mL	125 mL
<b>Vanadium - V</b>		
U-IAA-223	V in dilute HNO <sub>3</sub> , 1000 µg/mL	125 mL
<b>Ytterbium - Yb</b>		
U-IAA-270	Yb in dilute HNO <sub>3</sub> , 1000 µg/mL	125 mL
<b>Yttrium - Y</b>		
U-IAA-239	Y in dilute HNO <sub>3</sub> , 1000 µg/mL	125 mL

## ULTRA Scientific's EnviroConcentrates™ for atomic absorption spectroscopy

Code	Product	Unit
<b>Zinc - Zn</b>		
U-IAA-230	Zn in dilute HNO <sub>3</sub> , 1000 µg/mL	125 mL
<b>Zirconium - Zr</b>		
U-IAA-240	Zr in dilute HNO <sub>3</sub> , 1000 µg/mL	125 mL

## ULTRA Scientific's EnviroConcentrates™ for atomic absorption spectroscopy

ULTRA Scientific's AA EnviroConcentrates consist of a 10 mL bottle of the selected element at a concentration of 10000 µg/mL. Simply pipette the required amount of EnviroConcentrate and dilute to volume. Standards are traceable to NIST Standard Reference Materials® whenever possible.

Code	Product	Unit
<b>Aluminium - Al</b>		
U-IAA-013	Al in dilute HNO <sub>3</sub> , 10000 µg/mL	10 mL
<b>Antimony - Sb</b>		
U-IAA-051	Sb in dilute HNO <sub>3</sub> , 10000 µg/mL	10 mL
<b>Arsenic - As</b>		
U-IAA-033	As in dilute HNO <sub>3</sub> , 10000 µg/mL	10 mL
<b>Barium - Ba</b>		
U-IAA-056	Ba in dilute HNO <sub>3</sub> , 10000 µg/mL	10 mL
<b>Beryllium - Be</b>		
U-IAA-004	Be in dilute HNO <sub>3</sub> , 10000 µg/mL	10 mL
<b>Bismuth - Bi</b>		
U-IAA-083	Bi in dilute HNO <sub>3</sub> , 10000 µg/mL	10 mL
<b>Boron - B</b>		
U-IAA-005	B in water with trace NH <sub>4</sub> OH, 10000 µg/mL	10 mL
<b>Cadmium - Cd</b>		
U-IAA-048	Cd in dilute HNO <sub>3</sub> , 10000 µg/mL	10 mL
<b>Caesium - Cs</b>		
U-IAA-055	Cs in dilute HNO <sub>3</sub> , 10000 µg/mL	10 mL
<b>Calcium - Ca</b>		
U-IAA-020	Ca in dilute HNO <sub>3</sub> , 10000 µg/mL	10 mL
<b>Cerium - Ce</b>		
U-IAA-058	Ce in dilute HNO <sub>3</sub> , 10000 µg/mL	10 mL
<b>Chromium - Cr</b>		
U-IAA-024	Cr in dilute HNO <sub>3</sub> , 10000 µg/mL	10 mL
<b>Cobalt - Co</b>		
U-IAA-027	Co in dilute HNO <sub>3</sub> , 10000 µg/mL	10 mL
<b>Copper - Cu</b>		
U-IAA-029	Cu in dilute HNO <sub>3</sub> , 10000 µg/mL	10 mL
<b>Dysprosium - Dy</b>		
U-IAA-066	Dy in dilute HNO <sub>3</sub> , 10000 µg/mL	10 mL
<b>Erbium - Er</b>		
U-IAA-068	Er in dilute HNO <sub>3</sub> , 10000 µg/mL	10 mL

## ULTRA Scientific's EnviroConcentrates™ for atomic absorption spectroscopy

Code	Product	Unit
<b>Europium - Eu</b>		
U-IAA-063	Eu in dilute HNO <sub>3</sub> , 10000 µg/mL	10 mL
<b>Gadolinium - Gd</b>		
U-IAA-064	Gd in dilute HNO <sub>3</sub> , 10000 µg/mL	10 mL
<b>Gallium - Ga</b>		
U-IAA-031	Ga in dilute HNO <sub>3</sub> , 10000 µg/mL	10 mL
<b>Germanium - Ge</b>		
U-IAA-032	Ge in water with trace HF, 10000 µg/mL	10 mL
<b>Holmium - Ho</b>		
U-IAA-067	Ho in dilute HNO <sub>3</sub> , 10000 µg/mL	10 mL

**ICP, graphite furnace AA & ion chromatography standards**

<b>New</b> U-ICM-110-5	ICP Wavelength Calibration Standard (V) 26 Analytes in 5% HNO <sub>3</sub> with trace HF Al (Aluminum) ..... 20 µg/mL      Fe (Iron).....2 µg/mL      Pb (Lead) ..... 20 µg/mL As (Arsenic) ..... 20 µg/mL      Hg (Mercury) .....5 µg/mL      Sc (Scandium) ..... 1 µg/mL B (Boron) ..... 2 µg/mL      K (Potassium).....100 µg/mL      Se (Selenium) ..... 20 µg/mL Ba (Barium) ..... 2 µg/mL      Li (Lithium) .....2 µg/mL      Sr (Strontium) ..... 1 µg/mL Be (Beryllium) ..... 1 µg/mL      Mg (Magnesium) ..... 1 µg/mL      Te (Tellurium) ..... 20 µg/mL Ca (Calcium) ..... 10 µg/mL      Mn (Manganese) .....1 µg/mL      Ti (Titanium) ..... 2 µg/mL Cd (Cadmium) ..... 2 µg/mL      Na (Sodium) .....20 µg/mL      Y (Yttrium) ..... 1 µg/mL Cr (Chromium) ..... 2 µg/mL      Ni (Nickel).....5 µg/mL      Zn (Zinc) ..... 2 µg/mL Cu (Copper) ..... 2 µg/mL      P (Phosphorus) ..... 10 µg/mL	500 mL
------------------------	--	--------

<b>New</b> U-ICM-120-5	ICP Tuning Standard (XXIV) 15 Analytes in 1% HNO <sub>3</sub> Al (Aluminum) ..... 50 µg/mL      Cr (Chromium) .....50 µg/mL      Ni (Nickel) ..... 50 µg/mL As (Arsenic) ..... 50 µg/mL      Cu (Copper) .....50 µg/mL      Pb (Lead) .....50 µg/mL Ba (Barium) ..... 50 µg/mL      K (Potassium).....500 µg/mL      Se (Selenium) ..... 50 µg/mL Cd (Cadmium) ..... 50 µg/mL      Mn (Manganese) .....50 µg/mL      Sr (Strontium) ..... 50 µg/mL Co (Cobalt) ..... 50 µg/mL      Mo (Molybdenum) .....50 µg/mL      Zn (Zinc) ..... 50 µg/mL	500 mL
------------------------	--	--------

<b>New</b> U-ICM-111-5	ICP Wavelength Calibration Standard (XIV) 11 Analytes in 2% HCl with trace HNO <sub>3</sub> As (Arsenic) ..... 20 µg/mL      Mn (Manganese) .....20 µg/mL      P (Phosphorus) ..... 100 µg/mL K (Potassium) ..... 100 µg/mL      Mo (Molybdenum) .....20 µg/mL      S (Sulfur) ..... 100 µg/mL La (Lanthanum) ..... 20 µg/mL      Na (Sodium) .....20 µg/mL      Sc (Scandium) ..... 20 µg/mL Li (Lithium) ..... 20 µg/mL      Ni (Nickel) .....20 µg/mL	500 mL
------------------------	---	--------

<b>New</b> U-ICC-330	IC Cations Mixture (VII) 9 Analytes in 0.2% HNO <sub>3</sub> NH <sub>4</sub> <sup>+</sup> (Ammonium) ... 100 µg/mL      K <sup>+</sup> (Potassium) .....100 µg/mL      Mn (Manganese) ..... 100 µg/mL Ba <sup>+2</sup> (Barium) ..... 100 µg/mL      Li <sup>+</sup> (Lithium) .....100 µg/mL      Na <sup>+</sup> (Sodium) ..... 100 µg/mL Ca <sup>+2</sup> (Calcium) ..... 100 µg/mL      Mg <sup>+2</sup> (Magnesium) .....100 µg/mL      Sr <sup>+2</sup> (Strontium) ..... 100 µg/mL	125 mL
----------------------	---	--------

<b>New</b> U-ICM-150	Graphite Furnace AA Calibration Standard (XVIII) 16 Analytes in 5% HNO <sub>3</sub> with trace tartaric Ag (Silver) ..... 10 µg/mL      Co (Cobalt) .....50 µg/mL      Pb (Lead) ..... 100 µg/mL Al (Aluminum) ..... 100 µg/mL      Cr (Chromium) .....20 µg/mL      Sb (Antimony) ..... 100 µg/mL As (Arsenic) ..... 100 µg/mL      Cu (Copper) .....50 µg/mL      Se (Selenium) ..... 100 µg/mL Ba (Barium) ..... 50 µg/mL      Fe (Iron) .....20 µg/mL      Tl (Thallium) ..... 100 µg/mL Be (Beryllium) ..... 5 µg/mL      Mn (Manganese) .....20 µg/mL Cd (Cadmium) ..... 5 µg/mL      Ni (Nickel) .....50 µg/mL	125 mL
----------------------	--	--------

**ICP-MS Standards**

U-IMS-102	ICP-MS Calibration Standard (XXI) 29 Analytes in 5% HNO <sub>3</sub> Ag (Silver) ..... 10 µg/mL      Cs (Cesium) .....10 µg/mL      Ni (Nickel) ..... 10 µg/mL Al (Aluminum) ..... 10 µg/mL      Cu (Copper) .....10 µg/mL      Pb (Lead) ..... 10 µg/mL As (Arsenic) ..... 10 µg/mL      Fe (Iron) .....10 µg/mL      Rb (Rubidium) ..... 10 µg/mL Ba (Barium) ..... 10 µg/mL      Ga (Gallium) .....10 µg/mL      Se (Selenium) ..... 10 µg/mL Be (Beryllium) ..... 10 µg/mL      In (Indium) .....10 µg/mL      Sr (Strontium) ..... 10 µg/mL Bi (Bismuth) ..... 10 µg/mL      K (Potassium) .....10 µg/mL      Tl (Thallium) ..... 10 µg/mL Ca (Calcium) ..... 10 µg/mL      Li (Lithium) .....10 µg/mL      U (Uranium) ..... 10 µg/mL Cd (Cadmium) ..... 10 µg/mL      Mg (Magnesium) .....10 µg/mL      V (Vanadium) ..... 10 µg/mL Co (Cobalt) ..... 10 µg/mL      Mn (Manganese) .....10 µg/mL      Zn (Zinc) ..... 10 µg/mL Cr (Chromium) ..... 10 µg/mL      Na (Sodium) .....10 µg/mL	125 mL
-----------	--	--------

<b>New</b> U-IMS-121	Mercury ICP-MS Standard (XXI) in 5% HNO <sub>3</sub> Hg (Mercury) ..... 10 µg/mL	125 mL
----------------------	--	--------

## ULTRAgade® multi-element standards

Code	Product	Unit
<b>New</b> U-IMS-120	ICP-MS Calibration Standard (VI) 30 Analytes in 5% HNO <sub>3</sub> with trace HF Ag (Silver) ..... 10 µg/mL      Cr (Chromium) ..... 10 µg/mL      Ni (Nickel) ..... 10 µg/mL Al (Aluminum) ..... 10 µg/mL      Cu (Copper) ..... 10 µg/mL      Pb (Lead) ..... 10 µg/mL As (Arsenic) ..... 100 µg/mL      Fe (Iron) ..... 100 µg/mL      Rb (Rubidium) ..... 10 µg/mL B (Boron) ..... 100 µg/mL      Ga (Gallium) ..... 10 µg/mL      Se (Selenium) ..... 100 µg/mL Ba (Barium) ..... 10 µg/mL      K (Potassium) ..... 10 µg/mL      Sr (Strontium) ..... 10 µg/mL Be (Beryllium) ..... 100 µg/mL      Li (Lithium) ..... 10 µg/mL      Te (Tellurium) ..... 10 µg/mL Bi (Bismuth) ..... 10 µg/mL      Mg (Magnesium) ..... 10 µg/mL      Tl (Thallium) ..... 10 µg/mL Ca (Calcium) ..... 1000 µg/mL      Mn (Manganese) ..... 10 µg/mL      U (Uranium) ..... 10 µg/mL Cd (Cadmium) ..... 10 µg/mL      Mo (Molybdenum) ..... 10 µg/mL      V (Vanadium) ..... 10 µg/mL Co (Cobalt) ..... 10 µg/mL      Na (Sodium) ..... 10 µg/mL      Zn (Zinc) ..... 100 µg/mL	125 mL
<b>New</b> U-IMS-130-5	ICP-MS Mass Calibration Standard (XXIII) 15 Analytes in 5% HNO <sub>3</sub> with trace HCl B (Boron) ..... 1 ng/mL      In (Indium) ..... 1 ng/mL      Rh (Rhodium) ..... 1 ng/mL Ba (Barium) ..... 1 ng/mL      K (Potassium) ..... 1 ng/mL      Sc (Scandium) ..... 1 ng/mL Co (Cobalt) ..... 1 ng/mL      Li (Lithium) ..... 1 ng/mL      Tl (Thallium) ..... 1 ng/mL Fe (Iron) ..... 1 ng/mL      Lu (Lutetium) ..... 1 ng/mL      U (Uranium) ..... 1 ng/mL Ga (Gallium) ..... 1 ng/mL      Na (Sodium) ..... 1 ng/mL      Y (Yttrium) ..... 1 ng/mL	500 mL
<b>New</b> U-IMS-133-L	ICP-MS Plasma Setup Solution (XX) 11 Analytes in 1% HNO <sub>3</sub> with trace HF Ba (Barium) ..... 10 ng/mL      Ge (Germanium) ..... 10 ng/mL      Sc (Scandium) ..... 10 ng/mL Cd (Cadmium) ..... 10 ng/mL      Mg (Magnesium) ..... 10 ng/mL      Tb (Terbium) ..... 10 ng/mL Ce (Cerium) ..... 10 ng/mL      Pb (Lead) ..... 10 ng/mL      Tl (Thallium) ..... 10 ng/mL Cu (Copper) ..... 10 ng/mL      Rh (Rhodium) ..... 10 ng/mL	1 L
<b>New</b> U-IMS-131	ICP-MS Optimization Standard (XXII) 5 Analytes in 2% HNO <sub>3</sub> with trace HCl Cd (Cadmium) ..... 200 ng/mL      Mg (Magnesium) ..... 200 ng/mL      Rh (Rhodium) ..... 200 ng/mL Cu (Copper) ..... 200 ng/mL      Pb (Lead) ..... 200 ng/mL	125 mL
<b>New</b> U-IMS-132	ICP-MS Detection Limit Standard (XIX) 5 Analytes in 1% HNO <sub>3</sub> Be (Beryllium) ..... 10 ng/mL      In (Indium) ..... 10 ng/mL      U (Uranium) ..... 10 ng/mL Co (Cobalt) ..... 10 ng/mL      Tl (Thallium) ..... 10 ng/mL	125 mL
U-IMS-101	ICP/MS Calibration Standard 1 17 Analytes 10 µg/ml of each analyte in 5% HNO <sub>3</sub> Cerium      Holmium      Samarium      Ytterbium Dysprosium      Lanthanum      Scandium      Yttrium Erbium      Lutetium      Terbium Europium      Neodymium      Thorium Gadolinium      Praseodymium      Thulium	125 mL
U-IMS-103	ICP/MS Calibration Standard 3 10 Analytes, 10 µg/mL of each analyte 10% HCl Antimony      Iridium      Rhodium      Tin Gold      Palladium      Ruthenium Hafnium      Platinum      Tellurium	125 mL
U-IMS-104	ICP/MS Calibration Standard 4 12 Analytes, 10 µg/mL of each analyte in water Boron      Niobium      Silicon      Titanium Germanium      Phosphorus      Sulfur      Tungsten Molybdenum      Rhenium      Tantalum      Zirconium	125 mL
U-IMS-105	ICP/MS Calibration Standard 5 Mercury ..... 10 µg/mL in 5% HNO <sub>3</sub>	125 mL
U-IMS-110	ICP/MS Tuning Solution 5 Analytes, 10 µg/mL of each analyte 2% HNO <sub>3</sub> Beryllium      Indium      Magnesium Cobalt      Lead	125 mL
U-IMS-111	ICP/MS Internal Standard Bismuth ..... 100 µg/mL in 2% HNO <sub>3</sub>	125 mL
